THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MOST IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETING FOR THE WEEK ENDING NOVEMBER 22, 1940

Mosquito Control Department

When the resignation by Major S. E. Tee of membership of the Mosquito Control Working Special Committee came up on Wednesday's ordinary meeting of the Corporation, Major Tee said that three meetings of the Committee had been called and on each occasion he was the only member present. In the circumstances he did not see any use in continuing to be a member.

On the request of the Mayor, Major Tee withdrew his resignation.

The Mayors' Conference

The House sanctioned Rs. 1,060 for incidental expenses in connection with the Second Session of the All-India and Burma Mayors' Conference at Madras, which was attended by the Mayor and the Secretary.

The sum was appropriated from the Closing Balance.

Work After Nightfall

The Corporation meeting considered a letter from the Government of Bengal regarding arrangements for carrying on work after nightfall in Government and other important offices, hospitals and other important institutions during an emergency period.

The communication says:—

"In the first place it should be stated that the threatened area covers *the whole of Calcutta and the industrial areas of* 24-*Parganas, Howrah and Hooghly.* Under the present arrangements when air raids are considered possible a declaration will be made that a state of emergency exists. Such a declaration would require prior consultation with the military authorities and is not likely to be made unless some untoward event happens. Under the instructions to be imposed during such an emergency period all external lights would be extinguished (with certain exceptions which need not be considered now) and all internal lights would be so arranged that no lights would be visible from outside. The action consequent on the declaration of an emergency period might have to continue for weeks or even months though after some time, if it were found that such

strict precautions were unnecessary, a certain amount of relaxation would be allowed.

"It is thus evident that during an emergency period it would be impossible for work to be carried on in Government offices after nightfall unless some prior arrangements had been made for preventing the office lights from being seen from outside.

"One of the main difficulties that would face Government during an emergency period would be the handling of traffic after nightfall. In order to relieve the pressure on the roads, it is proposed that offices should as far as possible be closed before it became necessary to work by artificial light. If this proposal is given effect to it would go far to solve the traffic problem as well as the office lighting problem.

"It is suggested that very few Government offices have to do work of such immediate urgency as to necessitate work by artificial light through the whole of the emergency period."

On the proposal of Mr. M. A. H. Ispahani, it was decided to accept the suggestions in the Government letter, and the Chief Executive Officer was directed to make the necessary arrangements.

Supply Of Steel Joists

The Corporation discussed a motion by Mr. M. M. Burman that a representation be made to the Government of Bengal to arrange for the supply of steel joists and rods from Tata's to the city of Calcutta as the shortage of stock has led "to soaring prices" leading to stoppage of building work in Calcutta with consequential unemployment all round.

Mr. Burman said that if the construction of new building was stopped, the Corporation would lose approximately Rs. 2,50,000 yearly. Already the price of steel joists and rods had gone up 300 per cent.

The Mayor inquired whether the Government were bound to help unless it was for war measures? Mr. Naresh Nath Mookerjee said that Government were making very large demands on Tata's. Mr. W. A. Burns remarked that there were two distinct questions; first, supply to the Corporation for its own particular demand, and second, supply to the city at large.

Mr. G. S. G. Vernon pointed out that the purchase of steel was made at present on priority certificates from the Government and these were only granted for war work.

The motion was not seconded and fell through.

MR. A. K. M. ZAKARIAH

Offer of Charitable Dispensary at Salar

Kandi, Nov. 17.

Mr. A. K. M. Zakariah, *ex*-Mayor of Calcutta Corporation, has, it is understood, made a proposal to the Government and the District Board of Murshidabad to establish a charitable dispensary in his village home at Salar, in the District of Murshidabad, in memory of his deceased mother, Musammat Zahara Bibi.

The dispensary will be known as the Zahara Charitable Dispensary, Salar.

Unfiltered Water

Before the Corporation meeting on Wednesday last had proceeded with the business on the agenda, several Councillors drew the attention of the Mayor, Mr. A. R. Siddiqi to the shortage of unfiltered water in their respective Wards.

The Mayor said that as far as possible unfiltered water was being supplied, but sometimes the pressure was not high owing first, to wastage, and secondly, to the opening of water cocks. Further, new mains were being opened. He would, however, convey their complaints to the Chief Executive Officer.

Menial Staff's Grade

The Corporation rejected a motion moved by Mr. Suresh Chandra Varma and tabled, along with him, by Councillors, B. B. Ganguli, A. S. Nasker, M. M. Burman and D. N. Ghose, suggesting that in modification of the Corporation resolutions to the contrary the grade of the menial staff of the Corporation should be enhanced from Rs. 14—1—20 to Rs. 15—1—21, the usual grain allowance being consolidated with the pay.

Road Watering Men

In view of the assurance given from the Chair that the executive would take necessary action in the matter, Mr. Madan Mohan Burman withdrew his resolution which ought to direct the Chief Executive Officer to appoint forthwith those men who worked as road watering men and who usually started work on the 15th September every year as the absence of these men and stoppage of road watering has led to stench and smell in streets.

Entally Workshops

A Special Committee of thirteen Councillors to enquire into the working of the Entally Workshops and to investigate as to why a large number of the Workshop employees have not been reinstated was formed by the Calcutta Corporation at its meeting on Wednesday afternoon.

The Committee are to submit their recommendation by the 10th December next.

Mr. Naresh Nath Mookerjee moved a resolution recommending the formation of a Committee to enquire why a large number of employees of the Entally Workshops and other Departments in the Corporation had not been reinstated and make suggestions as to the steps to be taken to redress their grievances.

Mr. Mookerjee emphasised that some of the dismissed workmen had been in the Corporation employ for 20 or 25 years and it was but meet and proper that they should be reinstated.

Mr. N. C. Chatterjee held that it was for the Corporation to show that they did not want to victimise these people. He had received complaints that there had been discrimination amongst employees who had not responded to the notice of the Chief Executive Officer for resumption of work. The speaker did not know why some among them had been taken in and some had not been, and at least two hundred people had been refused admission into the Workshops. Mr. Chatterjee could not believe that all these two hundred men took a leading part in the strike, but, in reality, they had been led by a handful of men. All of them, therefore, should not be wrongly victimised.

Mr. M. A. H. Ispahani moved an amendment suggesting the appointment of a Special Committee of 13 members to enquire as to why a large number of the employees had not been reinstated and submit their report by the 10th December next.

Opposing Mr. W. A. Burns pointed out the necessity to enquire as to whether there was sufficient work for all these people. The financial position of the Corporation did not warrant the admission of those men if there was not enough work for them.

Mr. G. S. G. Vernon moved an amendment that the Corporation call for a departmental report on the working of the Entally Workshops and also why certain workmen had not been re-appointed. If, he said, the Corporation were able to do with 250 men work formally done by 400 men it was in the interest of the city that 150 men should lose their jobs, however sorry they might be for them.

Before putting the matter to vote, the Mayor (Mr. Abdur Rahaman Siddiqi) reminded the House that in connection with the last strike action was taken by the executive on the combined recommendation of the various groups in the House. He did not say that the executive was infallible but he hoped that nothing should be done by the House to torpedo the policy laid down by it at the time of the last strike. It was not for him to tell the House what decision it should take but he would like to warn the House that rumours had been coming to him that they were not in a very safe position; threats of scavengers' strike had been brought to his notice by fairly responsible people. If, therefore, their hearts melted at the little things that might be brought to their notice, they had at the same time also to remember that they had to carry out their duty also.

Proceeding the Mayor said that it had been even suggested to him that Government should appoint a Committee to go into the causes of the strike. The Mayor had replied, enquiring as to why was it that it was the scavengers only and not other employees of the Corporation, who went on strike. He had received no answer. One of the reasons which suggested itself to him was that when the scavengers went on strike, they held Calcutta by the throat and the health of a million and a half people was endangered and certain people saw in it an opportunity to further certain political objects and to exploit these poor miserable people. Every one had sympathy for them but it was their miseries which were sought to be made use of by interested politicians.

Mr. Vernon's amendment was rejected by the House. Mr. Mookerjee accepted Mr. Ispahani's amendment, which was accepted by the House.

For Improving Collection

Accepting the recommendation of the Finance Special Committee the Corporation meeting on Wednesday, agreed to the proposal for payment of extra remuneration to the staff of the Collection Department for improving the collection of consolidated rates both for current and arrear.

The realisations are to exceed 91·5 per cent. of the "gross current demand against the Collector." The remuneration are to be fixed in accordance with the sliding scale set forth below :—

(i) If the collection exceeds 91.5 per cent, but does not exceed 92 per cent, the staff will be paid a lump sum remuneration on the following scale :—

	Rs.	A.	P.
Collector (per month) ...	25	0	0
Asstt. Collectors (each per month)	12	8	0
Inspectors and Sub-Inspectors (each per month) ...	8	0	0
Bailiffs (each per month) ...	2	8	0

(ii) If the collection exceeds 92 per cent, but does not exceed 93 per cent, the staff will be paid a further amount (in addition to that earned under Sub-clause (i) above) at the rate of one and a half times of the scale laid down in Sub-clause (i) above, for the whole of 1 per cent, or at proportionate fractions thereof calculated on the basis of the nearest 1/10th per cent, attained above 92.

(iii) If the collection exceeds 93 per cent, the staff will be paid another further amount (in addition to those earned under Sub-clauses (i) and (ii) above) at the rate of double of the scale laid down in Sub-clause (i) for each 1 per cent, or proportionately for smaller percentages in the same manner as laid down in Sub-clause (ii).

That as regards collection of arrears an extra renumeration of ·75 per cent. of the collections be paid to the Inspectors, Sub-Inspectors and Bailiffs, the Inspectors and Sub-Inspectors getting one-third and the Bailiffs two-thirds of the total amount payable under this head, provided the total arrears on 1st April, 1941, do not exceed Rs. 11½ lakhs, including the transfers to the Law Department out of the arrears for the year 1940-41.

That the above resolutions will be applicable to the collections during the current year only.

That if the collection by the Department as a whole falls below 91.5 per cent of the "gross current demand against the Collector," the work of each Bailiff and Inspector shall be scrutinised and those individuals who are deemed inefficient, will be reported to the Finance Standing Committee for taking such steps against them, as may be considered necessary.

The Scavengers' Strikes Costs

Councillor Madan Mohan Burman withdrew the following motion, which he had tabled at Wednesday's meeting of the Corporation, on the assurance given by the Mayor that Mr. Burman's question on the subject would be replied to, at an early date :—

That the Chief Executive Officer be directed to place before the Corporation :—

(a) the amounts of expenditure with details of Scavengers' strike in March, 1940;

(b) the amounts of expenditure with details of Scavenger's strike in August, last;

(c) the amount of extra expenditure incurred or that is being incurred by the Corporation on account of innovation made during or after the strike with or without sanction of the Corporation.

Some Features Of The Calcutta Corporation

[By Polly Carp]

CALCUTTA'S steady expansion from day to day has brought in its train added responsibilities to its civic administrators. These are of varied nature and demand great vigilance and the unceasing attention of the Executive and City Fathers. To administer to the needs and provide amenities for about twelve lakhs of citizens, many difficult problems entailing high finance, sanitation, lighting, food adulteration, building, engineering, education, litigation and others are involved. Most ratepayers are unaware of the huge administrative machinery at work or the army of menials, skilled technicians, clerks and other subordinates employed by the Calcutta Corporation. A few statistics will reveal the colossal task that confronts those entrusted to maintain the "City Beautiful."

Population

The population of Calcutta according to the last census of 1931 showed 11,96,734 residents of whom there were 8,14,948 males and 3,81,786 females as against a total of 949,144 in 1901 representing an increase of nearly two and a half lakhs of people in 30 years. The census figures of 1931 did not include the residents of neighbouring municipalities such as Garden Reach, South Suburban and Tollygunge. The total for these three municipalities was 1,19,847. It is anticipated that the census for 1941 will show a substantial increase over 1931.

Area And Density

The municipal area of Calcutta is 25½ square miles which excludes the Fort and *Maidan*, Garden Reach, Port and Canals. If these are included then the area, which is known as the "Calcutta Area", is increased to 45 square miles. According to the last census there were 2,03,231 occupied houses in the municipal area representing an average of 58 persons per acre while there were 2,10,686 houses in the "Calcutta Area" with an average of 42 per acre.

Most of the Wards in the northern quarter are densely populated. In 1931 Jorasanko and Kumartuli in District I dead-heated for first place with an average of 176 people to the acre. Four other Wards in the same district averaged over 160, the lowest being Satpukur with 26.

In District II, Kalutola broke the record with an average of 219 and Puddapukur came second with 213, the lowest was Manicktala with 32.

In District III, the pride of place was held by Taltala with an average of 194 and Fenwick Bazar next with 161. The lowest was Tangra with 12. The "European" residential Wards of Ballygunge and Bamun Bustee (the area encircled by Chowringhee, Lower Circular Road and Theatre Road) showed 37 and 21 respectively.

In District IV, Bhawanipore and Kalighat were highest with 96 and Alipore last averaging 24.

Fort William and the *Maidan* enjoyed the unique distinction of two residents per acre and the Port had 5.

These figures indicate the congestion in some parts of the city, and the very difficult task imposed on the Health Department to maintain a clean bill of health, and to prevent the spread of epidemics which are an annual feature of the *bustees*. Were it not for the ceaseless watch and elaborate preventive measures taken by the Health and Engineering Departments, cholera, small-pox, typhoid and other infectious diseases would take heavier toll of lives.

Sanitation

The sanitation of the city is the joint concern of the Health and Engineering Departments of the Corporation. While the Health Officer and his staff are engaged primarily in curing and combating diseases and adopting preventive measures, the Engineering Department co-operates by controlling conservancy and drainage, in addition to its legitimate functions which embrace civil, mechanical electrical and marine engineering.

Some idea of the responsibilities and duties of the Health Officer may be gauged when one considers the departments that are controlled by him, *viz.*:—

Corporation Hospitals and Dispensaries, Maternity Homes and Units, Vaccination Centres, Food Inspections, Ambulances, Disinfections, Slaughter of Livestock, Mosquito Control, Analyses of Water and Birth Registration, etc.

The Corporation maintains 2 hospitals, 19 outdoor dispensaries—including one for homeopathic and one for unani treatment, 4 maternity homes, 7 maternity units, 21 milk kitchens and a free outdoor dispensary and hospital for animals.

Hospitals

Of the two hospitals, one has four beds and is more in the nature of an emergency ward of an outdoor dispensary. The other, recently opened at Kidderpore, is fast gaining popularity with shipping people and has 12 beds. A proposal for enlarging hospital and increasing the number of beds is engaging the attention of the Corporation.

An Infectious Diseases Hospital to be styled "King George V Infectious Diseases Hospital" was mooted 3 years ago. The scheme fell through at the last minute as serious objections were encountered by the rate-payers of the South Dum-Dum Municipality and acquisition proceedings had to be suspended *sine die*. Another site, the Manicktala Trenching Ground belonging to the Corporation, has been selected and inspected by the Committee. It covers an area of 45 bighas and would appear to be an ideal spot for the location of an infectious diseases hospital as it is easily accessible, has plenty of room for expansion and is removed from residential areas. A revised comprehensive scheme has been submitted by the present Health Officer and

the cost without acquisition of land is estimated at Rs. 3,20,000 with an annual recurring expenditure of Rs. 1,95,000.

Maternity Homes And Units

The maternity homes are doing very useful work and relieve to a great extent the pressure on the Lady Dufferin and Eden Maternity Hospitals. During 1939, the Corporation maternity homes admitted 8,026 labour cases and the maternity units handled 6,088 confinement cases. In addition to these labour cases there were a further 7,590 cases treated in the out-door section of the Baldeodas Maternity Home for female disorders. Perhaps the popularity and the great demand for admission to the "Baldeodas" is because it is the only Corporation maternity home in the northern quarter of the city and its Lady Superintendent has British Gynaecological and Obstetrical qualifications.

Dispensaries

About 10,00,000 old and new cases are treated in the out-door dispensaries of which 4,00,000 are new cases. Each unit has its full complement of medical officers, compounders, dressers, female attendants and menial staff.

In the unani dispensary there are two hakims —one for males and the other for females. The female section is in the charge of a qualified female hakim.

Two qualified homeopathic practitioners are in charge of the homeopathic dispensary.

Baby Welfare

To prevent infant mortality the Corporation maintains 21 milk kitchens where barley water and milk are distributed daily to children up to $2\frac{1}{2}$ years of age. About seven and a half maunds of milk are distributed daily. Nursing mothers are advised and the tiny ones receive attention from a fully qualified staff.

Vaccination Centres

There are 25 vaccination centres which are open throughout the year. 5,79,559 people were vaccinated during 1938, and 4,43,983 during 1939-40. The larger number of vaccinations in 1938 was due to the outbreak of small-pox in epidemic form which entailed a temporary extra staff for several months.

An animal vaccine laboratory is maintained where vaccine for Corporation use and sale to the public is prepared. The laboratory also undertakes detailed bacteriological examination of vaccine lymph including experiments on animal and preparing stock vaccines for cholera and typhoid.

Food Inspections

With a view to ensuring pure foodstaffs and to prevent the admixture of deleterious ingredients injurious to health, a squad of food inspectors go on their rounds daily collecting samples of food and foodstaffs from itinerant vendors and shopkeepers. These are sent for analyses to the Central Chemical Laboratory of the Corporation and criminal prosecutions are started against the vendors when the analyses reports reveal adulteration. Fines to the extent of Rs. 100 are at times imposed on offenders for adulterations of *ghee*, mustard oil and milk as these commodities are a daily necessity and used by rich and poor alike.

Ambulances

The Corporation has a fleet of 12 motor ambulances. Four of these are for infectious diseases and six for non-infectious cases. Two ambulances are kept reserve for emergency or in the event of breakdowns. There were 26,146 ambulance calls during 1939-40, while the total calls attended numbered 19,499 of which 1,334 cases relate to street accidents.

A very wise measure has been introduced by the Health Officer. All ambulance cars have been equipped with disinfecting materials so that disinfection of the premises by the ambulance staff is attended to immediately an infectious case is removed to a hospital. A further innovation is the storing of a disinfecting briquette in each ambulance car to deodorise the atmosphere.

Disinfecting squads, each in charge of a qualified medical man go out daily to the *bustees* to render these "plague spots" more sanitary. These men are also employed to disinfect houses where cases of infectious diseases have been reported.

A Disinfecting Station is located at 149, Lower Circular Road where articles may be sent for disinfection.

Slaughter Houses

Besides a large number of private licensed slaughter houses, the Health Department controls five slaughter houses where buffaloes, cows, goats, sheep and pigs are examined by veterinary officers before slaughter is permitted.

The number of animals slaughtered in the Corporation slaughter houses during 1938-39, was as follows :—

Buffaloes ...	17,866
Bullocks and cows ...	67,416
Calves ...	2,229
Sheep ...	1,26,484
Goats ...	1,00,094
Pigs ...	12,212

Mosquito Control

To check the breeding of mosquitoes and destruction of their larvae, an entirely separate mosquito-control department has been formed. A budget provision for 1940-41 for establishment alone amounts to Rs. 1,01,910. Mosquito-control Inspectors and Sub-Inspectors with their staff make house to house visits in areas mostly affected who oil drains and sprinkle disinfectants and insecticides. Although considerable sums of money are spent annually the nuisance has not abated. The Salt Lakes which are in close proximity to Calcutta are an admirable breeding ground for mosquitoes. Government attention has been drawn to this menace and it is hoped that the recent conference with the Chief Imperial Malariologist will find a solution to make the city malaria free.

Analyses Of Water

As the health of the city can be jeopardised by water-borne diseases, the Corporation pays very great attention to the all-important problem of supplying the city with pure drinking water. An

HEALTH & HYGIENE

"A man too busy to take care of his health is like a mechanic too busy to take care of his tools."—*Cicero.*

The Doctors Of Egypt And Assyria

[By Warren R. Dawson, *Fellow of the Royal Society of Medicine*]

THERE cannot be the slightest doubt that medicine had its origin in magic, and that for many centuries, almost to the present day, magic has never completely lost its hold on medicine. The earliest doctors were magicians, and the earliest forms of medical treatment were magical rites.

A large number of magical papyri has been found in Egypt, in which are set out at length the spells and incantations that the magician uttered, and minute directions as to how he was to proceed in various cases. In these papyri, diseases and illnesses are treated as if personified. Usually the magician addresses the spirit itself or he addresses the poison or other evil influence which the spirit was believed to have projected into the body of the patient.

The simplest method of treatment was the recitation of a spell in which the demon was bidden to be gone, or the poison to leave the patient's body. Such spells are usually full of references to the gods, and the defeat of the demon is usually attributed to divine power. The magician usually addressed the possessing spirit with such words as "Get thee back thou enemy, thou dead man or thou dead woman who dost cause pain to N the son of M." or, "flow out, thou poison, upon the ground."

The spirit is usually defeated by an assurance from the magician that it is really powerless: "Thou art weak and not strong, a coward and dost not fight, blind and dost not see." By thus informing the spirit of its impotence to harm the patient, the magician by sympathetic magic imagines he is depriving the demon of its potency. In other spells the spirit is rendered powerless by the mere invocation of the name of a god.

It is characteristic of the magician in all places and at all times that he should have more than one string to his bow, for if one method fails, another may succeed. Consequently we find in the medical papyri numerous alternative prescriptions, and in the magical texts, alternative spells, provided for every kind of sickness or calamity. Some of these contain drugs which are really beneficial and appropriate, and such prescriptions would tend to survive the more fantastic and unsuccessful ones.

By this means, more and more reliance came to be placed upon the drugs themselves and less and less upon the magician's spells. Hence the services of those who were skilled in the knowledge and preparation of drugs were in greatest demand. These men were no longer magicians, but physicians.

Just as the first steamships were provided with auxiliary sails, so the first physicians kept magic as a reserve force to be used in case of need. Medicine branched off from magic and began its independent career early in Egyptian history. But even the physicians were closely associated with magic and religious ritual, and religious elements continued to pervade medicine.

Many of the drugs in the medical papyri, even when beneficial, originally found their way into the pharmacopoeia for purely magical reasons. Even diseases which have obvious external manifestations, such as sores, boils or swellings, were believed to be caused by spirits in possession of the afflicted. At first wounds alone, because inflicted by human agency, and therefore material and comprehensible, were treated by practical methods. The analogies in the morbid conditions often associated with wounds led the physicians to apply the same rational methods of treatment to disease.

The miscellaneous nature of the contents of the medical papyri that have been discovered suggests that they are copies, made for the use of general practitioners who lived in places where the libraries of the temples were inaccessible.

The art of embalming the dead involved the removal of the internal organs of the body, both from the abdomen and the chest. These organs (with the exception of the heart which was almost always left in its place attached to its great vessels) were washed and preserved by the embalmers who made them up into packages and placed them in four ceremonial vases known as the Canopic Jars

Later on the use of these jars was discontinued and the organs were wrapped in linen and replaced in the body-cavity. This special treatment of the viscera familiarized the Egyptians with the appearance and mutual positions of these organs, and it also enabled them to recognize the analogies between the internal organs of the human body and those of animals, the latter long familiar from the time-honoured practice of cutting up animals for sacrifice and for food.

The various hieroglyphic signs representing parts of the body, and especially internal organs, are pictures of the organs of other mammals and not of human beings. This shows that the Egyptians' knowledge of the internal structure of animals is older than their knowledge of those of man. It shows further that they recognized the essential identity of the two, for they borrowed the signs based upon the organs of animals and used them unaltered when speaking of the corresponding organs of the human body.

When we come to consider the diseases mentioned in the papyri, we are at once confronted by a host of difficulties. In the first place, the texts are written in a specialized and concise form. Many passages have been copied from older books, and show evidence of textual corruption.

But the greatest difficulty of all is our inability to translate into English a great number of the maladies described, and the names of most of the drugs. There are, for instance, some half-dozen words for which we can find no closer equivalent than "swelling" or "lump," although each term clearly had a specific meaning to the Egyptians. Some of these "swellings" are clearly boils and carbuncles of various kinds, but others, again, are unmistakably manifestations of bilharzia infection, which was in ancient times, as it is today, a terrible menace to the inhabitants of the Nile valley.

Generally speaking, the maladies with which the papyri are concerned are those which attack the natives of today. Intestinal troubles due to bad water, to worms and other parasites, opthalmia and a large number of affections of the eyes, boils, sores and bites of insects, skin diseases, bilharzia infection and mastoid disease figure among the many maladies for which the ancient physician had to find remedies. The actual evidence of many of these diseases has been found in Egyptian mummies.

Surgical instruments have been discovered in Egypt, among which are delicate scalpels, probes and forceps. Splints have also been discovered, and these were applied to fractured limbs. But there is no evidence whatever that tooth-filling, or any other form of dental surgery was practised by the Egyptians.

Great number of different drugs were employed in Egyptian prescriptions, but the same difficulty is encountered in dealing with these as with the maladies, namely, our inability to identify many of them. The drugs were derived from the animal, vegetable and mineral kingdoms. Most of the animals can be identified.

The number of vegetable drugs is very large, but it is impossible at present to identify more than a relatively small percentage of them. The same difficulties of identification occur in the case of the mineral drugs. The quantities of each drug are meticulously specified in the prescriptions. Since minute fractional notations are often employed, we may infer that considerable care was used in dispensing.

Hartshorn, the substance obtained by crushing antlers of deer, was among the animal products used in medicine. In the Ebers Papyrus is a prescription "to cool a head that suffers pain," wherein hartshorn is one of ten drugs to be ground up, mixed with water, and applied to the head. In another papyrus hartshorn is used in preparations to drive out the demon which causes disease.

In a prescription which is "to drive out painful swellings which affect a man in winter and in summer," hartshorn is employed as an ointment, the horn being beaten up with incense and flour and mixed with sweet ale. In another prescription ground hartshorn is used in a fumigation for the ears. However fantastic these remedies may appear to us, hartshorn is a valuable medicine which was used by the Greeks, Syrians and Arabs and is frequent in the medical works of western Europe throughout medieval times up to the present day.

Although actual horns are no longer used the name hartshorn has survived in modern pharmacy. "Spirits of hartshorn," now used to designate an aqueous solution of ammonia, was originally applied to the ammoniacal liquor obtained by distillation of horn shavings, and in modern preparations calcium phosphate is added to represent that formed originally from calcined horns.

Another familiar drug of vegetable origin which was used by the Egyptians is castor oil. The Egyptians cultivated the castor-oil plant and obtained from its seeds the oil which they used in their lamps as an illuminant.

The medical papyri contain in the aggregate over two thousand prescriptions. A great many of the drugs employed are fantastic and magical, and there is generally a preference shown for rare substances which are difficult to obtain. All this enhanced the reputation of the magician. If he supplied the remedies, one is tempted to wonder how he got his supplies of lion fat, crocodile fat, oryx fat and other similar preparations.

Perhaps the homely goose-grease done up in separate pots and bearing different lebels solved the problem. In spite of such emoluments, however, a careful study of the texts discloses many rational drugs underlying the magical and fantastic ones, and a number of the most valuable drugs in modern pharmacy were first put to medicinal uses by the Egyptians.

The Babylonians had no physicians. They brought their sick into the market-places in order that passers-by might confer with them upon their symptoms in the hope that the patient might elicit from someone who had been similarly afflicted advice as to how to effect a cure. Their neighbours the Assyrians possessed considerable medical knowledge of which a mass of documentary evidence has come down to us.

There is a great similarity between the Egyptian and the Assyrian medical texts; both are strange mixtures of rational therapeutic treatment with magical spells and incantations. There is some difference, however, in the method of setting out the prescriptions. In the Egyptian papyri the name of the ailment is usually stated in the title, thus "prescription for driving away swellings," "prescription for a pain in the head" and so on. The Assyrian prescriptions have no distinct titles, but usually convey some notion of the symptoms or diagnosis of the disease in the opening phrase: thus "if a man's head has a scab, thou shalt" do so and so, or "if a man's teeth hurt, thou shalt take" such and such drugs and apply them; "if the accident of a blow has fallen upon him," etc. Another point of difference lies in the fact that in the majority of Egyptian prescriptions, the quantities of each drug to be used are stated: this detail is often lacking in the Assyrian texts.

Probably in Assyria, as in Egypt, dental troubles were frequent. It is interesting to observe that dental caries was exceedingly rare in Egypt in the predynastic and protodynastic people, and among the poorer classes it did not become common until modern times. But these people ate coarse

food in which a considerable quantity of sand was mixed, consequently the teeth rapidly wore down and exposed the pulp-cavities, where septic infection took a readier hold than in the hard enamel and dentine of the teeth themselves. Hence it is common to find alveolar abscesses without dental caries.

But tooth decay became common among the wealthier classes in the Pyramid Age, who had learned luxury and no longer subsisted on the simple diet of their predecessors.

At every subsequent period the same state of affairs is found, namely, the wide prevalence of every kind of dental disease among wealthy people of luxurious diet and much greater immunity from it among the poorer classes who fed principally on uncooked vegetable food. Probably the same state of affairs existed in Assyria. The Egyptians believed that the cause, or one of the causes of toothache was the gnawing of a worm, and in Assyria the same belief is found. This belief is very widespread and has persisted till fairly recent times.

Many early medical manuscripts of the fourteenth century are drawn up in precisely the same way as the Egyptian papyri. The prescriptions are headed in exactly the same manner as those in the Ebers and other papyri, and each is followed by a series of duplicates, headed by the word "Another," as are those of the papyri. Charms and incantations are interspersed amongst the prescriptions which are very similar to those of the Egyptian documents, although the names of Horus, Isis and the lesser divinities invoked in the papyri are replaced by those of Christ, the Virgin Mary and the Christian Saints.

At the end of the prescriptions the words are often added "tried and found perfect," "probatum," etc. just as the Egyptian prescriptions often end with the words "a perfect remedy," and so on. These points taken cumulatively, leave little doubt that the substance of the Egyptian medical books had reached Europe long before the more obvious modes of communication existed.

To cite a few examples of such transference and survival, one of the Egyptian papyri written about 1400 B.C. prescribes a skinned mouse as a remedy for an infantile ailment; but there is evidence that the use of the mouse as a child's medicine is many centuries older in Egypt than this first written record of it. In a predynastic cemetery in Upper Egypt remains of mice were discovered in the alimentary canals of the bodies of children under circumstances which prove that the little animals had been skinned before they were eaten.

The mice were evidently medicinally administered to the children as a last resource before they died. There is abundant literary evidence of the medicinal use of the mouse for various purposes, but usually for children, throughout classical, medieval and later times, and the custom of using mice as a medicine is not wholly extinct in parts of Europe today.

There are people still living in England and Scotland who in their childhood had been made to swallow skinned mice as a cure for whooping-cough and other complaints. This affords a striking example of the persistence of a remedy for more than sixty centuries.

Baked with the usual degree of excellence, and containing a high percentage of health giving Bourn-Vita, made from fresh full-cream milk from British farms, British Malt and Empire Cocoa. Obtainable in the usual size tins or convenient air-tight packets.

Weighing Sewage Sludge

Continuous Records Maintained At Chicago And Buffalo By Belt-Type Devices

SOME automatic device for weighing on a scale is necessary for the operation of a sewage-treatment plant where the sludge is being dewatered and dried and then either incinerated or processed for use as a fertilizer or soil conditioner. The operator depends upon such a weighing apparatus for his control, inasmuch as he wants to know at all times the amount of cake coming, in order to control the dryers or the incineration process. Extensive studies of various types of weighing belts have been made by William A. Dundas, Mechanical Engineer, The Sanitary District of Chicago, under the direction of William H. Trinkhaus, Chief Engineer.

For the weighing of material transported on a belt for disposal to an incinerator or a dryer in preparation for the sale of the material as a fertilizer, various makes of apparatus are on the market. In the development of the scheme of drying sludge at Chicago, it was realized early in the studies that a uniform feed is essential for such drying operations. The cake comes off the vacuum filters at Chicago with between 78 and 82 per cent. moisture and is dumped on to a travelling belt. In order to break up the cake and make an even load on the belt, Mr. Dundas developed a series of vertical disks revolving around a horizontal axis, against the motion of the belt at a slow rate. These disks have teeth arranged to throw the material sideways from one disk to the other and break it up. The broken-down cake is then evened up by a cake spreader, which makes a uniform load upon the belt.

To give a record of the tonnage of the cake as delivered from the filters and also to indicate the rate of delivery, a weighing device was sought. In the experimental work at the West Side Plant, which ran for several years, a Transportometer, made by the Sintering Corporation, was used. This received material from a single vacuum filter with a capacity of 20 tons of dry solids a day or, roughly, 100 tons of cake a day. In the development of the working plant as Calumet, which has been running now for over two years, the Merrick Weightometer is used, with a capacity of 12 tons of cake per hour. At the Southwest Works the Merrick Simplex Weightometer is installed, a less expensive device than the other Merrick unit mentioned. In this installation each scale has a capacity of 24 tons of cake per hour. In asmuch as the filters are grouped by fours and each feeds a dryer-incinerating unit, there are eight of these machines installed.

At both of the works of the Sanitary District of Chicago the details of the weighing platform of the scale are practically the same. The conveying belt runs over a platform. The scale is adjusted to

read zero at running speed. The Weightometer has a recording and totalising device which is built into a housing. As this device works on an electrical basis, it is possible to transmit the information and show both the recording and totalising at a distance. The chart gives an indication in tons per hour. There is a certain amount of lag in the apparatus, so that a load which varies in small portions is more or less evened up.

The Merrick Simplex Weightometer at the Southwest Works employs the same scale as in the apparatus at Calumet. The difference is in the recording and integrating apparatus. There is also an indicator to show the weight of material passing per hour. The indicator, recorder and integrator are all built into one unit. This operates on a mechanical basis, and does not record as well on the chart although the integrator works sucessfully. A dampening device is available which obviates this difficulty. While this device can be arranged to transmit the information to a distance, it is not so arranged at the Southwest Works. The Simplex unit was especially redesigned for the Southwest Works.

Summing up the units in Chicago, it is reported that both machines integrate the weight passing over the scales accurately and both machines produce a record which is available. The Simplex machine has, further, a large pointer to indicate the amount passing momentarily. If the feed is non-uniform, the Weightometer gives a better result, inasmuch as it does not weigh instantaneous loading but records itermittently. It has no indicator, and therefore the chart must be read to determine what is happening. The device is a good one and from the experience with the experimental West Side Plant and Calumet Works the Chicago Sanitary District is satisfied that the necessary records are obtained.

Simplex Weightometer with an empty stretch which at times is 8 to 10 feet long. At Buffalo it was felt that a cake-spreading device which provides for a few minutes of storage of sludge cake between the filter and conveyor belt would be most likely to be satisfactory, and such a device has been installed. It has been very successful and there has been no difficulty in keeping a record on the Simplex Weightometer at Buffalo from the indicator on the scale.

We are indebted to William A. Dundas, Engineer of Mechanical Design; Lankdon Pearse, Sanitary Engineer; both of the The Sanitary District of Chicago; and to Samuel A. Greeley, of Greely and Hansen, Consulting Engineers, Chicago, for the information on which this presentation of the system used is based.

—Some Features Of The Calcutta Corporation

up-to-date laboratory at Pulta is maintained and the water at the intake and in the filter beds is analysed several times daily by experts. After the water has been stored in the Tallah Reservoir, believed to be the largest superimposed reservoir in the world and built at a cost of three lakhs of rupees in 1909, it is again submitted to tests after it is collected from mains in all the districts. As soon as any contamination by leakage is noticed immediate chlorination takes place and samples are drawn regularly until the defect is located and removed.

A week to week detailed chemical and bacteriological analysis report is submitted to the Water Supply Standing Committee and Calcutta is proud of its drinking water as it is free from cholera microbes and other harmful bacteria.

CALCUTTA NEWS & VIEWS A Digest

TAGORE LEAVES CALCUTTA

After recovery from his recent illness Poet Rabindranath Tagore left Calcutta for Santiniketan by the Pakur Passenger on Monday morning, (November 18).

Though considerably improved in health, the Poet was still very weak. He was taken to the Howrah Station in a motor van and was carried to his compartment in an arm-chair. The Railway authorities made special arrangements for his comfort.

The Poet looked quite cheerful. A doctor accompanied him in his journey.

It is recalled that the Poet who had gone for a change to Kalimpong was suddenly taken ill there on September 26. On September 29, he was brought down to Calcutta on the advice of the doctors, who had hurried from Calcutta to Kalimpong on the previous day on receipt of news about the Poet's illness. The doctors travelled with him and he stood the journey to Calcutta well.

The Poet was placed under the treatment of eminent physicians in Calcutta. The country followed the course of his illness with anxiety and messages were received from different parts of the world, enquiring about his health. The country heaved a sigh of relief when the Poet was declared to be out of danger by the doctors on October 23, last.

A. R. P. DEMONSTRATION

In the presence of a large crowd assembled on Sunday morning at Shraddhananda Park the A. R. P. demonstration was held for the benefit of the citizens. The Commissioner of Police, the Deputy Commissioners of Police and A. R. P. experts were present at the demonstration which continued for an hour.

The whole display was exhaustively explained by running commentaries broadcast in the area through loud speakers.

The model A. R. P. warden's post, gas defence shelter, first-aid shelters were constructed to give a realistic touch to the display.

Various phases of the A. R. P. activities such as rendering first-aid to casualties, cordoning the gas-contaminated area and decontaminating it, fighting bomb Fire etc., were vividly displayed by the A. R. P. personnel of Muchipara A. R. P. Sub-area.

It is understood that similar displays every week on successive Sundays will be given in various parts of the city by the A. R. P. men.

Mr. C. E. S. Fairweather, Commissioner of Police in addressing the gathering said :—

"The object of this display is to help the public to realise in these troubled times, that every man and every woman is a soilder—and more than that, a soldier of the Front line.

"This war comes nearer, day by day. Now or never, we must prepare. You have seen, all over Europe, the devastation that has fallen on countries and places which were not prepared. Do not let us repeat the same mistakes.

"Every peaceable nation is now exposed to the onslaught of the ruthless enemies of civilisation.

"Rich and poor, high and low, are equally exposed to the danger. It is therefore, the duty of all of us—of every caste and creed—to join together in preparing to meet this common danger."

THE JAIN PROCESSION

The Annual Jain Shewtambari Pareshnath procession was taken out in Calcutta on Friday morning amidst scenes of great enthusiasm. The procession, which was the first to come out, started from Cotton Street and terminated at the Pareshnath Temple in Badridas Temple Street. The *Digambar* procession, which followed, came out from Bysack Lane and ended at the Pareshnath Temple at Belgachia.

As the processions wended their way along Chitpore Road, which was lined with thousands of spectators, the glittering display of gold and silver temple cars carrying bejewelled deities, multi-coloured banners, uniformed musicians and beautifully caparisoned horses and vast crowds of Jain worshippers, presented a picturesque and impressive spectacle.

His Excellency the Governor of Bengal and The Lady Mary Herbert watched the two annual Jain processions from the Jorasanko Rajbati in Upper Chitpore Road.

His Excellency and The Lady Mary Herbert on their arrival at the Jorasanko Rajbati were received by Mr. Daya Chand Parruck, Honorary Secretary, Jain Swetambar Temple. Kumar Rajendra Narain Roy of the Jorasanko Rajbati and several members of the *Swetambar* and *Digambar* Jain community were then introduced to His Excellency. The Lady Mary Herbert was taken to the *Zenana* where she met the *purdah* ladies.

SECONDARY EDUCATION BILL

The proposed Secondary Education Bill Protest Conference will be held on 21st, 22nd and 23rd December and not on November 30, and 1st December as previously announced. The Working Committee of Secondary Education Bill Protest Committee has taken this decision with a view to enabling the teachers, guardians of students and members of the Managing Committees of Schools all over Bengal as well as others who have sympathies with the aims of the Conference, to take advantage of the ensuing Christmas holidays.

Brisk preparations are now in progress in connection with the Conference which, in all probabi-

Mr. Mahesh Prasad Sinha, M.L.A., Chairman and Mr. Rameshwar Prasad Sinha, M.L.A., Vice-Chairman of the Muzaffarpur District Board have tendered their resignations of their respective offices.

SYLHET MUNICIPALITY

The Government do not propose to have a general election in the Sylhet Municipality, which was superseded by the late Congress-Coalition Government of Assam, during the period of supersession which does not expire till February of 1941, as they see no adequate reason to do so. This was the Government reply in the Assam Assembly on the 15th November during the question hour.

BENGAL MUNICIPAL ASSOCIATION

Mr. Biren Roy, General Secretary, All Bengal Municipal Association draws the attention of the Municipal Authorities in Bengal regarding the election of delegates to the Sixth Annual Municipal Conference to be held this year on the 30th and 31st of December as per resolution at the last conference. This Sixth Annual Session will be held at Berahampore and all arrangements for the lodging and reception of delegates are nearing completion.

—Calcutta News & Views

(*Continued from page* 12)

lity, will be held at the Town Hall, Calcutta. Acharya P. C. Ray will preside over the Conference. The organisers of the Conference expect that about two thousand delegates from all over Bengal will be attending the Conference. Besides the delegates from Bengal, some prominent educationists from other provinces are also expected to take part in the deleberations of the Conference. All secondary schools, colleges, bar libraries, Public libraries and other academic and cultural institutions were asked by the organisers to send delegates.

SALE NOTICE

Messrs. Mackenzie Lyall and Co. will sell by public auction unserviceable stores at the Corporation Condemned Stores Yard, Entally, at 8 a.m., on Saturday, the 30th November, 1940. All informations relating to the sale may be had of the undersigned.

M. G. BANERJEE,
Controller of Stores.

149, Lower Circular Road,
The 13th November, 1940.

PUNJAB CIVIC GUARDS

About five thousand volunteers for the Civic Guards have so far been recruited in the Punjab. Of these about five hundred are in Lahore. The training of the Guards has already commenced in about a dozen districts including Lahore.

When fully recruited the Civic Guard force will contain a maximum of thirty thousand for the whole province.

A provision of Rs. 10 lakhs is understood to have been made for the Civic Guards and supplementary estimates in this connection will be presented to the Punjab Assembly on November 22.

INDIAN ARCHITECTURE

Mr. Srish Chatterjee's Scheme for Bihar

Patna, Nov. 16.

In connection with the proposed branch of the All-India Institute of Indian Architecture in Patna for which Mr. Sris Chandra Chatterjee, Architect, came here, Mr. D. N. Sen, M.A., O.B.E., formerly Principal of B. N. College, Patna, has issued the following statement :—

"I fully believe that Bihar is entering upon the creative period of its present day culture. I believe that Indian culture unlike the cultures of Egypt and Babylon which have passed away without leaving any trace except in smouldering relics or monuments of dead stone, has continued for centuries slowly developing and advancing and is better preserved than any other in the world. I feel strongly that our constructive energies should be roused and allowed to express themselves in fresh creations. I therefore, welcome the formation of an All-India Institute of Indian Architecture and the proposal for the introduction of courses in Indian Architecture in the Universities.

It is very gratifying that the Calcutta University under the guidance of Dr. Shyama Prasad Mookherjee, has shown its appreciation of the strenuous efforts which Mr. Sris Chandra Chatterjee has been making for reviving our ancient architecture and adapting it to modern requirements. He will always have my best wishes for the success of his great undertaking.

I am grateful to Mr. Chatterjee for his indomitable attempts to give a new life to the old architecture of Bihar so that it may enter into a new progressive career of reconstruction and I hope that though the shades of evening are falling upon me I shall yet live to see a materialisation of my cherished hopes for something in our public buildings which will remind us of glorious days of Magadha and which will at the same time be in harmony with modern ideals and requirements.

I commend most heartily Mr. Chatterjee's learned article on the Message of Magadha to our students and public men for a serious study of the essay and for trying to carry out the ideals advocated therein. I welcome the proposal to embody this project in the construction of the National Hall in Patna in developed indigenous style which, I have no doubt, will inspire the present and succeeding generations."

Calcutta Associations & Institutions

DR. SATYANANDA ROY MEMORIAL

An Appeal

One year has passed since Dr. Satyananda Roy breathed his last. He was widely known as a scholar, psycologist, and educationist and also as a man of sterling character and personality.

Born of a very respectable family, he showed his parts in different movements and activities. During the Partition of Bengal, he joined the National College and after completing his education, he began his career as a social worker. He soon was a leading figure in building up the Calcutta Workingmen's Institution and Sramajibi Siksha Parishad, two organisations that still stand to his memory. He went twice to U. S. A.—first to study theology in the Harvard University and then to get his doctorate in Psychology from the Clark University. For about 30 years he was a popular figure in Calcutta and was connetced with many institutions for which he laboured sincerely and steadfastly.

Those who had the occasion to listen to his *Upasana* (divine service) at the Bharatbarshiya Brahma Mandir or elsewhere, were deeply moved by his religious fervour and enthusiasm.

As the first Pricipal of the Teachers' Training College, he came in touch with most of the teachers of the Corporation Primary Schools who could realise that he was a born *Guru*. His crowning achievement was to train a band of efficient teachers competent to take the charge of teaching forty thousand children of Calcutta. Even when he worked as Education Officer, he strained every nerve and it may be said that at the time of his death he was buried in a heap of office files.

To perpetuate his loving and revered memory, a strong Committee has been formed under the auspices of the Calcutta Corporation Inter-school Sports Association. The Committee consists of his students, admirers and friends.

The Committee proposes to organise every year sports and games in winter. It is expected that thousands of school children will take part. The successful competitors will be awarded Challenge Shields, Cups, Medals and other prizes.

We now appeal to all his admirers amongst the generous public who knew his manifold activities to help the Committee substantially by sending donations and contributions to the Hony. Secretary, Dr. Satyananda Roy Memorial Committee.

J. C. MUKERJEA,
Chief Executive Officer.

S. M. YAQUB,
2nd Deputy Executive Officer.

A. BARUA,

17-A, Mahim Haldar Street, Kalighat, Calcutta.
The 15th November, 1940.

LEGAL INTELLIGENCE

APPEAL BY THE CORPORATION

(Before the Chief Justice and Mr. Justice Mukherjea)

CORPORATION OF CALCUTTA—APPELLANT
vs.
P. N. TAGORE—RECEIVER—RESPONDENT

This was an appeal preferred by the Corporation of Calcutta, against the decision of the Additional District Judge of Alipore, reversing that of a Munsif of the same place.

It appeared that the Corporation brought suits for recovery of arrears of taxes in respect of certain Wakf property of Prince Kamer Kader and for a declaration of "*charge*" under section 205 of the Calcutta Municipal Act, on the property in arrears and for enforcement of that charges. All these suits ended in an *ex-parte* decree.. The Receiver was appointed sometime after the suits were terminated.

The Court passing the decree stated that the decretal dues did form a charge upon the premises in arrears under section 205 of the Calcutta Municipal Act. The Court did not give any direction as to the final decree or the period within which the defendant should pay the amount decreed. The decrees were put into execution and the receiver filed objections under section 47 of the C. P. Code, on the grounds that the decrees sought to be executed against the Receiver without the previous permission of the High Court, were incapable of execution; the decrees were not against the defendants as 'mutwallis' of the Wakf estate and as such they could not affect the Wakf property; and that the decrees were not in accordance with the provisions of order 34 C. P. Code and as such were incapable of execution. The Munsif rejected the objections in all the cases except three.

Against the said order the Receiver appealed to the Additional District Judge of Alipore who set aside the order of the Munsiff, holding that the Wakf estate was not liable to sale in execution of the decree, wherein the estate was not properly represented. Accordingly the Receiver's objections were allowed and the execution cases of the Corporation stood dismissed. Against the said order the Corporation preferred the present appeal.

The Court allowed the appeal and directed the respondent Receiver to pay the decretal amount due in respect of the rates within a period of 13 months from date, for which purpose he might have recourse to either the income or corpus of the estate; and if necessary, he might sell a part of the corpus in order to satisfy debts.

Mr. Atul Chandra Gupta and Mr. Kristo Lal Banerjee appeared for the Appellant, Corporation of Calcutta; Mr. S. N. Banerjee, Mr. H. L. Chakravarty and Mr. Narendra Nath Mitter for the Receiver.

SIR STUART HOGG MARKET

NOTICE

To all whom it may concern, that an application has been received from Mr. Atul Chandra Saha for the registration of his name as the sole occupier of Stall No. 79 in Block "C" (old), Sir Stuart Hogg Market to the exculsion of the name of Sukumar Saha the original recorded occupier of the stall. Objections if any, to this application should be submitted to the undersigned within 15 days from date hereof.

A. QASIM,
Revenue Officer.

S. S. HOGG MARKET,
The 21st November, 1940.

THE Improvement Trust

The following extracts are taken from the Proceedings of the Meeting of the Calcutta Improvement Trust, held on Saturday, the 28th September, 1940, at 10-30 a.m. :—

Present :—Khan Bahadur Muhammad Abdul Momin (Chairman), Mr. J. C. Mukerjea, Rai Sahib Chandan Mul Karnani, Mr. A. J. Thompson, Mrs. Hasina Murshed, Mr. Sudhir Chandra Ray Chaudhuri, Mr. J. J. N. Birch, Mr. Md. Rafique and Sir Hari Sanker Paul.

THE TRUST TRIBUNAL

It was reported that Government, in Notification No. 1199M, dated the 20th September 1940, had appointed Mr. N. R. Das Gupta, M.A., B.L., Bar-at-Law, to be the President of the Calcutta Improvement Trust Tribunal, with effect from 21st September, 1940.

It was also reported that Government, in letter No. 1231M, dated the 24th September, 1940, had authorised Babu Lalit Mohan Bakshi, who is in the panel of Assistant Government Advocates for the Tribunal, to carry on the duties of the Government Advocate in place of Mr. Das Gupta until further orders.

It was reported that Government, in Notification No. 1200M, dated the 20th September, 1940, had re-appointed Mr. Razaur Raman Khan, B.L., M.L.A., to be an Assessor of the Calcutta Improvement Trust Tribunal, with effect from the 21st September, 1940.

BETTERMENT FEE

The Board considered the Chief Valuer's note of the 26th September, 1940, and resolved that for the purpose of determining the amount of the betterment fee, the execution of Scheme No. XL (Chittaranjan Avenue to Wellington Street) should be deemed to have been completed and that notice in writing should be given to every person on whom a notice in respect of the land to be assessed has been served under clause (i) of sub-section (1) of Section 45 of the Calcutta Improvement Act, that the Board propose to assess the amount of the betterment fee payable in respect of such land under Section 78A of the Act.

The Board considered the Chief Valuer's note of the 26th September, 1940, and resolved that for the purpose of determining the amount of the betterment fee, the execution of Scheme No. XLI (Chandni Chak Street Widening) should be deemed to have been completed and that notice in writing should be given to every person on whom a notice in respect of the land to be assessed has been served under clause (i) of sub-section (1) of Section 45 of the Calcutta Improvement Act, that the Board propose to assess the amount of the betterment fee payable in respect of such land under Section 78A of the Act.

AHMEDABAD MUNICIPALITY

Ahmedabad, Nov. 18.

A meeting of the Ahmedabad Municipality was adjourned today without transacting any business. A resolution to this effect was passed, four Muslim members voting against. Municipal offices and schools also remained closed.

BARRACKPORE BRIDGE

With reference to Resolution No. 7 of the Board Meeting, held on the 14th August, 1937, accepting the tender amounting to Rs. 1,91,278-12-0 of Messrs. Hindusthan Engineering and Construction Company, for the reconstruction of the Barrackpore Bridge, the Board considered the Chief Engineer's note of the 25th September, 1940, and accorded their sanction to the payment to the contractors of a sum not exceeding Rs. 25,000 out of the additional expenditure incurred by them amounting to Rs. 30,000 over the contract amount, in anticipation of sanction by the Board through the Works Committee and approved by Government.

HOWRAH BRIDGE APPROACH

The Board authorised the Land Committee to hear objections to Improvement Scheme No. XLV (Howrah Bridge Approach—Dalhousie Square North to Canning Street), as modified, as there are very few objections to the modified scheme.

MR. BIRCH

It was decided to appoint Mr. J. J. N. Birch as a member of the Rules and Establishment Committee.

BOMBAY EX-PREMIER ARRESTED

Bombay Corporation Adjourned

Mr. B. G. Kher, former Congress Premier of Bombay who had informed the District Magistrate of his intention to offer *Satyagraha*, was arrested on Thursday last at his residence at Khar Road, a suburb of Bombay, under Section 129 of the Defence of India Act.

Mr. Kher had notified that he would address a public meeting at 8 o'clock in the morning at Vile Parle.

It is learnt that Mr. Kher has been lodged in the *Thana* Jail temporarily. As soon as the police officers entered his residence, Mr. Kher welcomed them remarking: "And so you have come." Mr. Kher said that throughout last night he had innumerable telephone calls from friends wanting to know if he had been arrested and consequently he had had no sleep. He then hurriedly selected a few books from a shelf and took leave of his family.

It is understood that the Governor of Bombay has sent a personal message to the Superintendent of Police, Bandra, and the Superintendent of the *Thana* Jail asking them that Mr. Kher should be shown every courtesy.

Following the arrest of Mr. Kher the Bombay Municipal Corporation adjourned its meeting without transacting any business.

LIBRARY OF THE BENGAL LE

VITAL STATISTICS

For the City of Calcutta for the week ending 16th November, 1940

City of Calcutta (Town and Suburbs)

The total number of deaths registered during the week was 760 against 632 and 547 in the two preceding weeks and higher than the corresponding week of the last year by 17. The general death-rate of the week was 31.9 per mille against 30.2 the mean of the last five years.

Town (Wards 1—25 and 27)

The number of deaths registered during the week ending 16th November, 1940, was 573 against 517 and 458 in the two preceding weeks. There were 15 deaths from cholera, against 5 and 8 in the two preceding weeks. There were 7 deaths from small-pox during the week against 7 in the previous week. There were 10 deaths from influenza against 4 in the previous week. The mortality from fevers and bowel-complaints amounted to 40 and 93 respectively against 34 and 50 in the preceding week. The general death-rate of the week was 29.8 per mille per annum.

There were 32 imported deaths. Excluding these, the death-rate of the Town was 28.1.

There were 72 deaths from respiratory diseases against 95 in the previous week.

There were 65 deaths from tuberculosis against 50 in the previous week.

There were 129 deaths of infants under one year.

Suburbs (Wards 26 and 28—32)

The number of deaths registered was 127 against 115 and 89 in the two preceding weeks. Of these 7 were from cholera, 2 from small-pox, 1 from influenza, 9 from fevers, 14 from bowel-complaints and 26 from respiratory diseases. The death-rate of the suburbs (or added areas) was 46.4 per mille.

There were 11 imported deaths. Excluding these, the death-rate was 42.4.

There were 15 deaths from tuberculosis against 11 in the previous week.

There were 26 deaths of infants under one year.

	8C & 8D, Gulu Ostagor Le.	1	14-11-40

Most people treat municipal subjects with indifference and unconcern—everybody's business being nobody's interest. But, really there are no uninteresting subjects, only uninterested people.

Yet, there is an increasingly large number of people now who believe that civics is a matter of concern to them, to their community and to the future of their city.

The *Calcutta Municipal Gazette* appeals to just such people. It invites discussions and constructive criticism in the conduct of our municipal affairs. It helps to increase the interest in Local Government, to make public life more useful, to make our nationalism richer by making it a matter of practical, constructive achievement.

And the *Gazette* is free from party fealty, without any party obligations or debts to pay. It wishes to present ideas impartially and judge questions in the interests of the city only and none other.

We invite you to read the *Gazette* regularly and help to spread ideas on municipal subjects.

Are we your advertising medium ?

Reaching every responsible person connected with the Corporation of Calcutta and other Indian Municipalities, and also to many abroad in distant and important parts of the world, the "Gazette" helps you to scale the buying wall which your salesmen cannot climb. Thus, a direct contact is established through the "Gazette" between you and the actual buyers of the innumerable things that are daily needed and procured for every municipality, far and near.

There is no waste, therefore, for the advertiser seeking to book these orders from the Municipalities when he puts "The Calcutta Municipal Gazette" to work for him.

We have further the pleasure of making it known that this "Gazette" has established itself in the unique position of the successful pioneer in Indian municipal journalism and, as a reliable guide in matters concerning health, hygiene and other interests allied to civic progress, is widely noticed and quoted by contemporaries in India and abroad.

For rates and particulars, please write to—

CORPORATION NOTICES

To Contractors

Tenders are invited in duplicate for the following and will be received by the First Deputy Executive Officer on the date noted for each, up to 2 p.m. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for....." For specifications and tender forms apply to the Keeper of Records between 11 a.m. and 3 p.m. on week days and 11 a.m. and 1 p.m. on Saturdays. Price Rs. 2 per set.

1. Supply of Straw for the year 1941.
2. Supply of Hay for the year 1941.
3. Supply of Disinfectants during 1941-42.
4. Supply of Solid and Pneumatic Tyres and Tubes for motor lorries etc. during 1941-42.
5. Supply of Disinfectants during the rest of the year 1940-41.
6. Removal of steam coal from the Yard to the boilers at the Palmer's Bridge Pumping Station.
7. Construction of road at 58/2, Raja Dinendra Street.
8. Remodelling the inlet sewer to the silt pit in Mominpore Drainage Pumping Station.

Tenders for 1 and 2 will be opened on 26th November, for 3 on 28th November, for 4 on 29th November, for 5 and 6 on 6th December, and for 7 and 8 on 11th December, 1940. The rates quoted in tenders for the above are to hold good for three months.

N.B.—All cases of delay over a fortnight in the execution of agreements in respect of works and supply of materials will be reported to the Committee and the parties will not be allowed to execute the agreements after that period without obtaining orders of the Committee.

In case a party deposits earnest money by cheque, he must deposit the cheque at least three working days before the date of opening of the tender.

The contractors should maintain an uniformity of their names and styles of business, appearing on various documents, *e.g.*, Treasurer's receipts, tender forms, agreements, licenses and bills.

Any deviation from this on the part of any contractor whenever detected, will render his tender liable for cancellation.

Where tenders are submitted by a Corporation, it should be signed by a principal officer of the Corporation or by an agent duly authorised in that behalf and be attested by a witness. Where it is submitted by a firm, it should be signed by the proprietor or one of the partners or by an agent duly authorised in that behalf by the firm and be similarly attested.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office
The 20th November, 1940.

A. F. NABI BAKSH,
District Engineer, III.

District III Eng'g Office.
The 21st November, 1940.

Naming and Re-naming of Roads.

It is proposed that—

(1) Sankaritola 1st Lane and the strip of un-named road running in straight line thereof through Creek Row be named as "Nrishinha Mukherjee Lane".

(2) The road round St. James Square, on its north, east and west, in Ward No. 11, which is named as St. James Square, be changed to "St. James Street"

Any person having any objection to the naming and renaming proposed above should state the same in writing to the undersinged, on or before Saturday, the 30th November, 1940.

D. N. GANGULI,
Assessor.

Central Municipal Office,
The 13th November, 1940.

The following name has been sanctioned by the Corporation for a road in Ward 22 :—

The portion of Sankaripara Road from Turf Road to Bhowanipore Road, to be called "Bijay Basu Road."

D. N. GANGULI,
Assessor.

Central Municipal Office.
The 13th November, 1940.

It is proposed that the portion of Fakir Halder Lane from premises No. 46, Mohim Halder Street to 12/1/2, Fakir Halder Lane, be named as "Rajendra Halder Lane".

Any person having any objection to the re-naming proposed above should state the same in writing to the undersinged, on or before Monday, the 25th November, 1940.

D. N. GANGULI,
Assessor.

Central Municipal Office.
The 11th November, 1940.

Modification of Alignment.

Notice is hereby given under Section 308 read with Section 302 of the Calcutta Municipal Act III (B.C.) of 1923, that the Roads and Bustees Standing Committee of the Corporation in exercise of the powers delegated unto them in this behalf have prepared a scheme and plan modifying the portion of the alignment of the 30 ft. projected public street connecting the 20 ft. roads at 105 and 109, Hazra Road with the 40 ft. projected road (connecting the two ends of Nanda Lal Jiew Road) in Ward 27, which was originally sanctioned by the Corporation dated 19th July, 1940, so far as to affects Plot 11 of 105, Hazra Road.

Any person, having any objection to the same, should submit it in writing, so as to reach the undersigned on or before Friday, the 20th December, 1940.

A copy of the plan, showing the proposed modification in the alignment may be seen in the office of the Chief Valuer and Surveyor of the Corporation between the hours of 11 a.m. and 2 p.m. on all working days.

S. CHATTERJI,
Acting Chief Executive Officer,

Central Municipal Office,
The 21st November, 1940.

CORPORATION NOTICES—*Contd.*

Central Municipal Office.
The 19th November, 1940

Sale of Corporation Surplus Land

In supersession of all the previous notices in this behalf, fresh notice is hereby given for information of the public that the following plots of Corporation surplus land will be sold to the highest bidder above the reserve price at a public auction to be held by the Chief Executive Officer, at the Central Municipal Office, on Thursday, the 12th December, 1940, at 5 p.m., on the conditions specifically mentioned in the form of agreement to be executed by the successful bidder at his cost within seven days from the date of auction. The successful bidder shall have to furnish, in cash, an earnest deposit of 25 per cent. on the amount of the purchase money immediately upon the lot being knocked down, and in default thereof, the premises is to be immediately put up and re-sold at the risk of the first purchaser. Public are invited to attend the auction and offer their bids. The plans of the lands, the form of agreement, conditions of sale and other necessary particulars may be seen and obtained on personal enquiry in the office of the undersigned on all working days during the office hours.

Description of lands :—

(1) Land at the junction of Upper Chitpore Road and Joy Mitter Street, Ward 3, measuring 4 kottahs approximately.

(2) Lots Nos. 4, 5 and 9 of surplus land at the junction of Ekdalia Road and Ballygunge Station Road, Ward 27, measuring about 3 kottahs 2 chittacks, 2 kottahs 9 chittacks and 3 kottahs 7 chittacks respectively.

(3) Lot No. 7 on the new 35 ft. road connecting Monsatola Lane and Pipe Road, Ward 25, measuring 5 kottahs 13 chittacks approximately.

(4) Lots Nos. 11 and 12 on Hussain Sha Road, Ward 25, each measuring 5 kottahs 12 chittacks approximately.

N.B.—Lot No. 9 is tenanted and it will be sold with tenants

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office,
The 5th November, 1940.

Lease of Corporation Land, etc.

Offers are invited for the lease of a portion of land comprising an area of about 1 bigha 16 kottahs 14 chittacks and 35 sq. ft. situated within the Lansdowne Dhobikhana belonging to the Calcutta Corporation together with the steam washing plant including the drying room. Offerers should quote monthly rental inclusive of occupier's share of taxes. Conditions of the lease and other particulars may be had on application to the Health Officer. The successful offerer will have to pay in addition to the monthly rental, water charges at the rate of six annas per 1,000 gallons of filtered water to be supplied by the Calcutta Corporation.

Offers should be sent in sealed covers superscribed: "Offer for the Lease of Land and Steam Washing Plant" and should reach the Health Officer, Central Municipal Office, up to 2 p.m., on Wednesday, the 27th November, 1940.

BHASKAR MUKERJI
Secretary to the Corporation.

Central Municipal Office,
The 6th November, 1940.

Road Closed.

Notice is hereby given for information of the public that in pursuance of a resolution, passed by the Corporation, at their meeting held on 2nd October, 1940, in exercise of the powers, vested in them under Section 306 of the Calcutta Municipal Act (B.C. III) of 1923, the eastern flanks of Lower Circular Road, measuring approximately 5 kottahs, 15 chittacks and 29 sq. ft. bounded on the north by premises No. 153/1, Lower Circular Road, (Musjid) on the east by premises Nos. 154, 154/1, and 154/2, Lower Circular Road (used as Kat golas), on the south by newly constructed footpath of Lower Circular Road in front of premises No. 155, Lower Circular Road and on the west by Lower Circular Road, delineated in the map or plan prepared in this behalf and thereon coloured green, has been temporarily closed, with effect from the date of the Corporation resolution, noted above, for the construction of pathways

Health should not be made to wait

S. K. CHAKRAVARTI, LTD.
Water-Works, Drainage and Plumbing Engineers
Mission Row, Calcutta

Sound Plumbing means health and longevity

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

G. C. WOODWARD,
Supdt., S. S. Hogg Market.

Are you advertising to the real buyers of your products ? Or to outsiders, who cannot possibly mean anything to you.

Through the advertising pages of the *Calcutta Municipal Gazette*, you can reach the most potent people in the country, the men whose influence on municipal purchases is unlimited, the people who are placing millions of Rupees worth of orders.

Its readers are the men who are the leaders of public opinion, people who make the wheels of our municipal and public life turn, people who are really the key men of the present age.

The ablest advertisers in India are using the *Gazette* because they know that it is worthwhile to do so.

The advertiser who wants his advertising Rupee to buy the maximum of advertising attention cannot possibly omit the *Gazette* from his list.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETING FOR THE WEEK ENDING NOVEMBER 29, 1940

Councillor Sattar Resigns

The Corporation Meeting on Wednesday, the 27th November, accepted the resignation tendered by Mr. Abdus Sattar of his seat as a Councillor of the Corporation. Since he has been appointed an Assessor of the Calcutta Improvement Trust Tribunal he cannot, under the Act, keep his seat any longer in the Corporation.

Kabiraj Satya Brata Sen

Kabiraj Satya Brata Sen was elected to fill up the vacancies in the *Public Utilities and Markets Standing Committee* and the *Roads and Bustees Standing Committee*,—the first caused by the death of Mr. Notobor Chandra Dutt and the second by the resignation of Sir Hari Sanker Paul.

Sir Hari Sanker Paul

Sir Hari Sanker Paul was elected to fill up the vacancy in the *Primary Education Standing Committee* caused by the resignation of Mr. M. L. Madkar.

The Cohen Brothers

Mr. D. J. Cohen was elected to fill up the vacancy in the *Finance Standing Committee* caused by the resignation of Mr. Mohammad Yusuf, while Mr. I. J. Cohen was elected to fill up the vacancy in *the Public Health Standing Committee* caused by the resignation of Mr. M. A. Jubbar.

Committee Of Examinations

The Corporation, at their meeting held on the 15th February, 1939, while considering the rules for recruitment to Corporation services, appointed a Committee consisting of the Chairmen of all Standing Committees and this Committee was designated as the Committee of Examinations. This Committee was placed in charge of all the arrangements and work connected with the holding of examinations and the publication of their results. They were also authorised to frame any supplementary rules for the examinations that might be considered necessary and place them before the Corporation for their approval.

The Committee at their meeting held on the 20th November, 1940, resolved *inter alia*:—

That the Services Standing Committees be directed not to make any appointment in the clerical cadres pending submission of the report of the Committee of the Examinations to the Corporation.

In moving for the confirmation of the above at Wednesday's Meeting of the Corporation the Chairman of the Committee of Examinations, Mr. M. A. H. Ispahani, intimated to the House that he hoped that his Committee would be able to report susbstantial progress regarding the preparation of the report concerned to the Corporation on Wednesday next.

Speaking on the motion Mr. Hamoodur Rahaman said that the delay in making appointments in accordance with the results of the Competitive Examinations was due to the fact they had not all the informations regarding the results of the examinations before them. For example, they did not know how many vacancies there were; and further, they did not want that any of the vacancies should be fiilled up by persons other than successful candidate.

Mr. N. C. Chatterjee asked what was the report the Committee of Examinations were going to submit. The Examinations were held five or six months back and the results were out sometime in August last. How was it that appointments were being held up?

Mr. Chatterjee said that he had every sympathy with the object that there should be appointments only from the qualified candidates and that it would not be fair to appoint outsiders, who are nominees of influential men but had not passed these examinations. What he wanted to know was why appointments were being held up pending submission of the report of the Committee of Examinations. If the Committee of Examinations had only to arrange the names of successful candidates in order of merit and to group them according to the communities to which they belonged as per Rule 26 (a) of the Rules for Recruitment adopted by the Corporation. then it was a purely clerical job which could be done in a few minutes. He would, therefore, request Mr. Ispahani to explain or clarify the point, that is, what kind of report the Committee of Examinations were going to submit to the Corporation.

Mr. Chatterjee further said that if the appointments were held up with a view to alter the communal ratio which had been fixed by the Corporation, then they were opposed to holding up appointments till the submission of the report. For that was the function of the Corporation.

Mr. Ispahani pointed out that in Rule 26 (a) of the Rules for Recruitment to the Corporation services it was laid down that as soon as the results of the examinations were announced the Committee of Examinations should, in the first instance, arrange the names of successful candidates in separate lists according to the examinations they had passed, grouping them within each list according to the communities to which they belonged and then in the second place the Committee should circulate the list so compiled to the authorities entitled to make appointments by the delegation of powers for the time being in force.

Continuing Mr. Ispahani said that his Committee met on last Wednesday (November 20) afternoon, about three-fourth of an hour before the Corporation meeting. They rose for want of certain information and again met that day (Wednesday) but certain further information was required by a member of the Committee who wanted to see how the advertisement in regard to the examination appeared in the newspapers. This information could not be had and they had to postpone the meeting without making practically any progress. "I hope", Mr. Ispahani stated, "next Wednesday we shall be able to do good work and report to the Corporation substantial progress."

In conclusion Mr. Ispahani said that they were requesting the Services Standing Committees not to proceed with making appointments in order to fill up the existing and future vacancies by the people who had been successful in the examinations.

Mr. Hamoodur Rahaman moved by the way of an amendment:

(1) *That the Services Committee be directed to suspend making appointments in the clerical cadres pending submission of the report of the Committee of Examinations to the Corporation as to the best way of absorbing the successful candidates in the existing and future vacancies in the cadres concerned.*

(2) *That the Committee of Examination do submit their reports to the Corporation within a week.*

Mr. N. C. Chatterjee, by way of an amendment, wanted that instead of asking the Committee of Examinations to submit a report as to the best way of absorbing the successful candidates they should ask the Committee to submit a report in order to give effect to the Corporation resolution of appointing successful candidates in the existing and future vacancies. Because he thought that the Corporation was committed to the policy of appointing the successful candidates.

Mr. Chatterjee's amendment was negatived by the House and Mr. Hamoodur Rahaman's amendment as set forth above was accepted.

ENGINEER KILLED BY LIFT

Mr. N. C. Chatterjee's Bereavement

We regret to record that Mr. B. B. Chatterjee (64), an engineer-contractor, (uncle of Mr. N. C. Chatterjee, Barrister-at-Law), met with a tragic end following the breakdown of a lift in a house in Clive Street on Thursday last. The lift man was also injured in the right hand.

It is reported that while Mr. Chatterjee was getting into the lift on the third floor of the house, the lift suddenly dropped a few feet down sandwiching him between the floor and the top of the lift and killing him on the spot.

No Huts

The Corporation decided to issue a notice under Section 324 (i) (e) prohibiting the construction of huts in the following streets and localities which were recently improved by the Calcutta Improvement Trust—(i) Maharani Hemanta Kumari Street, (ii) Manmatha Nath Bhattacharjee Street (iii) Balaram Ghosh Street, and (iv) Nyaratna Lane.

After Two Years

While the Corporation was considering the question of granting compassionate allowance to the heirs of certain deceased employees, Mr. Madan Mohan Barman drew the attention of the House to the case of one *Dukhu*, who died in March, 1938, and the compensatory allowance was being sanctioned by the Corporation that day (Wednesday), November 27, *i.e.*, after two years.

Mr. Barman remarked that this was an instance of the dilatory way in which the Corporation moved.

Mr. M. A. H. Ispahani: I cannot be held responsible for the sins of my predecessors.

The Mayor: This is a general grievance.

Mr. Barman: You say you have come here to do away with the evils.

The Mayor: Let us do our work. The machinery is so clogged that it does not move easily.

Mr. Barman: There must be someone to grease it (Loud laughter).

Financial Position Of The Corporation

Chief Accountant's Reply To Government Audit Report

"THERE has been a progressive deterioration in the financial position of the Calcutta Corporation", states the Accountant-General, Bengal, inviting special attention of the Corporation to certain "very unsatisfactory" features of the Audit Report on the Accounts of the Corporation for the year 1938-39.

The Accountant-General proceeds to point out that the balance at credit of the Revenue Fund of the Corporation has fallen from year to year as the following figures will show: Balance on March 31, 1931, was 113·42 lakhs, on March 31, 1935 it was 105·58 lakhs; and on March 31, 1939 it stood at 80·18 lakhs. Thus, in 8 years' time, the balance has been reduced by no less than 33¼ lakhs of rupees or by about 30 per cent.

Cash Balance

Replying to the above criticism, the Chief Accountant of the Corporation says that under the Municipal Act, the Corporation has to maintain at the end of a year a minimum cash balance of not less than six lakhs of rupees. "Although we are always anxious to see our cash balance standing at as large a figure as our circumstances can permit", the Chief Accountant points out, "we cannot refuse the present generation of rate-payers from deriving the maximum benefit of the resources in our hand, so long as the minimum cash balance is maintained. I do not think this is a fit case for being dealt with through an Audit Report."

Another unsatisfactory feature of the Audit Report to which the Accountant-General invites special attention of the Corporation is the "chronic arrears" in the collection of consolidated rates. The Accountant-General says:

Chronic Arrears

"The chronic arrears in the collection of consolidated rates have contributed largely to the unsatisfactory and deteriorating character of the finances. The outstandings are increasing by leaps and bounds. On March 31, 1924, the outstandings were Rs. 3·07 lakhs, on March 31, 1935, they mounted to Rs. 44·49 lakhs and they further increased to Rs. 53·14 lakhs on March 31, 1939.

"A rise from Rs. 3·07 lakhs to Rs. 53.14 lakhs or of 16.30 per cent. in the course of 15 years is indeed appalling and unless drastic steps are taken, there is very little chance of any real improvement in the financial position.

"A sum of nearly Rs. 80,000 has been outstanding on account of consolidated rates from 15 persons for periods varying from one to six years. Suits have not been filed nor have warrants been issued in these cases. In fact, no special action, appears to have been taken to realise these dues. The Corporation has extensive powers and various ways of dealing with defaulters and it is therefore, all the more regrettable that so little has been done where so much was possible."

Replying to the above criticisms, the Collector states:—

"The position of the department with regard to heavy outsandings was thoroughly discussed by the Finance Standing Committee at the close of the year under report, when the difficulties experienced by the department in taking action against Receivers, Trustees, Matwallis, Debutter properties and Bustees, etc., were explained. The Committee also discussed the matter in connection with para 15 of the Audit Report for 1937-38, regarding outstanding consolidated rates and passed a resolution informing the Auditors that definite steps for improving the position was taken. The department has made a splendid collection in the year 1939-40 in spite of various difficulties and the position of outstandings has definitely improved since.

As regards the remarks in the last four lines, I am afraid, they would not have come forth from one who is conversant with the power given to the Corporation

CALCUTTA RADIO STATION

Opening of New Studios

His Excellency the Governor of Bengal will perform the opening ceremony of new studios at the Calcutta Station of the All-India Radio on December 3, when His Excellency will broadcast an address to listeners. This will be preceded by an introductory talk by Mr. A. S. Bokhari, Controller of Broadcasting.

under the Act. Every year large outstandings are being placed before the Finance Committee and every one is feeling that amendment of the Act is necessary to remove the difficulties of collection. A large number of cases against Receivers, Trustees, etc., remain outstanding. Equal difficulty is presented by *bustee* bill payable by owners living in joint families. The Corporation has been powerless to deal with these people who are responsible for the majority of the outstandings.

To say the least one simple attention in the procedure made at the instance of Government Auditors has created an impossible situation. Originally, rate-bills of big buildings of which only a small part was occupied, could be disposed of smoothly by allowing proportionate remission for vacancy which has since been discontinued. Such cases are obviously accumulating for the last few years, as Collector's power falls short.

However, as this is not the place for discussing such difficulties in detail, I better stop here."

Following are the remarks of the Chief Executive Officer on the Accountant-General's observations regarding arrears in the collection of consolidated rates :—

"There can be no doubt that the position of our collection has become a most unsatisfactory feature and the Auditors have only drawn attention to a matter which has been engazing the attention of the Finance Standing Committee and the Corporation. To improve matters certain proposals have been made and it is certain that these will help to raise our percentage of collection. There may be difficulties as the Collector has pointed out but steps might be taken by the department for re-establishing its previous position as regards collection."

HOOGHLY BOARD

Dispute on Education Grant

A dispute has arisen between the Howrah District Board and the Commissioner of the Burdwan Division, over the former's refusal to allot any money for the district school board.

The Divisional Commissioner returned the current year's budget estimates of the Board unapproved, suggesting that provisions under certain heads of expenditure as made in the budget should be reduced on the basis of the average annual expenditure under those heads for three years ended 1938-39 with a view to finding out, at least Rs 20,000, for contribution to the district school board towards primary education in the current year. The Commissioner added that there was hardly any justification for the Board to shake off its liabilities on the plea of education cess not having been levied as yet.

At a special meeting the Board has decided to inform the Commissioner that it will not be possible to retrench expenditure according to his suggestion for finding money for the school board.

DR. RAJENDRA PRASAD IN CALCUTTA

Meets Sir Jadunath Sarkar

Dr. Rajendra Prasad accompanied by Mr. Muthura Prasad and Mr. Joychand Vidyalankar arrived in Calcutta on Thursday morning from Patna to raise funds for completion of the History of India, which is being prepared under the supervision of Sir Jadunath Sarkar and other distinguished scholars.

Dr. Rajendra Prasad soon after his arrival in Calcutta met Sir Jadunath Sarkar for about an hour.

The main object of Dr. Prasad's visit to Calcutta is completion of all arrangements in connection with Compilation of Indian History which is proposed to be written in twenty volumes. About ninety scholars have agreed to write on various chapters of different periods beginning from very ancient times. Sir Jadunath Sarkar, it is learnt, will write on Akbar and since other portions of Moghul Period. Dr. P. Bagchi will write on ancient Hindu Period. Dr. Prasad is also collecting funds in this connection.

Dr. Rajendra Prasad was a bit indisposed in the evening owing to a slight attack of asthma.

AN OATH FOR OUR CITY FATHERS

"We believe in Our City, in the spirit of her institutions, and in the principles of freedom of thought, equality of opportunity, and sense of individual responsibility, for which she stands: and as an expression of our gratitude to those who have wrought to give us this priceless heritage, we pledge to these free institutions our allegiance and loyalty in times of peace as well as in hours of peril, and we will do all in our power to aid Our City to reach the goal visioned by our forebears."

Calcutta—"My Home Town!"

[By H. C. Mukherji]

NO apology is needed by one born and bred in Calcutta and living here nearly for fifty-six years, to express similar sentiment as those conveyed in the famous line: "For all thy faults, I love thee still." The same sentiment, in fact, must surge in million hearts attuned to patriotism, which is but another term for love of one's country, for, did not another Poet also sing—

"Breathes there a man with soul so dead.
Who never to himself hath said,
'This is my own, my native land'?"

Truly and honestly, I am proud of my home-town, Calcutta, which, during nearly my own fifty-six years, has grown by leaps and bounds and promises to grow and develop still further even long after I have departed for ever!

Yes, Calcutta is my home-town, my pride uncontrollable, my childhood's vision of the world around. When, therefore, anything happens which seems to detract from that pride and makes me feel ashamed of my favourite city, the city of my birth, I grieve genuinely and wish I could prevent such a calamity. I do not know if all those who have been born in Calcutta think and feel as I do; but I know Rabindranath does and it is no small privilege to be in such exalted company.

If one is proud of one's parentage, one must also be proud of the city of one's birth and of one's native land. In the estimation of a true patriot, his native land is the best on the face of the Globe—where the breeze brings balmy fragrance and the luxuriant fruits and flowers are cool and refreshing, where the very earth is paradise—the smell of sods turned in by the scythe is better than the scent of perfumes, the fields are greener than elsewhere, the water of the flowing river is like nectar of the Gods—and where, in the words of the peasant poet:—

"There simmer first unfolds her robes
And there the largest tarry."

If I love my home-town and my native land, I also love another place just as dearly—the home of my ancestors whose blood flows in my veins, whose high ideals are my proud heritage and whose decendant, however unworthy, I am. Whoever, indeed, has not felt proud to visit his ancestral home ensconced in some village far, far away from the bustle of the city,—a tiny spot where mighty minds were born to commune with the Infinite, for that only was their daily and honest avocation? How placid is the atmosphere of the village, with its rivulet flowing peacefully by, its crystal-clear streams, fields and meadows, its cowherds and flocks, its noontide silence broken betimes by the singing lark and the chirping sparrows! the very naturalness of village life is its greatest attraction, and it will be a bad day for us when our village gradually become sophisticated and unnatural and lose their pristine purity and simplicity.

I beg your pardon, gentle readers, if I seem to be digressing; but my thoughts are fixed on the central theme of love of one's home-town and are so inter-linked that it can hardly be helped.

I admit I have not travelled too far and wide, but I have been to many a so-called "earthly paradise"; and yet I have longed to be back in Calcutta. There is something about this city which draws me to it as iron or steel is drawn to a magnet. I hate the terrible smells and the winter's pall of smoke in the glorious city, the perpetual dust nuisance which is abated only during the monsoon months to some extent, the eternally busy brigades of flees and mosquitoes by day and night; the green-fly invasions and the parennial presence of insects of all kinds and, of course, the monsoon flooding of streets. Yet the compensations are manifold.

If I go away on a change to the hills or the seaside or to some place in Bihar or the United Provinces, I may like the new environments for a few days. But as soon as the novelty wears off, I decide to come back to my old, favourite haunts. The hill breeze is surely bracing enough, the deep-well water is admittedly better than medicines for improving the digestion; but the village water looks suspicious, and no bath in the village tank is satisfying enough. For my drink and my bath I prefer Calcutta fluid water to any other fluid; and as for my health, there is no place like this city—with its connected drainage systems and its flushing arrangements for safe disposal of filthy sewage. In the majority of Indian towns even today, not to speak of villages, one would often come across human excreta in the fields while taking the morning or evening constitutional, the abominable strench promptly compelling a resolution not to visit the place again.

In the matter of communications, what changes have taken place during the last half-a-century! Calcutta has been growing and growing and growing, and the transportation of citizens and visitors have to be considered. In the old days, hackney carriages and horse-drawn trams (up to 10 at night) were the only conveyances available. The former gave one a real pain in the neck as there were no rubber tyres on the wheels of the carriages; and as the horses were not too well-mannered, a hackney carriage drive was far from being a pleasurable experience. In the majority of the towns and villages in those days, the only available conveyance used to be bullock carts, and even now this is the rule except in a handful of towns where taxi-cabs or buses have appeared. There is no trouble in Calcutta, by day or night, to reach from one end of the city to another by bus or taxi, and if short distances are traversed the rickshaw is always handy.

A new era in travel began in 1902, when electric trams were introduced in Calcutta, and the improvements effected in the bogies since then have made them the most comfortable conveyances in India, if not in the East.

Thanks to the operations of the Calcutta Improvement Trust, the face of the city has been changed considerably during the last twenty-five years. Broad highways have been constructed where congestion used to be the rule, while in the

maze of narrow winding lanes murders were committed in broad day-light. Pilgrim traffic to Kalighat, through interminable byways, used to be a source of much worry and discomfort, which, however, is not experienced to-day. In the southern and also the central and northern districts of Calcutta, the hand of the Trust is visible. So that one has been away for even a dozen years will be bewildered by the transformation which the city has undergone.

The educational and cultural life of Calcutta compares favourably with that of any other city in the world. The educational institutions that abound here,—the public libraries, including the Imperial Library, the Calcutta University, the many cultural bodies that adorn the city, where the incentive to learning is strong, the Indian Museum, that wonderful repository of knowledge—are still all objects of pride the like of which cannot be seen anywhere except in some of the biggest cities.

In the domain of sports, pastimes and amusements too, Calcutta hold a very advanced place among the cities in India. Unfortunately, however, too much time and attention are often devoted to this phase of Calcutta life to the detriments of its cultural side. Too much gambling is indulged in by both men and women on the Race Course as well as in other fields, and, as a result, the Indian community is being impoverished daily. A fact, almost deplorable fact, which may not generally be known, is that a large number of Bengali families, residing mostly in Southern Calcutta, (which used to be among the most prosperous up till, say, twenty-five years ago) have become so very indigent through their gambling propensities that their properties have been sold and they are living on charity. It is a pity that attempts remain yet to be made to discourage gambling. On the contrary, fresh fields are being opened out, from time to time, so that the habit of gambling may thrive!

Amusements are of various kinds. Those generally connected with city's night life at restaurants and questionable rendevous are, of course, the most objectionable. But as enjoyment of night life is not given to many, the evil has not been able to establish itself far and wide, as has been the case in Bombay.

The European Stage in Calcutta, and for that matter in India, is practically dead, which is a great pity from the cultural point of view. The Indian Stage goes on, but it has a very precarious existence, and if its success in the past had not been too glorious, it has now a mighty competitor in the Screen, both foreign and Indian, with the latter proving more and more formidable with the passage of time. As a cultural institution, the Screen today is a potent power; and in a city like Calcutta, it should wield an influence second to none, provided people of culture turn their attention seriously to its many problems of advancement. Greater minds than mine should, however, tackle this problem.

But Calcutta is truly a great city; and I love and respect it as being the city of the birth of many of my distinguished fellow—Bengalis. Yes, Calcutta "with all thy faults, I love thee still.". *Calcutta for Ever!*

BENGAL PRESS COMMITTEE

Personnnel Announced

A Provincial Press Advisory Committee has been appointed for Bengal.

In a statement to the press, Mr. Tushar Kanti Ghosh, the Convener for Bengal, says that the President of All-India Newspaper Editors' Conference, Mr. K. Srinivasan, has finally approved of the following comprising the Bengal Provincial Press Advisory Committee. :—

Mr. Tushar Kanti Ghosh—*Chairman.*
Mr. W. C. Wordsworth (Statesman).
Mr. Satyendra Nath Majumdar (Anandabazar Patrika).
Mr. Mahomed Khairul Anam Khan (Azad), and
Mr. Janaki Jiban Ghosh (Advance).

The Committee will begin work at once.

Let each one of us take this oath—

"We will fight for the ideals and sacred things of the city, both alone and with many.

"We will revere and obey the city's laws and do our best to incite a like respect and reverence in those above us who are prone to annul and set them at naught.

"We will strive unceasingly to quicken the public's sense of civic duty; and thus, in all these ways, we may transmit this city, not only not less, but greater, better and more beautiful than it was transmitted to us."

—The oath of the Athenian Youths.

HEALTH & HYGIENE

How To Avoid Infection For The Baby

FORTUNATELY a baby who is being nursed by the mother has a good chance of escaping most infections. If cases occur in the houses; however, baby may contract it: then is the greatest care necessary, because a child under two has little resistance, and an infectious illness will often prove fatal.

Prevention is the best safeguard. A few drops of good personal disinfectant should be put into the bath. A good disinfectant, either fluid or soap, will not harm the tenderest skin. All baby's clothes should be washed separately, in water to which the disinfectant has been added. Toothbrush, sponge, towels should be kept well away from those of any other members of the family, and should be disinfected each day and hung out to dry.

No one but the immediate family circle should ever be allowed to kiss the baby.

Many illnesses begin with a cold in the head or a sore throat; these symptoms, even if slight, should be taken seriously, as the child may easily become susceptible to colds. It is important to find out and remove the cause, because the habit of taking cold is easily acquired, and may result in many serious conditions which may damage the health permanently.

If the baby is well, no weather, except fog, will harm it, and the best part of the day should be spent in the open air. If there is any tendency to a cold, a day in one room to avoid added chill will prevent it developing. To take any symptom in its first stage, and treat it will avoid prolonged illness.

Anyone suffering from a cold or cough, or feeling "off colour," should not go near the baby. if they are members of the household it is wise to isolate them. A day or so in bed will keep them from spreading infection, and also give the patient a chance to recover without meeting any other germs. In this way the nature of the illness will make itself known before anyone else becomes involved. Above all, this should apply to the nurse who is in such close contact with the baby.

The First Signs

The first signs of illness in a child are vomiting, feverishness, lassitude or unusual sleepiness.

These first hours are of the greatest importance, and a doctor should be called in at once. Many illnesses, such as whooping cough or diphtheria, are treated by serum or injection, which is ineffective if not given in the early stages.

If the child is unwell, put it to bed at once in a warm bed and well-ventilated room. A feverish child is apt to throw off the bedclothes, so put on a vest or woolly coat and socks, for cold feet are a danger at all times. It is very important not to risk chill.

Symptoms of Measles

One of the most common illness that attack the child is measles. However slight the attack, this must be taken seriously. It is highly infectious in the early stages before the rash appears. The first symptoms are a cold, often slight at first, running at the eyes and nose, sneezing, and very often a dry cough. The rash usually makes its appearance about the fourth day. Many mothers do not attach much importance to an attack, and it is still frequently the case that all the children of a family are allowed to be together in order that they may all get it over at the same time.

The complications which arise from measles are many. Mastoid, with permanent impairment of hearing, discharging ears, and bronchial pneumonia are often the direct result of an attack.

Measles, combined with whooping cough, a very frequent combination, is exceedingly dangerous, and very commonly, especially in the young infant, proves fatal.

Convalescence is perhaps the most important part of any illness. Whilst the child is really ill it is easy to keep it in bed, but when the child improves there may be too quick a return to normal life. The chances of fresh chill must be guarded against.

Dangers After Careless Convalescence

Many of the serious illnesses late in life are the after results of infectious complaints contracted in childhood. After influenza, heart disease or lung trouble is apt to develop; after measles, deafness may result, and eyes may be affected; and after an attack of scarlet fever, heart or kidney trouble, and very often rheumatism will make their appearence.

So often when convalescing from one infectious illness another is contracted. With this in view it is of the greatest importance that all sources of infection should be kept from a small child.

Liver oils are rich in vitamin fat soluble A, and the sunshine vitamin D, and is an effective antidote against infection. A few drops, working up to half a teaspoonful a day, will protect the baby during the winter months.

If there is any symptom of digestive upset or feverishness, go back to an all-milk diet until the trouble disappears, then a gradual return to the usual diet should be made. Begin with the lightest foods, such as steamed fish or lightly boiled egg. This variation in diet will work wonders, and is a wise precaution throughout life. Milk requires no effort on the part of the digestion, and has great healing qualities, and therefore, will not throw any extra strain on the organs, and will allow them to make the adjustments necessary for return to health.

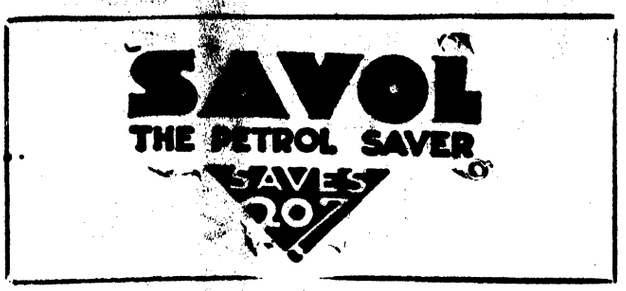
Machine Accounting In American Municipalities

ALL the accounting, billing and clerical work will probably be performed by business in the cities of to-morrow. Meanwhile, a great deal of this work already has been mechanized. No manufacturer has been more successful than the Burroughs Adding Machine Co. in fitting book-keeping machines to the kind of office work that is common to all municipalities. The accompanying tabulation of typical installations in 15 cities in 15 states shows these machines being used to do the accounting, posting and billing for taxes, water and electricity, for indexing every dollar spent against the budget appropriations and showing inexorably what remains.

These billing and general accounting machines are tailor-made for the job and can be equipped with features which will permit writing the bill, ledger and summery sheet at one operation. On payroll work, the check, employee's statement, payroll register, and earnings record can be written simultaneously. On tax work, the calculations are made at the same time that the tax bills and rolls are written.

Jacksonville and Pensacola, Fla., use Burroughs billing and general accounting machines on water accounts, and in the latter city for budget accounting also, with the possibility of tax work being added. Escanaba, Mich., uses this type machine for water and electric billing; Royal Oak and Muskegon for water bills: Marquette for its 5,500 tax items and its water accounts; Saginaw for its 27,303 tax accounts and its water and electric bills.

At Albert Lea, in the state of Minnesota, where the counties do the tax work, this type machine handles water bills, and budget, payroll and cost accounting. At Ridgewood, N. J., budgetary accounting will be added to the machine's present chores in the Tax and Water Departments.



City.		No. of Tax Parcels	Machines used on
Albert Lea, Minn	...		WBPC
Anaheim, Calif	...	4,000	TWEB
Battle Creek, Mich	...	15,000	TW
Belleville, N. J	...	7,02:	TW
Frankfort, Ky.	...		W
Gainesville, Fla.	...	4,00:	WEB
Hartford, Conn.	...	22,000	T
Helena, Mont.		6,000	TW
Jamestown, N. Y.	...	7,300	TWEB
Kenosha, Wis.	...	16,000	TW
Kingsport, Tenn.	...	3,300	TWE

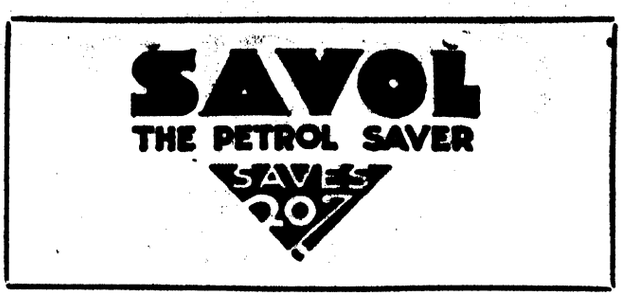
Tucson, Ariz.	...		W
Weymouth, Mass.	...	10,500	TW



A Few Burroughs Book-keeping Machine Installations
T=tax work; W=water bills; E=electric; B=budget; P=payroll; C=costs

"The machine makes a tax bill and record sheet for each piece, beginning Block 1, Lot 1, including sub-sections," says City Recorder and Treasurer J. R. Pectal, of Kingsport, Tenn. "For three years we have found this system satisfactory. Our assessments are kept on the same size sheet, and the same machine is used for recording the assessment levy and the payments."

In addition to these billing and general accounting machines, Burroughs builds a complete line of low-cost desk-model machines for ledger-posting, utility and tax billing and budgetary accounting.

Celotex Hardboard Uses include Railway Carriage Panelling, Floors, Concrete Forms, Flush Doors, Car Bodies, Exterior and Interior Decoration, etc.
Distributors for India:
SHAW WALLACE & CO., CALCUTTA

For purchasing departments, there is a fanfold order-writing machine easy to run and quick to produce neat, accurate purchase orders. For general office, there is a full line of calculators, adding machines and type-writers.

Much practical thought has been given by Burroughs to the small municipality having a thousand, or fewer or few more, tax and water accounts, and sometimes electric accounts, to keep and to bill. By using small machines now made available, it is possible to produce records as accurate and legible as those of any of the cities mentioned in this article. The tax and utility accounts can be posted by a small public utility machine able to add and subtract. There is also an automatic recepting machine which furnishes a triple check on tax, license and other money received, and tells who received each payment. For miscellaneous work, and where up to 14 copies are desired, there is a form-writing machine suitable for handling delinquent notices, payroll, bills, vouchers with voucher register, voucher checks with check register, and any forms together with journal or summary sheet.

Streets And Bridges

American Street Upkeep Costs

Street repairs and street cleaning represent the largest part of the public works maintenance cost in the big cities of the country, according to a survey of the American Public Works Association. For these two functions 16 of the cities paid out approximately $15,000,000 in 1939.

While appropriations for street cleaning in these cities were increased $200,000 over 1938, the funds set aside for street repair were reduced more than $1,000,000, which is false economy for cities which are attempting to defer needed street repairs. The annual bills for all maintenance activities in seven of the cities surveyed run well over $1,000,000 each for the past two years. Other functions usually included as maintenance activities are the repair of bridges and other structures, sewer maintenance and cleaning, traffic signs and the inspection of pavement cuts.

Topping the cities surveyed, in outlay for total maintenance expense, is Cleveland, Ohio, which estimates for 1939, an expenditure of $3,345,751, or an increase of $300,000 over 1938. Detroit, Los Angeles, Philadelphia, Milwaukee, Baltimore and Washington, D. C., are other cities spending more than $1,000,000 for public works maintenance in 1939.

For the smaller cities in the group, 1939 maintenance appropriations run as follows: Toledo, Ohio, $577,196; Oakland, Calif., $399,920. The maintenance bill for Syracuse, N. Y., is estimated at $250,362, but street-cleaning figures are not included. Atlanta estimates 1939 expenditures at $358,470, and Louisville expects to spend $459,813, excluding structure maintenance and pavement-cut inspection. St. Paul will pay $288,761 for street and sewer maintenance and cleaning.

Snow-removal appropriations play a sizable role in street-cleaning costs of the northern cities. In Rochester, for example, $224,000 will spent for ordinary street cleaning in 1939, and in addition an appropriation of $360,000 has been made for snow removal. Toledo has added $22,500 for snow removal to its current appropriation of $193,000 for street cleaning. Detroit's 1939 street-cleaning bill is estimated at $494,191, *plus* $92,459 for snow removal.

CALCUTTA NEWS & VIEWS A Digest

Keshub Chunder Sen

On the occasion of the "Janmotsav" a bust of Brahmananda Keshub Chunder Sen was unveiled on the 19th November last, by Mr. S. C. Mukherjee, I.C.S. (retired), at Keshub Academy in the presence of a large gathering of the pupils and their guardians.

Mr. Subhas Bose Ill

The hearing of the case against Mr. Subhas Chandra Bose, who is charged under the Defence of India Rules in connection with two speeches delivered by him in February last, was again adjourned to December 6, by Mr. V. N. Rajan, Additional District Magistrate of Alipore, on Monday last.

The Superintendent of the Presidency Jail, where Mr. Bose is at present detained, informed the Magistrate that Mr. Bose was unfit to stand his trial even inside the Jail and that the case might be adjourned for about 10 days to enable Mr. Bose to recover.

Mr. Debabrata Mukherjee, defence Advocate, informed the Magistrate that on Sunday evening, he and Mr. B. P. Pain saw Mr. Bose in Jail and found him too weak to be engaged in any lengthy consultation or to follow the proceedings of a trial. In the circumstances, they felt that no useful purpose would be served by their taking further part in the proceedings and their client (Mr. Bose) had also released them from their engagement in this case. They would appear on the next date provided they got further instructions from Mr. Bose.

Mr. Pain also wrote a letter to the Magistrate informing him of his inability, in the circumstances, to take part in the proceedings.

Calcutta Black-Out Again

The attention of the public in Calcutta and the industrial area of 24-Parganas, Howrah and Hooghly is, says a Press Note, drawn to the fact that there will be a test of the A.R.P. organization on December 11 and not December 4, as previously announced in the Press.

The test will last from 7 p.m. till midnight and will involve a trial of the lighting restriction arrangements that would be enforced under statutory order during an emergency period, and also a test of the efficiency of the various branches of the A.R.P. organization.

Certain modifications will be allowed in the lighting restriction arrangements in order to avoid excessive inconvenience to the public. The owners of the motor cars will not be compelled to fit masks on their motor vehicles in the manner indicated in the recent Press Note issued on the subject. The following arrangements will be permitted on this occasion :—

"The bulbs of the head lamps will be removed and the side lights will be obscured by the insertion behind the glass of material equal in density to that of a sheet of newspaper.

Railway services will not be suspended.

The Government appreciate that life under emergency conditions, such as will now be tested, may be inconvenient to a number of people. They consider, however, that it is essential that these trials should be carried out as early and as thoroughly as possible, and are satisfied that a test for only an hour late at night is not really long enough to gauge the extent to which the life of the City and area can be adapted to changed conditions. The Government trust and believe that as on previous occasions they will receive the willing co-operation of all members of the public.

Bengal Library Association

The usefulness of library movement in India was emphasized by Mr. W. C. Wordsworth on Sunday last, when he gave away certificates to the successful candidates of the fourth summer course of training in librarianship held by the Bengal Library Association.

The function took place at the Central Library of Calcutta University in the Ashutosh Building, College Square.

After stressing the important part that libraries play in education, Mr. Wordsworth said that in England it was now realized that a good library was an essential part of public health and no town was properly constituted which had not a well-equipped library and a trained librarian who knew how to bring the books under his care to the use of the public. Library work was new to India. They must not only have their books but they must also know how to take care of their books. This was whether the utility of this Association came in. It was doing something; indeed, it was doing more than what had ever been done in India in this respect. It was trying to establish the view that library work should be learned. They were just at the beginning and it was their duty to make the profession appreciated. Such pioneer work imposed hard work and sacrifice.

Mr. Munindra Deb Rai Mahashaya, President of the Association, said that 25 candidates took the training course of whom 15 were successful. It was a gratifying feature that for the first time four women joined training classes this year and of these two were successful.

Dr. Nihar Ranjan Roy, Director, gave a short account of the work of the training course.

Calcutta University Buildings

Considerable structural changes for beautifying the Calcutta University area are proposed to be undertaken in near future.

One of the eyesores in the University group of buildings was the tiled structure lying in between the Darbhanga Buildings and the Senate Hall, which so long housed the University Press. This

structure has now been demolished and the Press has been removed to a more commodious building constructed for the purpose at Hazra Road, Bhowanipore. Thus a considerable space has been released.

There are two proposals now before the University authorities as regards the utilization of the site. One is to erect a new building there to house the Ashutosh Museum of Indian Art which is at present accommodated in the western side of the Senate Hall, and the other is to lay out a flower garden. The latter idea seems to have found more favour with the University authorities and it is likely that steps would be taken to give effect to this proposal.

It is also proposed to pull down the ugly tiled structures situated in the north-west corner of the Senate House, as also the iron railings on the northern boundary of the University. The latter will be replaced by compound walls. It is also contemplated to remove the inconvenience now being felt as regards the parking of cars within the compound by the erection of a number of garages.

Women's Conference in Calcutta

Various matters relating to the status of women educationally and socially were discussed at the annual constituent conference of the All-India Women's Conference, Calcutta Branch, which began its sitting at the Ashutosh Hall, Russa Road, Calcutta, on Saturday last and concluded on Tuesday.

Mrs. A. N. Chaudhuri, who presided, said that in the terrible times through which the world was passing one was sometimes tempted to wonder whether anything was worth while. They did however, know that service in the true sense of the word could never fail to bring help to the world, the nation and the individual, and if they built on a sure foundation their work could not perish.

She appealed to her hearers to continue as they had begun and not be led away by the spirit of the times to engage in more spectacular activities which could not be as useful in the end as the work which they were trying to do. This work covered a wide field.

The following message from Mrs. Sarojini Naidu was read :—

"Breadth of vision, sincerity of purpose and unity of effort should be the watch-word of the Women's Conference. Now more than ever when the whole world is involved in a tragedy of conflict and untold sufferings women must prove their faith and courage and fulfil their high age-old mission of bringing order in the midst of chaos, hope in the midst of despair and peace out of the very heart of strike.

"The ideal of womanhood, and especially of Indian womanhood, has always been service. To-day the cry of stricken humanity is for a service given with love and understanding."

Mrs. Basanti Chakravarti, Joint Secretary, read the report for the past year which stated that the Calcutta Branch had been working successfully and that its branches in South Calcutta and Burrabazar had increased their membership. The Harijan Baby Clinic (*Bal Mandir*), the Hostel for Women Students and the Harijan Night School were showing satisfactory progress, and the newly-formed Adult Education Committee was organizing a number of adult schools.

The following delegates were elected to the 15th session of the All-India Women's Conference to be held in Bangalore :—

Mrs. S. N. Roy, Mrs. H. Ghose, Mrs. K. C. Roy, Miss Renu Roy, Begum Farhat Banu, Lady Sinha, Mrs. Hakam, Mrs. Lila Latika Banerjee, Miss Dolly Bose, Dr. Mrs. Joshi, Miss Bhandarkar, Mrs. Zoha, and Mrs. Shamsun Nahar Mahmud.

Several important resolutions were adopted.

The first resolution was to the effect that the appointment of an Inspectress of Women's Hostels by the Calcutta University was not sufficient, and the University was urged to establish at least two women's hostels under its direct control and to insist upon colleges admitting women students and maintaining hostels for their own women students. Further, it stated that all the University regulations regarding hostels should be enforced more strictly and rigidly, and that women Fellows of the University should be on the Residence Committee of the University.

The next resolution called upon the Government to introduce compulsory free primary education for both boys and girls, and also to establish a requisite number of adult education centres. The Conference emphasised the need for a comprehensive syllabus, including a course for two years, for the adult education centres.

Another resolution urged that civic training, with practical application, should be made a compulsory subject in all stages of education, both for adults and children.

On the concluding day the following resolution were adopted :—

"This conference whole-heartedly congratulates Begum Farhat Banu for bringing forward a Bill for the control of widows' homes, orphanages, etc., before the Bengal Legislative Assembly, particularly in view of the fact that this measure will bring about the achievement of the real purpose of all such institutions. It requests the Select Committee, appointed in connection with this Bill, to give their serious consideration to the recommendations embodied in the representation drawn up by the Sub-Committee appointed by the Branch and further requests them to make certain that this Bill becomes an effective measure.

"This conference considers that the time has arrived when energetic steps should be taken to remove the existing defects and omission in our systems of marriage laws, and in furtherance of the object, necessary legislation should be initiated forthwith particularly in regard to—

(a) Amendment of Sarda Child Marriage Restraint Act, so that its provisions are made effective.

(b) Notification and Registration of marriage.

(c) Suitable provision in Hindu Law for divorce on the following grounds—(i) Desertion, (ii) Lunacy, (iii) Cruelty, (iv) Adultery, etc.

"This conference expresses its deep confidence in the unity among the different communities which characterises the women's movement in India. It considers, that it is the duty of Indian women to take an active part in promoting mutual understanding among different sections in the country and thus make a direct contribution towards the cause of unity and progress of India."

BOMBAY CORPORATION

Meeting Adjourned

The Bombay Municipal Corporation adjourned, on Saturday evening, without transacting any business. The adjournment motion, it is understood, was in connection with the conviction of Mr. L. M. Patil, a former Local-Self Government Minister and also that of Pandit Govind Vallabh Pant, ex-Premier of the United Provinces.

The Late Mr. R. N. Sasmal

The need for compiling an authoritative biography of Deshapran Birendranath Sasmal was stressed by Mr. Ramananda Chatterjee presiding over a crowded public meeting held on Sunday evening at the Albert Hall in observance of the sixth anniversary of his death.

A resolution requesting the Calcutta Corporation to name, in perpetuation of his memory, a park or street, preferably Southern Avenue, after Birendranath was adopted at the meeting.

Hirendranath Datta Honoured

A picturesque ceremony marked the presentation of an address by members to Mr. Hirendranath Datta, *Vedantaratna*, one of the founder-members of the Bangiya Sahitya Parishad. The function took place at the hall of the Sahitya Parishad on Saturday afternoon under the presidency of Sir Jadunath Sircar, President of the Parishad.

Sir Jadunath said that as a philosopher and literateur Mr. Datta had done real service to Motherland for a period extending over 50 years. All his inspiration during this period found expression through Bengali literature. He had served his mother tongue devotedly and unsparingly. His example ought to serve as an inspiration to young men of Bengal to follow.

Mr. Datta in reply said that he was at the fag-end of career. He was only waiting for the call to pass into the otherland. At this age if the kind words of his countrymen sounded sweet to his ears, no one need be surprised. The tiny seed which was shown many years ago had now grown up into a big tree. The tree had grown up through storm and stress and many difficulties and was now laden with flowers, fruits and leaves. He considered himself blessed by having the opportunity to serve his mother tongue for the period of last 50 years. He believed that if they had succeeded in building the foundation of the Parishad truely and surely, whatever flood might sweep their national life, they would emerge unscathed.

The Poet Rabindranath Tagore sent a message stating that the Sahitya Parishad had earned the gratitude of the nation by organising the reception, an honour which he richly deserved.

The address of welcome was read by the Hony. Secretary of the Parishad, Mr. Brajendra Nath Banerjee.

THE SANTI INSTITUTE

ESSAY COMPETITION

The Santi Institute (26/1/A, Sasi Bhusan Dey Street, P. O. Bowbazar, Calcutta) have also opened the competition this year. The subjects are: (1) Characteristics of Nabin Chandra's Poetry, (2) Usefulness or otherwise of Insurance, (3) Contributions of Women to Bengali literature (open to ladies only), (4) Causes of loss of health of the Bengalees and their remedies, (5) Indian Painting, (6) Character of Hanuman in Ramayan, (7) Utility of Studying Geography (for students only), (8) Students duty towards their Superiors (for students only), and (9) Is Science a curse to the society?

All the essays are to be written in Bengali on one side of foolscap paper, excepting the last two subjects. The Competition is open free to the public and any one can write on more than one subject. The winners shall have to secure at least 50 per cent. of the marks and silver medals will be awarded to them. The essays are to be sent to Mr. Bipradas Dutt, the Hon. Secretary on or before the 31st December, 1940. Subject Nos. 7 and 8 are to be certified by the Head Master or the Principal. If the competitors require any further particulars they are requested to communicate with the Secretary.

Letters TO THE EDITOR

[The Editor does not hold himself responsible for the views expressed by the correspondents]

I

ENTALLY GRIEVANCES

To The Editor, "Calcutta Municipal Gazette."

Sir,—May I use your columns to draw the attention of Calcutta Corporation to a matter involving Ward 19, which is the most neglected Ward in Calcutta. It is a matter of great regret that South Road, Entally, now known as Dr. Suresh Sircar Road, which is the main road of Entally, is barely 30 ft. wide with footpaths at places only 3 ft. wide. The ever-increasing traffic has made the road highly congested and buses running along the road has made it dangerous. For narrowness of footpath the pedestrians are forced to walk on the road and accidents, sometimes fatal, frequently take place on the road.

There is an alignment scheme to widen South Road, Entally to 40 ft. In 1937 the then Councillor the late Dr. Suresh Ch. Sircar Rai Bahadur, moved the Corporation for working out the alignment but to no avail. He met with usual indifference. Since then the road has become more congested and dangerous. It deserves immediate attention. Without incurring much expense the Corporation can easily acquire open lands and lands under undertaking within the alignment in South Road, Entally and minimise the public danger.—Yours, etc.

J. C. SIRCAR,
Secretary,
Entally Welfare League.

13/1/A, Gope Lane, Entally,
Calcutta.

II

To The Editor, "Calcutta Municipal Gazette."

Sir,—The condition of the public road, *viz.*, Dr. Suresh Sarkar Road, Entally, for some time past, has become the subject of much criticism. This road is one of the main arterial roads of the locality. It is out of repairs for a long time, and there are ruts and holes which have become dangerous to cyclists and Rickshawallas, not to speak of pedestrians. The road is too narrow for bus service as there are no adequate footpaths on both sides of the road. In short, the public have to

walk with their lives in their hands, especially, the little children, who have to pass along this road for going to their schools.

We expect that our City Fathers will kindly pay special attention to the inconvenience and suffering of the public and do take necessary steps to repair the road forthwith and to widen the road to the prescribed alignment sanctioned long ago.

—Yours etc.

SATYAJIT MADHAB BOSE, B.Sc.,
9, Hati Bagan Road, Entally.

THE WORLD OF BOOKS

MUKTIR SANDHANE BHARAT. By Jogesh Chandra Bagal, Introduction by Acharya Sir Profulla Chandra Roy. Messrs. S. K. Mitra and Bros., 12, Narkel Bagan Lane, Calcutta. PP. 18+484+4. 33 Illustrations. Price Rupees Two and Annas Eight

The book under notice contains in Bengali the story of Indian Renaissance, which began with the advent of Raja Ram Mohan Roy. It was in the Fort William College that Indian intellect came into contact for the first time with that of the European. But the contact received a parmanent stamp through the teachings of the Hindu College, founded in 1817. Two years before Raja Ram Mohan Roy had established himself in Calcutta and began those religious, social and political endeavours, which heralded the dawn of New India. Ram Mohan's followers as well as Derozio and the students of the Hindu College spread the light of new education among their countrymen with missionary zeal.

With the spread of English education, newly educated Indian youths naturally turned to politics, and political associations soon cropped up for the redress of various greivances as well as the general improvement of the country. In 1851 the followers of Ram Mohan, the students of the Hindu College, and those representing the orthodox section combined to establish the British Indian Association, and even then they demanded that something like the colonial form of Government should be established in the country. It should be borne in mind that the terms "Dominion" and "Dominion Status" had not come into vouge at that time. This Association has been rightly called by the author as the precursor of the Indian National Congress founded thirty-four years after.

Political Associations were also set up in Bombay and Madras on the lines of the British Indian Association of Calcutta. Many new associations such as, the Hindu *Mela*, the Indian League, the Indian Association, arose in the sixties and seventies of the last century. They not only supplemented the work of the former association but became the spokesman of the spirit of the times. In the seventies it was mainly due to the activities of Sishir Kumar Ghose and the Indian League, of which he was the prime mover, and the foresight of Sir Richard Temple, the Lieutenant Governor of the time, that the Calcutta Corporation was constituted for the the first time on the democratic basis as a representative institution. Surendra Nath Banerjea, father of the modern Corporation of Calcutta, made his way to its council through the popular election in 1876. Similar movements were on foot in the Western and Southern Presidencies. When the ground had been prepared in this way, the Indian National Congress came into being in 1885.

It is, therefore, in the fitness of things, that the author has divided his work into two parts; the Pre-Congress Era and the Congress Era. In the thirteen chapters he has narrated the story of the first period of national struggle in its varied aspects—religious, social, literary and last but not least political. And the second part naturally covers the period from the establishment of the Congress up to the present time. The Congress was at first purely a political body and kept isolated from other progressive movements. But within a few years from its start it began to widen its scope. And in the dynamic movement of the *Swadeshi*, all aspects of cultural activities came to be absorbed into it. The next stage in its life began with the inauguration of the Non-Co-operation movement by Mahatma Gandhi. The Congress is still conducted on the lines chalked out by Gandhiji. The author has narrated the story of the Congress, its various activities and the phases it has passed through altogether in sixteen chapters. The narrative has been carried up to the year 1939.

The author has presented us with a connected and coherent history of Indian Renaissance in a neat volume. He has taken much pains. The want of such a book had long been keenly felt by the Bengali public. We congratulate him on supplying this want at a time, when it is needed most. The style is lucid and forceful. Thirtythree fullpage illustrations of some of the makers of Modern India have enhanced the value of the book.

VITAL STATISTICS

For the City of Calcutta for the week ending 23rd November, 1940.

CITY OF CALCUTTA (TOWN & SUBURBS).

The total number of deaths registered during the week was 644 against 800 and 632 in the two preceding weeks and lower than the corresponding week of the last year by 24. The general death-rate of the week was 29·4 per mille against 31·6 the mean of the last five years.

TOWN (WARDS 1—25 & 27).

The number of deaths registered during the week ending 23rd November, 1940, was 526 against 573 and 517 in the preceding weeks. There were 18 deaths from cholera against 15 and 5 in the two precedings weeks. There were 11 deaths from small-pox during the week against 7 in the previous week. There were 5 deaths from influenza against 10 in the previous week. The mortality from fevers and bowel-complaints amounted to 36 and 68 respectively against 40 and 93 in the preceding week. The general death-rate of the week was 27·4 per mille per annum.

There was 29 imported deaths. Excluding these, the death-rate of the Town was 25·9.

There were 90 deaths from respiratory diseases against 72 in the previous week.

There were 50 deaths from tuberculosis against 65 in the previous week.

There were 116 deaths of infants under one year.

SUBURBS (WARDS 25 & 26—32).

The number of deaths registered was 118 against 127 and 115 in the two preceding weeks. Of these 9 were from cholera, nil from small-pox, nil from influenza, 7 from fevers, 23 from bowel-complaints and 29 from respiratory diseases. The death-rate of the suburbs (or added areas) was 43·1 per mille.

There were 7 imported deaths. Excluding these, the death-rate was 40·5.

There were 8 deaths from tuberculosis against 15 in the previous week.

There were 31 deaths of infants under one year.

AUCTION SALE

Six milch buffaloes will be put up for sale by public auction to be held on Saturday the 7th December, 1940, at the Corporation Gowkhana III, at Lower Circular Road at 12 a.m. (noon).

A. K. BASAK,
Assistant Collector.

Central Municipal Office,
The 28th November, 1940.

A PROGRESSIVE INSURANCE COMPANY

Insurance has stood the test of time. It is not something that is transient, relying for its existence on any peculiar economic conditions or on any whimsical popularity which may cease to exist as quickly as it is born. It has proved itself to be the bedrock which in peace or war, in times of prosperity or depression, provides the safest anchorage for all.

The Eastern Federal Union Insurance Company, Limited, entered the Insurance Field in the year 1932, as a purely Indian concern modelled on up-to-date modern European lines, with valuable connections in the Insurance World. It is a composite Insurance Company run on entirely non-communal business lines with the object of providing security, stability and efficient service in all the forms of Insurance underwritten by it. This Company has received business from all parts of the world by means of reciprocal treaties with certain of the oldest established British Offices of world-wide reputation. It has agency connections throughout India, in Great Britain, in Africa and in China, and in order that the service given to Policy-holders may be second to none, the Company has Claim Settling Agents at principal ports throughout the world.

The Eastern Federal Union has fully lived up-to its early promise. The all-round progress of the Company during its 7th year of working has been very satisfactory as disclosed by its Balance Sheet for the year 1939. The percentage of surplus during that year from underwritting accounts in the General Departments had gone up from 6·95 per cent. to 15·51 per cent. and expenses decreased from 25·86 per cent. to 23·32 per cent. This is a very gratifying result as in the last four months of that year normal business activities had been greatly disturbed owing to the chaotic political condition. The Paid-up Capital of the Company exceeds Rs. 105,000, and the total book value of its Investments as at the 31st December, 1939, amounted to over Rs. 10 lakhs and 45 thousands. The company's policies are accepted by all the Exchange Banks of the country and it has an All-India Representative Board.

The Company has had the privilege of insuring a good proportion of the Calcutta Corporation properties.

The Company transacts Fire, Life, Marine, Motor, Personal Accident, Fidelity Guarantee, Aviation, Third Party Liability, Baggage and Workmen's Compensation Insurance business, and has Branches at London, Bombay, Lahore, Hyderabad (Deccan) and Ahmedabad.

CORPORATION NOTICES

To Contractors

Tenders are invited in duplicate for the following and will be received by the First Deputy Executive Officer on the date noted for each, up to 2 p.m. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for.....". For specifications and tender forms apply to the Keeper of Records between 11 a.m. and 3 p.m. on week days and 11 a.m. and 1 p.m. on Saturdays. Price Rs. 2 per set.

1. Supply of Disinfectants during the rest of the year 1940-41.
2. Removal of steam coal from the yard to the boilers at the Palmer's Bridge Pumping Station.
3. Supply of calves for the rest of the year 1940-41.
4. Construction of road at 58/2, Raja Dinendra Street.
5. Remodelling the inlet sewer to the silt pit in Mominpore Drainage Pumping Station.
6. Supply and delivery (weighed and stacked) of 1st grade steam and rubble coal for one year from 1st February, 1941.
7. Supply of petrol during the year 1941-42.

Tenders for 1 and 2 will be opened on 6th December, for 3 on 10th December, for 4 and 5 on 11th December, for 6 on 17th December and for 7 on 18th December, 1940. The rates quoted in tenders for the above are to hold good for three months.

N.B.—All cases of delay over a fortnight in the execution of agreements in respect of works and supply of materials will be reported to the Committee and the parties will not be allowed to execute the agreements after that period without obtaining orders of the Committee.

In case a party deposits earnest money by cheque, he must deposit the cheque at least three working days before the date of opening of the tender.

The contractors should maintain an uniformity of their names and styles of business, appearing on various documents, *e.g.*, Treasurer's receipts, tender forms, agreements, licenses and bills.

Any deviation from this on the part of any contractor whenever detected, will render his tender liable for cancellation.

Where tenders are submitted by a Corporation, it should be signed by a principal officer of the Corporation or by an agent duly authorised in that behalf and be attested by a witness. Where it is submitted by a firm, it should be signed by the proprietor or one of the partners or by an agent duly authorised in that behalf by the firm and be similarly attested.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office,
The 27th November, 1940.

Notice to Petty Improvement Contractors.

District No. I Engineer's Department.

Tenders for the following works are invited and will be received by the Chief Engineer in duplicate in a sealed cover superscribed "Tender for....." on Friday, the 6th December, 1940, upto 2 p.m. :—

170. Walling up the smith shop in North Garage at 72, Grey Street, Ward 3—Rs. 330, dated 27th November, 1940 (15 days).

171. Repairs to surface drain at Haji Zakaria Lane, Ward 3—Rs. 715, dated 27th November, 1940, (1 month).

172. Repairs to the Sewered Ditch leading to premises No. 17, Bhur Lane, Ward 3—Rs. 130, dated 27th November, 1940, (3 weeks).

N. B.—Please note that words in italics "7 days' notice" in clause 6 of the condition of contract should be read as "3 days' notice".

S. C. GHOSH,
District Engineer I.

District I Eng'g. Office,
The 27th November, 1940.

District No. I, Engineer's Department, (Cossipore).

Tenders for the following works are invited and will be received by the Chief Engineer in duplicate in a sealed cover superscribed "Tender for ....." on Friday, the 6th December, 1940, upto 2 p.m. :—

The Petty Improvement Contractors are required to call at the Central Municipal Office to receive the tender forms from the Central Record Keeper and to note the items and descriptions of works for which tenders are to be submitted, from a copy kept in the District Engineer, District I (Cossipore Office), for inspection.

63 Repairs to Bathing Platforms at Cossipore in Wards 30, 31, and 32,—Rs. 241, dated 14th November, 1940, (1 month).

64. Repairs to urinal at Station Road near Dum Dum Station, Ward 31—Rs. 292, dated 19th November 1940, (1½ months).

65. Repairs to Night Soil Transfer Depot at Cossipore—Rs. 391, dated 19th November, 1940. (1½ months).

N. B.—Please note that words in italics "7 days' notice" in clause 6 of the condition of contract should be read as "3 days' notice".

Plumbers' Examination.

Re : Plumbing Examination for holding a House Drainage Contractor's license under Chapter XVIII of the Calcutta Municipal Act of 1923.

It is hereby notified that the above Examination will be held on Monday, the 16th December, 1940, at 1 p.m. at the District No. II Office, at 22, Mirzapur Street.

An Examination Fee of Rs. 15 (which on no account shall be refunded) shall have to be deposited with the District No. II, Engineer's Office, at 22, Mirzapur Street, on or before Wednesday, the 12th December, 1940, by each candidate failing which the candidate will not be allowed to sit at the Examination. Intending candidates should submit three copies of photographs, together with a certificate from a licensed plumber, showing that they have undergone practical training for a period of 3 years under him.

Each candidate shall bring his own drawing instruments, pen and pencils and shall produce the cash receipt for the deposit of Examination Fee at the Examination Hall.

D. N. DUTT,
District Engineer, II.

District II Eng'g. Office,
The 23rd November, 1940.

Lease of Corporation Tanks, Etc.

Notice is hereby given for information of the public that the Estates and General Purposes Standing Committee of the Corporation at their meeting to be held on Tuesday, the 3rd December, 1940, will hold an auction for salami for the license for rearing and catching fish in the tank within the Tallah Park on Paikpara Raja Manindra Road and to the east of the All-India Raido Buildings in the Cossipore-Chitpore Open Space, for a period of 3 years, at an annual license fee of Rs. 200. The full amount of the salami, together with a Security Deposit equivalent to one year's fee plus Rs. 2 for a printed copy of Agreement Form, will have to be deposited by the successful bidder on the spot, on the acceptance of his bid by the Committee, subject to the approval of the Corporation. Other conditions may be seen at the office of the undersigned on any working day, during office hours. Any person willing to take the license, may appear at the auction and offer his bid.

R. SINHA
Chief Valuer and Surveyor.

Central Municipal Office.
The 27th November, 1940.

Modification of Alignment.

Notice is hereby given under Section 306, read with Section 302 of the Calcutta Municipal Act III (B. C.) of 1923, that the Roads and Bustees Standing Committee of the Corporation, in excercise of the powers, delegated unto them in this behalf, have prepared a scheme and plan modifying the alignment of Bamunpara Lane at its junction with Bondel Road in Ward 21, by splaying 4 ft. 6 in. by 5 ft. 6 in. instead of rounding off the corner, of premises No. 19, Bondel Road, which was originally sanctioned on 11th November, 1920, by the General Committee of the Corporation as constituted under Act III B. C. of 1899.

Any person, having any objection to the same, should submit it in writing, so as to reach the undersigned, on or before Monday, the 23rd December, 1940.

A copy of the plan, showing the proposed modification of the alignment, may be seen in the office of the Chief Valuer and Surveyor of the Corporation, between the hours of 11 a.m. and 2 p.m. on all working days.

S. CHATTERJI,
Actg. Chief Executive Officer.

Central Municipal Office,
The 26th November, 1940.

Declaration of Alignment.

Notice is hereby given under Section 302, of the Calcutta Municipal Act III (B. C.) of 1923, that the Roads and Bustees Standing Committee of the Corporation, in exercise of the powers, delegated unto them in this behalf, have prescribed the alignment of Kankurgachi 2nd Lane to a width of 30 ft. in Ward 29.

Any person, having any objection to the same, should submit it in writing, so as to reach the undersigned, on or before Monday, the 23rd December, 1940.

A copy of the plan, showing the proposed alignment, may be seen in the office of the Chief Valuer and Surveyor of the Corporation, between the hours of 11 a.m. and 2 p.m., on all working days.

S. CHATTERJI,
Actg. Chief Executive Officer.

Central Municipal Office,
The 26th November, 1940.

Sale of Corporation Surplus Land

In supersession of all the previous notices in this behalf, fresh notice is hereby given for information of the public that the following plots of Corporation surplus land will be sold to the highest bidder above the reserve price at a public auction to be held by the Chief Executive Officer, at the Central Municipal Office, on Thursday, the 12th December, 1940, at 5 p.m., on the conditions specifically mentioned in the form of agreement to be executed by the successful bidder at his cost within seven days from the date of auction. The successful bidder shall have to furnish, in cash, an earnest deposit of 25 per cent. on the amount of the purchase money immediately upon the lot being knocked down, and in default thereof, the premises is to be immediately put up and re-sold at the risk of the first purchaser. Public are invited to attend the auction and offer their bids. The plans of the lands, the form of agreement, conditions of sale and other necessary particulars may be seen and obtained on personal enquiry in the office of the undersigned on all working days during the office hours.

Description of lands :—

(1) Land at the junction of Upper Chitpore Road and Joy Mitter Street, Ward 3, measuring 4 kottahs approximately.

(2) Lots Nos. 4, 5 and 9 of surplus land at the junction of Ekdalia Road and Ballygunge Station Road, Ward 27, measuring about 3 kottahs 2 chittacks, 2 kottahs 9 chittacks and 3 kottahs 7 chittacks respectively.

(3) Lot No. 7 on the new 35 ft. road connecting Monsatola Lane and Pipe Road, Ward 25, measuring 5 kottahs 13 chittacks approximately.

(4) Lots Nos. 11 and 12 on Hussain Sha Road, Ward 25, each measuring 5 kottahs 12 chittacks approximately.

N.B.—Lot No. 9 is tenanted and it will be sold with tenants.

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office,
The 5th November, 1940.

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

ALDERMAN SUBHAS BOSE RELEASED

"Serious Danger To His Health"

ALDERMAN Subhas Chandra Bose, *ex*-Mayor of Calcutta, was released from detention on Thursday afternoon (December 5) from the Presidency Jail, Calcutta.

Mr. Bose, it will be recalled, was arrested on July 2, in connection with the Hollwell Monument agitation, under section 129 of the Defence of India Rules.

Mr. Bose, who had been ailing for some time past in the Jail went on hunger-strike on November 29. He took food for the first time in seven days after coming out of the prison gate by taking glucose water offered by the Superintendent of the Presidency Jail.

Immediately on release Mr. Bose was taken to his Elgin Road residence in an ambulance car accompanied by Jail doctor.

The Mayor of Calcutta, Mr. Abdur Rahman Siddiqi, called on Mr. Subhas Bose shortly after his return home.

GOVERNMENT COMMUNIQUE

The following *communique* has been issued by the Government of Bengal :—

"Release of security prisoner Mr. Subhas Chandra Bose for reasons of health :

Government *Communique* : Dated Calcutta the 5th December, 1940.

"On the 5th December, 1940 Government were advised that continued persistence in his hunger-strike by security prisoner, Mr. Subhas Chandra Bose would involve serious danger to his health.

"2. Government were not prepared to administer forcible feeding to Mr. Bose and he was accordingly released from jail and taken to his own home on the afternoon of the 5th December, 1940, upon the suspension of the orders of detention passed in his case under Rule 26 of the Defence of India Rules.

"3. Government are advised that although Mr. Bose is weak and has shown a tendency to nausea his condition gives no cause for anxiety provided that he breaks his fast. They accordingly accept no responsibility for the consequences to himself should he continue to abstain from nourishment".

DOCTOR'S BULLETIN

The following bulletin was issued last night by Mr. Bose's attending physicians :—

"On examination after his arrival, the doctors found Mr. Bose's heart recover some little strength before he could think of any sort of activity, mental or physical. Friends and well-wishers will be greatly assisting in his recovery, if they kindly abstain from any direct interview as this would impede his progress."

Chronicle And Comment

Alderman Subhas Bose

We extend a most warm welcome to Alderman Subhas Bose on his release. He has come out not a day too soon as the Government *communique* makes it perfectly clear that the hunger-strike he had resorted to in the jail has told on his none-too-good health. We are glad that he has been given an opportunity of recouping it. We do not know, however, how long he can enjoy the freedom he has been given now. As is known, two cases under the Defence of India Rules in connection with speeches made by him at different times and places during the current year and also for the publication of an article entitled "The Day of Reckoning" in his English weekly *Forward Bloc* are now pending against Mr. Bose before the Additional Chief Presidency Magistrate, Calcutta, and the Additional District Magistrate, Alipore, respectively. But wherever he might be, the loving thoughts and good wishes of his countrymen would follow the patriot, for whom no sacrifice has ever been too great for the Cause he has made his own.

Calcutta Rate-payers' Conference

On the 14th and 15th December will be held the Calcutta Rate-payers' Conference to consider and discuss the provisions of the Calcutta Municipal Amendment Bill 1940, now on the legislative anvil. The lead in the matter has been taken by the Ward I Ratepayers' Association and every Ward of Calcutta is invited to send its quota of delegates, one for each 1,000 of its population, so that the protest against the measure may prove real and effective.

The Reception Committee of the Conference have published in this connection an excellent brochure in criticism of the Amendment Bill, which we propose to publish in the next issue of the *Gazette*.

We wish the Conference all success.

Black-out In Calcutta

A Press Note issued on Wednesday evening (4th December) by the Government of Bengal, states :—

As already announced in the Press, Calcutta and the surrounding Industrial area of 24-Parganas, Howrah and Hooghly will be made invisible from the air, between the hours of 7 P.M. and midnight on the 11th December, 1940, for the purpose of a trial of the lighting restriction arrangements that would be enforced under statutory order during an emergency period.

A number of important undertakings which require illumination for carrying on work by night, have applied for exemption from the total Black-out orders which will otherwise be enforced during a state of emergency. It has been decided that exemptions would be granted to undertakings where in the public interest, work must continue even during a state of emergency, and which were able to satisfy Government that the illumination to be exempted was essentially necesary for the purpose of carrying on their work, was not visible at a height of 1,000 feet in the air, and could be extinguished within half a minute of an Air Raid warning being sounded. As it is not expected however that such arrangements would be completed before the Black-out on the 11th December, 1940, a list of the undertakings which have applied for such exemption has been furnished to all sub-area A. R. P. Lighting Restrictors with instructions to grant them special facilities for carrying out their experiments during the Black-out.

(Continued on page 78)

RANGOON MUNICIPAL LOAN.

A debenture loan of Rs. 30 lakhs was floated by the Corporation of Rangoon on December 2 for the completion of the Pegu Yomas Water Works and Distribution Mains. The loan will be issued at par, bearing three and a quarter per cent. interest, redeemable in 1966-76.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETINGS FOR THE WEEK ENDING DECEMBER 6, 1940

[The reports of the meetings of the Corporation appearing below are, in most cases, a summary of the proceedings.—Ed., "C. M G."]

The Late Satyananda Roy

A resolution of the Estates and General Purposes Committee regretting that, in view of the opinion of the Law Officer, they could not recommend the payment of the expenditure incurred for the medical treatment of Dr. Satyananda Roy, late Officiating Education Officer, in the Central Municipal Office on October 11 and 12, 1939, came up for confirmation at Wednesday's meeting of the Corporation.

The recommendation of the Committee having been placed before the House by Mr Debabrata Mukherjee, Mr. Hamoodur Rahaman pointed out that the Corporation had a certain sum amounting to Rs. 12,000 set apart in the budget for medical assistance to their employees and he would, therefore, suggest, by way of an amendment, the reference of the matter to the Finance Standing Committee for consideration whether the expenses can be met out of the budget item earmarked for the purpose.

The amendment was accepted by Mr Mukherjee.

Major S E. Tee said that when Dr. Roy became ill at eight o'clock on the night of October 11, some Councillors, who are doctors, rendered first aid. Major Tee remained with Dr. Roy till 10 p.m when he went home for dinner and came back in half an hour but there was no medical officer in attendance. On his own responsibility he called in a European doctor and nurse but no oxygen, bandage or the necessary instruments were available. There was no bed, and Dr. Roy had had to be placed on a table. He (Major Tee) remained with Dr. Roy up to the time of his death at half past one the next morning.

Major Tee said he understood that there was a fund of Rs. 1,27,000 for relief for Corporation employees If so, Dr. Roy's medical expenses might be met from that fund.

Major Tee, therefore, made a strong appeal to the House to instruct the Chief Executive Officer to see that there was a First-aid Room in the Corporation Buildings so that when a contingency arose employees of the Corporation might get medical assistance from the Corporation.

The Mayor said that there was no Councillor who did not sympathise with Dr. Roy's family but the Law Officer and the Chief Accountant were of opinion that Dr Roy's medical expenses could not be paid by the Corporation.

The Mayor also thought that the suggestion of Major Tee that they should have a separate First-aid Room was a capital one. They had a Medical Dispensary already in the Corporation Buildings and they would see that the Dispensary was kept open so that medical assistance could be rendered whenever the occasion arose.

The amendment of Mr. Hamoodur Rahaman was accepted unanimously.

NEW SHERIFF FOR CALCUTTA

Mr. Biren Mookerjee Appointed

Mr. Birendra Nath Mookerjee, M.A. (Cantab), M.I.E. (India), of Messrs Martin and Co. Calcutta, has been appointed Sheriff of Calcutta for the ensuing year.

Born on February 14, 1899, Mr Mookerjee is the youngest son of the late Sir Rajendra Nath Mookerjee, who was Sheriff of Calcutta in 1911.

Educated at Hastings House and Sibpur Engineering College, Calcutta, and Trinity College, Cambridge (Mech Science Tripos), Mr. Mookerjee joined the firm of Messrs. Martin and Co. in 1924. He became a partner of Messrs. Burn and Co., in 1931, and of Messrs. Martin and Co., in 1934.

Mr. Mookerjee is a member of the Local Board of Directors of the Imperial Bank. Recently he attended the Eastern Group Conference at Delhi as adviser to the Indian delegation, and is an adviser to the Munitions Supply Board.

Condolences

The Corporation condoled the death of Mr. B B. Chatterjee which resulted from an accident on Friday last.

During this week, said the Mayor moving the resolution, there had been the tragic death of Mr. B. B. Chatterjee, a contractor of eminence of this city. Mr. Chatterjee was related to Mr. N. C. Chatterjee of this House.

The Corporation also recorded their sense of sorrow on the deaths of Babu Jitendranath Roy, a distinguished citizen of Calcutta and zemindar of Narail in the district of Jessore, and of Dr. Purnendu Mohan Mukherjee, well-known eye-surgeon of the local Marwari Hindu Hospital.

Standing in silence Aldermen and Councillors adopted the resolutions.

Infectious Diseses Hospital.

Permission was granted to the Health Officer to sit on the proposed Government Committee of Experts for the selection of a suitable site for the establishment of an Infectious Diseases Hospital in or near Calcutta.

Greer Square

On the recommendation of the Estates and General Purposes Committee the reservation of the Greer Square for the exclusive use of women and children and entrusting its management to the Ladies' Committee was continued for another three years with effect from the 23rd November, 1940, an

the same terms and conditions as before and also on the additional condition that a Lady Councillor of the Corporation will be on the Ladies' Committee.

Next Corporation Meeting

The House then decided that in view of the proposed Black-out in Calcutta on Wednesday next, the meeting of the Corporation on that day would be held at 5 p.m. and not at 5-15 p.m. as was ordinarily done.

Carting of Refuse

The Corporation at its meeting on Wednesday decided to postpone consideration for a month, of the recommendation of the Works Standing Committee that the old system of carting of refuse by carts, which was in use before the last strike be reverted to, in view of the situation created by the war.

The time was taken to enable the Councillors to go through the report submitted by the Chief Engineer comparing the cost of cart system with the actual cost incurred on the removal of refuse by means of hired lorries during the last 8 months.

Mr. Madan Mohon Burman, opposed the motion for postponement. He characterised the figures submitted by the Chief Engineer as inaccurate and said that the carters who were expecting to be employed by the Corporation should either be taken in immediately or told straightaway that they were not wanted. They should not be kept waiting indefinitely.

Belgachia Bridge

On the recommendation of the Works Standing Committee, the proposal of the E. B. Railway administration to take up first the reconstruction of the Belgachia Bridge, which carried the Calcutta Jessore Road over the Railway sidings, and complete it before the Tallah Bridge is taken up, was sanctioned provided a temporary overbrige was constructed beforehand for convenience of pedestrians.

—Chronicle And Comment

(*Continued from page* 76)

Government Personnel

Approaching the problem of administration through biographical studies of the individuals who hold high positions in the various Federal Departments of the United States Government is a new kind of civic study sponsored by Arthur W. Macmahon, Professor of Government at Columbia University in a book just published and entitled *Federal Administrators* (New York, Columbia University Press). The book is based throughout on the careers of the men who now hold, or have held, position between the Secretary of the Department and the operating divisions of the Government bureaus.

The purpose is to examine the two phases of departmental leadership—the political and the administrative. Use of the biographical method has been adopted because the author believes that practice often runs ahead of theory and that more can be learned about the problem by emphasizing its personal rather than its procedural aspects. The subject is presented in three parts.

The first part treats the existing personnel at the centres of the departments. Formal titles are disregarded and individuals are classified in terms of what they do. Their personal histories are related to an analysis of the underlying necessities of leadership in the departments.

The second part is historical, tracing the offices of Assistant Secretary and Under-Secretary from their establishment in the various departments and summarizing the careers of all who have filled them.

The third part carries the analysis of management to the bureau level, examining the mode of selection, the training, and the tenure of the bureau heads. The classification is contemporary but in each case the history of the office and the nature of the experience of prior incumbents are reviewed. City officials and employees will be interested in this book as an illuminating study of civil service problems.

CALCUTTA BLIND RELIEF CAMP

To Be Kept Open

That the Calcutta Blind Relief Camp opened on November 5, has proved a boon to hundreds of afflicted persons is evident from the the fact that, owing to rush of patients, the authorities have decided to keep it open till the end of the year, and not to close it on December 6, as originally intended.

So far, about 550 patients have been admitted to the camp hospital, of whom nearly 300 are still undergoing treatment there. Over 2,220 patients have been treated at the outdoor department. The average daily admission is 30 and approximately 125 patients are attended to at the outdoor department every day.

The operations performed so far, include 420 catract and 24 glaucoma cases, the daily average being 24 operations.

In order to meet the need for relief work among the poor, the Calcutta Blind Relief Camp has been organized by an influential and representative Committee under the Chairmanship of the Mayor, (Mr. A. R. Siddiqi), on the initiative of Dr. T. Ahmad, Mr. A. K. Chanda and Mr. A. F. M. Abdul Ali are the Joint Secretaries.

Situated on the spacious ground floor of Karnani Mansion at 209, Lower Circular Road, placed at its disposal by Rai Bahadur Seth Sukhlal Karnani free of charge, the Camp is the first institution of its kind in India, where eye treatment is carried on under up-to-date scietific conditions. Attached to the hospital, which has accomodation for over 300 patients, are various laboratories, offices and other departments. All patients admitted in the Camp have their teeth, ear, nose and throat carefully examined and attended to by different specialists and necessary laboratory examination is undertaken before the cases are put up for operation.

Dr. T. Ahmad is in charge of the Camp and he is being assisted by a staff of 24 surgeons. In addition there are several visiting surgeons including Dr. S. K. Mukherji, Captain Kiran Sen, Dr. P. N. Chowdhury, Dr. B. Bhaduri, Dr. P. K. Guha and Dr. B. K. Das Gupta.

The nursing staff consists of a Sister and 20 nurses.

INDUSTRIES & COMMERCE

Special Article

The Industrial Future Of India—I

[By Debajyoti Burman]

INDIAN Industrial potentialities were, for the first time, clearly revealed during the last Great War. The Government of India had come to realise the necessity of fostering Indian Industries and had accepted the principle of discriminating protection. In order to satisfy the growing volume of public opinion, fiscal autonomy was conceded. Fiscal Autonomy meant that the British Government would not interfere in tariff measures agreed upon between the Government of India and the Indian Legislature. But these concessions were proved to be unreal. British Capital always intervened in any measure of discrimination in favour of Indian Industries and likely to affect them adversely. The hollowness of both the principles of discriminatory protection and fiscal autonomy was fully exposed in the Legislative Assembly in a debate on the question of granting protection to mills when the Finance Member, Sir George Schuster admitted that in the final stages of a trade agreement arrived at between the Government of India and the Legislature, the British Government did intervene and asked for reconsideration of the matter from the point of view of reactions in England, as well as in India; but their real object was believed to have been the safeguarding of the Lancashire interests. It was made perfectly clear during the controversy over the Indo-British Trade Agreement that the Government of India were in a position to look after British Industrial interests first, and in fact they did give more weight, in formulating their proposals, to British interests even at the expense of Indian, where the two interests clashed. This is the background against which the Industries struggled forward and the pace of Indian Industrial progress has, therefore, been very slow. In modern days, the political factor is of the highest importance in the development of the Industrial life of a country.

During the present War, the fundamental position remains unaltered for all practical purposes. Far reaching though constitutional changes are, they are not a break with the past. Safeguard clauses have been inserted in the Government of India Act 1935, to protect British Industries in India against any discrimination in favour of Indian Industries. The Stores purchase policy of the Government of India has been modified favourably to Indian Industries to some extent, but since the beginning of the present War, the Supply Department of the Government of India has persistently refused to make purchases through the Indian Stores Department. The Indian Supply Department has also refused to follow the open tender method for the granting of contracts which might have enabled at least some of the Indian Industries to compete with the Industries owned and controlled by British Capitalists in the supply of war materials and other essential war requirements.

The Potentialities

India is self-sufficient as regards foodstuffs, and she has an abundant supply of primary minerals and essential raw materials, cheap labour whose technical skill can be raised to a very high standard, a sufficient supply of capital which in no way can be termed shy, enormous hydro-electric power potentialities and a large home market. The extreme poverty of the people puts a drastic limit to any immediate expansion of the home market, but the Indian market for manufactured industrial products is likely to be immense provided that the standard of life of the people can be raised. India has modern facilities for communication and means of transport to push the movement of industrial products and raw materials. Potentialities of hydro-electric energy in India is enormous and when sufficiently developed, even the smaller industries will be able to obtain cheap power to supplement human energy by setting it free from monotonous mechanical work. The successful operation of the Ganges Grid Electrification Scheme and the other Punjab and South India Schemes have demonstrated that cheap power can be carried even to the interior muffussil districts both for industrial and household purposes. These natural facilities and potentialities has placed India in such an advantageous position that she can develop a balanced economy on the French or U. S. A. model.

India is becoming increasingly self-sufficient as regards cotton piecegoods, iron and steel, matches, cement and sugar industries. Her engineering industries are fast developing. Remarkable progress is also being made in paper, glass, soap, hardware, electric lamps and appliances, rubber tyres, asbestos, paints and enamel industries, but the manufacture of newsprint has not yet been successful. The imports of these manufactures are steadily coming down. The only industry that is still lagging behind is the production of heavy chemicals. India has the requisite raw materials for the production of many heavy

chemicals like Sulphuric Acid, Caustic Soda, Acetic Acid etc., but progress in this direction has been very slow.

The Chief varieties of manufactured goods that India still imports without any appreciable decline in the import balance are machinery, plant, mill accessories, motor vehicles, chemical and drugs, instruments and appliances etc. Railway engines are still imported, but railway lines and waggons are mostly manufactured in India. The manufacture of engines is likely to be undertaken in the future. The following table will indicate the changes in the supply of important manufactured imports :—

Chemicals	1913-14	74·7	0·3	12·4	1·5	...	5·2
	1936-37	54·0	5·0	13·2	10·4	...	3·6

India's trade with U. S. A., Germany and Japan in these products has increased since the last Great War. The first three of them being England's staple industries, they have been badly hit by the contraction of the Indian market, and more and more stress is being given on the doctrine of Imperial reference.

India's trade with Japan has steadily increased. There is a definite decline in the import of hosiery goods, but in all other respects, both as regards imports of cheap manufactures and exports of raw material, Japan's supply and offtake shows signs of increase. The position may be summed up as follows :—

A. Value of Imports into India from Japan (in lakhs of rupees).

	Pre-war average.	1932-33	1933-34	1936-37
COTTON GOODS—				
Hosiery	65	61	72	89
Piece Goods ...	6	7,85	4,43	5,58
Yarn	6	1,61	95	1,37
Other types ...	2	12	8	31
1. Total Cotton Goods ...	80	10,19	6,18	7,55
2. Silk Manufactures ...	1,31	2,01	2,11	1,30
3. Earthen ware and porcelains	4	31	26	27
4. Boots and Shoes ...	...	31	32	7
5. Artificial Silk Goods ...	...	2,70	1,56	3,53
Total Imports ...	3,64	20,47	16,35	21,37

B. Value of Exports from India to Japan (in lakhs of rupees).

1. Raw Cotton ...	14,50	11,12	10,52	25,41
2. Rice	1,33	62	...	36
3. Iron and Steel ...	15	52	66	96
4. Hides and Skins ...	13	20	21	23
5. Jute, Raw and Manufactured ...	22	47	38	1,25
Total Exports ...	16,84	13,95	12,61	30,07

This gives an indication of how with the decline of India's trade with England her trade with Japan is increasing.

It is quite possible that Indian manufactures will compete in the international market only if the rigidity of application of the doctrine of Imperial preference is relaxed and India is conceded the right to conclude bi-lateral or multi-lateral trade treaties in her own interest. During the present war her helplessness in the matter of concluding trade treaties has been fully realised. She has been unable to find out alternative markets for her agricultural staple products after the closure of the European market, due to the apathy of the British Government who have neither inspired the Indian Government to search for such markets in right earnest, nor permitted the Indian merchants to do it for themselves.

The Indian Cotton Industry has, however, made its competition felt in the markets of Afghanistan, Iran, Iraq and some African Countries. China was the largest yarn market for India, but owing to exchange difficulties and Japanese competition this important market has been lost.

The main feature the Indian Trade Statistics reveal is that, the Indian raw materials go abroad only to be finished into industrial goods, and a high percentage of it come back to India for the consumption of the Indian people. The Indian labour is thus deprived of employment, and the earnings of labour for producing the goods that India buys from abroad go to the foreign countries. The Indian peasant has employment for five months in a year, and for the rest of the period he is forced to remain idle. Indian cotton and pig iron goes to Japan to be transformed into piece-goods and steel products for our consumption. Indian hide and skins go to Czechoslovakia and U. K. for the production of our boots and shoes, and Indian oil seeds go out only to come back as oils to us. This deprived the Indian labour of crores of rupees every year which they themselves could have earned provided these Industries were established and worked on the Indian soil. Since the last Great War the Indian public has realised this great drawback in the national economy of the country, and since then great attempts are being made to stop this unnecessary drain.

DEFICIENCIES

In order to understand the deficiencies of the Indian Industry, it is essential to realise the part played by foreign capital and enterprise in the development of modern Industries in India. Jute, mining, engineering, plantation, paper and cement industries have been promoted by British Capital and Enterprise. Indian Companies in these industries have been established no doubt, but they have smaller capital and output, and they are not in a position to compete with the British concerns. Constructing the railways and conducting the coastal and overseas shipping have remained mostly in the hands of the British Capitalists. Banking and Insurance have first been established mainly by British Enterprise and with British Capital, but Indian Capital has also made much headway in Banking and Insurance. India has been denied any opportunity to build her own shipping trade and railways have been taken out of the control of the Indian Legislature and have been placed under the charge of a Statutory Railway Board. The outstanding exceptions where Indian Capital and Enterprise have made the greatest headway are the Cotton Mill Industry, Tata Iron and Steel, hydro-electric and associated industries, and those sugar factories which have been established since 1930. The Chemical Industries have found the most powerful unequal competitor in the Imperial Chemical Industries which practically hold a monopoly of supply of the heavy chemicals.

The distinction between the raising of capital abroad and the ownership of such capital is most clearly visible in India. Her position with regard to foreign capital is very different from that of Japan or China. Japan has freely borrowed abroad to finance her own industries, but she has always retained control of the capital in her own hands. China has followed Japan in this respect, but foreign investors are shy of Chinese investments because of her defaults. In India foreign capital flows in abundance, but invariably everywhere the control of such capital is in British hands. The Jute Mill Industry is the most outstanding example. It has been promoted, controlled and financed by British Companies, and although nearly 60 per cent. of the Capital in the Jute Industry is now owned by Indians, the control is almost exclusively in the hands of British Managing Agents. These European Managing Agents have enjoyed full opportunities for technical and managerial training and experience, and undue advantage has always been taken of the cheapness and abundance of Indian manual labour, and the same advantage has also been taken in the purchase of raw jute from cultivators who have no holding power. The Managing Agency system, a peculiar form of organisation unknown anywhere else in the world, still prevails in India and is particularly favoured by the British Community here. It has undoubtedly helped in the Industrial development of India at the start, but its worst feature has been that it has perpetuated the racial grouping of interests and has prevented co-operation between Indian and British firms. The Eastern Group Conference which has met at Delhi has further confirmed the Indian belief that the British Capitalists are unwilling to part with the control of their capital and to transfer it to Indians hands, and in this they get the full protection of the British Government despite the latter's declared policy of Fiscal autonomy. It is becoming increasingly necessary to start aircrafts, ship and motor building industries in India, but in spite of the difficulty of running these industries in England against constant interference from the air, the British Capitalists are unwilling to cooperate with the Indian Capitalists in the control of capital to be sunk in these industries. Seth Walchand Hirachand has been trying since the outbreak of the present War to build a shipbuilding factory, an air craft factory and a motor car factory but he has obtained very little sympathy and help either from the Indian Government or from the British Capitalists in his endeavours. Sir Alexandar Roger, a person connected with the Callendar Cable Company and not a delegate to the Eastern Group Conference is presiding over the Heavy Industries Committee and Sir Walter Massey-Green, the Australian delegate is presiding over the Small Industries Committee. The Australian delegates expressed the view that while Australia herself is in a position to manufacture air craft and ships, it would be an unnecessary duplication to start these industries over again in India. The representatives of Indian Capital and Enterprise have not even been invited as delegates to the Conference. This indicate that an attempt may be made, after the Group Conference, to perpetuate the concentration of industrial leadership in British hands with the backing of the commercial safeguards clause in the constitution. It is likely to prove the most stubborn obstacle in the way of Indian Industrial progress. and Mr. J. C. Mukerjea, the Chief Executive Officer of the Calcutta Corporation, was probably the first to express this apprehension in a tea party given to the Calcutta journalists in the Commercial Museum Hall.

(To be continued)

LIST OF INDUSTRIAL RESEARCHES

University To Collaborate In Compilation

It is understood that the Board of Scientific and industrial Research, Government of India, contemplate to compile an annual list of industrial researches completed, in progress and contemplated in India at the various Government and certain other laboratories.

In order that the list of researches may be more complete and valuable and assume an all-India character it is proposed to include in the same compilation the industrial researches which are being conducted in the various universities and affiliated laboratories.

The University of Calcutta in whom the request has been made have agreed to collaborate with the scheme of the Board and have appointed Prof. Phanindra Nath Ghose and Prof. B. C. Guha to furnish the report and forward it to the Board.

The following information sought after will be supplied (1) list of industrial researches completed during the year 1939-40, (2) list of new items or new aspect of existing items of industrial researches in progress during the year 1940-41 and (3) list of new items or new aspects of existing items of industrial researches contemplated for the year 1941-42.

Tuberculosis Among Students—I

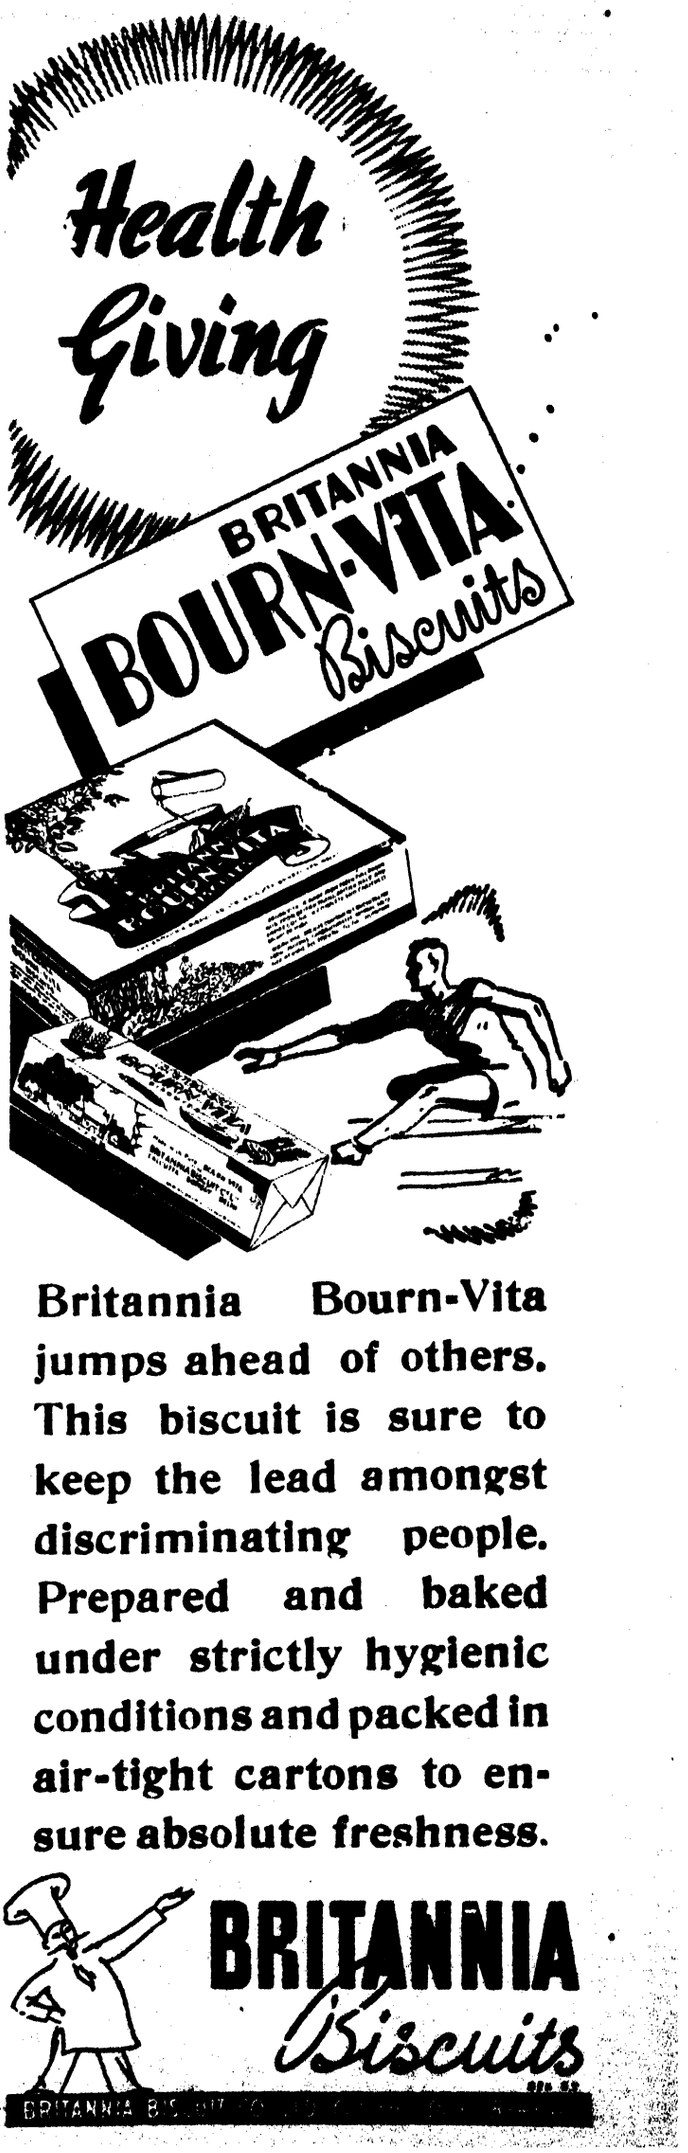
[By Amiya Jiban Mookerjee]

As tuberculosis is a serious problem in the years of late adolescence and early maturity, that is to say, the college age, it is imperative that the student community of this country must take it upon themselves to carry on in right earnest thorough investigations into this problem among them and also to take such measures, without letting the grass grow under their feet, as to uproot this evil out and out.

A few years ago, Sir Hassan Suhrawardy, who was then the Vice-Chancellor of the Calcutta University and also the Chief Medical Officer of the East Indian Railway, remarked in one of his specially written articles on the tuberculosis menace to the students: ". . . . . With a lowered vitality and with the ignorance of the spread of infection, our young students are faced with the serious menace of an invasion of tuberculosis in a very alarming manner." Dr. A. N. Chatterjee, some time Secretary of the Students' Welfare Committee of the Calcutta University also once stated in a report, which was based on a twelve years' study of the tables prepared by the Medical Board attached to the Welfare Committee, that there had been a slight improvement in the physique of the Bengali students, but the satisfaction which might have been derived from this feature was marred by the fact that there had been a *rise in the incidence of students suffering from chronic lesions of the lungs.* Then, again in 1934, the Annual Report of the Students' Welfare Committee of the Calcutta University had to say: "The increased incidence of malnutrition and of tuberculosis is a disquieting figure and calls for immediate action . . . .". Although the finding contained in the report of the Students' Welfare Committee for the year 1937-38, was that the average Bengali student of 1937, was a more healthy person than the student of 1921, the report added that the standard of physical fitness achieved was still considerably below that of the students of the Western countries, and that there had been no decline in the incidence of affections of the lungs.

We may safely say that the health of the students of any other Indian University is in no way brighter than this; in fact, in every part of the country this disease is eating into the vitals of the nation in the same pitiless manner.

That this disease corrodes young lives most is always obvious from the statistics published by the annual reports of the different tuberculosis sanatoria, and it goes without saying that the toll of young lives is mainly taken from the students. In 1933-34, and also in 1934-35, the students who had undergone treatment in the Union Mission Tuberculosis Sanatorium at "Arogyavaram", in South India, topped all others and in 1935-36 they came second. In Itki Sanatorium (in Behar) the number of students was the highest according to the annual report of the Sanatorium for the year 1936. The Jadabpur Tuberculosis Hospital, near Calcutta, too, has the same story to tell in its Annual Report for the year 1938. In every likelihood, reports of many other Indian sanatoria, will reveal the same unfortunate state of affairs with regard to the incidence of tuberculosis among the students of this country. In fact, tuberculosis is a world problem. The disease generally affects the young, just of the age of students. Unfortunately, the disease is rapidly spreading among the student population, and this is a situation the seriousness of which cannot be viewed with equanimity. Statistics furnished by several workers of the Tuberculosis Association have disclosed time and again, the pernicious degree and alarming proportions of this evil which is certainly a matter of grave national concern as the vitality of our young hopefuls is being sapped to the detriment of the ultimate interests of the country.



Few members of the student community at large in this country are, perhaps, aware what untold misery this disease has brought to them and how actively they should interest themselves in the campaigns against this disease without further loss of time. Although this disease is no respecter of persons, and it has its victim in every stratum of society—irrespective of worldly means, education, culture, age, constitution, sex, race, community, religion and nationality—it loves most to destroy young persons, and only too often it darkens mercilessly their radiant possibilities, takes out of them all their rosy ambitions and aspirations, shatters their physical and mental abilities by exhaustion and worry, so that despite talents and genius they are worn down, dejected and miserable with no other prospects in life.

Tuberculosis has indubitably become dangerously rampant among the young ones, and the reasons are obvious. Lack of nourishment, lack of rest and over-crowding, which are the inevitable results of economic helplessness of the people, are greatly responsible for the rapidity with which this disease is spreading in the land. Hence, the students, who are but a section of the entire population of the country, are naturally the helpless victims of the circumstances.

But the present system of education, too, has often been considered to be greatly responsible for the deterioration of the health of the students and

has on many occasions been severely criticised by many competent and responsible persons who could not but be alarmed at the deplorable state of the health of the students in this country. To quote Sir Hassan Suhrawardy again, from a writing where he discusses the health of the students in relation to tuberculosis: ". . . . . We should change the method of education in the Indian schools and ensure that the curriculum is also lighter. Of recent years there has been a great and mischievous tendency of giving too much importance by some teachers to the attendance at lectures. The whole method of education requires a drastic change and cutting down of the length of the course in every stage and the hours to be spent in the class rooms." That under a wrong system of education hundreds and thousands of children suffer mental cruelty, day after day, has drawn the serious attention of the educationists of other countries as well. Mr. A. R. Foster, the Headmaster of the Belfast Royal Academy, while describing the abuses that are predisposing factors not only for tuberculosis but for every other kind of disease in the adolescent, including the mental, which is the worst of all, says: "I submit, that our modern system is not education at all, but mere cruelty to children. Why do we put up with it? Because we refuse to think We are in the grip of an inhuman system, operated by men and women who were reared in it and are too dulled in mind or themselves too much over pressed to do more than administer palliatives where a major surgical operation is an imperative necessity. This system in Ireland is the direct descendant of what was called the Intermediate system, which to speak as a victim, was a rotten system. It set up base commercial standard of competition for money awards and bounded on the bright young brains of this gifted land to chase pounds, shillings and pence instead of Truth, Beauty and Justice . . . . . " Mr. Foster does not even approve of the ways in which children now enjoy their games after having spent long hours in both school and home work, and believes that the present methods of arranging games are hardly helpful to the young folk for the conservation of their energy. Mr. Foster pleads for a careful delimitation of the work as well as all strenuous games of the children and advocates more restful recreations in order to make children's lives more pleasant and happy. Alderman P. Astins of Essex County Council, discussing the social aspects of tuberculosis, refers to the problem of the physical and psychological strains of the students, and remarks: "Our very enlightenment begets its own problems. The recent emphasis on physical fitness has influenced the curricula in schools, with added emphasis on games. All to the good with adequate safeguards." Dr. J. A. Myers, in discussing tuberculosis control in the 'teen ages', also says, "In the schools great stress is laid on exercise . . . but what has been done about conservation of energy? . . . . Perhaps there is no one change that could be brought about in the school system that would do more to insure the good health of the girls and boys than the establishment of a definite rest period of approximately an hour some time during the day."

Steel Production*

Modern Productive Methods

THE production of steel in India is increasing rapidly, partly on account of war requirements, but principally due to the local demand for indigenous steel created by India's industrial expansion, and although there are several electric furnaces operating in India a description of one of the latest types will be of general interest. The Brymbo Steel Company, Limited, of North Wales, has, we are aware, been in existence since the middle of the eighteenth century but is still today very much abreast of the times through having recently installed one of the most modern designs of electric arc furnace for the production of high grade steels. The new plant, one of the Electric Furnace Company's latest 5-7 tons "Efco" units with hydraulically controlled electrodes, is being used to produce, at the rate of 150-180 tons of ingots (about 115 to 135 tons of billets) a week, about 25 different types of special steels. To operate it a 3.3 kv. supply is taken from the North Wales Power Company, through an oil circuit-breaker specially designed by Whitehead Switchgear and Inventions Limited, to withstand the very heavy duty imposed on it, with a rupturing capacity of 100,000 kva. It trips on an average about twice a shift, due to the enormous surge arising when the electrodes burn holes in the charge and this suddenly collapses. Despite this harsh treatment the Whitehead patent laminated contacts incorporated show little or no wear, while the oil itself is found to keep in remarkably good condition.

Brief Description

An oil pump is built in and the switch is remote operated by means of a solenoid, a Westinghouse rectifier being provided to supply the necessary D.C. Overhead coils and time delay mechanism are also embodied. From the circuit-breaker the high voltage supply is taken to a 2,300 kva. Metrovick water-cooled transformer, which has six tappings giving 180, 160, 140, 114, 100 and 85 v., the full kva. capacity being available only on the top voltage. Off-load voltage operated tap-changing gear, which is all fully inter-locked, operates on the high-voltage side, all the meshing being effected outside the transformer. The reactor provided on the transformer has tappings so that it is possible to obtain full, two-thirds, one-third or no reactance. The total reactance of the transformer, its busbar, the furnace and cables is about 30 per cent. All-welded sheet-steel construction is employed for the transformer building, other safety features include a Buchholz relay. A pump keeps the circulating oil in constant motion, the usual type of conservator tank being fitted.

Busbars

Three sets of busbars, each feeding one of the three electrodes embodied in the furnace, run from the transformer. To these busbars are fitted 6,000/15-A current transformers which are in circuit with relays. The latter are in

turn connected with a hydraulic system which pumps soluble oil in water from a tank into an accumulator, from which three pipes are taken, one to each electrode. The pressure in the accumulator is maintained at 170 lbs. per square inch, a certain amount of compressed air being introduced into the accumulator to act as a cushion. The pressure pipes from the accumulator feed the bottom of cylinders attached to the furnace. Pistons coming from the top of the cylinders are attached to the electrode carriages by means of crossheads. The electrode carriages themselves run on rollers on the electrode masts which are of tubular steel construction. The pressure of the hydraulic supply and the diameter of the electrode raising cylinders are arranged so that counter-weights are unnecessary, this reducing inertia and giving quick response to changes in electrode current.

Current Control

The amount of current passing through the electrode circuit depends on the distance of the electrodes from the charge, and as the relays are arranged to operate in accordance with the amount of current passing through the electrodes, it follows that whether pressure is applied to the electrodes or not depends on the position of the electrodes. Successful operation of the furnace demands control not only of current but of voltage too. The current variation is achieved by means of a selector switch giving seven different ratios—15/5, 13/5, 11/5, 9/5, 7/5, 5/5 and 3/5. If the electrodes were allowed to come down without voltage control, they would be damaged or else the steel would pick up carbon—a thing which has to be avoided. Accordingly, to guard against this, voltage relays are connected between each electrode and earth. As the bath of the furnace is also earthed, the result is that the relay is short-circuited when the electrode nears the bath or scrap, and the electrode is automatically raised.

Demand And Consumption

For melting a charge, which takes on an average about two hours, one of the higher voltages is employed, but for the refining period, lasting from two to four hours, according to the type of steel, a lower voltage is necessary if burning of the furnace brickwork is to be avoided. The average initial load for melting is in the neighbourhood of 2,000 kw., with swings as high as 3,500 kw. These swings gradually decrease as the melting proceeds. As soon as melting is completed, and the refining starts, only 500 to 700 kw. is required. On an average it takes about 570 kwh. to melt a ton of charge, while for refining a further 230 to 280 kwh. is needed. The temperature of the arc reaches about 3,000 degrees C., and that of the steel about 1,650 degrees C., though this figure varies according to the type being produced. The maximum demand of the furnace is 2,100 kw. and the weekly consumption approximately 120,000 kwh. The furnace has the remarkably high power factor of 0.95. The furnace is of the swing-roof type permitting charging by means of a patent charging basket at the top in only five minutes. An ingenious system enables a single hydraulic cylinder, operating at about 600 lbs. per square inch, to work both the roof and the furnace tilting mechanism, the changing of a steel pin from one position to another effecting the simple change-over. This arrangement has the additional advantage that it is impossible inadvertently to carry out the two operation simultaneously. The electrode arms, too, are electrically interlocked

LONDON TRANSPORT SYSTEM

The adjustment of working hours in shops and offices to conform with the Government's suggestion for mitigating inconvenience of early black-outs, has modified the peak hours of traffic on the whole London transport system says a *British Official Wireless* message, dated London, November 29.

The Transport Board has been readjusting its services to provide the fullest facilities for its millions of daily passengers between their homes in the suburbs and Home Counties and their place of work.

The Board's fleet of omnibuses was recently augmented by hundreds of vehicles drafted in from the provinces with the result that a greater number of buses are plying the streets of London to-day than a year ago.

Now, the reinstatment of the pre-war services of the "Green Line" coaches are announced by the Board. The services of these coaches were curtailed at the outbreak of war when Government comandeered a large number of coaches as emergency ambulances for air raid casualties, which happily have so far proved to be on a much smaller scale than it was thought prudent to plan for. These services will now be strengthened resulting in the doubling of routes, and on some routes there will be twice as many coaches as during recent months.

by limit switches at the top of the mast, so that it is impossible to swing the top of the furnace unless the electrodes are in the fully raised position.

Considerable Reliability

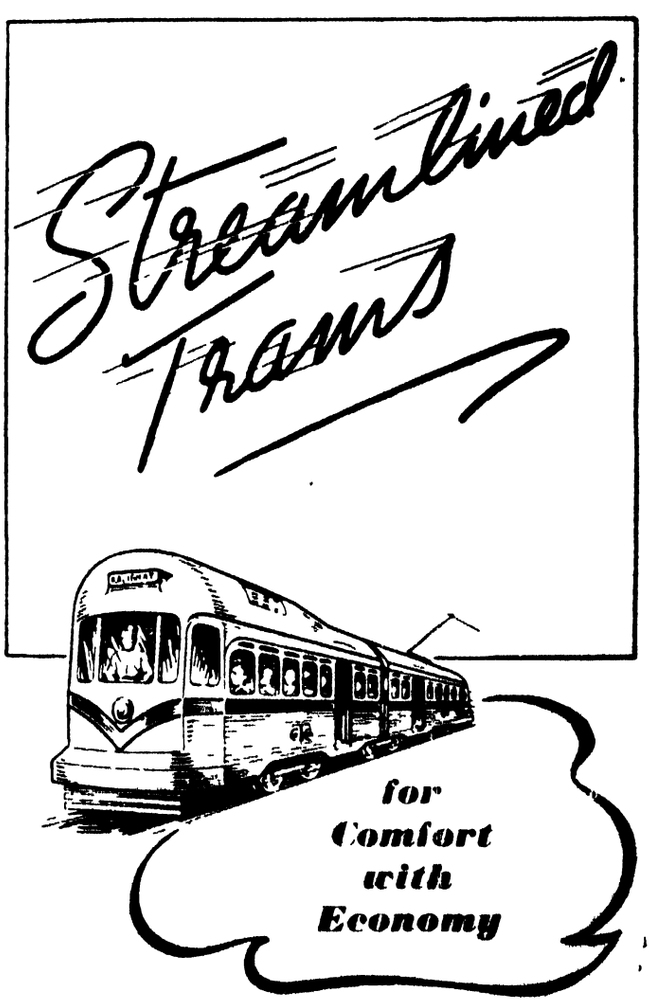
Water-cooled arches are provided over the door and tapping spout to prevent body distortion and the whole furnace is on a U-shaped girder structure to prevent undue strain. The electrodes pass through cast-steel water coolers, on the top of which are cast-iron economiser segments. The electrode holders are of cast steel, not water cooled, and the holder tightening gear is spring loaded. The electrodes are 9 inches diameter graphite, and consumption is approximately 12-15 lbs. per ton of steel produced. Although the new equipment has been in operation only a few weeks, so simple and reliable is its working that the company is already planning to add a similar furnace with a slightly larger capacity (7-10 tons). Unfortunately, owing to the North Wales Power Company's distribution arrangements, it will not be possible for these two furnaces to melt simultaneously, but by staggering the melting operations, the second plant will, however, permit a considerable expansion of output. The rating of both furnaces will be the same, with the result that the larger unit will give slightly slower melting. Otherwise, with the exception of a modification of the transformer to give its full output at the top three voltages employed, instead of only on the top one, both units will be identical.

Power Costs

Due to high transmission costs caused by the location of the site where the furnace is installed, power costs are high compared with more concentrated manufacturing areas, and some special consideration to this on the part of the principal authorities involved would appear to be worthy of most serious consideration, as this new class of manufacture in North Wales, which involves electric furnace melting, is likely to develop rapidly both now and after the war. In fact, the future of employment in the district is going to depend at some later date very largely upon consideration being given to this all-important plant.

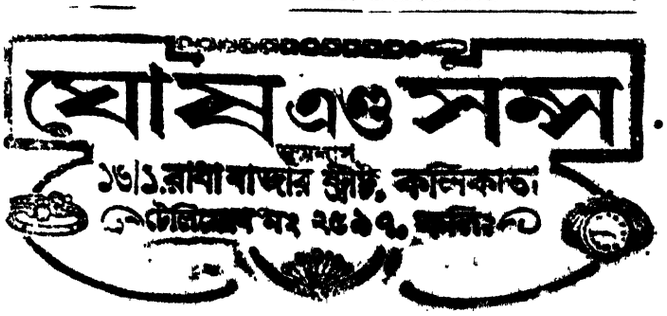
DR TAGORE'S HEALTH

Mr. Anil Kumar Chanda, Secretary to Dr Rabindranath Tagore, has issued the following statement —



With the return of Gurudeva (Dr. Tagore), to Santiniketan an impression seems to have gained ground in the country that he is now restored to full health and has already resumed his normal activities of daily life Unfortunately this is far from the truth. He was removed from Calcutta not because he had completely recovered but as he insisted on returning to his Asram and the medical advisers also thought that complete recovery would be hastened in the congenial atmosphere and pleasant surroundings of Santiniketan. He is still confined to his room and is undergoing a regular course of treatment. He is not in a position to meet any visitors or attend to his correspondence; so, friends are earnestly requested not to come to Santiniketan with the idea of visiting him or write to him in the hope of getting any reply.

—Tuberculosis Among Students



(*Continued from page* 83)

The current educational systems and some other vicious systems that have a demoralising and enervating effect on the mind and the body cannot, however, possibly be changed wholly by the students themselves. And many of the causes of this speedy growth of tuberculosis among students are, of course, beyond the control of the student community. But certain things there are which are well within their control. Not only, for instance, can they develop healthy habits and obey the laws of hygiene which are not infrequently neglected by them, but they can, also, in the words of Sir William Osler, "help the most important and most hopeful campaign . . . . . by joining actively in the work of the local and the national anti-tuberculosis societies."

CALCUTTA NEWS & VIEWS A Digest

EDUCATION PORTFOLIO

The *Associated Press* understands that as the Hon'ble Chief Minister, Mr. A. K. Fazlul Huq is anxious to relieve himself of departmental work he intends to offer the education portfolio to one of his colleagues.

COUNCILLOR BIPIN GANGULY DISCHARGED

On Saturday last before Mr. Wali-Ul-Islam, Additional Chief Presidency Magistrate, Northern Division Police Courts, Mr. Bipin Behari Ganguly, Councillor of the Calcutta Corporation, and thirteen others, who were arrested in connection with the armed decoity committed in a house in Duff Lane, were again placed by the officers of the Special Branch of the Calcutta Police.

The Magistrate after going through police reports discharged Mr. Bipin Behari Ganguly and seven others while the other seven sent before the Magistrate for trial.

The trial will commence on December 13, next.

CLINICAL TRIAL FOR INDIAN DRUGS

A clinical trial of their products in the hospitals under the control of Government and local bodies, has been stressed in a communication by the Indian Chemical Manufacturers Association to all Provincial Governments and major Indian States.

The Association states that several drugs and proprietory remedies identical to those coming from Germany and other foreign countries are now being manufactured in India and the manufacturers are in a position to prepare many more also, but the absence of the facility of a clinical test makes it difficult to convince the medical profession and the efficacy of the products.

NEW BUILDING FOR BOMBAY MUTUAL

The steady success which the Bombay Mutual Life Assurance Society has maintained for the last seven decades was alluded to by Sir Nripendra Nath Sircar when on the 29th November, he laid, in the presence of a distinguished assemblage, the corner stone of the new building of the Society at the crossing of the New Howrah Bridge Approach Road and and Royal Exchange Place Extension.

Extending a cordial welcome to Sir Nripendra and the guests Mr. U. S. Desai, Chairman of the Society's Board of Directors characterised the ceremony as one that would go down in the history of the Bombay Mutual as a red letter day as it marked a new era of progress, development and usefulness of the institution and the noble work to which it has set its hand.

A. R. P. ADVICE TO CITIZENS

Khwaja Sir Nazimuddin, Home Minister, Bengal, gave a broadcast talk on A. R. P. from the Calcutta Station of the All-India Radio on Saturday last.

He referred to the public co-operation on the occasion of the recent lighting test and said that it was the Government's intention to perfect the A.R.P. organization as quickly as possible and for this frequent practices would be necessary. Such practices, to be effective, must test not only the lighting arrangements and the staff in control of such arrangements but also all other A. R. P. personnel as well as the allied organization of the Civic Guard who, at the time of an air raid, would have definite duties and responsibilities to perform.

Such tests could not always take place at such a convenient time in the life of the city, and the industrial area as 10-30 at night. Times would have to be selected when the life of the city was more approaching the normal and the warning of the approach of a test would as time went on become less and less elaborate and more and more reliance would have to be placed on the sound of the siren or hooter.

Sir Nazimuddin reminded his listeners of the test that will be held on December 11 between 7 p.m. and midnight and asked each and everyone to help in making it a success.

The A. R. P. organization he said now covered the whole of Calcutta and the industrial area of the 24-Parganas, Howrah and Hooghly and had been extended to certain other towns in Bengal. He requested the citizens to find out immediately what exactly was being done in their area and to learn who were the wardens and other A. R. P. officers in charge there. They should ascertain what part each and every individual was expected to play in the event of an impending air attack. Further, all those who were able-bodied and are not already fully engaged, should get in touch with their Chief air raid warden and offer their services. It might be that the offer could not be accepted immediately as all posts might be filled, but the presence of reserves would frequently be of value and training could be provided.

The public as a whole could not join the organization, however. The watchword for them should be : avoid panic and carry on their normal activities and obey the instructions issued by the A. R. P. authorities. Panic and not the high explosive or incendiary bomb was the greatest danger that must be fought.

SIR GOOROODAS BANERJEE : IN MEMORIAM

Tribute to the life and work of the late Sir Gooroodas Banerjee was paid at a public meeting which was held on Monday last, at the Sir Gooroodas Institute Hall, Narkeldanga, in observance of the twenty-second anniversary of his death. Mr. Narendra Kumar Basu presided.

ALL-BENGAL MUNICIPAL CONFERENCE

The All-Bengal Municipal Conference will be held at Berhampore on December 30 and 31. Mr. Ambica Charan Roy, Chairman, and Maulavi Abdul Gani, Vice-Chairman, of the Berhampore Municipality, have been elected Chairman and Secretary of the Reception Committee respectively. The Committee has decided to request the Nawab Bahadur of Murshidabad to open the Conference.

Mr. Justice Charu Chandra Biswas said that their province could boast of many great men, who had devoted their lives to various humanitarian services. But it would be no exaggeration to say that a man like Sir Gooroodas was rare. He held out a noble and inspiring ideal before them. Of the many noble characteristics in him what stood out as prominent was his religious-mindedness. Up to the last moment of his life, he remained firmly loyal to his ideal. His faith in their ancient cultuke and religion was unbreakable. He did not totally disregard Western culture but accepted what was good in it. But he never forgot that he was the son of this land and above all he was a Hindu.

Dr. D. N. Maitra said that his devotion to piety and religion was the principal trait of Sir Gooroodas's life. The glamour of Western thought and culture could never make him blind to the culture and civilisation of their own country. His was a life noble and great, which should fill everybody's heart with inspiration.

Prof. Debaprasad Ghosh said that great men like Sir Gooroodas always liked to remain in the background in spite of his brilliant attainments. Distractedness now-a-days was common to many of them who would rather love colour and display than intrinsic worth, but Sir Gooroodas was a man inclined to dwelling apart. He lived a simple and saintly life.

Mr. N. K. Basu in course of his speech said that Sir Gooroodas was honest in word, thought and deed. This the speaker emphasised by way of illustration. Sir Gooroodas could not tolerate dishonesty of even a minor nature.

HUNGER-STRIKE IN PRESIDENCY JAIL

The situation arising out of the hunger-strike in the Presidency Jail is dealt with in a *communique* issued by the Goverment of Bengal.

Mr. Subhas Chandra Bose, it is stated, is decling food since November, 29.

The *communique* says :—"During October and November, security prisoners detained in the Presidency Jail under Rule 26 of the Defence of India Rules put forward certain demands for special treatment and threatened to go on hunger-strike if the Government did not comply with these demands. The demands, together with the measures taken by the Government upon representations made by prisoners, were mentioned by the Home Minister during the course of the debate in the Legislative Assembly on November 28, 1940. The Government will issue later a *communique* dealing with them in order that the public may be in possession of the full facts of the case.

"On November 25, fifteen of the prisoners, professing dissatisfaction with the extent to which their demands had been met, resorted to hunger-strike in accordance with their threat and are still declining food. Their names are : Messrs. Subhas Chandra Bose, Pratul Chandra Ganguly, Anil Ganguly, Dharani Goswami, Narendra Nath Das Provat Chandra Chakravarty, Rabindra Mohan Sen Gupta, Saroj Kumar Chakrabarty, Ashutosh Kali, Radha Gobinda Bhanja, Khitish Chandra Bhowmick, Sripati Nandy, Anil Roy Chowdhury, Rakhal Chandra Ghosh, Charubadan Chakrabarty and Maulvi Abdul Halim.

Three undertrial prisoners, charged with dacoity, also declined food on November 25, but broke their fast on November 26, and have not resumed it. Their names are : Moni Mohon Ghosh, Nripendra Nath Singh and Bepin Behary Ganguly.

"On November 29, security prisoner, Mr. Subhas Chandra Bose, declined food for different reasons. He is still on hunger-strike.

"The health of all 16 prisoners is satisfactory and there is no cause for anxiety in any case. Forcible feeding has been resorted to in the case of one prisoner only, Mr. Sripati Nandi, who is being cared for in the Jail hospital.

"The Government propose to issue further *communiques* from time to time in this connection, for the information of the public".

HUNGER-STRIKE BY MR. SUBHAS BOSE

In the Bengal Legislative Assembly on Tuesday, Sir B. P. Singh Roy, Revenue Minister read out the answers of Khwaja Sir Nazimuddin, Home Minister, (who is absent from Calcutta), to a series of questions asked by Mr. Santosh Kumar Basu on short notice relating to the hunger-strike by Mr. Subhas Chandra Bose.

Sir B. P. Singh Roy stated that Mr. Subhas Chandra Bose had intimated to the Government his reasons for resorting to hunger-strike. This intimation had been given by letters to the Superintendent of the Presidency Jail dated October 30, and November, 14, to the Home Minister dated October 30, and November, 3, and to His Excellency the Governor and the Council of Ministers dated November 26. The explicitly-stated reason was to procure his release. He (Mr. Bose), also stated that he was protesting against the Defence of India legislation on the ground that it had no ethical or popular sanction; also against the application of that legislation by the Government of Bengal in a manner showing communal discrimination and against his own arrest, detention and prosecution which he described as vindictive, illegal and inequitable.

Sir Bijay Prasad also stated that no reply was sent to Mr. Bose. Sir Bijay Prasad added that Government were not prepared to place the correspondence that had passed between the Government and Mr. Bose in the last two months on the table.

To the question if any action was taken by Government to avert the hunger-strike on the part of Mr. Bose, Sir Bijay Prasad replied in the negative because there was no ground for Mr. Bose's action.

THE LATE MR. B. B. CHATTERJEE

The *Sradh* Ceremony of the late Mr. Bidhu Bhusan Chatterjee, who was killed as the result of an accident in a lift at the Improvement Trust Office on Clive Street on the 28th November last, was performed according to the strict Hindu rites at his Bhowanipore residence on Sunday last. Mohamahopadhyay Durga Charan Sankhya-Vedantatirtha and other well-known Pundits surpervised the *Sradh* Ceremony. There was a large distinguished gathering and Councillor N. C. Chatterjee, nephew of the late Mr. Bidhu Bhusan

Chatterjee and Mr. Bibhuti Bhusan Chatterjee, the eldest son of the deceased and his brothers received the guests.

* * * *

A public meeting to condole the untimely and accidental death of Mr. B. B. Chatterjee, of Messrs. B. B. Chatterjee and Sons, Contractors, was held at the premises of Gour Gobindo Math, 41-15, Russa Road, Tollygunge, on the evening of the 29th November last, at the instance of the Secretary Mr. Kshitish Kumar Ghose.

As proposed by Mr. Durga Das Banerjee, Engineer and supported by Mr. Harsanath Mukherjee, Pandit Dwijapada Goswami took the chair.

A number of speakers addressed the meeting, dwelling upon the life of the departed, who took a keen interest in public affairs. He helped the Deshabandhu Memorial Committee by contributing 50 thousand bricks and supplied the Howrah Samaj with building materials when the "Nader Nemai Mandir" was constructed. He was greatly attached to the Gour Gobindo Math and many philanthrophic and religious institutions has received very active support at his hands. He lived a simple, honest, truthful, amiable and religious life and anyone who came in contact with him could not but love and adore him.

Mr. Amrita Nath Mukherjee, Mr. Kshitish Kumar Ghose, Mr. D. N. Basu Mullik, Mr. Sripati Banerjee, Mr. Bishnupada Bose and Mr. Nut Behari Shaha also paid tributes to the departed. The President, Pandit Dwijapada Goswami, explained to the audience the immortality of the soul and the insignificance of the mortal body.

The gathering passed a resolution expressing their great sorrow at the sad demise of Mr. Chatterjee and their sympathy to the members of the bereaved family. The meeting concluded with *Sri Harinam Sankirtan*.

MAYOR FETED

A tea party to meet Mr. A. R. Siddiqi, Mayor of Calcutta, was given by the President and members of the Calcutta Moslem Orphanage at No. 8, Syed Salley Lane, Calcutta, on Saturday last.

Mr. Siddiqi was received by the Home Minister, Khawaja Sir Nazimuddin, and was welcomed in an address made by one of the orphans. Mr. Siddiqi was presented with a *qasida* which had been composed in his honour by the boys.

In his address, Mr. Siddiqi told the boys not to be ashamed because they were orphans and urged them to be courageous.

CENSUS EXPENSES

The way in which the Census operation is proposed to be conducted in Bengal, came in for strong criticism when a Bill was placed before the Bengal Legislative Assembly on Tuesday last to make the Calcutta Corporation and other municipalities to bear certain expenses incurred in connection with the census.

The Bill,—the Bengal Local Authorities Census Expense Contribution Bill,—which was introduced by Sir Bijoy Prasad Singh Roy, aimed at providing that a portion of the Census Expenses might be charged to the municipal funds or the Corporation of Calcutta. In the case of the Calcutta Corporation the charge shall not exceed one-half. The Bill also sought to provide for powers to enable Union Boards and Municipalities to make voluntary contributions. No contribution, Sir Bijoy Prasad stated, would be exacted from the bodies for the relief of Census Budget of the Central Government. At the request of the Government of India, the Government of Bengal agreed to co-operate with the Central Government in Census work subject to the observance of the same principle as in 1931.

BALL AND CABARET IN AID OF THE BLIND

Funds in aid of the Calcutta Blind Relief Camp and the War Blinded, benefited considerably as the result of a Ball and Cabaret held at Firpo's Resturant, Calcutta, on Tuesday night.

Held under the distinguished patronage of His Excellency the Governor of Bengal and the Lady Mary Herbert, the Ball drew a very large and appreciative crowd.

Several cabaret items—outstanding among which were delicia Jehan's snake dance, "The Black-out Stroll" and "The Hornpipe"—added to the success of the function.

A large number of prizes were presented to lucky ticket and programme holders.

JUTE INVESTIGATIONS

With the approval of the Government of India, the Bengal Government have appointed Mr. D. L. Majumdar, I.C.S., Secretary of the Indian Central Jute Committee, to be an associate of Prof. J. A. Todd, who has been brought out from England by the Bengal Government to investigate into the constitution and working of the Jute and Hessian Future Markets.

Mr. Majumdar will be associated with the Professor in these investigations, in addition to his duties as Secretary of the Indian Central Jute Committee.

BENGAL SHOPS BILL.

First Application to Calcutta and Howrah

It is understood that the Bengal Shops and Establishments Act, 1940, which was passed by both the chambers of the Bengal Legislature in September last, will come into force with effect from January 1, 1941.

The Act will, in the first instance, apply to the city of Calcutta and its suburbs and to the Municipality of Howrah.

The main features of the Act are:—

(1) Every shop must close after 8 p.m. at night.

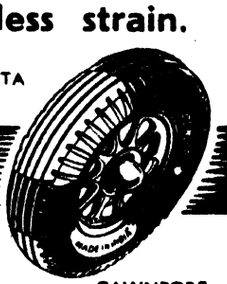
(2) A shop-keeper will not be able to require any of his employees to work for more than ten hours in any one day and after half-past eight at night.

(3) Every person employed in a shop will be entitled to one hour's rest after seven hours' work in the day, and to half an hour's rest after five hours' work.

(4) Persons employed in a shop and in commercial establishments will be entitled to one and a half day's holiday every week.

(5) Employers will have to pay the wages of persons employed in a shop, commercial establishments and establishments for public entertainment or amusement by the tenth day of the month immediately succeeding that in respect of which such wages are payable.

(6) A person employed in a shop, commercial establishment and establishments for public entertainment or public amusement will be entitled to fourteen days' privilege leave on full pay after year's service and to ten days' casual leave on half pay every year.



THE FIRST CITY

in India needs efficient

CONSERVANCY EQUIPMENT...

The first city in India is already experiencing the advantages of pneumatic bullock cart tyre equipment. Every day it is possible to see the easy traction of bullock carts on pneumatic wheels, the lack of damage to road surfaces, and all can appreciate that the animals are put to much less strain.

ECHOES OF OLD CALCUTTA

History Of Garstin Place

[By J. R. Stapleton, *Calcutta Station Director, All-India Radio*]

The building which the studios of the Calcutta Station are situated was first used for broadcasting in 1927, by the old Indian Broadcasting Company. It was taken over by the Government of India in 1930, and has recently been completely renovated and adapted to radio requirements.

The history of the site on which the building stands is interesting, as it is closely connected with the original settlement of old Calcutta. Where the studios now stand was at one time the only hospital the early settlers possessed. It was ill-ventilated, insanitary and generally unsuitable. It was pulled down in 1763, and a new hospital was erected where the Presidency General Hospital now stands. The old hospital had been built over a filled-in-tank, and after its demolition, the ground stood vacant for some years. It is said that the climate of Calcutta in those days was as bad as the method of treatment of the unfortunate patients, the rainy season being the harvest-time of the undertakers, who made immense sums of money. Old records reveal that only one-fourth of the European population survived the dreadful conditions and a large dinner-party used to be given on October 15, each year to enable the survivors to congratulate each other on their being alive.

Find Of Cannon

Adjacent to and just south of the old hospital was a burial ground and a powder magazine on the site of which was built St. John's Church in 1787. Five years later—in 1792—the Old Court House was demolished under the supervision of Major General John Garstin, who used the material and fittings to erect the present building and the block of buildings that now run along the north side of the Church compound and form southern end of Garstin Place, the eastern portion being utilized by the Foreign Office.

During the recent excavations by All-India Radio, three old cannon were unearthed in the compound (now mounted on each side of the main entrance). The origin of the cannon is obscure, but the fact that the old powder magazine lay directly to the south and also that a number of cannon-balls were discovered in the same vicinity, together with two other smaller guns a few years ago, leads one to suppose that these pieces of ordinance formed at one time part of an old battery, especially as it is known that the East India Company manufactured guns and explosives in the Old Fort before the Siege of Calcutta, and used the powder magazine for storing their munitions. Another interesting point is that during the fight round the present site of Dalhousie Square, which preceded the fall of Calcutta in 1756, a battery posted near the powder magazine "went into action," and it is highly probable that these old cannon formed part of it.

The site on which the powder magazine was built was known originally as Perrins's Gardens and was used as a pleasure ground. After the Siege, the site became the property of the Maharajah Nobo Krishna Deb, and was eventually purchased by Warren Hastings for Rs. 10,000. He in turn passed it on to the Trustees for the building of St. John's Church.

Letters TO THE EDITOR

[The Editor does not hold himself responsible for the views expressed by the correspondents]

BUILDING RULES

To The Editor, "Calcutta Municipal Gazette."

Sir,—Though we are not in agreement with many clauses of the Calcutta Municipal (Amendment) Bill, 1940, yet we appreciate the remedy given to the rate-payers by Clause 44 to check the vagaries of the Building Department and Committees of the Calcutta Corporation. Unless Clause 44 is given a retrospective effect to cover all illegal constructions made after the publication of the Bill in the *Calcutta Gazette* on 13th June, 1940, the Bill would fail to have expected results —Yours etc.

H. M. BANERJEE.
Pleader.

93, Hari Ghose Street.
Calcutta.

LEGAL INTELLIGENCE

ASSESSMENT APPEAL

(Before Mr. Justice Biswas and Mr Justice Roxburgh)

Governor General of India in Council—(Plaintiff)—Appellant.

vs.

Corporation of Calcutta—(Defendant)—Respondent.

This was an appeal preferred by the appellant, the Governor-General of India in Council, against the decision of Mr. B. Sanyal, Judge, Small Causes Court, Calcutta, dismissing the appeal against the assessment of rates and taxes by the Corporation of Calcutta, in respect of premises No. 4, Dum Dum Road.

The Government of India was the owner of the premises which consisted of a total area of 111 bighas of land occupied by 42 residential houses, an institute, a playground, tennis courts, recreation fields, spare grounds, road and tanks. The premises are about a mile from the Cossipore Gun and Shell Factory. It was alleged, that the premises were acquired by the Government for the purpose of erecting quarters for the officers and employees of the Cossipore Gun and Shell Factory. The houses, it was alleged, were in fact "ordinarily let" some to the officials of the Factory and some to the employees of several firms and others, at a total rent of about Rs. 4,950 a month.

The Corporation assessed the municipal rates and taxes of the premises under section 127 (b) (*i.e.*, premises for residential purposes) of the Calcutta Municipal Act. Against the order of the assessment the Government appealed to the Judge, Court of Small Causes, Calcutta, on the ground that as the premises were "ordinarily let out" to tenants the assessment ought to have been made under section 127 (a) (i.e., on letting value), of the Municipal Act. The Government made no objection regarding the quantum of tax assessed under section 127 (b) of the Act but the objection was regarding the principle of assessment.

The Small Causes Court Judge found that its was quite clear from the evidence of Mr. Mitchel, Assistant Manager of the said Factory, that employees were allowed to occupy the quarters rent free for the more efficient performance of their work. Mr. O'Relly, the Garrison Engineer, contradicted Mr. Mitchel in respect but the Judge accepted the evidence of Mr. Mitchel as he was responsible for the efficient working of the factory. The Judge further found that the employees of the factory must have been occupying those premises as servants and not as tenants, and as such, it was held that the premises were rightly assessed by the Corporation under section 127 (b) of the Calcutta Municipal Act. The appeal of the Government was accordingly dismissed. Against the said order the present appeal was preferred.

The Court admitted the appeal.

Mr. P. B. Mukherjee and Mr. Basanta Kumar Mukherjee appeared for the appellant, the Governor-General of India in Council.

PROCEEDINGS STAYED

Before Mr. Justice Bartley and Mr. Justice Lodge, this application was made by the petitioner, the Corporation of Calcutta, for a rule on the Municipal Magistrate, Calcutta, and the opposite party Upendra Mohan Pal Chowdhury to show cause why an order for demolition of the unauthorised structures should not be passed.

The petitioner applied under section 363 of the Calcutta Municipal Act for the demolition of some foundation and plinth walls which had been reconstructed at 10, Bonomali Sarkar Street in deviation from the sanctioned plan on the ground that they fell within the road alignment of Bonomali Sarkar Street. For such deviation the Magistrate fined the opposite party Rs. 100 and an agreement under section 303 of the Act was duly executed by the owner. In these circumstances the Magistrate allowed the unauthorised structures to stand, subject to the agreement. The Corporation then moved this Court

Their lordships issued a rule and stayed further proceedings.

Mr. Santosh Kumar Basu with Mr. Pashupati Ghose appeared for the Corporation of Calcutta.

THE Improvement Trust

The following extracts are taken from the Proceedings of the Meeting of the Calcutta Improvement Trust, held on Saturday, the 26th October, 1940, at 10-30 a.m

Present :—Mr. C. W. Gurner, (Chairman); Mr. J. C. Mukerjea, Chief Executive Officer, Corporation of Calcutta; Mr. Abdur Rahman Siddiqi; Rai Sahib Chandan Mul Karnani; Mr. A. J. Thompson; Mrs. Hasina Murshed; Mr. J. J. N. Birch; Mr. Md. Rafique and Sir Hari Sanker Paul.

SHORT TERM INVESMENTS

The Board approved of the Chairman's action in making the following short-term investments out of surplus funds of the Trust :—

(i) Rs. 2,00,000 with Allahabad Bank limited, for four months from 4th October, 1940, at 1 per cent. per annum.

(ii) Rs. 2,00,000 with Bank of India Limited, for five months from 4th October, 1940, at 1½ per cent. per annum.

(iii) Rs. 2,00,000 with Eastern Bank Limited, for two months from 4th October, 1940, at ¾ per cent. per annum.

(iv) Rs. 2,00,000 with Central Bank of India Limited, for two months from 4th October, 1940, at 1 per cent. per annum.

The Board approved of the Chairman's action in refixing the short-term deposit of Rs. 2,00,000 with the Allahabad Bank Limited, on its maturity on the 24th October, 1940, for five months at 1¼ per cent per annum.

A statement of loss caused by theft for the quarter ending 30th June, 1940, was laid before the Board for information and was ordered to be recorded.

PAYMENTS-ON-ACCOUNT'

A statement of loss caused by theft for the quarter account'' against measurements, but in advance of calculations, were made to contractors immediately before the *Puja* holidays :—

Contract No. 1180. Contractor—Babu Mohitosh Mukherjee—Contract—Road construction, etc., in Barrackpore Bridge Approaches—Rs. 5,000.

Contract No. 1104. Contractor—Messrs. Hindusthan Engineering and Construction Co. Ltd.—Contract—Reconstruction of Barrackpore Bridge—Rs. 11,000

Contract No. 1223. Messrs. B. Chatterjee & Co.—Contract—Supply of Pig Lead—Rs. 2,500.

STONE SETTS

With reference to Resolution No. 12, of the Board Meeting, held on the 24th August, 1940, in supersession of the Board's Resolution No. 22, of 20th April, 1940-, sanctioning a consolidated estimate amounting to Rs. 49,650 inclusive of Rs. 22,850 for departmental supply of 172,440 stone setts) for stone sett paving of roads, in Schemes Nos. VIIG (Jagannath Ghat Road—Chitpore Road Upper to Strand Road North), XXVII (Barabazar—Maidapati Area) and XLIII (Darmahatta Street Widening—portion), the Board considered the tenders received in respect of work appertaining to Rs. 26,800 only of the sanctioned estimate and the Chief Engineer's note thereon, and resolved to accept the tender of Messrs. Alliance Engineering Company, for Rs. 10,218-1-0 for work required, in Scheme No. XXVII, and that of Babu R. N. Mitra, for Rs. 8,215-12-0 for work, in Schemes Nos. XLIII and VIIG, provided both agree to complete the work allotted to them in four months.

ROAD CONSTRUCTION IN ENTALLY

With reference to Resolution No. 8, of the Board Meeting, held on the 14th September, 1940, sanctioning an estimate amounting to Rs. 86,864 (inclusive of Rs. 6,000 and Rs. 2,250 for transporting surplus earth within a radius of 3 miles and for 8-inch to 9-inch diameter sal bullah piling, respectively, not to be tendered for, and Rs. 2,255 for painting the road surface with asphalt, to be done departmentally), for road construction, sewerage, drainage works, etc., on the 100-foot main road from Gorachand Road to the junction of Road No. 2, in Scheme No. XLIX, the Board considered the tenders received in respect of work appertaining to Rs. 76,359 only of the sanctioned estimate and the Chief Engineer's note thereon, and resolved to accept the lowest tender, namely, that of Babu Mohitosh Mukherjee, for Rs. 63,020-8-0.

The Board also approved of the tenderer's rates for the removal of earth at Rs. 15, Rs. 20, Rs. 25 and Rs. 30 for 1, 2, 3 and 4 miles, respectively.

CHAIRMAN'S VISIT TO DELHI

The Board approved of the Chairman's visit to Delhi and possibly Mysore for the purpose of studying the working of Improvement Trusts in these towns.

CALCUTTA'S GIFT TO CHUNGKING

University to Send Publications

The University of Calcutta will shortly be presenting to the Chungking Central Library, under the control of the Republican Government of China, a number of its publications, consisting of journals and volumes of the Department of Letters.

The Library has, it is learnt, suffered damage due to recent bombing, and it asked the University of Calcutta to replenish its collections, which the latter has agreed to do through the Consul-General for China in Calcutta.

VITAL STATISTICS

For the City of Calcutta for the week ending 30th November, 1940.

City of Calcutta (Town and Suburbs)

The total number of deaths registered during the week was 645 against 644 and 700 in the two preceding weeks and higher than the corresponding week of the last year by 22. The general death-rate of the week was 29.4 per mille against 31.5 the mean of the last five years.

(*Town* (*Wards* 1—25 *and* 27)

The number of deaths registered during the week ending 30th November, 1940, was 540 against 526 and 573 in the two preceding weeks. There were 20 deaths from cholera against 18 and 15 in the two preceding weeks. There were 21 deaths from small-pox during the week against 11 in the previous week. There were 7 deaths from influenza against 7 in the previous week. The mortality from fevers and bowel-complaints amounted to 20 and 66 respectively against 36 and 68 in the preceding week. The general death-rate of the week was 28.1 per mille per annum.

There were 26 imported deaths. Excluding these, the death-rate of the Town was 26.7.

There were 109 deaths from respiratory diseases against 90 in the previous week. There were 47 deaths from tuberculosis against 50 in the previous week.

There 107 deaths of infants under one year.

Suburbs (*Wards* 28—32.)

The number of deaths registered was 105 against 118 and 127 in the two preceding weeks. Of these 8 were from cholera, 2 from small-pox, 1 from influenza, 9 from fevers, 19 from bowel-complaints and 15 from respiratory diseases. The death-rate of the suburbs (or added areas) was 38.5 per mille.

There were 6 imported deaths. Excluding these, the death-rate was 36.0.

There were 6 deaths from tuberculosis against 6 in the previous week.

There were 17 deaths of infants under one year.

CORPORATION NOTICES

To Contractors

Tenders are invited in duplicate for the following and will be received by the First Deputy Executive Officer on the date noted for each, up to 2 p.m. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for....." For specifications and tender forms apply to the Keeper of Records between 11 a.m. and 3 p.m. on week days and 11 a.m. and 1 p.m. on Saturdays. Price Rs. 2 per set.

1. Supply of calves for the rest of the year 1940-41.
2. Construction of road at 58/2, Raja Dinendra Street.
3. Remodelling the inlet sewer to the silt pit in Mominpore Drainage Pumping Station.
4. Supply and delivery (weighed and stacked) of 1st grade steam and rubble coal for one year from 1st February, 1941.
5. Supply of petrol during the year 1941-42
6. Supply of Printing Stationery during 1941-42.
7. Supply of Office Stationery during 1941-42.
8. Supply of Typewriting and Duplicating materials during 1941-42.
9. Supply of Drawing materials during 1941-42.

Tenders for 1 will be opened on 10th December, for 2 and 3 on 11th December, for 4 on 17th December, for 5 on 18th December, 1940, for 6 and 7 on 7th January and for 8 and 9 on 8th January, 1941. The rates quoted in tenders for the above are to hold good for three months

N.B.—All cases of delay over a fortnight in the execution of agreements in respect of works and supply of materials will be reported to the Committee and the parties will not be allowed to execute the agreements after that period without obtaining orders of the Committee

In case a party deposits earnest money by cheque, he must deposit the cheque at least three working days before the date of opening of the tender

The contractors should maintain an uniformity of their names and styles of business, appearing on various documents, *e.g.*, Treasurer's receipts, tender forms, agreements, licenses and bills

Any deviation from this on the part of any contractor whenever detected, will render his tender liable for cancellation

Where tenders are submitted by a Corporation, it should be signed by a principal officer of the Corporation or by an agent duly authorised in that behalf and be attested by a witness. Where it is submitted by a firm, it should be signed by the proprietor or one of the partners or by an agent duly authorised in that behalf by the firm and be similarly attested

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office,
The 4th December, 1940.

District IV Eng'g Office
The 2nd December, 1940

DRAINAGE DEPARTMENT

To All P. I. Contractors, District I and Cossipore

Re Construction of Boundary Pillars at Bagjola.

Dear Sirs,

Please submit your tender in the prescribed tender form for the petty improvement works of the Corporation for the above work, the details of which can be obtained from the department. The tender in a sealed cover, endorsed as above will be received by me on the 9th December, 1940, at 12 noon

The work is to be completed within 3 weeks from the date of order to take up the work in hand.

Yours faithfully,
P. C. ROSE
Executive Engineer, Drainage.

Central Municipal Office
The 4th December, 1940

Health Department.

NOTICE

For the convenience of the citizens the vaccination stations have been kept open both in the morning and in the afternoon, as also on Sunday mornings, and the public are requested to call at the nearest vaccination stations and get themselves vaccinated as early as possible.

As sporadic cases of small-pox are occurring in different parts of the city, it is highly desirable that the public should get themselves vaccinated in time.

S. N. GHOSE,
Health Officer,
&
Superintendent of Vaccination.

Central Municipal Office
The 30th November, 1940.

Naming of Roads.

The following name has been sanctioned by the Corporation for two roads in Ward No 27:—

The 20 ft. and 12 ft. roads at 48, Monoharpukur Road to be called "Monoharpukur Road."

D. N. GANGULI,
Assessor.

Central Municipal Office.
The 2nd December, 1940.

Are you advertising to the real buyers of your products? Or to outsiders, who cannot possibly mean anything to you.

Through the advertising pages of the *Calcutta Municipal Gazette*, you can reach the most potent people in the country, the men whose influence on municipal purchases is unlimited, the people who are placing millions of Rupees worth of orders.

Its readers are the men who are the leaders of public opinion, people who make the wheels of our municipal and public life turn, people who are really the key men of the present age.

The ablest advertisers in India are using the *Gazette* because they know that it is worthwhile to do so.

The advertiser who wants his advertising Rupee to buy the maximum of advertising attention cannot possibly omit the *Gazette* from his list.

CORPORATION NOTICES—*Contd.*

Each candidate shall bring his own drawing instruments, pen and pencils and shall produce the cash receipt for the deposit of Examination Fee at the Examination Hall.

D. N. DUTT,
District Engineer, II.

District II Eng'g. Office,
The 23rd November, 1940.

Sale of Corporation Surplus Land

In supersession of all the previous notices in this behalf, fresh notice is hereby given for information of the public that the following plots of Corporation surplus land will be sold to the highest bidder above the reserve price at a public auction to be held by the Chief Executive Officer, at the Central Municipal Office, on Thursday, the 12th December, 1940, at 5 p.m., on the conditions specifically mentioned in the form of agreement to be executed by the successful bidder at his cost within seven days from the date of auction. The successful bidder shall have to furnish, in cash, an earnest deposit of 25 per cent. on the amount of the purchase money immediately upon the lot being knocked down, and in default thereof, the premises is to be immediately put up and re-sold at the risk of the first purchaser. Public are invited to attend the auction and offer their bids. The plans of the lands, the form of agreement, conditions of sale and other necessary particulars may be seen and obtained on personal enquiry in the office of the undersigned on all working days during the office hours.

Description of lands :—

(1) Land at the junction of Upper Chitpore Road and Joy Mitter Street, Ward 3, measuring 4 kottahs approximately.

(2) Lots Nos. 4, 5 and 9 of surplus land at the junction of Ekdalia Road and Ballygunge Station Road. Ward 27, measuring about 3 kottahs 2 chittacks, 2 kottahs 9 chittacks and 5 kottahs 7 chittacks respectively.

(3) Lot No. 7 on the new 35 ft. road connecting Monsatola Lane and Pipe Road, Ward 25, measuring 5 kottahs 13 chittacks approximately.

(4) Lots Nos. 11 and 12 on Hussain Shu Road, Ward 25, each measuring 5 kottahs 12 chittacks approximately.

N.B.—Lot No. 9 is tenanted and it will be sold with tenants.

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office,
The 5th November, 1940.

Modification of Alignment.

Notice is hereby given under Section 308, read with Section 302 of the Calcutta Municipal Act III (B. C.) of 1923, that the Roads and Bustees Standing Committee of the Corporation, in exercise of the powers, delegated unto them in this behalf, have prepared a scheme and plan modifying the alignment of Bamunpara Lane at its junction with Bondel Road in Ward 21, by splaying 4 ft. 6 in. by 5 ft. 6 in. instead of rounding off the corner, of premises No. 19, Bondel Road, which was originally sanctioned on 11th November, 1920, by the General Committee of the Corporation as constituted under Act III B. C. of 1899.

Any person having any objection to the same, should submit it in writing, so as to reach the undersigned, on or before Monday, the 23rd December, 1940.

A copy of the plan, showing the proposed modification of the alignment, may be seen in the office of the Chief Valuer and Surveyor of the Corporation, between the hours of 11 a.m. and 2 p.m. on all working days.

S. CHATTERJI,
Actg. Chief Executive Officer.

Central Municipal Office,
The 26th November, 1940.

Health should not be made to wait

S. K. CHAKRAVARTI, LTD.
Water-Works, Drainage and Plumbing Engineers
Mission Row, Calcutta

Sound Plumbing means health and longevity

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. **No dogs, bicycles, tricycles or perambulators are allowed inside the market.**

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

Chronicle & Comment

The Black-Out

There may apparently be very little to marvel at the swiftness and completeness with which Calcutta went dark on the burst of the siren last Wednesday, for, in these days of electricity, lights can be put out in a fraction of a second by just pressing a switch. But when it is remembered that Calcutta has a varried night-life and that the citizens are accumstomed to carry on a wide range of intellectual, recreational, as well as very necessary domestic activities by artificial light after dark, the successful black-out seems fully to justify the enthusiasm of Mr. N. V. H. Symons, Commissioner, Presidency Division and Controller of Air Raid Precautions in Bengal. "Extremely good" is his impression of the black-out in the city proper, and he stresses the fact that the co-operation of the public which made such a successful black-out possible was entirely voluntary, "for there has been no compulsion and no threats, nor any penalties to be applied to any person who did not co-operate in the black-out measures for the general safety of us all." These impressions of the Controller of Air Raid Precautions in Bengal are based on aerial reconnoisance made in an 'open plane' and from a height of only 2,000 ft.—last time it was a closed plane and 5,000 ft.—of not the city of Calcutta alone but also the suburbs, which, with their numerous factories, offer to prospective aerial raiders the most valuable targets in and around Calcutta. Factory areas both north and south of the city, says Mr. Symons, were well blacked-out; it appears to have been especially successful in the north of the city, for, flying over the area between Dum Dum and Ichapore, Mr. Symons noted, with what degree of statistical accuracy we are in no position to estimate, the black-out there to be "95 per cent. except for Barrackpore which was 100 per cent. efficient, not one single light of any kind being visible there." What would have been a perfect black-out was unfortunately marked by a few 'white spots' to be found to the north-east of the Howrah Bridge, where, as on the last occasion, not only were many lights showing but also

many people thought fit to shine torches in the air—a form of irresponsibility and civic indiscipline which cannot but be regretted. Mr. Symons has also, we note, a word of praise for members of the Civic Guard and A.R.P. workers some of whom stopped his car as he motored back to Calcutta from Dum Dum at about 10 p.m. and told him " in the most courteous manner" that he was showing too much light thus providing him with the final satisfaction for a good evening's work.

Health Insurance

One of the many glaring contradictions of society as at present organised is furnished by the relations between doctor and the public. Both need one another but for very different reasons. The public depend on doctors to cure them of disease: doctors depend on the public for earning a livelihood, for in a perfectly healthy community doctors must starve. This fact tends to make the curative service of medicine so much more important than the preventive one—a deplorable situation, of which the only remedy lies in health insurance schemes under which doctors are paid to look after public health. Whether voluntary or compulsory, launched by private enterprise or under the auspices of the State, health insurance in some form or other is urgently called for in a country like ours where the majority of the people are too poor 'to purchase' medical treatment even from the humblest of private practitioners demanding the smallest of fees, so that while an incredible number of people suffer from want of medical attendance, quite a large number of trained doctors languish for want of practice. Health insurance with subsidised medical service will, therefore, be a boon to both these classes of sufferers though if launched on a wide scale it will somewhat affect the income of doctors with a large practice. It is, therefore, all the more heartening to find Dr. Bamandas Mukhrjee, a distinguished doctor, enjoying of the largest of practices in this city, recommending health insurance for all persons below a certain income level, in the course of his presidential address at the annual session of the Calcutta Medical College Re-Union on Thursday last. After mentioning how national health and efficiency were being maintained at a high level in all the civilised countries by the co-ordination of the preventive and curative aspects of medicine through organisation of health insurance, Dr. Mukherjee pointed out that subsidised medical practice had been introduced in rural areas in the United Provinces and Madras and very pertinently asked if it was impossible for the Government of Bengal to introduce such a scheme without delay to save the rural population from the ravages of preventible diseases like malaria, cholera, small-pox and others.

So far as our experience of the Government goes, to hope that its cumbrous machinery will be set in motion by a single speech, however effective, will be hoping for the impossible. We, therefore, do not expect Dr. Mukherjee's address to produce an immediate response on the part of our Government. But we do expect that now that a lead has been given by such an eminent person, it will be taken up by others of equal or less eminence resulting in a vigorous continued agitation for health insurance under public auspices, till a concrete scheme is actually put into operation.

Time For Colds

The season for cold is at hand, or rather we are in the midst of it. Thousands are likely to suffer from minor infections of the upper respiratory tract before the year is out. All of these infections will be disagreeable. Some are likely to usher in more serious diseases such as pneumonia.

The best part of treatment for a cold is rest in bed. This permits the energy of the body to concentrate on the fight against the infection. Colds, moreover, are usually contagious. A day or two in bed, therefore, not only helps the patient to recover, but tends to prevent the spread of the infection to others

In the event that the symptoms arise from a mild attack of a more serious disease, isolation of the patient at home in bed is, of course, of even more importance in preventing the spread of the infection. While relatively few persons take seriously the advice to stay in bed by way of treating a cold, that practice is the best kind of treatment for the patient and it helps to protect others, from infection.

Drugs have failed to shorten significantly the duration of colds. If any drug so far recommended as a remedy for colds were especially effective as a cure or preventive, surely the mass experience with drugs would have demonstrated the fact clearly. Treating colds with drugs may do more harm than good. The inflammation which makes colds so disagreeable, and which leads to the excessive excretions from the nose is an important part of the natural process of ridding the body of the infection. The inflammation takes place because the resistive forces of the body have been concentrated at the point of infection. To use inhalations which constrict the tissues therefore runs counter to the natural curative process. Drugs which hinder the ciliary action, moreover, also run counter to the natural defence process since ciliary action is depended on to remove the secretions thrown out from the inflamed area.

There is no convincing evidence that vaccines are particularly helpful in preventing colds. It seems likely, however, that a person well fortified by good nutrition stands a better chance against colds than do others. In any event, rest in bed appears to be the best prescription for the treatment of a cold from every viewpoint.

H. E. TAI CHI TAO

ARRIVAL IN CALCUTTA FROM SANTINIKETAN

His Excellency Dr. Tai Chi Tao, President of the Examination, Yuan and member of the State Council of the Republican Govt. of China, and party arrived here on Thursday from Santiniketan.

The Mission will leave for China on Saturday.

His Excellency paid a visit to the Mahabodhi Society of Calcutta on Thursday and the members of the party were entertained at a lunch by the members of the Society.

FIVE-HOUR BLACK-OUT FOR CALCUTTA

SOME THOUGHTS ON THE BLACK-OUT

By "Enn"

WAR to-day is the concern of the civilian as much as of the soldier. To-day the battle-field is not the only venue of war—while the armies face each other for weeks in nervous suspense, people behind the lines suffer and die in thousands, thanks to the Heinkels and the Spit-fires, the mines and the submarines. There is no such thing as a non-combatant in a modern war. Bertrand Russell once very aptly remarked, that the soldier at the front would be safer at his post than the women and children left behind at home. To-day the war is won or lost not by the morale of the armed forces but of the unarmed masses.

That is how the black-out brings to our mind the grim realities of the war. The war is no longer the drum-beating in the far away battle-areas where in red-brown fields poppies grow round the barbed wires, but the battlefield to-day is brought to the very door-step of peaceful homes. While bombers rain death and destruction upon fair cities like Madrid Nanking and London and the innocent faces of the old and the young look up to the sky in terror and agony, can we deny that it is the courage and fortitude of the defenceless that deserve our praise, and not the bravery of the enemy that brings hatred and murder?

As I went out into the open to have a look round the city during the five-hours' rehearsal black-out last Wednesday, I found people collected at street-corners to "see the fun". Indeed, it is a novel experience for most of them. Though the tram and the bus services were running almost at the normal, there was no rush, for, the private cars were conspicuous by their absence. With lights-off, there was an atmosphere of unreality all over the place. The Lower Circular Road looked like a beautiful avenue with a Fontainblou touch. The Park Street show-windows presented the appearance of a row of vacant tenements. The blue Neon of the Firpo, so soothing to the passing eyes, was gone, while the feast of light that was Metro could not be located except for the dim ray that was coming from its foyer. In the more congested areas, the black-out orders had been equally strictly observed, except for the irrepressible *panwalls*, who stuck to at least one visible light in practically every one of their shops. The Civic Guards were to be seen in plenty—but could not their uniform be made more conspicuous and their general bearing a bit smarter?

All these and more struck the eye as one wandered along in the darkness. It was interesting, for it was something that had never been tried before, something about which people had heard only recently, like the term 'black-out' itself in our vocabulary.

But how few of us have stopped to ponder the significance of a real black-out of Calcutta! on my way back home, as I watched the silhouette of the Museum against the background of the pale gleam of the clouded sky, I tried to picture how Calcutta would look in the ordeal of an air raid. This beautiful city of mine would have to face the desecration of the vandals from across the sky. A city has a personality, its brick and mortar are endowed with flesh and blood for those who love their city. Should all these be destroyed and in its place would come out a picture of ruin and devastation? How could this be possible? The Japanese or the German in those bombers, would they not be reminded of their own beautiful cities, the tiny wooden structures of Nippon or the beautiful calmness of the Black Forest? They also are human, but then, why should they bomb our fair city? Perhaps, there lies the real tragedy of a modern war. The man is reduced to the beast, and forgets his own kin.

Last Wednesday's Test

FOR five long hours Calcutta plunged herself into darkness on Wednesday, the 11th December, 1940.

It was the third black-out test in the City, the second one having been staged some months ago.

The second test was for an hour only after 10-30 p.m., while the last was for five hours,—the longest so far in Calcutta, commencing from 7 p.m.

According to A. R. P. authorities Wednesday's test was a complete success. So was the previous one.

A. R. P. sirens ushered in the black-out punctually at 7 o'clock. Immediately, 20,000 gas and 6,000 electric lights which illuminate the streets and other external lights, including advertisement signs, were switched off; lights inside premises were either extinguished or so arranged as to make them invisible from outside and Calcutta was enveloped in darkness relieved only by the soft light of the moon diffused through lowlying clouds.

Despite the enforced darkness hotels and restaurants in the Chowringhee area were full, cinemas and theatres had large audiences, and traffic in the streets was considerable, both vehicular and pedestrian. Tramcars ran on all sections with fairly large complements of passengers and buses also plied on all the routes, although their number had been reduced to meet traffic requirements. Most shops were, however, closed in all parts of the City.

The tram cars had their headlights masked and their window shutters drawn. The interior lights were dimmed, only just sufficient for one to find one's way to a seat. The buses had their headlights out and plied only with dimmed sidelights

---

(*Continued from previous column*)

on. They had also their window shutters drawn and the inside lights reduced to a minimum. These vehicles were so effectively darkened that they could not be seen until they drew very near. The rickshaws plied without any lights at all.

There were not many motor cars in the streets. The motorists who were out on the streets had only dimmed sidelights on. But some motorists were seen driving without any lights on, or without caring to switch on the tail light, with the result that they constituted a danger to others. Many people preferring to walk along the middle of the road instead of keeping to the pavements was also a source of danger to motorists. As, however, motorists, including the taxi drivers undertook a self-imposed speed restriction, necessiated by unaccustomed darkness, accidents were rare. In fact no such report was received.

On the river, lights on ships were so screened as not to show upwards, internal lights were invisible from outside and jetty and dock lighting was controlled.

Howrah and Sealdah stations were blacked-out in accordance with schemes prepared by the authorities concerned, but the station staffs carried out their work and passengers found their way in and out of trains without difficulty. At Howrah instructions regarding the departure and arrival of principal trains were broadcast at regular intervals.

Two aeroplanes, one carrying Mr. N. V. H. Symons, I.C.S., A.R.P. Controller and the other carrying Brigadier-Major Stanley, flew over the city and the industrial area to see the effect of the black-out. Mr. Symons flew 2,000 ft. above the ground while Major Stanley flew at a higher altitude.

Elaborate precautions were taken by the authorities for the safety of life and property. A.R.P. wardens, civic guards and large number of policemen were on duty and up to a late hour no report had been received of untowarl incidents.

Howrah and other industrial areas in the neighbourhood of Calcutta war also blacked-out.

CIVIC CAUSERIE—By "Citizen"

THE cold weather in Calcutta has always been known in the past to be the most enjoyable, but citizens are wondering what has happened to it this time. Like a coy maiden peeping through a window into a room where strangers are foregathered, winter, as it is understood in Calcutta, seems to be trying for over a month to make up its mind as to whether it should manifest itself in this city of many peoples, and may be, in the course of this process, the hour of its appearance will be over, for time and tide, it is said, wait for none. Is it because winter made a prolonged stay last time that it is still hesitating to make its presence felt here this season?

Whether there be any proper cold weather or not, the usual round of gaieties and amusements as well as popular "war effort" attractions have been arranged for, as this is the recognised season for all kinds of big functions, and notabilities from their Excellencies the Viceroy and the Marchioness of Linlithgow downwards, will be spending a few days or weeks, as the case may be, among us, in accordance with unwritten custom. It will certainly be a great disappointment to all if winter really fails to materialise, as during the Christmas week, many outdoor engagements take place, and in the absence of the cool north breeze the atmosphere will be the reverse of bracing. Again, banquets and dances, which must be held within four walls of halls, stuffiness is likely to be experienced, instead of pleasantness, detracting from the enjoyment to which one is entitled. Admitting that fans will be requisitioned to counteract perspiration, nothing could possibly compensate for the natural coolth of a winter evening.

But, what's the use of grumbling? Let us hope for the best. Even when normal winter conditions are the order, it has often been seen that although the first fortnight of December has not been too pleasantly cool, on Christmas Eve or Christmas Morn, a refreshing breeze has sprung up and brought in congenial cold. Atmospheric idiosyncracies are, however, so very unfavourable to human enjoyment this time that it looks like hoping against hope for winter to assert itself on *Burra Din*. But, will the god who presides over the weather be so very unkind to hundreds of thousands of residents and visitors alike on this occasion as not to bless them all with just a wee touch of the much-desired change?

ABSENCE of seasonal conditions always causes sickness, and although it may not be generally known, because Calcutta is such a large city, diseases of various kinds have us in their grip at the moment. Indeed influenza and other forms of fever are raging in and around Calcutta and there are plenty of typhoid cases to be found in every part of the city and suburbs. It must be mentioned, to the credit of the Health Officer, Calcutta Corporation, that he foresaw what was coming along and issued warnings in good time for every citizen to be inoculated against typhoid. Where fatalists constitute the bulk of inhabitants, such warnings are not generally heeded, and as we must reap what we sow, sickness is common in every household, even if typhoid may not have assumed epidemic form.

During my half-century's experience of Calcutta, I do not recollect ever to have found an apology for winter as is the case now. What is wrong with Calcutta atmosphere hardly anybody can tell. Had winter conditions been absent from all places in India, one might have been justified in blaming the war, with its constant bursting of bombs and shells and its reaction on the atmosphere of the earth. In the actual theatres of war in Europe, winter has certainly been delayed, but it has set in at last with its usual severity in many places, as reports of diminishing aerial activities would testify. It had, however, been confidently anticipated by many persons who ought to know their own country that

(*Continued on page* 120)

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETINGS FOR THE WEEK ENDING DECEMBER 13, 1940

[The reports of the meetings of the Corporation appearing below are, in most cases, a summary of the proceedings.—Ed., "C. M. G."]

TWENTY-SIXTH ORDINARY MEETING HELD ON WEDNESDAY, THE 11TH DECEMBER, 1940

Release Of Mr. Subhas Bose

The Calcutta Corporation accepted a motion, sponsored by Mr. Kshitish Chandra Chakravarty expressing its satisfaction at the release of Alderman Subhas Chandra Bose and urging the Government to withdraw in the best interests of the city the cases that are still pending against him.

Agreement With The Collector

The recommendations of the joint meeting of the Services Standing Committee No. 1 and the Finance Standing Committee, dated the 25th November, 1940, regarding the agreement to be entered into between the Corporation and the Collector to be appointed, the post having fallen vacant, were advertised and discussed at some length by the meeting.

The discussion centered round the proposed new Clause 7 which run as follows :—

> "7. The Corporation shall allow an adequate establishment to the Collector for the efficient and proper discharge of his duties as Collector, and the duties of the Collection Department all appointments in connection with the said establishment being made by the proper authority for the time being without delay provided that appointments in the case of bailiffs shall always be made from the panel of persons to be nominated by the Collector. The persons to be thus employed shall be subject to the Provident Fund and under Leave Rules of the said Corporation and shall have to furnish such security to the Corporation as may be fixed by the Corporation from time to time."

Mr. W. A. Burns, Chairman of the Finance Standing Committee having moved for the acceptance of the recommendations, Syed Badrudduja said that when they considered the matter in the joint meeting they had lost sight of one factor. It did not occur to them at that time as to how it would be possible for the Collector to give effect to the resolution of the Corporation fixing the percentages of appointments allotted to different communities, particularly the Muslims and the Scheduled castes. Although in the case of bailiffs appointments would be made by proper authorities these would have to be made from persons to be nominated by the Collector. In the circumstances, he would ask the House to postpone consideration of the matter for a week.

Mr. M. A. H. Ispahani, Chairman of the Services Standing Committee No. I, moved as an amendment that in the proposed new clause 7 of the Agreement, after the word "Collector" in the first sentence the following be inserted :—

> *"and provided further that the number of Muslims, Scheduled Castes and other minority communities does not fall below the percentages allotted to them by the Corporation resolution dated 15th February, 1939."*

In placing the amendment before the House, Mr Ispahani said supporting the Collector sent a panel of 40 names out of which one was a Muslim and 39 non-Muslims how would it be possible for the Services Committee No. I or No. II to maintain the communal ratio in the matter of appointment of baliffs, in the case of Muslims? They wanted that the percentage of appointments allotted to the different communities by the Corporation should also be given effect to in the matter of appointment of bailiffs. The best way to do that would be to add a proviso to the recomendation stating that although appointments in the cases of bailiffs should be made from a panel to be nominated by the Collector the communal ratio fixed by the Corporation for the Muslim and Scheduled castes should be given effect to.

Mr. Homoodur Rahman seconded Mr. Ispahani's amendment. He expressed his apprehension that if left to the option of the Collector he might not include the names of Muslim and Scheduled caste candidates in the panel to be sent to the authorities for approval. Provision for appointment on the basis of communal ratio must be made if the interest of the Muslim and Scheduled caste to be safeguarded.

Mr. D. J. Cohen moved as an amendment that after the word "Collector" in the first sentence of Clause 7 in the following be inserted :—

> *"and shall as far as possible, conform to the percentages fixed by the Corporation for the various communities"*.

Mr. Cohen said that he was not in favour of making it obligatory on the Collector to maintain the communal ratio. He thought the ratio should be maintained as far as possible. For that would go against the efficient administration of the Collector's department.

Mr. N. C. Chatterjee said it would be much better not to introduce communalism at least in the Collector's Department. They all knew that the Collector had got to realise 26 lakhs of outstanding consolidated rates. They all knew that

the greatest handicap under which the Collector laboured was that he was forced to accept men for whose efficiency he could not possibly be responsible. Mr. Chatterjee said that when the Collector would be responsible for the conduct of his subordinates and not the Corporation, would it be fair for them to ask him to take men who might not be useful to him? From the point of view of the financial prospects of the Corporation and also for the efficient administration of the Collector's Department they should not insist on the communal ratio being maintained in this department. The original recommendation, he thought, should be accepted by the House.

The Corporation had got other departments as well wherein the communal ratio might be applied but for Heaven's sake, Mr. Chatterjee appealed, for the sake of financial integrity of the Corporation, let them not introduce communalism in the Collector's Department.

Mr. Anukul Chandra Das said that the members of his community had bitter experiences in the past and as a result they had been excluded from services. On behalf of the Scheduled castes he would assert that the communal percentage of services must be maintained in all the departments including the Collector's Department.

Mr. Susil C. Sen characterised the discussion as a tempest in a tea-pot. He pointed out that circumstances in the Collector's Department were different from those in other departments. The Collector was directly responsible to the Corporation for his subordinates and it was in the fitness of things that he should have every facility in this matter. But, enquired Mr. Sen, what justification was there to say that even if capable officers were available from among the members of the Scheduled castes and other minorities they would not be taken in? Why that lurking suspicion? It might not be improbable that they would have a Muslim Collector in the near future: what would be the case then? In that case other minorities in the province might say the same thing with regard to the Muslim Collector.

Mr. Sen maintained that the communal ratio might be applied in the case of other departments but that was by no means applicable in the case of the Collector's Department. That imposition would make his task almost impossible.

Mr. J. H. Speller suggested that the matter be held over till the next meeting of the Corporation and in the meantime, members who had spoken on the subject be asked to sit round a table to come to a decision with regard to the matter which was very important from the point of view of the finances of the Corporation.

The House accepted the suggestion of Mr. Speller.

Post Of Chief Executive Officer

In view of the fact that the term of appointment of Mr. J. C. Mukerjea as Chief Executive Officer of the Calcutta Corporation expires on March 31, 1941, the Services Standing Committee No. I has recommended that steps be taken to issue an advertisement in all leading newspapers all over India, inviting applications for the post.

The Committee has recommended that the salary of the post of the Chief Executive Officer should be fixed at Rs. 1,500, rising by annual increments of Rs. 100 to a maximum of Rs. 2,000 per month. He will be allowed free use of a Corporation car. The appointment will be for a period of five years with option to the Corporation to renew the term for a further period. The appointment will be terminable on three months' notice on either side.

The Committee has further recommended that the Corporation do request Aldermen and Councillors to refrain from applying for the post.

These recommendations of the Committee having come up for consideration at the meeting, Syed Badrudduja moved for postponement of the consideration of the recommendation. He said that the matter was an important one. In view of the fact that the Calcutta Municipal Amendment Bill, 1940, was now before the Select Committee of the Bengal Legislative Assembly, they could not at the present moment take all aspects of the matter into consideration for arriving at a decision. Therefore, he proposed to ask the House to postpone consideration of the matter till the first meeting of the Corporation next year when he hoped issues bearing upon the subject would be clearer to them for arriving at a just decision.

Mr. M. A. H. Ispahani having formally moved for the postponement of the consideration of the question, the House agreed to it.

Candidates for the post, as the draft advertisement for the post states, must offer evidence of exceptional ability and wide experience. Academic qualifications of a superior degree are desirable and preference will be given to persons who have gained experience through approved service in a comparable post.

Candidates must possess first-hand experience of work in a superior administrative capacity in a large municipal or similar administration with an extensive programme of engineering and of sanitation; also a practical knowledge of municipal finance. Apart from routine administration the immediate problems confronting the Calcutta Corporation are: completion of the drainage reorganisation scheme, expansion of the scheme for the development of its own electrical and other engineering undertaking, self-sufficiency with regard to the utility services; prevention of epidemics, sanitation and extension of medical relief; also collection of the outstanding consolidated rates and other dues of the Corporation. Candidates must be qualified to handle and exert a directive influence on the solution of such problems and also to initiate improvements and reform.

Candidates should not be less than forty years of age and are to produce evidence of physical fitness.

—Civic Causerie

(*Continued from page* 118)

aerial flights over England by enemy planes at a height of anything between 20,000 and 30,000 feet would not be a practicable proposition from the beginning of November, if not earlier, as petrol would solidify at that height, but even now, these flights are going on, though on a restricted scale.

In other parts of India, cold weather has started as usual, not only in the hills but in the plains, too. Why should the plains of Bengal be singled out for the vagaries of the weather, and Calcutta, in particular, made to realise that punny man must be grateful for the tender mercies of Nature is a problem for bigger brains than mine to solve. The only compensation so far has been practical absence of the usual cold weather smoke nuisance.

INDUSTRIES & COMMERCE

Special Article

The Industrial Future Of India—II

[By Debajoyti Burman]

(Concluded from the issue of 7th December, 1940).

The Remedy

It is not possible to remove these deficiencies without bringing in a radical change in the system of capitalist economy. In an attempt to raise the standard of living of the Indian people by giving them more employment the application of some form of socialist economy is necessary. The National Planning Committee has been moving in this direction, and after a comprehensive survey of the Indian economic life made by the best economic and scientific brains of India, has arrived at certain tentative conclusions.

The standard of life of the people can be raised and more employment can be given to the people, only if a proper balance between agriculture and industry is maintained and if the smaller industries are not sacrificed to the bigger ones. France was the only country in Europe which consistently maintained a balance of 50:50 between agriculture and industry, and she never allowed her bigger industries to crush the smaller ones. She remained a solvent country till the day of her fall. On the other hand, England permitted her heavy industries to sweep out the smaller ones and even replace agriculture by industry as the chief source of employment. By making manufactured commodities her staple products, Britain counted the danger to make herself dependent on foreign markets and any contraction in the overseas markets told heavily on her industrial life, the consequences of which was severely felt by the whole nation particularly during the Great Depression. Eastern Industrialisation has affected the British industries, specially the cotton and steel industries, very adversely. France was always on her guard against any possibility of over-industrialisation, and the National Planning Committee, in planning the economic life of India, is practically following the French model to a large extent.

India's Staple Industry

Agriculture is the staple industry in India. It is necessary to transfer some people to other employments in order to relieve the excessive pressure on land, and to find employment for the agricultural population during the slack season of the year. The 1931 Census shows that there are 44 workers to 56 dependents and it is absolutely imperative that the proportion of workers to dependents must be increased. Of the total number of persons employed in gainful occupations, the best proportion in the division of work in a country like India is that half should be in agriculture and half in industry, and of the total employment in industry, as much should be employed on smaller and cottage industries as is possible, thus ensuring maximum employment to the people. The National Planning Committee inclines to this view, and has recommended that Defence Industries, Key Industries, Public Utilities, Mineral resources, Railways, Waterways, Shipping and other many of Public transport should either be state owned or rigidly controlled by the state, so that they do not come into conflict with the smaller industries, and cottage industries should be fostered to the greatest extent. The Committee also recommends that the Public Utilities should be owned by some organ of the state, *e.g.*, by the Central Government, Provincial Government or local bodies, and as regards the agency in state-owned industries, an autonomous Public Trust would be suitable, the nature of a Trust being varied with different industries. Such a Trust would ensure public ownership and control, but would avoid the difficulties and inefficiency which creep in from a democratic control. In some cases there may of course be co-operative ownership and control. In the case of private industries, the State may appoint Directors or Representatives on the directorate of those industries to see that the State policy in regard to planning is carried out.

The relation of large scale industries to small and cottage industries must be rigidly controlled. The National Planning Committee has laid great stress on the development of Cottage industries, and has clearly suggested that any large scale industry which might come into conflict with a particular cottage industry encouraged and supported by the State, should itself be controlled by the State. Space does not permit to enumerate the activities and aspirations of the Planning Committee in detail, but some idea may be obtained of their scope of work from the directions of their investigations. The Committee had formed 29 Sub-Committees to investigate into the following subjects :—

(1) Rural Marketing and Finance, (2) River Training and Irrigation, (3) Soil Conservation and Afforestation, (4) Land Policy, Agriculture and Insurance, (5) Animal husbandry and Dairying, (6) Crop planning and production, (7) Horticulture, (8) Fisheries, (9) Rural and Cottage

Industries, (10) Power and Fuel, (11) Chemicals, (12) Mining and Metallurgy, (13) Engineering Industries including Transport industries, (14) Manufacturing industries, (15) Scientific Instruments, (16) Labour, (17) Population, (18) Trade, (19) Industrial Finance, (20) Public Finance, (21) Currency and Banking, (22) Insurance (23) Transport Services, (24) Communication Services, (25) National Housing, (26) Public Health, (27) Education (General), (28) Education (Technical), and (29) Woman's Role in Planned Economy.

Subjects For Investigation

"The wide variety in the division of subjects for investigation embracing all the important aspects of national life indicates that the National Planning Committee is eager to find out a proper balance for India between agriculture and industry, and small and large industry, supported by proper communications, transport and banking facilities and technical and general education. The extension of the activities of the All-India Village Industries Association has proved that the Indian people are not averse to manual labour when avenues of employment are open to them. Extreme poverty, bad health and a heavy load of debt on the shoulders of the people have made it impossible for them to take any initiative to improve their economic life. The initiative must be taken under the present conditions by the State, but the existing government cannot be expected to do it. The Chairman of the Planning Committee, Pandit Jawaharlal Nehru, in his opening address to the third Session of the Committee, made it clear that the scheme was considered for a free India and not for a colonial India with the strings of political and economic authority held elsewhere. It cannot be transplanted on different soil. To give an instance: Many of our Sub-Committees' reports have recommended state-ownership or control of industries, services and enterprises. Indeed we have already come to some general decisions on this subject. Obviously, when we refer to the State we mean a free and democratic India; we do not mean the present State in India, subordinate to and controlled by foreign authority and interests. It would be absurd for the present State in India to interpret our recommendation in its own favour and thus add to its own political and economic power. This present State is carried on in the interest of British vested interests in India and for this state to have more power means that British vested interests are further entrenched and added to. We know to our cost how Indian industry and enterprise have suffered because of these in the past. The Government of India Act 1935, tried to perpetuate this state of affairs by preventing us from touching British interests in India. That policy continues and will be intensified under the pretext of war economy, and he declared as the object of the Planning Committee, We are aiming at a free and democratic state, which has full political and economic freedom. In this State the fundamental rights of the industrial and the group—political, economic, social and cultural—will be guaranteed, and the corresponding duties and obligations laid down. The State will be progressive and will utilise all scientific and other knowledge for the advancement of the people as a whole, and for the promotion of their happiness and material as well as cultural and spiritual well being. The State will not permit the exploitation of the Community by individuals or groups to the disadvantage of the former and to the injury of the nation as a whole. To realise the social objectives, the State has to plan through its representatives for the nation and to co-ordinate the various activities of the nation so as to avoid waste and conflict and attain the maximum results. This Planning will deal with production, distribution, consumption, investments, trade, income, social services, and the many other forms of national activity which act and react on each other. Briefly put, Planning aims at the raising of the material and cultural standard of living of the people as a whole.

Educating The Public

The Calcutta Corporation has rendered a sterling service to the Industrial progress of the country by the establishment of the Commercial Museum, which has become the centre for the concentration of informations regarding the ever-growing industrial life of India and the collection of samples of Indian Industrial products for demonstration. All such information centred there are sifted and verified and are again distributed to the people in a manner likely to draw their best attention. Manufacturers and dealers have both found it a very useful meeting ground for the exchange of commercial information and for coming into contact with one another. This body can further prove its importance by improving the details and volume of such informations collected and distributed. Before the Planning Commission can successfully begin its work, it is desirable that the people should be sufficiently educated on its aims and objects and the method it desires to follow in recasting the entire national life, so that any amount of interested capitalistic propaganda may not be able to put obstacles in its way. The Commercial Museum of Calcutta has been copied by Bombay, Madras, C. P., and U. P. and unsuccessfully by the Government of Bengal. It is time that further impetus may be given to it to maintain the lead that it has so ably given to the country. A socialist economy requires that the people should be able to follow the course of State activities to the fullest extent, and should be sufficiently educated so that they will lend their willing co-operation to the State in all its efforts. The coming of the new world order is already revealing itself as a silver lining in the dark international horison, and this new order is bound to be socialist in its nature. Food, clothing, shelter, education and employment, the prime necessities of life should be assured, under the new socialist world order, to every person in the society, and the conditions and the structure of society should be made such that it becomes impossible for a body of megalsomaniance and profiteers to involve entire nations in devastating wars in future. Educating the public should now begin.

(Concluded.)

Tuberculosis Among Students—II

[By Amiya Jiban Mookerjee]

(Concluded from the issue of 7th December, 1940)

THE student of this country should know that one of the most important developments in the Anti-tuberculosis campaigns in America has been the keen interest in the subject evidenced by the respective College Health Departments and the students themselves. Although such campaigns are being carried on in America with considerable success, it is never forgotten that tuberculosis is still the first cause of death in the most productive years of life. The Colleges and Universities of that country have become increasingly conscious of the tuberculosis problem; and not only is it thought that the active interest and co-operation of high school and college students need to be enlisted, but they are actually given every encouragement and opportunity to participate in the nation-wide anti-tuberculosis movements of that country. The following letter addressed to the Editor of the "New York Times" was published in that paper on December 1, 1932:

"A group of students here at the University of Missouri recently decided to form a health unit to aid the State and National Tuberculosis Associations in their fight against the disease. On the face of it this is relatively insignificant. But there seem to be reasons why it deserves wider attention.

"It is the first organisation of its kind rising out of the voluntary action of the students themselves at any University. To recognise the need of health-education as an important factor in checking the insidious march of this disease is to admit that this step by University students is of more than passing significance. . . . . They can only aid organised professional projects, but that is precisely what is needed—an awakened interest in a matter that affects them vitally, and an intelligent effort to face the situation."

The letter was indited by a member of the Students' Tuberculosis Committee at the University of Missouri.

Since the National Conference on College Hygiene was held the college administrators have realised more and more that they cannot afford to remain blind to such a hazard and the economic loss involved. The American Student Health Association has set up a well-defined programme for anti-tuberculosis work. Mr. C. E. Shepard reported in his article "Campaign Against Tuberculosis in College Students" (published in the "American Journal of Public Health") that an ideal programme was being inaugurated at the University of California and Stanford University under the auspices of the San Francisco, Alamedia County and California State Tuberculosis Associations. Lousie Strachan, the Director of Child Health Education of the National Tuberculosis Association of the U. S. A., intimated, in an article which appeared in the "Journal of Health and Physical Education," that the schools, colleges and universities of that country were growing more and more conscious of the tuberculosis problem amongst the students and that the authorities of such institutions were trying to grapple with the situation with deep concern.

After describing (in the Eighth Health Number of the *Calcutta Municipal Gazette of* 1937) how in the West the sick children are always "institutionalised," *i.e.*, put into special sanatoria, and how the greater proportion of them recover and lead useful lives in society, Dr. A. C. Ukil continues: "Switzerland has proceeded a step further by establishing a sanatorium for University Students at Leysin where the recovering students prosecute their studies while they have the cure, with the result that no break occurs in the career of the student. The cost involved is not more than what the students have to spend in the ordinary course. France has started such an institution for the University students near Montpellier. Arrangements are now being made at Leysin to build an International University Sanatorium where various countries are subsiding a certain number of beds for the students of their Universities."

Writing further on the conditions existing in this country, Dr. Ukil strikes a sad note:—"Sometime ago I suggested to the University of Calcutta to have every student tested periodically with tuberculin and examined by X-Ray. Two successive Vice-Chancellors have also touched on the subject in their Convocation Addresses, but hitherto nothing has been achieved."*

Let alone the question of a "University Sanatorium," but even as regards periodical tuberculin test and X-Ray examination our University authorities did not barely touch the subject.

After a thorough study of the tuberculosis problem among the Indian students in Europe Dr. Ukil had on a past occasion, made the very important suggestion. That the Education Department could also help a lot in spotting out suspected cases and delicate children and also help to educate them regarding the prevention of this disease. Let us exa-

*It appears that the Calcutta University has now decided to subsidise a few beds for the University Students at the Jadavpore T. B. Hospital near Calcutta. By doing so, the University has shown its wisdom at least to some extent.

mine how that education is to be imparted. The late Dr. Livingstone Trudeau, the first President of the National Tuberculosis Association of the U.S.A. and the pioneer of the Sanatorium treatment of tuberculosis in America, thus remarked, in course of his Presidential address in 1905:

"The first and greatest need is education; education of the people, and through them education of the State. Education should begin by teaching in the public schools the main facts relating to the transmission of tuberculosis, insisting in such teachings on the value of hygienic measures of prevention and dwelling as little as possible on the details of the bacteriology of the disease, which would tend to produce in imaginative young minds exaggerated and fantastic impressions of the danger of infection."

America is carrying out Dr. Trudeau's suggestions to the letter. It remains to be seen when such things are going to be fulfilled in this country of ours. Are not the students in this country, like their compeers in other countries, eager to stamp out their formidable enemy—Tuberculosis? Are not the students of this country, too, required to help in a nation wide endeavour to eradicate this evil menace that has overwhelmed them in an appalling manner?

The students of India, if they are really seriously interested in their own welfare, should profitably take it upon themselves to follow the footsteps of the students of other countries who have gone steadily ahead in the matter of building up their health and vitality to national advantage and, particularly, combating this terrible scourge.

Once on the way to organise a big-scale fight against tuberculosis, the students should not only think of themselves, but must make it a point also to help in the national campaign against tuberculosis in other ways also. "One of the most alarming features of the public health condition in Bengal," once wrote *The Amrita Bazar Patrika*, "is the rapid spread of this disease in the countryside. Most of the villagers in Bengal as in every other province are not only poor but illiterate. There is an appalling ignorance among them about the methods of prevention and cure of tuberculosis They do not know what they should and what they should not do to protect themselves against the ravages of this scourge. It is here that our students can render great service. They may disseminate correct knowledge about the methods both of prevention and cure of the disease among these village folks. By teaching the latter the laws of hygiene and particularly how to live safely with tuberculous patients in the family, they may check the spread of this evil"

"The entire student community", continued *The Amrita Bazar Patrika* in the same article, which was an editorial leader, "should be mobilised for the fight against this fell disease, and to attain this object occasional public meetings of the students of every district town in the mofussil and of every big educational institution in Calcutta ought to be organised. Besides, the different students' organisations in the country should also be approached with a view to waking them up to the gravity of the situation that is fast developing. We dare say, if the situation is clearly explained to them and they are given a definite plan as to what they can and should do to check the progress of this disease their help and co-operation in the fight will be easily forthcoming."

Lending his whole-hearted support to the appeal issued by Her Excellency Lady Linlithgow for fighting the menace of tuberculosis, Dr. Syamaprasad Mookerjee, an *ex*-Vice-Chancellor of the Calcutta University, and really well-wisher of the students and unversally loved and respected by them, made special appeal to the students to suitably contribute their share in some form or other to solve this dreadful problem. Presiding over a meeting of the student community of Calcutta, and organised by the Tuberculosis Association of Bengal at the Calcutta University Institute, Dr. B. C. Roy once explained how the students of to-day would form the public opinion and be the legislators of to-morrow and why they should, therefore, know the difficulties and dangers to which they were forcibly exposed under urban conditions. Dr. Roy strove to awake the students to the deadly problem of tuberculosis among them and observed that if each student in Calcutta helped the Tuberculosis Association with only 8 annas a year, the Association could open several more Clinics in the city. The students were asked to avoid diseases that could be prevented and were appealed to join the Tuberculosis Association of Bengal in a missionary spirit.

The students of our country, are not only required to co-operate with such organised professional projects, but, like their brethern overseas they should also establish separate Tuberculosis Committee under their own management. It is high time that the young lives in this country are regarded and treated as the most important factors in national wealth, and much more serious attention should be paid to solve this grave and momentous problem. Let the students of this country develop a real "will to live" and rouse themselves from placid inactiveness, let them with might and main endeavour to inhabit the onslaught of this hideous disease and sincerly try their utmost to attain the high-watermark of exuberant health, vigour and longevity. Not a minute more should be lost to improve the miserably run-down condition of their health. This is the moment to realise that they must now rise to the occasion and *act*. Let them take this vow to-day: "We must make worth living and will no more be mere living deaths. We will break in upon the morbidity and sluggishness of society and make a magnificent edifice of health of everyone of us. We must triumph over all sense of inferiority, and disperse the dark and dismal apathy which blight the lives of so many of us, and contrive to lead them towards a better, nobler and *revived* life replete with endowments of health, beauty and energy."

It is strange to relate that even, in these days, certain educational authorities in this country have betrayed a strange attitude with regard to the education of their students about tuberculosis: they hold that the problem of tuberculosis among the students has often been unduly exaggerated and that knowledge regarding this disease would unnecessarily destroy the peace of their minds! The students would tend to worry and brooding over their health, at slightest reasons, and this

A. R. P. In The Factory

[By S. A. Mitchell, M.B.E., "*A. R. P.*" *Officer, Boots Pure Drug Company, London*]

ALL enemy Governments have weapons for attack but A.R.P. boasts no weapons, being regarded as a purely defensive service to maintain morale and prevent panic. The breakdown of morale and the spread of panic are the surest ways of introducing disorganisation. Can our factories stand up to a severe "bombing" and still carry on? Simplicity should be the basis of our plans. If we insist upon a thousand and one things being done, difficulties will at once be introduced. A.R.P. organisers have ever had dinned into them the fact that "production must go on", so that, we are eternally up against this challenge; that, no matter what happens, as far as possible, production must still be maintained.

Shelters

These must, of course, be situated near to the workshops and be capable of being occupied within a few minutes. All other things being equal, a shelter in an existing building is much to be preferred to an externally placed shelter, for during the severe January weather it was only too evident that staff would elect to use indoor shelters if these were available, and at the same time this would lessen the risks of colds and chills through exposure and varying temperatures. I am neither an architect nor an engineer, and do not propose to say much on the subject of the construction of shelters, and, indeed, it has already been thoroughly discussed at previous meetings of this Institute. We have solved our shelter problem by examining existing factory buildings and adapting basements and ground-floor shelters wherever possible.

All shelters, of course, have been provided with seating accommodation, and in the underground concrete and brick type we have taken care to install duckboards and back-rest rails, as by breaking the contact of the occupant with the shelter proper we believe the effects of transmitted concussion may be minimised. All shelters are provided with identification numbers and the external type with identification boards, which are faintly illuminated at night. In addition, all shelters have normal battery and portable battery lamps, telephones, temporary lavatories, rescue equipment, emergency water supplies, blankets, and first-aid equipment. We maintain emergency water supplies in a fresh condition by chemical treatment and storage in stone jars, which saves frequent changing of water.

Protection Of Vital Plant

Vital plant is that which, if any of it were damaged, production would be seriously interfered with. Such places as power and boiler-houses and special process plants need all the protection that can practically be afforded, and present problems which are often more difficult to solve than pro-

tection of personnel. Each place, each piece of plant requires individual examination in the light of its importance, and by no means the least difficult problem is the provision of adequate protection without interference with function. It is this last consideration which usually dictates the kind of protection adopted, or, indeed, whether protection shall be provided at all. It is sometimes easier to duplicate plant or important parts of plant and store them in some less vulnerable place.

Observation Posts

A post or posts should be placed on the top of substantially constructed building and should command as extensive a view of the surrounding factories as is possible. The observers are protected in a conical steel or concrete shelter. Direct telephonic communication between posts and the central control is, of course, essential. On receipt of the air raid warning "red," the observers proceed to their posts and are able to report to control any untoward incident, such as the dropping of incendiary bombs, so that aid can be despatched to the scene at once.

Communications

This is a very important branch of A.R.P organisation. Shelters can be constructed, first-aid posts, fire posts, &c., erected, but unless you are in immediate telephone contact with all these, then your A. R. P. strength is considerably weakened. The heart of the communications is the control, where a telephonist is in constant attendance night and day, awaiting the receipt of the "yellow" warning which is to summon certain essential services into activity.

The control room should be underground if possible and where practicable, should be provided with more than the ordinary standards of overhead and lateral protection. The room should also be gasproof and reasonably soundproof. A good control lay-out is arranged for by providing a two room structure. In the first room are assembled the telephone clerks, who are seated respectively before groups of incoming and outgoing phones. Communication with the second room is maintained through two small windows marked "Incoming" and "Outgoing" messages. On receipt of the air raid warning "red," the reminder of the control staffs report at once to control. The telephone supervisor passes any messages received through the relevant window to the main control room.

First-Aid

Conveniently situated first-aid posts should be provided throughout the factory, all protected with the standards of lateral and ovehead protection. All should be capable of being made gas proof with the usual air locks at entrances and exists. The post should also be provided with washing and bleaching facilities, and divided up so that contaminated personnel can go through the various cleansing stages. Provision should be made of an additional adjacent room for the reception of any strecher and walking cases, as evacuation arrangements may break down.

The necessary equipment for both first-aid and anti-gas treatment should be present in each of these posts as well as means for sterilisation of instruments, and facilities available for dealing with anything excepting major operations. It is a good plan to have in reserve stocks of first-aid shell dressings as we believe that, should a major catastrophe develop, this type of dressing will be undoubtedly useful. As you know, it is a larger edition of the field dressing which we carried in the inside of our service tunics during the last war. Factories' own trained nurses, if available, would be in charge of these first-aid posts, and immediately under them work the auxiliary staff.

Fire Appliances

All air raid precautions services are important, but this is one of the most oustanding of them all. Most factories have their own standing fire brigades, which have probably been supplemented by an auxiliary fire brigade, which, in turn, has been increased by a body of especially trained Auxiliary Fire Service personnel.

Trailer pumps are very useful fire appliances, and most factories will have already provided themselves with one or more of these. Consideration should also be given to the housing of these in buildings of standard protection. One of the most useful appliances is the stirrup pump, and these should be distributed generously throughout the factory and staff trained in their use. The stirrup pump is very strongly made and has some 30 ft. of hose. It possesses an $\frac{1}{8}$ in. nozzle, which emits a finely atomised spray. I am of the opinion that the incendiary bomb course recently available to C.A.G.S. and L.A.G.C. instructors has robbed this bomb of many of its terrors. The school prepares a really gigantic fire for you with the aid of what are called "fire devils." This fire is built up in an enclosed room and the candidate rather tremulously has to commence his task of not only putting out the incendiary bomb, but of overcoming the surrounding fire.

Rescue Work

Again, properly protected posts must be positioned throughout the factory and completely furnished with gear and equipment. The staff detailed for this work should have specialised knowledge, and it is indeed a good plan to have some technicians, such as engineers, welders, plumbers, pipe fitters, electricians, joiners, &c., making up a rescue team. Their duties are defined as being responsible for the rescue of staff who may be entombed in buildings, and it is important that rescue workers should be taught to work as far as ever possible in complete silence, as if it becomes necessary to wear respirators it will not be possible to talk.

Decontamination

Whilst we know that in the early days the danger from gas was very much over accentuated, yet it is considered advisable still to have trained teams of decontamination workers. As long as gas remains a possibility of air attack—and, indeed, it seems it always will be so—such squads must be constantly maintained. Everyone has seen pictures of these people dressed up in their hideous-looking clothing, rather like characters out of an H. G. Wells novel. Such squads, of course, should report to properly protected posts and await orders.

It is good to learn that the detector paint (supplies of which were elusive for so long) is now available, and many factories have taken advantage of this by erecting at various points throughout the factory tell-tale indicator boards which, during an air raid, can be routinely examined for signs and symptoms of certain liquid gases. Leaders of decontamiation squads have also been armed with formidable "poke-sticks" in order that they can prod any suspicious-looking pools of what might be liquid gas.

Lighting Problems

I think that the majority of factories have by now solved what originally seemed to be an insoluble problem. Many of us have experimented with subdued blue lighting, shaded lighting, painting out, wooden shutters, and ordinary opaque blinds, and have found the answer in a combination of these five methods. Weatherproof obscuration of light in factories which have immense glass areas is a costly process, and quite a large area of the glass in vital plants where production must go on has already been boarded up and covered with weatherproof felting material. Some factories have been provident enough to lay in stocks of timber in order that any glass broken by concussion can be rapidly replaced. It is difficult to recommend the policy of boarding up all such glass areas now, as in doing this demands on the timber supplies would obviously be enormous, but I consider that some provision should be made for this emergency.

Ventilation

Black-out conditions have created a problem in connection with the ventilation at most factories and offices. The temperature, usually already on the high side towards the end of the day, tends to rise excessively unless some means of automatic temperature control is already installed. As the windows and other outlets are almost hermetically sealed, all natural ventilation is thereby prevented, except in factories or offices where some form of air conditioning or mechanical ventilation has been installed. The remedies are, therefore, obvious. Where cost will permit, automatic temperature control of existing heating systems should be adopted as far as possible, combined with mechanical ventilation or ideally complete air conditioning should be installed. This latter, incidentally, will also permit it certain cases of poison gas filtration if thought desirable either as a whole or in special sections. Where cost does not permit the matter being dealt with in the way suggested, much can probably be done by making one man specially responsible for watching the temperature developed by the heating system and by keeping the room temperature around 63 deg. Fah. for offices or factories.

The installation of window ventilation traps, preferably of the type which do not cause direct draught, will be found fairly effective in remedying the stagnant air conditions. The effectiveness of these depends very largely on the prevailing wind conditions. A type of trap made of fibrous plaster has been developed which will fit in the existing window frames of the sash type and is understood to have given satisfactory results in connection with a certain hospital.

THE BENGAL CO-OPERATIVE SOCIETIES FEDERATION

Co-Operators' Day

Under the auspices of the Bengal Co-operative Societies Federation, the "Co-operators' Day" will be celebrated on Saturday, the 14th December, 1940, at the District III Building (No. 1, Hogg Street, 2nd floor) Extension Hall, of the Calcutta Corporation.

All members of the Co-operative Societies of Bengal and all persons interested in the Co-operative movement are cordially invited to attend the function to make it a success.

—Tuberculosis Among Students

(*Continued from page* 124)

might even develop into a mania! Without making any unpleasant comment on the workings of these worthy minds, we can only invite general attention to our attempt, in this essay, to explain the position of the students *vis-a-vis* the disease of tuberculosis, and leave it for our readers to decide their individual and collective course of action in the matter. On behalf of the student community in India, we would, however, take this opportunity to refute the disgraceful charge of folly and cowardice to which they are exposed by the assumption underlying the solicitous opinions of the gentlemen who voice protest against measures to educate students against tuberculosis.

The Germans hold very strong views on the matter. They say: "The whole of education should be designed to occupy a boy's free time in profitable cultivation of his body. He has no right during those years to loaf about and make disturbances in the streets and picture-houses, but after his day's work is done he ought to harden his young body so that life may not find him soft when he enters it. To prepare for this and to carry it out is the function of youthful education, and not merely to pump in so-called knowledge. It must rid itself of the notion that management of the body is the business of the individual alone. No one should be free to sin at the expense of posterity—that is, of the race."

In England, Lord Beaconsfield put the matter in a nutshell when he said that "the nation's health should be the primary concern of every great statesman." We respectfully recommend Lord Beaconsfield's advice to those who guide our national destiny. Let all our leaders work in concert to ensure and preserve the health of the children and youths in India. We are in no doubt that once the correct lead is given and taken, immense national benefit would soon accrue from well-planned procedure. Shall India not unite to fight Tuberculosis—the common enemy of the Nation?

CALCUTTA NEWS & VIEWS A Digest

Calcutta Blind Relief Camp

The Lady Mary Herbert paid a visit to the Calcutta Blind Relief Camp at Karnani Mansions, 209, Lower Circular Road, Calcutta, on Monday.

The Lady Mary was received by Mr. A. R. Siddiqi, Mayor of Calcutta, Chairman of the Camp; Dr. T. Ahmed, Surgeon-in-charge; Rai Bahadur Seth Sukhlal Karnani, Mr. A. K. Chanda and Mr. A. F. M. Abdul Ali (Joint Secretaries), and other officials of the institution.

She was then introduced to members of the staff and was shown round the various departments. She spoke to some of the patients.

Mr. N. R. Sarker on Unemployment

Apart from State activities, the role that private initiative and enterprise can play, through the expansion of trade, industry and commerce, in solving the problem of unemployment, was stressed by Mr. N. R. Sarker addressing the Economic Seminar of the Presidency College, Calcutta.

The complex problem of unemployment, Mr. Sarker said, did not admit of solution by the efforts of a single agency, whether it was the Government or any other organisation. The problem could be solved gradually only through the growth and diversification of the country's social or economic life.

India stood in a position of advantage so far as opportunities for creating new machinery for gainful employment was concerned. The very fact that their country was backward meant they had considerable scope for extension of the social services that would remove the accumulated deficiency of the past.

He emphasised that unemployment was not a problem by itself. As their economic life grew in diversity, as the standard of life increased, as new wants arose, there would be scope for absorbing larger numbers of educated youths in gainful occupations. He stressed that unemployment should be solved not by lowering the standard of living but rather by trying to raise it.

Mr. Sarker suggested that some expert machinery should exist which would be in a position to focus the attention of the public on the probable scope of employment in various occupation. A body on the lines of the National Professional Orientation Committee which the Wicksell Report in Sweeden recommend might be set up in India.

Calcutta Fire Brigade

Appreciation of the Fire Brigade's fine record of public service and his belief that it would do its best should hostilities extend to Calcutta was expressed by His Excellency Sir John Herbert, Governor of Bengal, in opening the new permanent headquarters of the Brigade at Free School Street, last week-end.

What the Brigade's best was likely to be, His Excellency added, depended largely on factors beyond its control. The Calcutta Corporation and the Howrah and Garden Reach Municipalities should weigh carefully their responsibilities towards their ratepayers and be ready to offer the Brigade whatever facilities it might need and they could offer.

On arrival His Excellency was received by the Nawab Bahadur of Dacca, Minister for Local Self-Government, and Mr. C. E. S. Fairweather, Commissioner of Police. After being introduced to Mr. Fairweather and Mr. F. A. Tucker, Chief Officer, Calcutta Fire Brigade, His Excellency proceeded to the dais where the Mayor of Calcutta, the Chairman of the Howrah Municipality and the Chairman of the Garden Reach Municipality were presented to him.

His Excellency then inspected the parade after which the Brigade marched past, Sir John Herbert taking the salute

Deputy Director of Information Dead

Mr. S. C. Guha Thakurta, Deputy Director of Information, Government of India, passed away on Sunday last, at his Dover Lane residence at the early age of thirty-nine.

Suresh Chandra was born at Banaripara in Barisal. A brilliant student throughout Suresh Chandra obtained scholarship in the Matriculation examination and headed the list of successful candidates in the M.A. examination in Political Economy. Occupying a high place in the B.C.S. examination he was appointed Deputy Magistrate in 1925. His promotion was not long in coming and in a few years' time he was appointed Assistant Press Officer to the Government of Bengal. Mr. Guha Thakurta was tranferred to Delhi where he rose to be the Deputy Director of Information.

He leaves behind his parents, wife and a little son.

WELL-KNOWN CALCUTTA BUSINESS MAN DEAD

Mr. Francis Holroyd French

The death has occurred in Calcutta of Mr. Francis Holroyd French a Director of Messrs. Turner, Morrision and Company Ltd. Mr. French was the only son of the late Mr. F. C. French, C.S.I., I.C.S.

Well-known in business and sporting circles in Calcutta and Bombay, Mr. French joined the staff of Messrs. Turner, Morrison and Company, in December, 1919, after leaving the Indian Army where he held a commission in a Gurkha regiment and a subsequent staff appointment.

He became a Director of the Company in 1933 and spent a good deal of his business life in Bombay. He was a member of the Bombay Legislative Assembly. He was also a steward of the Western India Turf Club.

In Calcutta he became a member of the Bengal Legislative Assembly and was on the boards of a number of well-known business concerns.

Mr. French was a good sportsman. Among other pastimes he loved hunting, riding, pig-sticking and shooting.

He is survived by his wife and two children.

"Raja" Subodh Mullick

His intense love for motherland and immense sacrifice that he underwent for the cause of national education would ever remain bright in the memory of the people of this province, were the words with which a number of speakers paid tribute to "Raja" Subodh Mullick at a meeting held on Sunday evening at the Mahabodhi Society Hall.

The occasion was the twentieth death anniversary of the Raja and was observed under the Chairmanship of Dr. Sundari Mohan Das.

Born in a rich family, Mr. Sachindra Prosad Bose said, "Raja" Subodh Mullick spent a considerable period in Europe. On his return to India he joined the political movement and worked silently for the cause. In 1905 during the time of the 'Partition' agitation when leaders were at a loss to find out money for the establishment of a National University, it was Subodh Mullick who came forward with a donation of a lakh of rupees; his countrymen hailed him as "Raja", the king of their heart. The charity left the Raja almost penniless and he had to live an unknown life in a rented house at Deoghar for about ten years.

This was only one instance how he financed national projects,—without thinking for the future and the consequence. The life of the "Raja" was worth emolution and the speaker hoped that youths of the country would draw inspiration in building up their character from the life and work of "Raja" Subodh Mullick.

Dr. Sundari Mohan Das said that Raja Subodh was one of those great sons of Bengal who 35 years ago founded the base for independence movement in India.

Secondary Education Conference

Dr. Niharranjan Ray, Publicity Secretary, Secondary Education Bill Protest Conference, writes as follows:—

About 500 schools have already signified their intention of sending delegates to represent their views at the Conference to be held on December 21, 22 and 23. Letters conveying support for the aims and purposes of the Conference are pouring in daily at the office of the Reception Committee at 209, Cornwallis Street, Calcutta. More than 200 men and women belonging to all classes of the society but mostly of the educational world of Bengal have joined the Reception Committee.

Anybody paying a subscription of Rs. 2 can become a member of the Reception Committee; a payment of annas eight only entitles one to become a delegate. Visitor's ticket has been fixed at annas four and Re. 1. All subscriptions are to be sent directly to the Secretary, 209, Cornwallis Street, Calcutta, either by money order or in person.

The venue of the Conference has been finally fixed at Hazra Park and Ashutosh College, which is adjacent to it, will be utilised for the purposes of accommodating the delegates coming from motussil.

An educational exhibition showing the development of secondary education of the province in all its aspects is also being arranged to be held at the Ashutosh College Hall in connection with the Conference.

Prominent educationists from outside Bengal have already been invited to join and address the Conference.

A large army of volunteers will be required to help the organisers of the Conference. Already there has been a good response to the call for volunteers. Those who want to be enrolled as such are requested to kindly come in immediate touch with either Prof. Sukumar Bhattacharyya, Ashutosh College, Calcutta, or with Prof. Haricharan Ghosh, Bangabashi College, Calcutta, between the hours of 12 and 4 p.m. on any working day. Any information with regard to the Conference may be obtained from Mr. Charu Chandra Bhattacharyya, Secretary, 209, Cornwallis Street, Calcutta.

"Forward Bloc"

The management of the 'Forward Bloc' weekly of which Mr. Subhas Chandra Bose was the founder-editor has decided to suspend the publication of the same for the present owing to forfeiture of the security of Rs. 2,000 by the Government and demand of a fresh security of Rs. 5,000.

CHIEF EXECUTIVE OFFICER

Address To Be Presented

The Secretary, Calcutta Corporation Employees' Tiffin Room (Mr. Sukhen Chatterjee) writes:—

An address will be presented to Mr. J. C. Mukerjea, the Chief Executive Officer, on Monday, the 16th December, 1940, at 5-30 p.m. at the lawn within the Central Municipal Office.

After the function is over a portrait of him will be unveiled at Corporation Tiffin Room by the Mayor of Calcutta.

All employees are cordially invited to attend the function.

A. R. P. CIRCULAR NO. 4.

Members of the Calcutta Corporation A. R. P. Unit are hereby requested to be present at the Town Hall, on Saturday, the 14th December, 1940, at 4 p.m. on the occasion of distribution of A. R. P. Certificates and Badges.

Rai Seth Suklal Karnani Bahadur has kindly consented to give away the Certificates and Badges.

J. C. MUKERJEA,
Chief Executive Officer,
and
General Controlling Officer,
Corporation A. R. P. Unit.

The 10th December, 1940.

CORPORATION EMPLOYEES' ASSOCIATION

Annual "Priti Sammilani"

The General Secretary (Mr. Radharaman Roy Chowdhury) writes:—

The Annual "Priti Sammilani" of the Calcutta Corporation Employees' Association will be held on Tuesday, the 17th instant, at 7 p.m. at the Minerva Theatre under the presidency of Councillor Sudhir Chandra Ray Chaudhuri.

Mr. J. C. Mukerjea, Bar-at-Law, the Chief Executive Officer, will be the Chief Guest.

The programme includes speeches, songs, and the drama *Alamgir* which is to be staged by the Calcutta Corporation Dramatic Club.

The members of the Association are requested to take admission cards from the Social Secretary (Mr. Haranath Chakravarty) at the Association Room.

CIVIC NEWS FROM FAR & NEAR

BEGGAR NUISANCE IN MADRAS

In a statement to *The Hindu*, Mr. S. Satyamurti welcomed the publication of the Government Bill to provide for the control of the beggar nuisance in the Madras City and he expressed the hope that it would soon become law.

Mr. Satyamurti also hoped that the Corporation Council would provide necessary funds in its next year's Budget for the construction of a work house for able-bodied beggars. Such an undertaking, he said, would relieve the City to a large extent from the beggar nuisance which had, of late, become very oppressive.

RURAL WELFARE AND DUTY OF PUBLIC

Speaking at the Conference of union boards of 24-Parganas, held at Alipore, Mr. H. S. M. Ishaque, Director of Rural Reconstruction, Bengal, referred to the responsibility that rested on the public for the success of the rural reconstruction movement.

The Government, he said, were no doubt fully alive to the question and were doing their best to push forward the movement, but the main burden would continue to rest on non-official public bodies, union boards and other voluntary village organisations. The basic principles of voluntary organization for joint and co-operative effort for the common good would remain as before the key-stone of the movement. Government and their officers would certainly help, assist and guide, but could not possibly do more.

The inertia of the people, Mr. Ishaque continued, had to be broken and a new measure for self-betterment and a new spirit of service and sacrifice in money, time and labour, inculcated amongst the masses. Their people were poor, ignorant and disorganized and had almost resigned themselves to their lot. The primary object of rural reconstruction was to fight this defeatism and create in its place a healthy desire to improve not only individually but also collectively without which no society could possibly progress.

AHMEDABAD MUNICIPAL ELECTION

Fifty-two Congress and 29 Hindu Mahasabha candidates besides a dozen independents are contesting 52 non-Mahomedan seats in the Ahmedabad Municipality, polling for which began recently. Two Congress candidates—a harijan and a woman—have been returned unopposed. The total number of voters exceed one lakh and forty-four polling stations have been set up in the twelve Wards.

B. N. RAILWAY'S MUNICIPAL TAXES

In pursuance of clause (2) of Section 135 of the Indian Railways Act IX of 1890, the Central Government have appointed Sir Madhavan Nair, Bar-at-Law, President, Railway Rates Advisory Committee, as the officer for the purpose of determining under the said clause the sum to be paid to the Howrah Municipality by the Bengal Nagpur Railway Administration in lieu of the municipal taxes in respect of certain specified property.

TRAVELLING EYE DISPENSARY AT BRAHMANBARIA

In view of the rush of patients, the Brahmanbaria Municipality has requested the travelling eye dispensary, organized by the Association for the Prevention of Blindness, Bengal, to extend its stay at Brahmanbaria till the end of December. The dispensary has been working at Brahmanbaria since August 30 last. Upto November 30, 14,848 patients were treated at the dispensary, and the number of operations performed was 894.

MAHARAJA NANDY MEMORIAL

Proposed Calcutta College

An appeal signed by Sir P. C. Ray, Mr. Justice C. C. Biswas, Raja Bahadur Bhupendra Narayan Singha of Nashipur, Sj. Ramananda Chatterji, Mr. K. C. De, Dr. B. B. Dutt, Controller of Examinations, Calcutta University, Messrs. S. N. Banerji, Bar-at-Law, D. P. Khaitan, Kshitish Ch. Chakravarti, Councillor, Calcutta Corporation, Debendra Nath Mukherji, Councillor, Calcutta Corporation, Anath Gopal Sen, Dr. Bhupendra Nath Bose, Dr. Panchanan Neogi and Mr. Nanda Lall Kundu has been issued to the pubic in connection with the proposal to establish a College in Calcutta to commemorate the late Maharaja Sir Manindra Chandra Nandy Bahadur. It states :—

"With a view to perpetuate the hallowed memory of the late illustrious Maharaja Manindra Chandra Nandy of Cossimbazar, and also to remove the long-felt want of a fully equipped first grade College in North Calcutta affiliated in Arts, Science and Commerce, a proposal to establish such a College in the palatial house No. 20, Ramkanto Bose's Street, Shambazar belonging to the late Maharaja has been before the public for some time and in fact has made considerable progress. His worthy son the Hon'ble Maharaja Srish Chandra Nandy of Cossimbazar has very generously promised to hand over the premises to the proposed Managing Committee of the College and has also consented to be the President of the Committee. Promises of monetary support have already been received and the University will shortly be requested to grant affiliation to the College. The house is very suitable for College purposes and stands on an area of about one and a half bigha of land. A strong Managing Committee is being formed and admirers of the late Maharaja Manindra Chandra Nandy and members of the public interested in the establishment of the College are requested to come forward with further monetary help so that the College may be affiliated in as many subjects as possible.

"All correspondence and offers of help are to be addressed to Dr. P. Neogi, 44-A, New Shambazar Street, Calcutta."

ALL-BURMA BENGALI LITERARY CONFERENCE

Pandit Vidhusekhar Sastri, Ashutosh Professor of Sanskrit, Calcutta University, will preside over the fourth annual session of the All-Burma Bengali Literary Conference to be held in Rangoon during Christmas.

Letters TO THE EDITOR

Notice to Correspondents

All contributions and correspondence should be addressed to the Editor, "Calcutta Municipal Gazette," Central Municipal Office, 5, Surendra Nath Banerji Road, Calcutta.

Letters and other contributions must always be written on one side of the paper only and signed by the writer. Their publication in the "Gazette" however must not be taken to imply endorsement by the Corporation or by the Editor of any opinions that may be expressed in them.

Mss. and photographs sent for publication will not be returned unless they are accompanied by fully stamped and addressed covers.

All communications intended for publication in the "Gazette" must reach this office at least six days in advance of its next date of issue.

Insanitary Footpaths And Lanes

To The Editor, "Calcutta Municipal Gazette."

Sir,—The part which is being played by the Health Officer of the Calcutta Corporation to prevent the health of the City from being jeopardised is praiseworthy and he deserves thanks from the general public. The *bustees* are considered as "Plague Spots", and with a view to rendering those spots more sanitary, Disinfecting Squads, each in charge of a qualified medical man go out daily to these places. The writer of this letter takes this opportunity of drawing the pointed attention of the above officer to the insanitary condition of some of the footpaths and lanes of this vast city of Calcutta. In this connection, Baretto Lane and the un-paved footpath just outside the western boundary wall of the Deshapriya Park may be cited. Owing to the non-existence of any urinal, the former is being regularly used by the passers-by as a urinal, while in the case of the latter one cannot help saying that it is being converted by the public as a hell. The part of the city where this park exists is inhabited by decent families. This state of affairs can be remedied for the time being if the footpath in question be cemented immediately. But the problem cannot be fully solved unless an urinal is erected somewhere on the spot. In the interests of the health of the people of this part of the City, the Health Officer is requested to deodorise the atmosphere by instructing the staff concerned to sprinkle daily disinfecting materials on this plague spot.—Yours etc.

HARICHARAN BOSE.

7/2/1-C, Hazra Lane,
Calcutta.

Calcutta Associations & Institutions

CORPORATION EMPLOYEES' ASSOCIATION.

Executive Council Meeting

At a meeting of the Executive Council of the Calcutta Corporation Employees' Association held on Monday the 2nd December, 1940, the following resolutions were passed :—

1. (a) That this meeting expresses its sympathy with Mr. N. C. Chatterjee, Councillor, Calcutta Corporation for the bereavement sustained by him at the sad demise of his uncle late Mr. B. B. Chatterjee under the most tragic circumstances. May the noble soul of deceased rest in peace.

(b) That this meeting expresses its sincere sympathy with Mr. Sukhendu Bikash Sen-Gupta of the License Department, for the bereavement sustained by him at the sad and untimely death of his accomplished wife late Sm. Sudhira Sen-Gupta. May her soul rest in peace.

2. That this meeting views with grave anxiety the hunger-strike resorted to by Alderman Subhas Chandra Bose and requests the Government of Bengal to remove the causes which led him to such a course.

That this meeting also protests against such prolonged detention of Alderman Bose in Jail and demands his immediate release in the interest of justice.

3. (i) That in view of the fact that the privilege of advance salary before the X'mas is being enjoyed by the employees for a pretty long time, this Council requests the Corporation (the Mayor, the Chief Executive Officer, and the Chairman, Services Standing Commitee No. II) to continue the same privilege this year too.

(ii) That this meeting expresses its sense of discontentment at the appointment of outsiders as bailiffs of the Collection Department superseding the just and legitimate claims of senior and experienced hands, and requests the Services Standing Committee No. II that in making future appointments the claims of the temporary hands should be considered favourably.

(iii) That this meeting requests the Corporation to fill up all posts of higher grades by promotions only and not on the results of the competitive examinations as the former course of action will give the employees incentive to work and increase efficiency.

(4) (i) That a suitable memorandum be prepared by the General Secretary and be placed before the Special Committee for redressing the grievances of the dismissed labourers of the Entally Workshop, Motor Vehicles Department and *Gowkhanas*.

(ii) That this Council requests the Corporation to grant full pay for the period of suspension to the suspended workers *e.g.* Messrs. Md. Ishahaque, Sk. Rajab Ali, Sk. Ratan, and Haricharan Mahanty who were unjustly accused and subsequently honourably acquitted in the Entally Workshops Manager assault case in consideration of the fact that (i) they were innocent, (ii) had suffered for a long time due to non-payment of wages, and (iii) had to spend a large sum to conduct the case.

LEGAL INTELLIGENCE

APPLICATION AGAINST CORPORATION

(Before Mr. Justice Ameer Ali.)

Jagannath Pal

vs.

The Corporation of Calcutta

His lordship delivered judgement in this application (reported in the *The Statesman* of May 28 and June 29) in which the petitioner Jagannath Pal asked that writs of certiorari and prohibition be issued against the respondent the Corporation of Calcutta or that an order be made against it, under Section 45 of the Specific Relief Act, 1877, in respect of sanctioning a building Plan of premises No. 6, Baranashi Ghose Street, Calcutta.

It appeared that Mr. Justice Sen had granted an *interim* injunction, pending the final disposal of the application, restraining the Corporation from confirming or conveying the sanction of the plan to Chandi Charan Pal, the owner of the premises.

Mr. S. C. Mitter, Mr. R. N. Sircar and Mr. D. P. Chatterjee appeared for the petitioner; Mr. S. P. Chowdhury for the respondent Corporation.

His lordship found that the proposed additions were to some extent, but not by any means to a great extent, advantages to No. 5-A. Non-compliance with the rules or the excess in the powers of relaxation were, however, largely to the disadvantage of No. 5-B, because, on his reading of the rules, sanction for these additions could only be granted under the rules as they stood, in exchange for very large concessions as to area, side-space, and so forth, which would give a very material advantage to the adjoining owner. In accordance with his lordship's decision in a much more serious case which was now under appeal, this adjoining owner had a right to come before this court and ask for an order calling upon the Corporation to deal with the building plans of the adjoining house in accordance with law. His lordship must for the purposes of this application follow that decision until it had been upset.

As regards the relaxations there was no difficulty in finding that while one or other rule might have been relaxed, the aggregate relaxation in this case was not permissible under the rules.

The questions, therefore, were as to the form of relief asked, and the courts discrection in such matter. As regards the latter his lordship had not been anxious to interfere in this case, but provided a legal right was established, it seemed to him that his lordship would be wrong in not granting the relief unless good reason had been put before the court to the contrary. It was true that the owner of No. 6 was not before the court but the only relief asked was that his lordship would direct the Corporation to proceed to deal with the building plans according to law and their own regulations.

On the question of relief sought, his lordship observed that in the circumstances his lordship could not deprive the petitioner, from asking for an order under Section 45. The only order would be that the Corporation would proceed to deal with the case of sanction for additions and alterations to premises No. 6, Baranashi Ghose Street, in accordance with the law, and the regulations relating to this matter and the Corporation was to pay the costs of the application.

Attorneys: Messrs. P. C. Ghose and Company; Mr. T. C. Mitra.

VITAL STATISTICS

For the City of Calcutta for the week ending 7th December, 1940.

City of Calcutta (Town and Suburbs)

Notice to Contractors

The date for opening of the tenders for Remodelling the inlet sewer to the silt pit in Mominpore Drainage Pumping Station has been changed. Tenders in this connection will be opened on the 3rd January, 1941, instead of on the 11th December, 1940, as previously advertised.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office,
The 10th December, 1940.

Health Department.

NOTICE

For the convenience of the citizens, the vaccination stations have been kept open both in the morning and in the afternoon, as also on Sunday mornings, and the public are requested to call at the nearest vaccination stations and get themselves vaccinated as early as possible.

As sporadic cases of small-pox are occurring in different parts of the city, it is highly desirable that the public should get themselves vaccinated in time.

S. N. GHOSE.
Health Officer,
&
Superintendent of Vaccination.

Central Municipal Office,
The 30th November, 1940.

Special Notice

Health Officer's Advice.

With a view to prevent, as far as practicable, the occurance of epidemics of small-pox and cholera, an extra staff of Vaccinators and Inoculation Officers have been appointed for vaccinating against small-pox and inoculating against cholera.

The public are aware that vaccination and inoculation offer protection against an attack of the virulent diseases mentioned above.

It is, therefore, expected that the public would avail themselves of the services of this extra staff by getting themselves vaccinated and inoculated without delay, and thus co-operate with the Health Officer in attaining the object.

The public may apply to the District Health Officers of the Districts concerned at the undermentioned addresses as well as at the nearest Corporation Vaccination Stations for services of the extra staff mentioned above :—

District I Health Officer—79, Cornwallis Street.
District II Health Officer—22, Mirzapore Street.
District III Health Officer—1, Hogg Street.
District IV Health Officer—11, Belvedre Road.
Health Officer, Cossipore—10 and 11, Barrackpore Trunk Road.
Health Officer, Manicktala—109, Narkeldanga Main Road.

S. N. GHOSE,
Health Officer,

Central Municipal Office,
The 7th December, 1940.

CORPORATION NOTICES—*Contd.*

DRAINAGE DEPARTMENT.

To All P. I. Contractors, District III and Dhappa.

Re :—Making pucca the Scraped Tin Shed Latrine at Topsia P. S.

Dear Sirs,

Please submit your tender in the prescribed tender form for the petty improvement works of the Corporation for the above work, the details of which can be obtained from the department. The tender in a sealed cover, endorsed as above, will be received by me on the 16th December, 1940 at 12 noon.

The work is to be completed within 1½ months from the date of order to take up the work in hand.

Yours faithfully,
P. C. BOSE,
Executive Engineer, Drainage.

Central Municipal Office.
The 11th December, 1940.

Notice.

In exercise of the powers vested in the Corporation of Calcutta under Section 473 of the Bengal Act III of 1923 and delegated to me under Section 12 thereof, it is hereby notified that old premises Nos. 4, 4/1, 5, 5/1, 6 and 49, Monsatala Lane, 6/1, 7 and 7/1, Ganesh Sarkar Lane, Ward 25, (acquired by the Corporation in connection with the development of Monsatala area) which are not required for the purpose of the roadway as per plan prepared in this behalf, will be disposed of by the Corporation. Particulars may be obtained on enquiry and an inspection of the said plan may be had in the office of the Chief Valuer and Surveyor of the Corporation any day during office hours.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office,
The 11th December, 1940.

License for tanks and trees, etc.,

Notice is hereby given for information of the public that the Estates and General Purposes Standing Committee of the Corporation, at its meeting to be held on Tuesday, the 17th December, 1940, at 5 p.m., will hold an auction in respect of the following :—

(a) Annual license fee for the license for the ferry service between Paramanick Ghat at Cossipore and Lala Babu Shire Ghat at Belur for a period of 3 years.

(b) Salami for the license for a tank and fruit trees at the Kasiabagan Burial Ground for a period of 4 years, at a monthly fee of Rs. 9.

A security deposit, equivalent to one year's fee in the case of the first and six months' fee in the case of the second lot, is to be deposited with the Corporation. Other conditions of the licenses may be seen, at the office of the undersigned, on any working day, during office hours. Any body willing to take any of the licenses, may appear at the auction, and, offer his bid, if he so desires.

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office
The 11th December, 1940.

BYE-LAWS FOR LICENSED PLUMBERS

NOTIFICATION

Calcutta—No. 1452M.—14th November 1940.—The following bye-laws made by the Corporation of Calcutta under clause (13) of section 478 of the Calcutta Municipal Act, 1923 (Bengal Act III of 1923), have been sanctioned by the Governor under sub-section (1) of section 482 of that Act, and are hereby published as required by section 486 thereof in supersession of the bye-laws published with notification No. 1118M., dated the 21st July 1908 :—

Bye-laws under section 478(13) of the Act, prescribing the qualification to be required from, and regulating the appointment, suspension and dismissal of licensed plumbers.

A. Qualifications.

1. Before any license is granted to any person or firm to act as a licensed plumber, for the purposes of either Chapter XVII or Chapter XVIII of the Act, or both, such person, or a resident member of such firm, or some one in the employment of such person or firm, must satisfy the Chief Executive Officer, or the officer to whom the Chief Executive Officer has delegated his powers in this behalf, in the following respects :—

(*i*) in the case of a license for the purposes of Chapter XVII, that such person or member, or some one in the employment of such person or firm,—

(*a*) has a practical knowledge of plumbing work, and has for a recent period of at least three years been employed as a plumber, or passes the plumbing and sanitary fitting course of the Calcutta Technical School in accordance with the Corporation resolution, dated the 14th December, 1932, which runs as follows :—

"That the passing of the Plumbing and Sanitary Fitting Course of the Calcutta Technical School be made the necessary qualification for the certification of plumbers and that a person holding such a certificate be given the plumber's license for the purpose of Chapter XVII (Water Supply) or XVIII (Drains) of the Calcutta Municipal Act, subject to his passing the departmental test of the Corporation.";

(*b*) is able to carry out work in both lead and iron, and can wipe straight or branch joints and lead pipe of any market size and perform any other work usual to the trade of plumber;

(*ii*) in the case of a license for the purposes of Chapter XVIII that such person or member, or some one in the employment of such person or firm,—

(*a*) has a practical knowledge of drainage work and has for a recent period of at least three years been employed as a plumber or passes the Plumbing and Sanitary Fitting Course of the Calcutta Technical School in accordance with the Corporation resolution, dated the 14th December, 1932 given above;

(*b*) can timber trenches in a workmanlike manner in bad ground;

(*c*) can build in brick-work in Flemish or English bond, and generally understands masonry work;

(*d*) can lay and join stoneware pipes, both in straight lines and with curves, and can place them in proper gradients by method of levellings;

(*e*) can insert a junction in a pipe-sewer and a junction block in a brick-sewer in a manner approved by the Engineer; and

(*f*) can properly restore road surfaces.

B. Appointment.

2. No license shall be granted as aforesaid unless bye-law 1 be complied with and unless, in the opinion of the Chief Executive Officer or the officer aforesaid, such person or firm has a suitable place of business together with a proper and sufficient stock of tools, plant and material for the purpose of carrying on the trade or business of a plumber and als such person or some one in the employment of such person or firm, passes the departm ntal test of the Corporation.

C. Suspension and Dismissal.

3. A licensed plumber appointed as aforesaid may be suspended or dismissed, as the Chief Executive Officer may think fit—

(*a*) if the plumber in the opinion of the Chief Executive Officer—

(*i*) fails to carry out in a workmanlike manner any work entrusted to him; or

(*ii*) fails to carry out any such work within a reasonable time as the Engineer may direct, or delays in carrying out any such work without assigning good and sufficient reasons when called upon to do so; or

(iii) fails to comply with any lawful direction given to him by the Engineer or other officer empowered in that behalf; or

(b) if any accident or other damage is caused by or through neligence, or want of care, or precaution on the part of any servant or workman of the plumber in the course of business; or

(c) if any work is done is contravention of the provisions of the Act or any bye-laws or rule made thereunder; or

(d) if a person or firm was licensed on the ground that some one in his or their employment complied with bye-law 1, whenever he or they ceases or cease to have in his or their employment a person who fails to satisfy the Chief Executive Officer or the officer to whom the Chief Executive Officer has delegated his powers in this behalf, in the respects prescribed by the said bye-law.

4. The license of a plumber shall automatically become cancelled on his being adjudged an insolvent.

By order of the Governor.

Water-Works, Drainage and Plumbing Engineers

Mission Row, Calcutta

Sound Plumbing means health and longevity

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

G. C. WOODWARD,
Supdt., S. S. Hogg Market.

MAYOR OF CALCUTTA

LONDON AIR RAID VICTIMS: CALCUTTA MAYOR'S APPEAL

THE citizens of Calcutta decided, in a meeting convened by the Sheriff, to go to the help of the women, children and the civilian population of London, who were being daily bombarded from the air. The object of the Fund to be raised was purely charitable and humanitarian. Persons belonging to all classes and to every shade of public opinion could thus give freely and generously, for there could not be any room for a difference of opinion where mercy and succour to the suffering are concerned. I appeal to every man and woman living in Calcutta to help the Committee in its efforts to relieve, in howsoever humble a way, the sister city of London.

GIVE WHAT YOU CAN BUT GIVE IT SOON FOR WINTER IS COMING

Donations may kindly be forwarded to:—
"The Mayor's Fund for London Air Raid Victims,
Hongkong & Shanghai Banking Corporation,
Dalhousie Square, Calcutta.

12th Dec. 1940. Abdur Rahman Siddiqi

Chronicle And Comment

The Mayor's Appeal

In the preceding page we have published the appeal issued by our Mayor, Mr. Abdur Rahman Siddiqi. In sending the appeal to the Press, the Mayor writes:—

"Due to the Puja holidays intervening, the work of the London Air Raid Fund Committee did not go forward as briskly as it should have done. Calcutta has once more assumed its normal life and it is time we fulfilled the promise we made to the citizens of London to render help to the victims of Air Raids. The Committee appreciates the fact that the public has contributed to the many War Funds now being raised in Bengal. It may, however, be pointed out that the Calcutta Mayor's Fund for the Relief of London Air Raid Victims is of a purely humanitarian character and is intended to be a gesture of sympathy and friendliness towards the civilian population of the sister City of London. Inhabitants of Calcutta, whatever their religious or political views, can thus join hands and make the Fund a gift worthy of the greatness of Calcutta and in keeping with the unfailing generosity of its citizens to suffering humanity.

"The raids are continuing and havoc wrought increasing and widening. Added to these is the fact that winter is approaching. I appeal to the citizens of Calcutta to give what they can and to give it at once."

For our part we can but only repeat what we had said when the appeal was first issued, that considering that the victims of the air raids on London are innocent civilians and many of them helpless old men, women and children, the loss of life and limbs and of home is grievous, and it is up to all of us to help towards relief of this suffering to the best of our capacity on humanitarian grounds.

Students' Welfare Committee

The Hony. Secretary, Students' Welfare Committee, Calcutta University, invites applications from candidates for the competition for the Debendranath Hemlata Gold Medal for the year 1940. The medal is awarded to the student who passes any of the following examinations with the best of health and paying attention to his physique all through the University career. Graduates who have obtained any of the following degrees are entitled to compete for this Medal *within three years* of obtaining such degree:—*M.A.*, *M.Sc.*, *M.L.*, *M.O.*, *M.S.*, *Ph.D.*, *D.Sc.*, *D.L.*, *M.D.* Competitors will have to appear before the Students' Welfare Committee of the Calcutta University for a routine Medical Examination and will also be subjected to such tests as may be decided upon by the Committee appointed for the purpose by the Syndicate. In awarding the medal the record of physical achievements of the candidates throughout their academic career will be taken into account.

Applications from the entrants for the Competition are required to be forwarded by a member of the Senate or by the head of any institution affiliated to the University and must reach the office of the Hony. Secretary, Students' Welfare Committee by the 9th January, 1941. If suitable candidates are available from among the competitors for this medal for the year 1940, two additional medals will be awarded on the results of the competitive examination for the award of the medal for the year 1940.

Corporation Central Laboratory

Mr. A. R. Siddiqi, Mayor of Calcutta, performed the opening ceremony of the new premises of the Corporation Central Laboratory on Saturday, the 21st December.

Mr. J. C. Mukerjea, Chief Executive Officer, welcomed the guests.

Mr. S. Chatterji, First Deputy Executive Officer then gave a short history of the Corporation Central Laboratory, while Dr. J. B. Grant, Director, All-India Institute of Hygiene and Public Health spoke about Municipal Laboratory. Mr. Chatterji's history is reproduced elsewhere.

The Chief Executive Officer then requested the Mayor to perform the opening ceremony, and the Mayor delivered the address which is published as a Supplement to this issue.

A vote of thanks to the Mayor and the guests having been moved by Dr. S. N. Ghosh, Health Officer, the formal opening of the new Laboratory premises was done by the Mayor, after which tea was served.

Anti-Mosquito Measure

The Anti-Mosquito measures, which are being conducted by the Government of Bengal in the Salt Lake areas since 1936 with a view to solving the malaria problem in Calcutta, now form the subject of a controversy between the Government and the Corporation of Calcutta.

Since the commencement of the operation of the measures, the Corporation has been contributing its share of the cost. But of late, it is considering a proposal of its Health Standing Committee whether it should stop the contribution. The Standing Committee has recommended to the Corporation to inform the Government that if the latter do not formulate a definite scheme for the permanant reclamation of the Salt Lake area, the former cannot go on paying the annual recurring charges for temporary measures. In the opinion of the Committee, the Corporation can, however, make a lump sum contribution to the Government for the purpose of anti-mosquito measures, provided an effective scheme is drawn up for completing the reclamation of the area within a definite period.

Stressing the need of continuance of the measures, Government, in one of their communications to the Corporation, state that the recent survey work carried out by the Public Health Department has revealed that onslaught of the malarial species still continues in the City and Government are advised that in view of the present position, the necessity of continuing the control operation in the Salt Lake areas remains as great as before. Government further state that the question of formulating a scheme and giving effect to it within as short a time as possible will be taken up in the light of the decisions that may be reached at a conference between their representatives and the representatives of the Corporation, to be shortly convened.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETING FOR THE WEEK ENDING DECEMBER 20, 1940

TWENTY-SEVENTH ORDINARY MEETING HELD ON WEDNESDAY, THE 18TH DECEMBER, 1940

Standing Committee Vacancy Filled Up

Councillor Dr. Sadeque Hossain was elected to fill the vacancy created in the Services Standing Committee No. II by the appointment of Councillor Abdus Sattar an Assessor of the Calcutta Improvement Trust Tribunal (when he vacated his seat), his resignation from the Public Health Standing Committee having been accepted.

Cholera Beds In Hospitals

In view of the apprehended outbreak of cholera in the city, the Corporation sanctioned, on the recommendation of the Public Health Standing Committee the opening of 24 extra beds, if and when required, in different hospitals of the city, according to the discretion of the Health Officer.

In placing the recommendation before the House Dr. Syed Zafar Ahmed, Chairman of the Public Health Standing Committee, said that the apprehension was justified as the Health Officer had received a letter from the Superintendent of the Campbell Hospital on November 20 last, informing that he had admitted 64 cholera cases in the hospital on that day against 29 sanctioned number of beds there. The Superintendent had also asked the Corporation to meet the cost of the extra beds. Dr. Ahmed told the House that any extra bed, if opened, would cost the Corporation Rs. 40 per month.

Dr. Ahmed also stated before the House what the Health Officer had told the Public Health Standing Committee when they considered this question in the Committee. The Health Officer had told them that cholera had never been epidemic during this part of the year and probably the cases in the Campbell Hospital which he had visited were due to eratic diet and that he had found that there were very few fatal cases and that a fair number of cases had come from outside the city.

Agreement With Collector

The consideration of the recommendation of the joint meeting of the Services Standing Committee No. I and the Finance Standing Committee regarding the agreement to be entered into between the Corporation and the Collector was postponed till after the holidays.

All-Bengal Municipal Conference

The Corporation adopted a resolution recommending election of four representatives to represent the body at the Sixth All-Bengal Municipal Conference to be held on the 30th and 31st December next at Berhampore but in the absence of any names being proposed the resolution became ineffective.

Declares "Main Thoroughfare"

The recommendation of the District Standing Committee, District I for moving the Government for declaring Mahendra Gossain Lane in Ward VI as "Main Thoroughfare" under the Bengal Suppression of Immoral Traffic Act, was accepted.

Inspection Of Libraries

On a point of order being raised, the Mayor gave a ruling that the recommendation of the Estates and General Purposes Standing Committee regarding the appointment of three Inspectors of Libraries receiving grants from the Corporation should come through Services Standing Committee No. I.

The Building Department

At the instance of Councillor Debendra Nath Mukherjee, the Corporation directed the City Architect to send every month, from the month of November, 1940, a report of the Building Cases, pending and disposed of, to the Chief Executive Officer and the same be placed before the Corporation every month.

The mover had given the form in which the return was to be made.

In placing the motion before the House, Mr. Mukherjee complained that plan cases and demolition cases lay pending before the Building Department for months and even for one year and more. The work was expedited only when the party concerned could approach the Department with a letter from a certain Councillor.

Mr. N. C. Chatterjee, said that the Building Department was the plague spot in the Corporation; procrastination was writ large on the Department and scandals went on with regard to Building Cases which remained pending for months and months. It was high time the Corporation should do something in this matter.

Mr. M. A. H. Ispahani: "I would like to know who is to be blamed for delay in regard to disposal of Building Cases, the Department or the Committee?"

Mr. N. C. Chatterjee: "Don't know as yet".

Mr. Hamoodur Rahman said that it could not be said that the cases were disposed of quickly but there was also the "other side" of the question. He referred to formalities that had to be gone into before a plan could be sanctioned by the Buildings Committee. He requested the mover of the motion to consider this aspect of the question.

Mr. Madan Mohan Burman said that sanction of the Buildings Committee with regard to a plan was required only when there had been any contravention of the Building Rules. What was however regrettable was that even with regard to plans which involved infringement of the Building Rules there was undue delay.

Mr. Anukul Chandra Das by way of amendment moved that the motion be referred to a joint meeting of the two Buildings Standing Committees.

In putting the motion to vote the Mayor, Mr. Abdur Rahman Siddiqi said that as Mr. N. C. Chatterjee had said he would also like to say that this was one of the plague-spots of the Corporation and that it was also a "scource of income". He would not mince words (laughter in the House) and he would say it was a "disgrace" to the Corporation. It might be a reflection on the Corporation or on the Committee but they were what they were. As the motion wanted some information to be placed before the Corporation, he thought, there should be no objection.

The House accepted the motion of Mr. Mukherjee.

NOTICE

On account of the Christmas holidays there will be no issue of the "Calcutta Municipal Gazette" on the 28th December, 1940. The Market Prices Current will, however, be issued on that date and will be available at the Municipal Markets.

The next issue of the "Gazette" will appear on the 4th January, 1941.

All-India Local Bodies' Conference

Mr, Nalini Ranjan Sarker, *ex*-Mayor of Calcutta and former Finance Minister of Bengal has been elected President of the third session of the All-India Local Bodies' Conference, which meets on December 26, 27 and 28.

An influential Reception Committee has been formed with Mr. S. M. Mehdi, M.L.C., in this connection.

The Conference opens at mid-day on December 27 when the presidential address would be delivered after an welcome speech is read out along with the messages of good wishes.

The resolutions would be taken up for the consideration of the Conference on December 28 and 29 respectively.

CHIEF EXECUTIVE OFFICER

Address Presented: Portrait Unveiled

An address was presented to Mr. J. C. Mukerjea, the Chief Executive Officer, on Monday the 16th December, by the Corporation Tiffin Room Committee. The Mayor of Calcutta Mr. A. R. Siddiqi presided. Mr. Sukhen Chatterjee, Secretary, Tiffin Room Committee read out the address composed in Bengali.

There was a large gathering, and many Heads of Departments attended.

After the function was over in the lawn within the Central Municipal Office, a portrait of Mr. Mukerjea was unveiled at the Corporation Tiffin Room by the Mayor.

The Chief Executive Officer in a neat little speech made a suitable reply to the address. He was moved at the warmth and affection showed to him by all sections of employees.

The Mayor said that it was a pleasure to find that Mr. Mukerjea was so popular amongst all sections of employees.

Infringement Of Civic Rights

Calcutta Municipal Amendment Bill, 1940

[By K. M. Banerjee, *General Secretary, The Calcutta Ratepayers' Conference.*]

IT was with the noble object of familiarising the people with the art of administration and of arriving at the right methods even through blunders at the beginning that the system of local self-government was incorporated by Sir Surendra Nath Banerjea in the Municipal Act, 1923, which practically gave citizens of Calcutta full control over the city's affairs by their elected representatives.

These representatives are empowered with—

(1) appointment of their own officers in the Corporation and fixing their salaries and allowances;

(2) unhampered management of the affairs of the Corporation by their own Committees;

(3) sanctioning of contracts upto an adequate limit by their own men;

(4) maintaining discipline in their own office and rewarding and punishing their staff;

Certain powers are vested in the Local Government to maintain a formal supervision over the affairs of the Corporation. These mainly are—

(1) Government sanction to projects costing over Rs. 2·5 lakhs.

(2) Government power to call for any return or report or copy of any document from the Corporation.

(3) Deputation by Government of any officer to make inspection or examination of any department of the Corporation.

(4) Government requiring the Corporation to do any particular act within a particular time.

(5) Government power to supersede Corporation in case of its non-compliance with such order.

(6) General power of annulling any proceeding of the Corporation thought not in conformity with law.

(7) Specified acts of the Corporation including appointment, salary, allowance, condition of service of high officers requiring sanction of the Government.

(8) Control over raising loan and some other matters.

The original Act of Sir Surendranath underwent several modifications in course of its 17 years' run. The most important of these are—

(1) additional power to the auditors (1933);

(2) perpetuation of caste distinction and accentuation of religious discrimination (1939);

The new Amendment Bill 1940, however, is intended to deprive the people of many of their rights conferred by Sir Surendranath's Act and add new powers to the Local Government. These include:—

(1) Annulling of any proceeding of the Corporation or of any Committee.

(2) Suspending of any resolution of the Corporation or any Committee which according to the Government may lead to breach of peace or annoyance to the public.

(3) Suppressing any department of the Corporation.

(4) Reserving to itself the power of appointing Chief Executive Officer from among its own servants of certain qualification.

(5) Re-appointing the Chief Executive Officer at the option of the Government.

(6) Appointing a Service Commission of three members of whom one must be a Moslem and one non-Moslem and the Chairman, a Government Officer, and prescribing terms of their service.

(7) Vesting to this Commission all powers of recommending appointment of officers on Rs. 50 and more per month and of taking disciplinary measures against such officers.

(8) Keeping to itself the power of approval of all higher officials appointed by the Corporation.

(9) Making appointment of higher officers renewable every five years automatically requiring sanction of the Government.

(10) Depriving the Mayor and Deputy Mayor of the power of making contract, vesting the power on the Government appointed Executive Officer.

These are a few of the inhibitions placed on the rights of the people by the new amendments. The Rate-payers' Associations of Calcutta on behalf of the Rate-payers convene the Calcutta Rate-payers' Conference to register the protest of the people against the measure.

The Government And The Corporation

By the Calcutta Municipal (Amendment) Bill of 1940, the Provincial Government proposes to assume further powers over the Calcutta Corporation. The fundamental idea underlying the birth and growth of Local Self-Government in India has been that the people primarily concerned should have control over their own civic affairs so that they might get used to governing themselves, which has been declared more than once to be the ultimate goal of British rule in India; and the grant of Local Self-government was intended to familiarise people with the arts of government even by blundering along into right methods. Government tutelage should in this matter be as little as possible.

Surendranath's Act And Its Amendments

Soon after the introduction of Montague-Chelmsford Reforms, Sir Surendranath Banerjea, the father of Indian Nationalism, introduced the Bill which afterwards enacted as the Calcutta Municipal Act, 1923, (Bengal Act III of 1923). Since then, during the last 17 years, it has been amended at least 18 times. The more important of these Amending Acts have been, Bengal Act XI of 1933, by which the auditors appointed by the Local Government will be given power to disallow, surcharge and charge in the accounts, and Bengal Act XI of 1939, by which the constitution and composition of the Municipal Council was materially affected, and rate-payers, while voting for a candidate, have been made to think not as rate-payers, but caste differentiations have been perpetuated, (*e.g.*, scheduled caste reservation), religious discri-

mination accentuated (*e.g.*, Muslim Constituency), breed whether pure or mixed recognised (*e.g.*, Anglo-Indian Constituency), foreign capital respected (*e.g.*, in Special Constituencies) and persons in the labouring occupations have been so far recognised as found fit to be placed on a par with people of mixed descent, (*e.g.*, Labour and Anglo-Indian Constituencies).

Compartment Electorates

The rate-payers have thus been divided into various groups, the electorates have been also variously divided into compartments, and their representatives have been made to think, not in terms of general good to the ratepayers at large, but how best to act in the interest of their particular set of electors and this has been gradually leading to greater accentuation of the differences between the electorates and even to antagonisation. This is really dividing ratepayers from their brother ratepayers and is now standing in the way of all the ratepayers ever uniting together. It might be very satisfactory for those who carry on an alien Government, but it can never conduce to the larger interests of the entire body of ratepayers, who, divided in numerous fanciful parts, cannot possibly have a united voice to make themselves heard. The favoured constituencies having no real basic justification for their several existences remain ever in an attitude of thankfulness to their progenitors and are oft rewarded with crumbs for their faithfulness while the main constitutional fights fall on the shoulder of that constituency which has been termed General (clipped although it has been by the Scheduled.)

Powers of Provincial Government

However, it will be proper for us to see what powers regarding administration, appointments and accounts, the Provincial Government already possessed in matters pertaining to the Calcutta Municipality under the existing Municipal Act, and what powers the Government further wants to assume.

Under Section 14 of the existing Act, sanction of the Provincial Government must be obtained to all projects costing two and a half lakhs of rupees and more, and if after sanction of such project any material change be made in the project, such change cannot be carried out till sanctioned by the Government.

Under Section 15, the Government has power to require the Corporation to furnish the Government with any return, estimate, statistics or other information or report on any matter or a copy of any document in the charge of the Corporation. Under Section 16, the Government can depute an officer or officers to inspect or examine any department, service, work or thing under the Corporation, and to report to the Government, and for that purpose the deputed Officer may make local inspection and require the Corporation to produce necessary papers and to report. On receipt of the deputed Officer's report the Government, can, under Section 17, in case of inefficiently performed or inadequately financed duties, call upon the Corporation to make suitabe arrangements or to show cause why they should not be done within the time limit by the Government. On the failure of the Corporation's acting according to Section 17, the Government can under Section 18 appoint some person to take the action directed by the Government, the Government itself fixing his remuneration and directing that such remuneration and cost of taking action should come from the Municipal Fund, and for that purpose the consolidated rate or other taxes may also be levied or increased or debenture issued under the direction of the Government.

Under Section 19 the Government has power to annul illegal proceedings of the Corporation. Under Section 51 the appointment, salary, allowances and conditions of service of the Chief Executive Officer, Chief Engineer, Health Officer and Deputy Executive Officers and any action taken by the Corporation with a view to termination of their appointments are subject to the approval of the Provincial Government.

Under Section 88, on a written requisition of a Secretary to the Provincial Government, the Corporation may, at any time, undertake the execution of any work certified by the Secretary to be urgently required for public service and for this purpose may temporarily make payments from the Municipal Fund.

Under Section 97 the Corporation cannot raise any loan without the previous sanction of the Provincial Government, and the terms of the loan and interest payable are subject to the approval of the Provincial Government who can attach the Municipal Fund for recovery of money borrowed from the Government.

Under Section 121, the Municipal accounts are examined and audited from time to time by auditors appointed by the Provincial Government, and the auditors have plenary powers for the purpose. The auditors, under Section 122, are to submit their reports to the Corporation and their duplicates to the Provincial Government. Under Section 123 the Corporation is to remedy forthwith the defects or irregularities pointed out by the auditors and to report their action to the Provincial Government; and in case of difference of opinion between the Corporation and the auditors, or if the Corporation do not remedy the defects within the time considered reasonable by the auditors, the Provincial Government shall pass such orders as it thinks fit, and its orders shall be final. If the Corporation do not comply with the Government orders, the Government can take action under Section 18. Under Section 123B, the Government auditors can disallow any item of account contrary to law and surcharge the same on the person making or authorising the illegal payment, and Councillors and Aldermen voting for such illegal payment, afterwards disallowed, shall be surcharged and held responsible for the payment and the Local Government has the power to modify the order of the auditors.

Proposals In The New Bill

Now let us glance at the proposals in the new Bill, Section 19 is going to be recast and the Provincial Government will have the power *suo motu* to annul any proceeding of the Corporation, or of any Committee, which in the opinion of the Government is not in conformity with law and the Provincial Government may do all things necessary to secure confor-

mity, or suspend any resolution of the Corporation or any Committee which the Government would think might lead to breach of peace or cause injury or annoyance to the public or to any class of person. A new Section 19-A is going to be added, empowering the Government to supersede any incompetent department of the Corporation and to appoint a suitable person to take charge of the department, and such person shall in the matter exercise all the powers of the Corporation, Committee and the Executive Officer, the remuneration of such person being paid out of the Municipal Fund, and any dispute regarding the duties or powers of such persons shall be decided by the Provincial Government, whose decision shall be final. And under the new Section 19-B, the Provincial Government can dissolve the Corporation, when the Government considers it to be incompetent or defaulting in its legal duties, and can direct a General Election. In Section 46 material alteration is being made, making it obligatory on the person disputing an election and filing an election petition before the High Court to deposit a sum of Rs. 1,000 as security for costs.

Powers Of Appointments

Section 51 makes sweeping changes in the appointment of the Chief Executive Officer. The Provincial Government will appoint a Chief Executive Officer and a person who has been for 15 years or more in the Executive Branch of the Indian Civil Service and for 20 years or more in the Executive Branch of the Bengal Civil Service will be eligible for three years renewable at the option of the Privincial Government, and may at any time be removed by the Provincial Government, and the Provincial Government shall remove him if 2/3rds of the Councillors and Aldermen vote for his removal and the Executive Officer shall be paid a salary not exceeding Rs. 2,500 per month and allowances not exceeding Rs. 500 a month.

Moreover, under Section 51-A the Provincial Government shall appoint a Service Commission consisting of three persons, the Chairman shall be a person who has been a servant of the Crown for not less 10 years, and one member shall be a Muslim and the other a Non-Muslim. Of these two members, one must have at least five years' experience in Corporation administartive work. Further, the Government will not only prescribe by rules the term of office and conditions of service of the Chairman and members of the Service Commission, but also the number and conditions of service of the officers and servants to be appointed by the Commission and the manner of their appointments as also the manner in which the Commission will perform its duties. All these persons shall be servants of the Crown and the Provincial Government shall fix their salaries and allowances which shall come out of the Municipal Fund.

This Service Commission shall be consulted in all disciplinary matters affecting any officer or servant of the Corporation, (other than the Executive Officer), who holds a post carrying a minimum salary exceeding Rs. 50 per month; and under Section 51-B, all appointments to any post under the Corporation, save and except that of the Executive Officer, shall be made only on the recommendation of the Service Commission. But this section grants certain small mercies, as posts carrying maximum salary of not more than Rs. 50 and temporary posts for a period not exceeding 3 months, need not require the recommendation of the Service Commission. Although the recmmending authority is the Service Commission, the Government has been pious enough to add in subsection (2), that the actual appointing authority to all posts carrying a maximum salary of Rs. 250 shall be the Executive Officer who will himself be a Government-appointee, and to the posts having a higher maximum salary the appointing authority shall be the Corporation, provided all appointments having a maximum salary of more than Rs. 500 shall require the approval of the Provincial Government. A new sub-section has also been added to enable the Government to exercise a check in the matter of continuance of any Officer as a Chief Engineer, Chief Accountant, Health Officer, Secretary, Deputy Executive Officer or any officer getting a salary of Rs. 500 or more by making their appointment renewable every five years and hence automatically requiring the approval of the Government at every renewal. Under Section 51C, control of officers and servants of the Corporation will be vested in the Executive Officer, subject to certain provisions regarding reports to the Standing Committee of the Corporation and the Provincial Government. In Section 52 a new Sub-Section is being added enabling the Executive Officer to take action in emergencies and the Provincial Government shall also do so, where the Corporation or the Executive Officer has failed to act, the costs to be defrayed from the Municipal Fund. Section 66 is being so amended that even the rules of business framed by the Corporation shall be subject to the approval of the Provincial Government.

Powers of Mayor and C. E. O.

By the new Section 66A, and alterations in Sub-Section (2) to Section 67, the Mayor and Deputy Mayor will be deprived of the power of making a contract on behalf of the Corporation, the same power being henceforward exercisable by the Executive Officer, the Government appointee, who shall sanction all estimates not exceeding Rs. 10,000 and also enter into contract, reporting only those worth between 1 to 10 thousand Rupees to the Standing Committee or Corporation, and contracts for sums exceeding Rs. 10,000 but not exceeding Rs. 2½ lakhs require a previous sanction by the Corporation, and contracts exceeding the sum of Rs. 2½ lakhs require a previous sanction of both the Corporation and the Provincial Government. By subsequent amendments the Mayor and the Deputy Mayor have been deprived of all vestiges of power or authority and the Executive Officer has been vested with them, the Mayor or the Deputy Mayor merely retaining the power of crying out "order, order" in Corporation meetings.

There are many other equally elevating features in the Bill of 1940, which would inter for ever Local Self-Government of Calcutta and along with that the memory of Sir Surendranath Banerjea; but only a few salient features of the Bill have been picked out here for comparison with the existing law, which is wide enough for ministerial interferences of any kind and at any time.

Maternity And Child Welfare In Soviet Russia

[By S. Upadhyaya]

THE future of the State rests with the child, and the healthy child is a valuable asset. The mother through whom the race grows is equally essential to the social well-being. The protection of the mother and the child has been the chief concern of the Soviet Government. Of numerous achievements of Soviet Russia notable is the legislation concerning the protection of the mother and the child. Soviet Russa has learnt to respect the mother and the child is reared up in the manner congenial to the healthy growth of personality.

In the years following the Revolution problems of the mother and the child compelled the attention of the State. The society cannot create genuine motherhood except by scraping out what was crazy and insane in the past. So the Soviet Government began the work of liberation of women with the help of new legislations. The new legislations about marriage of children and divorce came into operation in 1918. It was the real beginning of emancipation of women. Marriage formalities were abolished and only a registration was needed. The marriage code of 1927 was further advanced along the line. It abolished the illegitimacy of child by introducing *de-facto* marriage. Marriage could be dissolved without trial at the instance of the one of the partners. The result was startling. Russian women sacrificed to superstition and barbarity discovered the meaning of life. They came forward to share equal responsibility with men in the new scheme of life. Field, factory, university were honey-combed with women. In the past education despised life. Life was vulgar, uncouth and meaningless. Education could not soil its hands on the realities. In the new order, Russian women were called upon as never before in the blind and bungling struggle towards the light to be conscious and courageous. They have broken the new paths through the dead past to create the new world to dwell in peace and sincerity. In 1937 more than 200,000 women were reading in Universities and technical institutes.

To know the range and possibility of normal development of motherhood the State opened various research institutes. Of these the *Central Scientific Research Institute* is the most important. It studies the health of women and children and has three departments: Sex-hygiene, pregnancy, gynaecology. When a woman is pregnant she is examined by the bureau and a certificate is issued that entitles her to several privileges. For sixteen years (1920-1936) child-bearing was an act of free will, only to be decided by the mother. Abortion under certain conditions was permissible. The legislation of 1936 marked a departure from the past practice and abortion was abolished. Abortion is now only permissible when pregnancy endangers the life of the mother or diseases of parents can be inherited by the child. The new legislation extended social insurances to the mother. Office employees were granted fifty-six days of leave prior to and fifty-six days of leave after the child-birth. Mothers with six children were to receive special allowance of two thousand roubles annually for each child for five years. And mothers having ten children were entitled to a State contribution of 5,000 roubles for five years.

In old Russia 90 per cent. of women did not receive any medical aid in child-birth. Even in cities not more than 15 to 20 per cent had a doctor. At present the Consultation Bureau and Maternity Home do render necessary services. Mothers stay in the hospital for 8 days after the child-birth.

Soviet children are reared up in the nurseries. The Soviet nurseries have a three-fold purpose. It liberates the working women. It rears up the child and educates the mother and the child. The director of the nurseries is generally a women physician.

On her way to work the mother brings the child to the nursery, puts the clothes in the locker and delivers the child to the nurse. The child is examined, dressed in the nursery-clothing and is left among the infant companions. Small infants are kept in the cribs. They have toys to play with and are fed by mothers at regular intervals. The crawling child enters the second group. He plays in the pen and is provided with different sort of toys. By three the child begins to walk. Older children play in groups; their toys are automobiles, locomotives, tractors. They sing and dance. They are often taken to the field and are shown round. At the age of four the child healthy in body and mind leaves the nursery. When the child leaves nursery he joins the *kindergartens*. The *kindergartens* educate the child from the fourth to the seventh year. The *kindergartens* aim to educate the child into an ideal citizen. Science, linked to the philosophy of education, provides the most perfect equation for educational excellence. The children in Soviet Russa are more

alive intellectually, more critical minded about the problems of nature and life. The Soviet children learn the vast creative power resident in socialised and humanised economy. They are taught to love science and objective truth, to respect and love the earth, its manifold unfulfilled excellence and human beauty, to believe courageously in life, life for the lowest children of the earth. The old sad past, they know, is doomed to be lived out in darkness, in a vale of tears. Boys and girls grow up joyously loving life so intensely that death would always seem the sick shadow of life.

The work of the *kindergartens* consists of definite subjects designed to further the physical, intellectual and political development of the child. According to A. Pinkevich the programme includes the following themes:

Theme one: the organisation of the life of the group, in the course of which children become accustomed to manual labour and the observance of hygiene. They get to know nature and a number of elementary arithmetical concepts. At the same time children learn to appreciate music and art generally. The child forms of education at this age are games, drawing, etc.

Theme two: children's participation in the improvement of sanitary conditions, this theme is elaborated in the same manner as the first.

Then come the following themes: participation in celebrations of the November Revolutions, organisation of "economic corners"; participation in the general work of organising for winter sports; Lenin Commemoration Days; organisation of "working corners", participation of children in the Red Army Celebrations; spring work; organisation of vegetable gardens and flower beds.

At the age of 7 or 8 the child goes to the regular school. Various youth organisations do look after the health programme of the young people. The *Pioneers* have the largest centre in Moscow with radio, telephone, telegram for the children. The *Pioneers* organise excursion campaigns into distant country side. Summer camps, truly speaking, is an international gathering of children. Boys and girls of different nationality do spend a happy time. It is the powerful factor in the protection of the children's health.

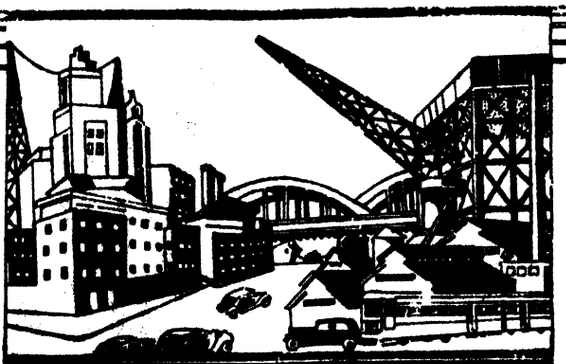
ANTI-RABIC TREATMENT

Centres Opened at Different Hospitals in Calcutta

The Government of Bengal have framed rules for the guidance of persons requiring anti-rabic treatment under the decentralised scheme and concession to Government-servants and their families in the matter of such treatment.

It may be stated in this connection that the Pasteur Institute at the School of Tropical Medicine, Calcutta, has been closed and no more patients are treated there. An Institution for the manufacture of anti-rabic vaccine has been opened at Ballygunge under the name of Pasteur Institute, Ballygunge, and anti-rabic treatment is now given at the out-door departments of the following hospitals:—

Presidency and General Hospitals for Europeans and Anglo-Indians; Dufferin Hospital for Indian women and children; and Campbell Hospital, Sambhunath Pandit Hospital and Mayo Hospital for others.



Baked with the usual degree of excellence, and containing a high percentage of health giving Bourn-Vita, made from fresh full-cream milk from British farms, British Malt and Empire Cocoa. Obtainable in the usual size tins or convenient air-tight packets.

Progress Of The Municipal Salvage Scheme

[By J. C. Dawes, o.b.e., m.i. mech. e., *Deputy Controller of Salvage, Ministry of Supply*]

MUNICIPAL salvage is not a new venture. Nearly all the refuse disposal plants erected in this country since the last war have been of a type which makes salvage work possible. There were at the beginning of the present war no less than seventy of these plants in England and Scotland; no less than 1,600,000 tons of refuse per annum were passed through the English plants, and some salvage work was done at each of them. At many of them salvage operations were carried on intensively. In addition, some twenty Local Authorities have what are usually referred to as "organic" salvage plants for the reduction of abattoir and fish wastes to feeding meals and fertilisers. No other country, to my knowledge, has municipal refuse salvage plants of the same type. In fact, comparatively few municipal salvage plants of any type are used abroad, and it is correct to say that more salvage work from domestic refuse has been done in Great Britain since the last war than in all the Continental countries combined.

The modern refuse disposal plant of the separation or "salgave" type, as we know it, was introduced as a result of the activities of the National Salvage Council which was set up in 1917, and during the last twenty years hundreds of thousands of tons of useful materials have been salved from house refuse and sold for millions of pounds. Soon after the present war commenced the Government, realising the importance of salvage work, decided to set up another organisation, not a Council this time, but a special Department within the Ministry of Supply. As you know, one of the first decision taken by the new Department was to ask for monthly salvage returns from all Local Authorities in England and Wales whose districts have populations of 10,000 or over, and from districts in Scotland with populations of 5,000 or over.

The first monthly return was for November, 1939, when it was found that the Local Authorities referred to were selling salved materials at the rate of 26,781 tons per month of a value of about £30,000, or £360,000 per annum. Tonnage details are given later. These figures can fairly be taken as representing the pre-war salvage operations of the Local Authorities in England and Wales, because the new Department did not begin to function until the end of that month, when the official Salvage Circular was sent to all Local Authorities. The figures given represent the value of salved materials sold, but they do not tell the whole story because they do not include the value of what might be called "indirect" salvage work, which includes the sale or utilisation of steam for the generation of electricity or other purposes with a consequent saving of coal. The value of this form of utilisation might be estimated at £6,000 to £7,000 per month.

Again, there is the increased value of reclaimed or improved land as a result of controlled tipping, but no figure can be given for this. If it were possible to give a figure it would be substantial.

The figures are, however, sufficient testimony to the pre-war determination of the officers responsible for public cleansing operations to assist industry, and, incidentally, their own rate-payers, as and when possible; but good as they may be for peace-time operations, they are not good enough to meet war-time needs. They serve one useful purpose in that they can be used as a basis from which to calculate the value of the additional salvage work undertaken as a result of war-time activities, and, as I propose to show, they have now been considerably improved upon, but lest any should feel a sense of satisfaction at the improvement which has already taken place, I must remind them that much further progress is absolutely essential in the national interest.

I have referred to the figures of November, 1939, as a basis, because the Salvage Department of the Ministry of Supply came into being during November, 1939, and issued its first general Salvage Circular on November 30th, 1939. When the returns for December were available it was found that a slight increase had taken place both as regards value and tonnage, the figures being 30,056 tons and £32,869, whilst those for January of the present year still better at 35,073 tons and £35,577; but the weather conditions during this month were bad and interferred with routine collection work. The tonnage figures for February are not yet available, but the value is approximately £42,000, an increase of 40 per cent over the figure of November, 1939.

Many Local Authorities now have excellent salvage schemes in progress, notwithstanding local difficulties experienced in the early stages, but many others are still doing comparatively little. As a matter of fact, the negative returns for February numbered 341, and represented a population of 6½ millions; the 550 positive returns received represented a population of 32 millions.

The reason so many Local Authorities do no salvage work and many others do very little appears to be a mistaken conception of the relative importance of salvage work at this critical period of the nation's history; it must be clearly understood, however, by every Local Authority, and especially those with routine refuse collection services, that the salvage of such waste materials as paper, metals, bones, textiles, and foodstuffs for livestock is equal in importance to munitions production, and the other war services, of which no one ever dreams of doubting the urgency. When the salvage of the materials to which I have referred, as well as others, receives the attention its importance now demands, the results will, I hope, be very difficult from the figures given earlier in this paper and will render unnecessary the consideration of any form of compulsion.

When this important fact is generally realised it will be found that thousands of tons of waste paper, metals, bones, and textiles, all of which are now important war materials, are available for collection in our own country. These materials ought to be—and, in plain language, must be—made available for our industries. I feel sure that the Local Authorities will give the help necessary to secure this, and I am certain that the householders of the land are now prepared to do their part provided they are told precisely what their Local Authorities expect of them. The waste materials I have singled out for emphasis are not the only ones required. For instance, the matter of collecting household kitchen waste has became urgent in many districts where the shortage of pig food is now acute, and, as you know, other waste materials are scheduled in Salvage Circular No 1.

I hope no one will mind my stating the present salvage position in plain terms; I do so because it is necessary and to encourage Local Authorities and

their officials to give the country the very best assistance possible. There are, and will continue to be, isolated cases where collections of very small quantities of waste materials may not be practical, or economical, as, for instance, in remote hamlets but by far the greater part of the population—over four-fifths—is served by refuse collection services, and these services can become salvage services even if it means modifying the refuse collection arrangements should this become necessary. This has already been done in a few cases, but only a few; in the great majority of cases no important modification has been found necessary in order to proceed with salvage operations.

Effective municipal salvage work in war time means much more than local collections and sales of waste materials; it saves the lives of merchant seamen as well as their ships; it saves currency; it ensures regular supplies of raw materials to vital industries; it helps to keep the Expeditionary Force, the Air Force, and the Navy supplied with equipment and munitions, and, indirectly, it helps with their food supplies. These immensly important facts must be grasped and appreciated if we are to put forward our maximum effort to win the war in the shortest possible time.

I have often heard such remarks as these: "We have instructed the men to accept waste materials when they are offered," or "We have sent out leaflets, but the response has been poor," or "The men are fully occupied with their normal work and cannot do more," and so on; but, on examination, these are often in the nature of excuses and reveal a lack of enthusiasm—in other words, the will to salve is not present. No one has ever said that the materials are not there to be salved, and no one has questioned the need for salving them; but some have taken the view that if the Government want the materials they ought to introduce a national scheme to obtain them, apart from the local refuse collection services. No doubt this could be done, but what of the time and the cost? Think of the staff and equipment which would be needed to duplicate an existing routine service. Why increase the cost of the war unnecessarily and add to the already heavy burden of taxation?

The effective answer, however, is that many Local Authorities, large and small, have clearly demonstrated that the waste materials so urgently needed can be salved by grafting salvage schemes on to their refuse collection organisation. Many such schemes are now working smoothly and well, and producing the desired results. If the standard reached in the best organised districts were to become the standard in all districts the figures I have quoted would be increased by at least four times.

In twenty-five towns latest available figures show that salvage work at the rate of fully £35 per annum per 1,000 of the population is now being carried out; in ten of these towns the figure is over £50. At the other end of the scale many districts are still submitting nil returns, and in many the figure is well under £5 per 1,000. I am not suggesting that a fixed standard is practicable for all towns, because local conditions and methods of refuse collection and disposal make differences unavoidable. Further, most of the Local Authorities returning a figure of £35 or over have refuse separation plants, but not all of them; three dispose of the refuse by controlled tipping. What I do seriously suggest is that, given the necessary determination, the present figures for the towns below the £35 limit can be substantially increased, and I hope and believe they will be and in the very near future.

PERMANENT
HUME STEEL PIPE
(with Spun Concrete Lining and R. C. C. Outcoating)
POSSESSES FULL PROTECTION, INTERNAL AND EXTERNAL. GIVES LONGER LIFE THAN UNPROTECTED METAL PIPE.
SATISFIES ALL CONDITIONS!!
Gives about 30 per cent. superior flow of water.
Saves in laying, jointing and transport.
Stands very high pressure easily.
Free from Rust and Tuberculation.
Saves a large amount initially.
Is regarded as the best Pipe by Eminent Experts
Can be re-used after a number of years elsewhere.
Free from Bursts.

NUTRITION PROBLEM IN BENGAL

Investigation Committee Set Up

In order to initiate a uniform nutrition policy in Bengal and to stimulate and co-ordinate nutritional researches in different institutions, a Committee, with Lt.-Col. A. C. Chatterjee, Director of Public Health, as convenor, has been set up by the Government of Bengal.

This Committee, to be known as the Bengal Nutrition Committee, is expected to function as an authoritative body and to be the agency of nutritional publicity work on sound lines. Ten Specialist Sub-Committees have been formed under it to deal with different aspects of the nutrition problem, such as diet surveys, diet in relation to public health, basic researches, food technological researches and publicity work.

Dr. B. C. Guha of the University College of Science; Dr. B. Ahmed of the All-India Institute of Hygiene and Public Health, and Dr. S. N. Chatterjee, Nutrition Officer of the Government of Bengal, have been appointed Joint Secretaries of the Committee.

The Government of Bengal hope that a Provincial Nutrition Committee, with such a distinguished authority, would lead to great advances in dealing with the question of solving the nutrition problem of the province, both in scientific and practical aspects.

CALCUTTA NEWS & VIEWS A Digest

Mr. Subhas Bose's Health

The following bulletin regarding the health of Mr. Subhas Chandra Bose was issued on Sunday last by Dr. M. M. De, M.B., M.R.C.P., (London), Professor of Medicine and First Physician, Medical College, Calcutta :—

"I have examined Mr. Subhas Chandra Bose this evening. There has been a little progress in his general condition; his appetite has improved and depression in not so marked. The pulse however, has become intermittent and blood pressure remains low. He complains of occasional palpitation and giddiness on change of posture. There is still some pain in the abdomen and over the sciatic nerve on the right side.

"I regret that adequate mental rest has not been observed by the patient as advised by me; the improvement is, therefore, below my expectation. I would again strongly urge the necessity of strict adherence to medical advice in this matter".

The Mayor Opens Soap And Cosmetics Exhibition

The need for greater efforts to popularise the use of soap and cosmetic goods was stressed by Mr. A. R. Siddiqi, Mayor of Calcutta, while he opened the exhibition of Soap and Cosmetics at the Government Industrial Museum on Saturday last.

Mr. Siddiqi said that they were very backward in the use of soap and cosmetic goods. If soap and cosmetic makers understood the art of advertisement and propaganda, they would be able to create a market which would astound them. According to figures, so far as Bengal was concerned, there were 120 soap factories, large and small, and in them 2,581 workers were employed in the washing soap section while 1,113 were employed in the toilet section. The total annual production in Bengal was 23,900 tons of washing soap and 7,685 tons of toilet soap and the value of this was Rs. 72,15,650 for the washing soap and Rs. 68,39,250 for the toilet soap. As against these figures, they imported 46,695 tons of washing soap and 1,359 tons of toilet soap. Mr. Siddiqi emphasised that the importation of soap into India could be totally stopped if the manufacturers and industrialists took up the problem in all earnestness.

In cosmetics, Mr. Siddiqi continued, except in Bengal he did not think that they had made sufficient progress. He was suprised sometimes to see that they used hair-oils and scents imported from Paris and England when some of the Indian products excelled them. Further, India produced all the essentials that went to the basic oils and had a fine sense of smell that could differentiate between any shade of perfume in the world.

What he was trying to impress upon them was, proceeded Mr. Siddiqi that having got the raw materials, and chemical experts to give advice, the only problem left before them was how to induce their people to use more soap in order to keep their bodies clean and thus to raise the standard of general health in India. The poverty of the masses, however, would come in the way, no doubt, but they were gradually witnessing an improvement in the use of soap even by the poorer people. He would request the manufacturers not to demand higher prices for their products than those demanded for European or Japanese imported products. They should calculate on the basis of raw materials plus factory charges, plus a percentage of profit. Thus, instead of making large profits by small sales, they would be wiser if they sold soaps cheaper so that even the poorest people might use them. Then instead of selling thousands of tons, they would be able to sell millions of tons.

Mr. S. C. Mitter, Director of Industries, Bengal, welcomed the Mayor with an introductory speech.

Secondary Education Conference

The Chief Minister of the Bengal Government will discuss the provisions of the Secondary Education Bill with the members of the Senate of the Calcutta University in the first week of January next.

Dr. Shyamaprasad Mookerjee who presided at last Saturday's meeting of the Senate, read a note from the Vice-Chancellor (Khan Bahadur M. Azizul Haque) who was out of the town for reasons of health, stating that about a week back the Chief Minister telephoned to him to say that he was anxious to discuss the provisions of the Bill with the members of the Senate. It is proposed therefore to hold a meeting of the Senate on January 6 or 7.

Dr. Mookerjee added that the Committee which was appointed by the Syndicate to report on the provisions of the Bill which had been forwarded to the University by the Government for its opinion, had met a number of times and its report was almost ready.

The University was to have submitted its views on the Bill to the Government by December 15. The Bill is now under consideration of a Select Committee of the Bengal Legislative Assembly which is expected to submit its report by January 15 next.

* * *

An emphatic protest against the Bengal Secondary Education Bill was registered at a Conference of educationists held on Monday last at the Ram Mohun Library Hall under the presidency of Mr. Sanat Kumar Roy Chowdhury.

A resolution condemning the measure as highly deterimental to the best interests of the country was adopted at the Conference which was organised under the auspices of the Calcutta Teachers' Association.

The Secondary Education Bill, Mr. Roy Chowdhury observed, which was now before the Select Committee of the Bengal Legislative Assembly, had been discussed thread-

bare in press and on platform; but this meeting had a special significance in view of the fact that the Conference had been attended mainly by educationists.

The Secondary Education Bill was introduced at a time when communal passion had been at its highest. The measure, Mr. Roy Chowdhury added, apparently innocent-looking, was highly inimical to the cause of culture and education. Educationists or the guardians had no place on the proposed Board for Secondary Education; nominated officials and representatives elected on communal basis were to fill seats. The important task of compilation and publication of text books was to be vested in such a body. The result could easily be imagined; already, in some instances, history had to be re-written and truth and accuracy had to be sacrificed to pander to communal passion. The Board would have the right to abolish or transfer any school to any locality. The experience the people had gained in that respect from the working of the Primary Education Board filled them with dismay.

Not A Communal Measure

Speaking on the Secondary Education Bill at the Calcutta Rotary Club on the 19th instant, Dr. W. A. Jenkins, Special Officer for Secondary Education, Bengal, repudiated the charge that it was a communal measure or a measure that sought to bring Secondary Education in the province under official control.

In the course of discussion that followed the address Dr. Jenkins, replying to a question, said that there was nothing in the provisions of the measure to suggest that there would be any reduction in the number of students attending Secondary Schools under the proposed Board.

Dealing with the question of control of Secondary Education in Bengal he pointed out that there had never been any systematic control of secondary education as such, and that, as a result, the development of schools proceeded upon an unplanned basis and in a haphazard manner. There had admittedly been a steady deterioration in the standard of attainment of the students in these schools and here was no difference of opinion as to the necessity of establishing as soon as possible a responsible controlling authority with power to remedy the existing defects and to ensure evolution upon an approved planned basis.

He referred to past attempts at introducing legislation designed to this end and said that as it was clear that no scheme that could be devised would be acceptable to the University and to Government, Government had no alternative but to place the matter before the legislature for decision.

The Bill proposed to set up one large controlling authority consisting of 50 members representative of all bodies directly interested in education. He explained that it was impossible to have all interests represented on a small body. As constituted in terms of present personnel, there would be on the Board 20 Moslems, 22 Hindus, including Scheduled castes and 7 Europeans together with the President. It could not therefore be dubbed as a communal measure but it gave a reasonable representation to different interests. However ideal it might be that education should be above communal matters, the present situation left no alternative but to state exactly what representation should be given to different communities. Moreover, it was better that the decision as to the communal representation should be made at the beginning rather than be a recurrent disturbing factor at all elections.

A smaller body consisting of 14 members would deal with questions of day to day administration and all of them would probably be educationists. The criticism that there was an undue amount of official representation on the Executive Committee might appear to have substance on the surface but these people were there because of their training and experience and not as Government representatives.

Dr. Jenkins emphasized that the statement that the Board would be entirely under the control of the Government was without foundation and pointed out that the Board would be autonomous.

"Cyclotron" For Calcutta

The Senate of the University of Calcutta, at their meeting on Saturday last accepted with thanks, the offer of Rs. 60,000 by the Board of Trustee, Sir Dorabji Tata Charities Trust, for the purchase of a "Cyclotron" and agreed to make a capital expenditure of Rs. 77,000 to pay the balance of the cost of materials amounting to Rs. 20,000 as also the cost of erection of the plant and construction of a building for the purpose.

The "Cyclotron" will be installed in a newly constructed building in the grounds of the Science College of the University in Upper Circular Road. The University will incur a recurring expenditure of about Rs. 4,000 to maintain the instrument in working order. The cost of the instrument is Rs. 80,000, of which Rs. 60,000 is being paid by the Sir Dorabji Tata Charities Trust and the rest by the University. The instrument is expected to be installed at the beginning of the next financial year.

The "Cyclotron," according to Dr. Meghnad Saha, Head of the Physics Department of the Calcutta University, who will supervise the working of the instrument, has great possibilities in finding out the origin of diseases. Dr. Saha who had seen the machine in work in the California University, told the Senate that there were about 30 "Cyclotrons" in different Universities and medical institutes in America. There were four such machines in England and three or four in Russia.

Prof. Nibaran Chandra Roy pointed out that this would be the first "Cyclotron" to be installed not only in India but also in Asia.

Dr. Bidhan Chandra Roy who moved for the acceptance of the offer of the Sir Dorabji Tata Charities Trust for the purchase of the instrument, pointed out that this instrument was used for the purpose of breaking up atoms and molecules into smaller radio active particles. For example, an atom of Potassium or Sodium could be broken up with the help of this instrument, into smaller radio active particles. He said that it would be possible with the help of this instrument to use in the treatment of cancer all those substances which could not be used at the present moment

---

SIR P. C. RAY'S 80TH BIRTHDAY

Proposed All-India Appeal

India's leading publicmen, statesmen, educationists and scientists are being approached to have their names appended to the drafts of All-India appeal for funds for which, the Committee was formed recently with Sir N. N. Sircar, as Chairman. The Committee want to raise funds on the occasion of the completion of the 80th year of Sir P. C. Ray, on August 7, 1941. The proposed funds will, it is learnt, be devoted to the furtherence of scientific and industrial research in India.

if they were altered by radio active properties, which the smashed or 'tagged' atoms would acquire as a result of this process. Secondly, all the food and medicines that one took consisting of molecules or atoms could, by this instrument, be reduced into smaller particles and their career in the body could be traced so that they would be able to find out how far the system had been able to utilise the food or the medicine which it was not possible to do at the present stage of development of medical science. These were some of the possibilities of the instrument.

Bengal Congress Parliamentary Party

Twenty-seven members of the Bengal Congress Parliamentary Party met at the residence of the Congress President, Maulana Abul Kalam Azad on Sunday, the 15th December, in pursuance of a notice issued by Mr. Kiran Sankar Ray, General Secretary of the Party, and re-elected Mr. Sarat Chandra Bose, President of the local Parliamentary Party and Leader of the Congress Party in the Assembly.

The All-India Congress Parliamentary Sub-Committee, it may be recalled, had removed Mr. Sarat Chandra Bose from the leadership of the Bengal Congress Parliamentary Party "as a disciplinary measure."

Earlier in the day, Mr. Kiran Sankar Ray had informed over the phone, it is reported, some members of the party cancelling the meeting under the direction of the Congress President. Mr. Ray is further said to have informed the members that a fresh notice for the purpose of electing office-bearers would be issued on a later date.

Twenty-seven members of the Party, however, arrived at Maulana Abul Kalam Azad's house and held the meeting under the Chairmanship of Mr. Santosh Kumar Basu. Mr. Ray objected to the meeting on the ground that he had already notified its postponement. Mr. Ray's objection was overruled by the meeting whereupon he left.

Mr. Santosh Kumar Basu was re-elected Deputy President of the Parliamentary Party and Deputy Leader of the Congress Assembly Party. Mr. Sasanka Sekhar Sanyal was appointed Chief Whip and Mr. Surendra Mohan Maitra, General Secretary in place of Mr. J. C. Gupta and Mr. Kiran Sankar Ray respectively. Dr. Radha Kumud Mookherji was elected Leader of the Congress Party in the Council replacing Mr. Kamini Kumar Dutta.

Jail Hunger-strike Off

Following a long interview which Messrs. Sarat Chandra Bose, Santosh Kumar Basu, Charu Chandra Ray had with the Hon. the Home Minister, when the latter promised to consider the grievances of the Security prisoners on hunger-strike at the Presidency, Alipore Central and Hijli Jails, the prisoners discontinued the strike on Monday last. The assurance of the Home Minister was conveyed to the prisoners in a letter over the signatures of Messrs. Subhas Chandra Bose and Pratul Chandra Ganguly.

Braille Instrument Made In Calcutta

The Braille instrument, used for writing by the blind, has been manufactured for the first time in India by the University of Calcutta.

As it was difficult to secure the instrument from abroad due to the present unsettled situation in Europe, the authorities of the University directed the Applied Physics Department of the Science College to see whether it could be made in the College workshop. The experiment proved successful, and 50 instruments have so far been manufetured under the supervision of the head of the department, Dr. P.N. Ghosh, they are for use by students who are being trained as teachers for blind schools by the blind scholar, Mr. S. C. Roy, in the Teachers Training Department of the University. The instruments, from the point of view of efficiency, compare favourably with those manufactured in foreign countries.

The instrument consists of three parts; a small tablet with guide holes and pins to hold the paper in position, two plates with six holes fixed in them at regular distances apart, and a small implement with which to punch holes in the paper.

The Viceroy In Calcutta

His Excellency the Viceroy arrived at Calcutta on Saturday night last, by special train.

His Excellency the Governor of Bengal and the Lady Mary Herbert accompanied by personal staff received His Excellency at the Howrah railway station.

Major-General C. A. Heydeman, Commander, Presidency and Assam District, Mr. A. R. Siddiqi, the Mayor of Calcutta, Mr. H. H. Burn, Sheriff of Calcutta, Mr. A. D. Gordon, Inspector-General of Police, Bengal, Mr. S. K. Haldet, Commissioner of Burdwan Division, Mr. C. E. S. Fairweather, Commissioner of Police, Calcutta, and Sir Thomas Lamb were among those present at the station.

* * *

Opening the annual meeting of the Associated Chambers of Commerce on Monday last, the Viceroy reviewed the war situation, India's war efforts and the problems connected therewith. He also expressed Government's concern about finding markets for Indian exports

The Viceroy devoted a great part of the speech to the Satyagraha movement started by Gandhiji and said, "I regret all the more that we should have to deal with a movement of this character at this moment, since I do not believe that it corresponds in the very least degree to the true feelings of this country."

Referring to the constitutional deadlock, the Viceroy reiterated that "the final proposals of His Majesty's Government embodied in the statement that I made on their behalf on 8th August, represented a genuine, a sincere and a most generous offer." He asserted :—"Our intentions—our proposals—are crystal clear".

The Viceroy did not fail to give "full weight" to the views of the minorities and gave his final judgement thus :—"But the fact remains; and it is that we cannot at this stage find that degree of agreement in this country, that degree of support for the scheme of constitutional advance which would justify His Majesty's Government in proceeding immediately on the lines I have just indicated."

Yet, "His Majesty's Government and I remain as anxious as ever to see a solution."

Sir P. C. Ray

"I believe in plain living and high thinking and this is the thing which appeals to me most; it is by this mode of life that Gandhiji has won the hearts of the Indian masses," observed Acharya Sir P. C. Ray replying to an address of welcome presented to him by the Sindhi Community in Calcutta on Sunday last, at the premises of the Sindhi Merchants' Association at Chowringhee Lane. Acharya Ray performed the opening of the new premises of the Association.

Sir P. C. Ray observed that there was much in common between the Sindhi and the Bengalee and the presence of that community in this province was welcome.

It had pained him to find, however, Acharya Ray continued, that Bengalees following the example of other provinces, had been taking to a luxurious mode of life despite the fact that the income of the average Bengalee was very poor. He had been to Madras and Bangalore several times and had seen for himself how thousands of rupees were spent on ocansions of wedding. The same contagion had spread to Bengal and guardians, forced to purchase highly priced clothings, were being daily impoverished. Acharya Ray was afraid that the case had been the same with the Sindhis too.

It might be possible for well-to-do people to waste money on precious clothes but everyone knew that the mass of the people were too poor to afford that. Sir P. C. Ray believed in plain living and high thinking and it was that mode of life which had enabled Gandhiji to win the heart of the Indian masses. The speaker himself was getting four-score years old and physically incapacitated; he had travelled extensively throughout India and abroad but had never taken with him a servant while travelling and had himself done the washing.

Acharya Ray concluded his address with an appeal to Indian women to take the salutary principle of plain living and high thinking.

Bengal Press Advisory Committee

An extraordinary general meeting of the Indian Journalists' Association took place on Sunday last in Calcutta. Over 50 members representing various news papers were present. Mr. A. B. Chatterjee, I.C.S., Press Advisor, Calcutta was present by special invitation.

Mr. Tushar Kanti Ghosh, Convenor for Bengal, explained the circumstances under which the Bengal Press Advisory Committee had been formed. He had been instructed by the All-India Standing Committee to restrict its personnel to not more than five. The Convener being *ex-officio*, four others were chosen. They were Mr. W. C. Wordsworth of *The Statesman*, representing the European section of the Press on the Committee, Mr. Mahomed Khairul Anam Khan, Editor of the *Mohammadi* and Managing Director of the daily *Azad*, (the Moslem Press) and from the *Ananda Bazar Patrika* and the *Hidusthan Standard* group, Mr. Satyendra Nath Majumdar and Mr. Janaki Jiban Ghose from the *Advance*, *Matribhumi* and *Viswamitra*.

A resolution approving the personnel of the Committee and recording full confidence in it was then formally moved and seconded. An amendment approving the personnel but suggesting deletion of the portion "having full confidence" was also moved and seconded. After a prolonged discussion, the amendment was put to the vote and lost, only the proposer and the seconder voting for it. The original motion was then carried, all supporting it with the exception of the two dissentients.

Co-Operators' Day

Faith in the co-operative system of economy and its social ideals as representing the future basis of civilisation and the surest guarantee of peace was reaffirmed at a meeting which was held on Saturday, (the 14th December) at the Corporation Extension Hall in celebration of the "International Co-operators' Day".

In previous years the celebration of the day in Bengal was organised by the Co-operative organisation under Government auspices, but this year without any response from them, all arrangement of the function was made by the Bengal Co-operative Societies Federation.

Mr. Santosh Kumar Basu presiding over the function said that this Federation had sought to emphasise the need of non-official and popular control and establishment of responsibility in abundant measure in co-operative societies and other organisations. Although this attempt had not unfortunately succeded owing to want of responsibility on the part of the Government, they felt that the day was not far distant when the general principles of freedom and responsibility would once again assert themselves in counsels of those who had governance of the country in their hands.

In conclusion, Mr. Basu hoped that the beginning they had made this evening would develop in such a way as to draw into its fold all the co-operative institutions in the far corners of this province, so that in the coming year the day might be celebrated on a much bigger scale.

Other speakers were Messrs. R. Roy Choudhury, Anath Bandhu Dutt, V. Srinivas, M. M. Lahiri, Himangshu Sen and S. M. G. Hyder Ali.

A. R. P. VOLUNTEERS AND CIVIC GUARDS

Viceroy's Inspection

His Excellency the Viceroy inspected the Civic Guards and the A. R. P. volunteers of Calcutta on parade on Tuesday morning at the Parade ground in the Maidan. In all 7,200 persons—4,800 Civic Guards and 2,400 A. R. P. volunteers—participated in the parade.

On arrival, the Viceroy was received by His Excellency The Governor of Bengal, the Hon'ble Lord Sinha of Raipur, President of the Calcutta Civic Guards Committee, the Hon'ble Sir Nazimuddin, Home Minister, Bongal, and the Commissioner of Police, Mr. C. E. S. Fairweather,

As His Excellency had finished the inspection, the whole contingent of Civic Guards and A. R. P. volunteers under the parade commander, Mr. Norton Jones, Additional Deputy Commissioner of Police, marched past to the tune of music supplied by the military and the police bands.

Her Excellency the Marchioness of Linlithgow and the Lady Mary Herbert attended the function, and others present included Mr. H. S. Suhrawardy, Maharaja Srish Chandra Nandy of Cossimbazar, Sir Bijoy Prosad Singh Roy, Mr. M. B. Mullick, Mr. Prasanna Deb Raikut, and Nawab Mushrruff Hossain, Minister to the Government of Bengal.

CIVIC NEWS FROM FAR & NEAR

PUNJAB MUNICIPAL ACT

The Punjab Municipal (Amendment) Act, 1940, has received the assent of His Excellency the Governor. The Governor has also given assent to the Punjab Legislative Assembly (Removal of Disqualifications) Amendment Act, 1940.

MUNICIPAL GRANT TO COLLEGE

The Jessore Municipality have sanctioned a capital grant of Rs. 5,000 to the proposed Jessore College. It is learnt that application for affiliation of the proposed college has already been made and the college authorities expect to open it in the coming session.

NAIHATI MUNICIPALITY

At a Special Meeting of the Commissioners of the Naihati Municipality held on the 6th December under the presidency of Mr. C. D. Leitch, Chairman, Mr. S. C. Mitra was elected Vice-Chairman. Mr. Mitra is a retired officer of the Indian Posts and Telegraphs Department and was Assistant Post Master-General, Bengal and Assam.

C. P. DISTRICT COUNCIL DISSOLVED

The Governor of the C. P. and Berar has directed that the District Council of Betul having abused its powers and institutions under its control to a grave extent should be dissolved and fresh elections be held as early as might be convenient.

The Government Resolution on the subject states that the District Council had constrained its educational staff to engage in various forms of non-educational activities. The teachers were required on plain of disciplinary action to enrol not only themselves but also others as members of the Congress Party. They were encouraged to inscribe on school walls political slogans of which many were very objectionable and some even "prejudicial reports" under the Defence of India Act and Rules. Pamphlets and other papers issued by the District Congress Committee were often dispatched with the School *dak* with the connivance of the District Council and the school board (which is a Sub-Committee of the District Council) and were distributed by the teachers and other District Council employees.

The Resolution also states that a "national circular" had been issued by the school board of Betul to all District Council teachers on November 5, 1938, requiring each teacher to become a Congress member himself and enrol others, wear *khaddar* clothes and Gandhi cap, display photos of Mahatma Gandhi and Pandit Nehru in the schools, celebrate November 26 as the day of freedom by taking out a flag procession and also carry out orders sent out by the Secretary of the District Congress Committee in connection with Congress work.

DARIDRA BANDHAB BHANDAR

The Seventeenth Anniversary Meeting of the Daridra Bandhab Bhandar and the opening of the Health Exhibition will be held at the Scottish Church Collegiate School on Thursday, the 26th December, 1940, at 6 p.m. The Exhibition will remain open from the 26th to 30th December.

The Hon'ble Mr. Justice C. C. Biswas, C.I.E., has kindly consented to preside and Dr. J. B. Grant to perform the opening of the Exhibition.

INSTITUTE OF INDIAN ARCHITECTURE

Response In Asansol

Before a distinguished gathering in the Barret Club, Asansol, presided over by Mr. M. M. Mukherji, General Manager, Ghusick Collieries, Mr. Sris Chandra Chatterjee *Sthapatyavisarad* stressed the vital necessity for a country wide organisation that could safeguard the interests of Indian architectural arts, crafts and industries and contribute to the cultural and economic regeneration in India. Dr. Shyamaprasad Mookerjee, said the speaker, sponsored a degree course in Architecture under the University of Calcutta when he was its illustrious Vice-Chancellor, and his great achievement had inspired the authorities of the Universities of Nagpur, Bombay and Patna, who were now considering the introduction of a like scheme in their Universities. But unless actual constructions were thoughtfully erected in a large scale, where students can get practical training, mere theoretical training in Engineering Colleges would certainly not be effective. The erection of structures in cheap yet beautiful styles of Indian inspiration could convince the public of the legitimate claims and prospects of Indian architecture much more than what mere lantern lectures on the subject could do. Municipalities and Local Boards should, Mr. Chatterjee maintained, encourage Indian architectural constructions by all possible means.

Mr. K. P. Chatterjee, a leading Mining Engineer, observed that terracotta, cement and allied industries concerning civil engineering constructions should provide employments besides creating fields of activities for business magnates.

In a neat speech the President, Mr. Mukherji, stressed the importance of the resuscitation of India's architectural glory, which really was an index of the nation's cultural and constructive achievements.

It was resolved that a Local Committee would be organised, under the guidance of Mr. S. M. Chaudhuri, Chief Engineer of the Local Board, with influential members representing all phases of civic life which could co-operate with the All-India Institute of Indian Architecture that was expected to function at an early date.

COMPULSORY LIFE INSURANCE FOR GOVT. SERVANTS

Bengal Government Scheme

The *United Press* understands that the Government of Bengal are examining a scheme for compulsory life insurance of all Government servants. Information, it is understood, is being collected at present regarding new recruits, appointments each year during the last five years in gazetted, subordinate and inferior services and in subordinate offices with their scales of pay, age, etc. in this connection.

Calcutta Associations & Institutions

CORPORATION MECHANICAL ASSOCIATION

A social gathering of the above Association was held on Thursday, the 19th December, in the Officers' Club Room, Central Municipal Office Building.

Mr. K. S. Ranga Rao, B.E., A.M.I.E.E., Electrical Engineer, E. I. Railway, delivered a lecture on Electrical Illumination and Signalling of Railways."

CORPORATION SCAVENGERS' AND LABOUR UNION

An Appeal

The attention of the benevolent public is drawn towards the activities of the Calcutta Corporation Scavengers' and Labour Union. The said Union is running about 18 schools in Calcutta for the children of the Scavengers and Labourers. The education of these children means much as they would be responsible for the health of the people of the city. The schools depend for the greater part of their expenses on the benevolent public and Corporation. The schools also get some help from the Corporation employees. But with all this the financial condition of the schools is inadequate to scope with even with the necessary and legitimate expenses such as purchase of books and stationery for the students.

We, therefore, appeal to the benevolent public to contribute towards the deserved cause. Their charities would no doubt enable these various institutions to run smoothly.

THE COMING CENSUS

"Not Boycotted by Congress"—Says Mahatmaji

Mahatma Gandhi has written to the Secretary of the All-Bengal Census Board that there will be no difficulty in Census enumeration as there is no boycott on behalf of the Congress.

CORPORATION A. R. P. UNIT

Distribution Of Badges And Certificates

On the occasion of distribution of A. R. P. Badges and Certificates to the members of the Calcutta Corporation A. R. P. Unit, which was held on the 14th December, 1940 under the presidency of Rai Seth Suklal Karnani Bahadur, O.B.E., at the Town Hall, Mr. J. C. Mukerjea, the Chief Executive Officer and General Controlling Officer, A. R. P. Unit, Calcutta Corporation, said "Nothing gives me greater pleasure than the function of this evening for which we have assembled here to-day. It is evident that the employees who have come here to receive their Certificates and Badges are actuated with a spirit of social service. Fifty years ago there was no such thing as A. R. P., twenty-five years ago we were on the threshold of a new type of warfare and to-day that has developed in all its greatness necessitating the existence of A. R. P. services. One should not forget that one one-self might be the next victim and this thought initiates a feeling of service. It is the duty of every young man and woman to be trained in A. R. P. work which is nothing but a training in social service."

Mr. Mukerjea paid a graceful tribute to Rai Seth Suklal Karnani Bahadur for his kindness in attending the meeting.

The speaker dwelt on the benevolent attention which Rai Seth Suklal Karnani Bahadur, O.B.E., paid to social service which he has taken up with all seriousness and zeal.

In course of an appropriate reply, Rai Seth Suklal Karnani Bahadur, O.B.E. spoke eloquently on the absolute necessity of such organisations which, he said, were unique in their character. He further stated that such social organisations deserved all the encouragement and help from every quarter forthwith

The function terminated with a vote of thanks to the Chair by Mr. Benoy Roy one of the Instructors of the Unit.

SMALL-POX IN CALCUTTA

Attacks And Deaths: Ward By Ward

It may be stated for the information of the public that there were 48 small-pox (living) cases within last week. A detailed analysis of reports so far received is given below :—

Wards affected.	Reported cases.	Number unprotected.	Age.	Nature of Dwelling place.	No. of deaths.
2	17	16	2-5 yrs.	Pucca.	15
6	9	8	1-2 yrs.	Do.	8
5	5	4	1-2 yrs.	Kutcha.	3
9	3	1	6 months—1 yr.	Do.	1
7	2	Nil.	10-15 yrs.,	Do.	Nil.
3	2	Nil.	1-10 yrs.	Do.	Nil.
11	2	2	Do.	Pucca.	2
1	2	Nil.	Do.	Do.	Nil.
8	1	1	1 yr.	Kutcha.	1
14	1	1	8 months.	Pucca.	1
21	1	1	2 months	Kutcha.	1
31	1	...	Under five.	——	1
29	1	1	Do.	Pucca.	Nil.
38	1	1	Do.	Do.	Nil.
	48	36	Common age below 5.	Mostly pucca dwellings.	33

It will be seen that of the 48 cases 36 were unprotected of which 33 ended fatally, mortality being most marked within the age of 5.

This at once reveals that there must be a large number who are not protected by vaccination during their life and as such are prone to contract this fell disease through sheer negligence and apathy of their parents and guardians.

VITAL STATISTICS

For the City of Calcutta for the week ending 14th December, 1940

CITY OF CALCUTTA (TOWN & SUBURBS).

The total number of deaths registered during the week was 660 against 691 and 645 in the two preceding weeks and higher than the corresponding week of the last year by 11. The general death-rate of the week was 30.0 per mille against 31.9 the mean of the last five years.

Town (Wards 1—25 and 27)

The number of deaths registered during the week ending 14th December, 1940, was 554 against 579 and 540 in the two preceding weeks. There were 10 deaths from cholera, against 18 and 20 in the two preceding weeks. There were 32 deaths from small-pox during the week against 11 in the previous week. There were 4 deaths from influenza against 6 in the previous week. The mortality from fevers and bowel complaints amounted to 23 and 65 respectively against 17 and 74 in the preceding week. The general death-rate of the week was 29.0 per mille per annum.

There were 27 imported deaths. Excluding these, the death-rate of the Town was 27.5.

There were 113 deaths from respiratory diseases against 109 in the previous week.

There were 66 deaths from tuberculosis against 62 in the previous week.

There were 120 deaths of infants under one year.

Suburbs (Wards 28—32)

The number of deaths registered was 106 against 112 and 105 in the two preceding weeks. Of these 4 were from cholera, 1 from small-pox, 3 from fevers, 19 from bowel-complaints and 21 from respiratory diseases. The death-rate of the suburbs (or added areas) was 38.8 per mille.

There were 9 imported deaths. Excluding these, the death-rate was 35.4.

There were 10 deaths from tuberculosis against 14 in the previous week.

There were 27 deaths of infants under one year.

QUOTATIONS FOR ADVERTISEMENT KIOSKS

Notice

Offers in sealed covers superscribed "Kiosks on Telegraph and Tramway Poles" are invited for the utilisation of telegraph and tramway poles erected on Corporation land all over the city for advertisement purposes for a period of five years from the 1st April, 1941, subject to the following terms and conditions:—

(a) That no Corporation lamp-post shall be used for the purpose of putting up Kiosks, the agreement and the payment being for the right to put up Kiosks on Government Telegraph posts and tramway poles only.

(b) That the party will have the right to display not only porcelain and enamel advertisements, but of hand painted or printed paper posters.

(c) That there should be no advertisement of spirituous liquor on the Kiosks.

(d) That the type of Kiosks to be erected and the nature of the advertisements displayed are to be subject to the approval of the Chief Executive Officer.

(e) That the Corporation will have the right to dispose of complaints, if any, regarding selection of particular sites for advertisement posters.

(f) That a lump sum fee per annum should be quoted, it being understood that the fee should be payable in monthly instalments within a week from the receipt of the monthly bills.

The offer must reach the undersigned on or before Wednesday, the 8th January, 1941.

M. RAY,
Offg. Secretary to the Corporation.

The 13th December, 1940.

Cancellation of Alignment.

It is hereby notified for general information that the Corporation of Calcutta, under powers, vested in them in this behalf, have, by a resolution dated the 4th December, 1940, cancelled the portion of the alignment of the 20 ft., projected public street, connecting Olai Chandi Road with a new C. I. T., Road, falling within the C. I. T. Scheme—Cossipore-Chitpore Open Space, (Section II) in Ward No. 30, which was previously sanctioned by the Corporation on 10th March, 1937.

A copy of the plan, showing the portion of the alignment, cancelled, may be seen in the office of the Chief Valuer and Surveyor of the Corporation, any working day except Saturday, between 11 a.m. and 2-30 p.m. and between 11 a.m. and 12-30 p.m., on Saturdays only, on payment of usual fees.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office,
The 13th December, 1940.

CORPORATION NOTICES—*Contd.*

Modification & Cancellation of Alignment.

Notice is hereby given under Section 308 read with Section 302 of the Calcutta Municipal Act III (B. C.) of 1923, that the Roads and Bustees Standing Committee of the Corporation in exercise of the powers delegated unto them in this behalf have considered it expedient to cancel the portion (marked P Q R on the plan) and to modify the portion (marked R S on the plan), of the alignment of the 40 ft. projected public street off Alipore Park Road East (now Raja Santosh Road and running towards south and east to Alipore Bridge in Ward 24, which was originally sanctioned on 23rd November, 1922, by the General Committee of the Corporation as constituted under Act III (B. C.) of 1899.

Any person having any objection to the same should submit it in writing so as to reach the undersigned on or before Saturday, the 18th January, 1941.

A copy of the plan showing the proposed cancellation and modification, of the portions of the alignment may be seen in the office of the Chief Valuer and Surveyor of the Corporation between the hours of 11 a.m. and 2 p.m. on all working days.

J. C. MUKERJEA,
Chief Executive Officer

Central Municipal Office.
The 19th December, 1940.

Ward Maps for Sale

Notice is hereby given for the information of the public that copies of Ward Maps of the City (drawn to a scale of 12 inches to the mile) are ready for sale at rates fixed by the Corporation in accordance with the provision of Section 551 (2) of the Calcutta Municipal Act, 1923. Necessary details of information may be had from the Chief Estimator in the Chief Engineer's Office in the Central Municipal Office Buildings.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office,
The 7th December, 1940.

Situation Vacant.

Applications are invited from Graduates of the Bengal Veterinary College for the post of a Slaughter House Inspector in the grade of Rs. 100—5—150. The applicants must state :—

(i) Age, (ii) Qualifications, (iii) Experience and past service in the Corporation, if any, and (iv) relationship, if any, by blood or by marriage with the Mayor, Deputy Mayor, any Alderman or Councillor or any Statutory Officer of the Corporation.

The selected candidate will be subject to the leave, and other service rules of the Corporation and will have to contribute to the Corporation Provident Fund and before joining his duties he will be required to furnish a declaration under Section 54-A of the Act stating that he was never convicted of an offence against the State or sentenced to imprisonment for a term of 3 months or more.

The applications should be addressed to the Chairman, Services Standing Committee No. II and will be received by the undersigned up to the 3rd January, 1941.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office,
The 13th December, 1940.

Special Notice

Health Officer's Advice.

With a view to prevent, as far as practicable, the occurance of epidemics of small-pox and cholera, an extra staff of Vaccinators and Inoculation Officers have been appointed for vaccinating against small-pox and inoculating against cholera.

The public are aware that vaccination and inoculation offer protection against an attack of the virulent diseases mentioned above.

It is, therefore, expected that the public would avail themselves of the services of this extra staff by getting themselves vaccinated and inoculated without delay, and thus co-operate with the Health Officer in attaining the object.

The public may apply to the District Health Officers of the Districts concerned at the undermentioned addresses as well as at the nearest Corporation Vaccination Stations for services of the extra staff mentioned above :—

District I Health Officer—79, Cornwallis Street.
District II Health Officer—22, Mirzapore Street.
District III Health Officer—1, Hogg Street.
District IV Health Officer—11, Belvedre Road.
Health Officer, Cossipore—10 and 11, Barrackpore Trunk Road.
Health Officer, Manicktala—109, Narkeldanga Main Road.

S. N. GHOSE,
Health Officer,

Central Municipal Office.
The 7th December, 1940.

S S Hogg Market.

NOTICE

To all whom it may concern, that Mr. Saroj Kumar Mukherjee has applied for registration of his name as the occupier of Stall No. 37, in the Flower Range in the Sir Stuart Hogg Market in place of Mr. Bepin Chandra Bhuiya, the recorded occupier of the above stall, who has by a registered deed transferred his rights and interests in the said stall to the former.

Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

A. QASIM,
Revenue Officer.

S. S. Hogg Market,
The 16th December, 1940.

Collection Department.

NOTICE

This is to notify that the office collection Receipt No. 76 of the Collection Department, Division VII of Form No. A.C.-8, having been lost from the book in the blank form, will not be recognized by the Corporation if at any time it is found to have been misused.

A. K BASAK,
Asst. Collector.

Central Municipal Office.
The 13th December, 1940.

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

GREETINGS

OF THE SEASON

TO

OUR READERS

PATRONS

AND

WELL-WISHERS

Chronicle & Comment

New Year's Honours

We offer our felicitations to Mr. C. W. Gurner, I.C.S., Chairman, Calcutta Improvement Trust, and Councillor, Calcutta Corporation, who has been awarded the C.S.I.; Mr. D. J. Cohen, Member, Legislative Council and Councillor, Calcutta Corporation, who has been awarded the O.B.E.; and Mr. M. A. H. Ispahani, Bar-at-Law, Member, Bengal Legislative Assembly and Councillor, Calcutta Corporation, who has been made an M.B.E., for being recepients of New Year's Honours for 1941. The graceful recognition of persons connected with the civic administration of the city of Calcutta augurs well for the establishment of harmony and concord with the Government which, in the fitness of things, provide the only key to civic progress and civilised well-being.

New Councillor

A *Calcutta Gazette* Extra-ordinary notifies that the Governor has been pleased to appoint Mr. S. Sharfuddin Ahmed to be a Councillor of the Corporation of Calcutta, in the vacancy caused by the seat of Mr. Abdus Sattar, M.A., B.L., having been declared vacant.

It may be recalled Mr. Abdus Sattar was nominated by the Corporation as an Assessor of the Calcutta Improvement Trust Tribunal.

All-India Local Self-Government Conference

The Conference met at Patna, under the presidentship of Mr. N. R. Sarker who delivered a very capable speech giving a lucid analysis of the outstanding problems of local government at present. The two difficult problems that confront the local government are an efficient personnel and finance. Very large and varied responsibilities vest to-day on local authorities and the efficient discharge of these responsibilities depends materially on the quality of the personnel they employ. Unfortunately, local authorities in our country do not always realise the importance of impartial selection on merit. Personal and political predilections are often allowed to play an unhealthy role in the recruitment of municipal staff. This naturally undermines good administration. This evil will no doubt gradually diminish with the progress of education, with the increase of civic consciousness and improvement in the general standard of public morality. The remedy of this evil does not lie in curbing the powers of local bodies with a view to check nepotism; the proper method would be to insist on the establishment of certain standards and rules which would ensure that appointment should be made strictly on the basis of merit as tested in competitive examinations, subject, of course, to such special considerations as may appear necessary in the interest of backward classes. Similarly, there should be rules to ensure that seniority and merit are respected in the matter of promotions.

In the matter of finance, which is a traditional stumbling block to civic progress in this country, Local authorities are entrusted with many functions which necessitate the spending of increasing amounts of money. But their sources of revenue are most inelastic. The difficulty of local authorities in this respect is that no special sphere of taxation has been assigned to them. They only take what they can after the needs of Central and Provincial Governments have been met. It is becoming increasingly evident that unless the Provincial Governments leave a sufficiently wide scope for taxation by local authorities and further supplement the latter's income by assignments or shares in the yield of provincial taxes and by suitable subventions and grants-in-aid, it would be extremely difficult for local authorities to provide even the essential services. While economic husbanding of existing resources will no doubt go some way, the question of additional taxation for raising of revenues must also be boldly faced.

Greetings To Rural Bengal

From H. S. M. Ishaque, Esqr., *Director of Rural Reconstruction, Bengal*

I TAKE the occasion of beginning of this New Year to offer you my warmest greetings. With Rural Reconstruction, pioneered by the present Government of Bengal, entering upon a most important phase, I can, with confidence, wish that not in words only, but in fact also, the year will be happy and prosperous.

The time has come to recast the spirit, and, through the spirit, the present scheme of things entire. We plan for the spiritual revival of Rural Bengal, which alone can sustain any effort at material reconstruction. Our aim is a great one and demands a dynamic of corresponding force. And, pledged as I am to put forth my very best endeavour to serve you, I avail myself of this opportunity, before I set about the task, to appeal to you earnestly for your response and support. I welcome you to our common duty, which, done in the right spirit, will be lost in free, glad devotion, and to self-sacrifice, which will forget its name and become joy. There are few duties and few responsibilities with such a scope and such reward.

All revivals have sprung from certain sound principles at work. Some revelation, some ideal has caught the minds of men and new life has sprung.

Any large attempt at reconstruction, not based on sound principles, is bound to be sterile. So I propose to devote myself, 'inter alia', to the exposition of certain fundamental ideas about what exactly we intend to do, why we want to do and how we would do it. I hope to address to you regularly a series of Rural Reconstruction bulletins, which shall be arranged to be distributed as widely as possible. These will make the spear-head of the movement.

The greatest obstacle in our task is not so much material as spiritual. It is the weakness of the

(Continued on page 198)

A Speech On The Corporation Laboratory

[By Dr. J. B. Grant]

ON the occasion of the opening of the new premises of the Corporation Laboratory by the Mayor of Calcutta, on Saturday, the 21st December, 1940, Dr. J. B. Grant, M.D., M.P.H., Department of Public Health Administration, All-India Institute of Hygiene and Public Health, Calcutta delivered the following speech:—

Ignorance is prone to labour under the delusion that no problem has previously been attacked correctly or adequately. One is not surprised in reviewing the history of this Laboratory to learn of its historical importance through the significant contribution of its pioneers in particularly the fields of Cholera, Plague and food control. The intimate association during the eighties with the birth and early development of anti-cholera inoculation was a significant contribution in what has since proved a world-wide boon to humanity. The Laboratory was established under Sir William Simpson, the first whole-time Health Officer of Calcutta (1886-1897) who must have been an outstanding individual. He Associated himself intimately with Koch's discovery of the comma bacillus both in Egypt, as well as when the discoverer himself came to Calcutta to confirm his Egyptian discoveries. Calcutta and the Laboratory was a proving ground of the efficacy and harmlessness of Cholera inoculation. The Central Laboratory was similarly historically associated with the introduction of Plague vaccine in connection with the early experiments undertaken by Drs. J. N. Dutt and S. B. Ghose, who joined the Laboratory in the nineties and set the first standards in India for purity of food-stuffs, especially Ghee. This became the important point of departure for subsequent statutory food adulteration requirements both of the Government of Bengal and other Indian Provinces.

Determination of the earliest tropical standards for the purity of water were also associated with the Laboratory in conjunction particularly with the work of Clemesha.

It is a privilege for all attending this opening ceremony that we have with us two of the pioneers Dr. T. K. Ghose and Rao Bahadur V. G. Raju whose contributions in the development of standards particularly of food and of water bacteriology under tropical conditions are too well-known to all of us to require mention. It must also be extremely gratifying to Dr. Ghose that the mantle of the pioneer has fallen on the shoulder of Dr. S. K. Ghose, his able son, under whose immediate direction this Laboratory is being extended and modernised. On the other hand, all technical men appreciate that progress is never achieved except through the intelligent support of general executives. I have had other occasions to realise that much of the credit for the modernisation of the Laboratory is due to the support of Mr. S. Chatterjee, the able Deputy Executive Officer I.

A well-organised Public Health Laboratory is one of the foundations of effective health work and an invaluable means of co-ordinating health activities. If the health work of the Calcutta is to function efficiently, if the control of the water and milk supplies and of communicable diseases is to be based upon facts rather than personal opinion, and if the clinical service is to put into practice for its patients all our present day knowledge of disease prevention, there must be available a Public Health Laboratory doing work of such high character and broad scope that all workers in this field will instinctively seek its guidance and advice. This has for some time been recognised internationally by the larger cities, and many valuable contributions to public health are the result of the painstaking and patient efforts of the Laboratory worker.

Such a Laboratory should be an important factor in stimulating friendly relations between the physicians and the Health Department by providing an expeditious and careful service as an aid to diagnosis. Further more, by establishing a relationship with the milk producers on a high professional plane of fairness and accuracy, it should assist materially in building up the interest of the producers in the control of the milk supply.

The function of the laboratory is to aid the clinician, the epidemiologist, the nurse, the milk inspector, or the sanitary engineer by the examination of submitted specimens.

The laboratory should be so organised that it will be able to undertake as they are needed studies or research in special Public Health problems which may be peculiar to the locality.

The extent to which biological products are distributed depends upon the policy of the state in supplying them to local communities. But regardless of this so far as practical, the laboratory should keep in stock fresh supplies of the biological products, to be made freely available to physicians and for distribution by the division of communicable diseases.

The preparation and free distribution of containers and materials for specimens and cultures, together with careful directions for the collection of specimens, are essential activities.

Implication has been made that the service of a Public Health Laboratory to the community should be free and available to the private practitioner. This has so far not been done in Calcutta and I take the opportunity of referring such a policy for the consideration of the pertinent authorities and of the Health Officer. It is almost superfluous to point out that the efficacy of curative medicine is proportionate to the earliness of diagnosis. Infectious diseases cannot be controlled without ascertainment of their occurrence. Free laboratory facilities are increasingly becoming universal because it has been found that the cost of a free and complete diagnostic service to remove the chief obstacle to early diagnosis is more than repaid through the increased efficiency of medical practice.

Among those present on the occasion (whereupon notices were published in our last issue dated 21st December, 1940) were:

Dr. Sundari Mohan Das, Lieut.-Col. R. N. Chopra, Dr. J. B. Grant, Mr. H. N. Worth, Dr. B. Mukherjee, Major Taneja, Dr. J. N. Mukherji, Dr. P. K. Ghosh, Mr. G. S. Dutt, Dr. R. Ahmed, Mr. N. C. Paul, Mr. N. C. Sen, Mr. Tushar Kanti Ghosh, Dr. Meghnad Saha, Dr. Panchanan Neogi, Dr. Biresh Guha, Dr. J. C. Roy, Rao Bahadur Gobindo Raju, Dr. N. N. De, Mr. A. P. Basu, Mr. B. G. McHatton, Mr. J. K. Mitter, Chairman, Tollygunj Municipality, Dr. K. P. Biswas, Dr. A. K. Sen, Dr. T. K. Ghosh, Dr. J. P. Chowdhury, Dr. M. V. Ahmed, Dr. S. N. Das, Sir Hari Sanker Paul, Dr. S. Sarkar, Mr. Naresh Nath Mookerjee, Mr. B. S. Nahar, Mr. D. N. Ghosh, Mr. T. C. Roy, Mr. A. Matin, Mr. B. N. Roy Chowdhury, Mr. H. K. Ghosh, Mr. Shamsul Haque and Mr. Ziauddin Ahmed.

[Speeches delivered at this meeting by the Mayor and the First Deputy Executive Officer have been already reported in our last issue.

—Ed. C. M. G.]

All-Bengal Municipal Conference

Sixth Session At Berhampore

THE Sixth Session of the All-Bengal Municipal Conference was held at the Krishnath College School Hall, Berhampore, on the 30th and 31st December last. About 200 delegates from municipalities all over Bengal attended, and Mr. Barada Prosanna Pain of Howrah, presided. Mr. Ambika Charan Ray, Chairman of Berhampore Municipality, who was the Chairman of the Reception Committee for the Conference, welcomed the delegates and in his speech referred to the good work done by the All-Bengal Municipal Association which was brought into being in 1932 after the first meeting of the All-Bengal Municipal Conference held at the Albert Hall, Calcutta.

Placing the Fifth Annual Report of the Association, Mr. Biren Roy, Chairman of the South Suburban Municipality and General Secretary of the All-Bengal Municipal Association, said:

"Bengal politics to-day reeks of village atmosphere and this is natural as more than 90 per cent. of the population of this province live and die in villages. Most of the towns of Bengal are mere centres of local administration and have very little industrial life to draw its vitality from. Yet if Bengal is to flourish as a progressive province it must nourish its few towns as centres of culture and progress.

"Yet in our optimism we must not ignore the fact that we are passing through one of the severest crises in the history of the world and that in the conclusion of the war, the world will not be what it used to have been these few hundred years. We in our humble way are looking forward to a time when "War Drums will beat no longer" and mankind will settle down to solve manifold problems of life without reference to the sword. The towns will then be the centres of population engaged in the production of not only necessaries but also amenities of life through machines. The municipalities will be able to bring to every man and woman, however humble their station in life may be, all the blessings which science has conferred on humanity. If we set this ideal before our eyes, our work will not languish for want of proper inspiration but will sustain us through all our difficulties and failure."

Referring to the Municipal Association, which he described as "a connecting link between the Local Self-Government Department of Bengal and the ratepayers", he deplored the lack of recognition from Government to the Association in this perspective. He spoke of the "unemployment statistics" which the Association had taken in hand keeping in mind "poor relief" and "provision for the aged and the infirm" which, he said, "in civilised countries is a first charge on the revenues of the Local Councils."

He then said that the Association had "an idea to harmonise and tone up municipal administration in our province by chalking out new lines along which the Municipalities should expand. But for this," he said, "we must have the authority through our own Executive Council, elected by the Municipal Bodies to formulate and see the working out of such schemes for developments as are best suited to their individual requirements. For all these, we must not only have funds, but willing workers for research. And that is the way we have to move."

Mr. Barada Prasanna Pain, in his Presidential Address, spoke strongly against the system of nominations. He said:

"When nominations to the legislature are no longer considered a necessity, I cannot think of any conceivable reason why this pernicious system should continue to disfigure the municipal statute book or to prevent the growth of healthy civic life in us.

"The institution of local self-government in this province has not progressed satisfactorily, but has always had to contend against unnecessary and uncalled for obstruction and interference. If you do not firmly resist such obstruction, I am certain, there will be an end of local self-government in the course of the next few years."

He added: "We must press our claims in the matter of representation on the Legislative Assembly and Legislative Council of the province. The Bengal Chamber of Commerce, Bengal National Chamber of Commerce and the Moslem Chamber of Commerce, all enjoy the privilege of electing their own representatives to the legislature, and it is a great injustice to the self-governing institutions of the province that they have not been given the right of representation."

Next year the Conference meets at Jalpaiguri.

—Greetings To Rural Bengal

(*Continued from page* 196)

sprit, the inertia which paralyses our best resolutions. Conquer this, at least strive to do so, and, with this striving, make the present year memorable in the history of our endeavour.

Do I pitch the note of my appeal too high? I think not.

General Article

Forgotten Calcutta Worthies

John William Ricketts: A Maker Of Anglo-India

[By Shibnarayan Sen, *Curator, Nepal Museum, Katamundu (Nepal)*]

HENRY LOUIS VIVIAN DEROZIO, poet, philosopher and free-thinker, in moving the proposition at a meeting held in the Town Hall (Calcutta) on the 28th March, 1831, that, as a mark of approbation, respect and affection, Mr. J. W. Ricketts should be presented, as a memorial of gratitude by his countrymen, with a silver vase, his portrait in oil, and a public dinner welcoming him to his native shore, spoke as follows :—

> "Why then am I here this day? I have intimated that I have been called here by duty, and that is a voice which I dare not disobey. I am an East Indian, and, therefore, I ought to be here. I am interested in the welfare of my countrymen, and, therefore, I ought to be here. I am anxious to know what measures have been adopted to promote that welfare, and therefore I ought to be here. I love my country and I love justice, and therefore I ought to be here. Shall it be said of me that I was a man who, having committed an error (1), was afraid or ashamed to acknowledge it? They know me not who entertain this opinion of me :— I am satisfied that I have done him (J. W. Ricketts) wrong. Publicly was the error committed, as publicly is it recalled..... Our condition is worse than savage degradation. Of what savage tribes has it yet been recorded that the parents have consigned their offspring to infamy? No, Sir, it has been left for civilised man to do what no barbarian has ever yet conceived. and that has been to work out for an unhappy class the conditions against which we complain. Taking this view of these conditions, the petition, of which Mr. Ricketts was bearer, was the remonstrance of East Indians against the unnatural cruelty of their fathers ..... This Assembly has already accorded its thanks to him, but although the acknowledgements of grateful hearts are pleasing, the labour of men in a public cause should not be passed by in that way. Mr. Ricketts has told us that our gratulations and the plaudits he has received this day have rendered him indebted to us. Gentlemen, that sentiment has made us doubly his debtors. Conceive yourselves transported back to the days of Greek and Roman glory, conceive yourselves a community existing in those ages, with brilliant examples before your eyes of honours and triumphs accorded to those who had served their country; conceive how such examples had operated upon your minds, and you had then welcomed to his native shore the man who for you has done much and suffered much. Many whom I have now the honour to address are aware that it is not recently that he has exerted himself to ameliorate our condition. In youth, when he first felt life in every limb, that animation was inspired by an unabating zeal to do his country service. You can testify whether I overrate him, when I declare, that if any man is entitled to the gratitude of the East Indian community, that man is John William Ricketts....."

In January 1822, in consequence of a decision of the Supreme Court in Calcutta, which declared that a large proportion of East Indians did not come under the denomination of British subjects, a subscription to defray the expenses of an appeal to the King (George IV) in Council was inaugurated. This was the commencement of the first combined movement of the East Indian Community, which, after eight years of agitation and organisation, culminated in the Petition of the East Indians. Christian inhabitants of Calcutta and the Provinces comprised within the "Presidency of Fort William," to the Hon'ble the "Commons of the United Kingdom of Great Britain and Ireland in Parliament assembled," presented to the House of Lords by the Earle of Carlisle on the 29th March, 1830, and to the House of Commons by the Honourable Williams Wynn, (2), on the 4th of May of the same year.

Towards the close of eighteenth century fears regarding the increase in numbers and loyalty of Eurasians were spread abroad chiefly amongst the servants of the Company; and, whether from a sense of danger, a feeling of shame and disgrace, or a determination to hedge round the preserves of office in the gift of Directors exclusively for those of pure European birth and education, Eurasians were effectually excluded from positions and offices which they were well fitted to occupy. A general letter of the Court of Directors, dated 14th March, 1786, prohibited those wards of the Upper Orphan School of Bengal Military Society, who were born of native mothers by British fathers, from being sent to England for education. In the *Gazette* of June, 1792, it was notified that "no person, the son of a native, shall henceforth be appointed to employment in the Civil, Military or Marine services of the Company, or as sworn officers of the Company's ships, between Europe and India." In 1795, during the Governor-Generalship of Lord Cornwallis, all persons not descended from European parents on both sides, were prohibited from serving in the European branch of the army, unless as fifers, drummers and bandsmen. Those of their number debarred from serving in British regiments, who entered the service of native princes, were immediately recalled on the outbreak of hostilities. This was the case in 1801, when the Mahratta war began. Indeed, up to the renewal of the Charter in 1834, the general tendency of the rule of the Company was to level Eurasians to the same rank as natives, while, at the same time, offices to which natives were eligible, such as those of Munsiffs and Sudder Ameens were closed against Eurasians. Besides this, outside the Presidency towns, they were subject to the rule of Muhamedan law. English by parentage, the majority were denied

(1) Derozio, himself a Member of the Committee, was opposed to the proceedings which Ricketts brought to such a successful termination.

(2) See *Modern Review*, October, 1930, "Some New Lights on Raja Ram Mohon Roy" by S. N. Sen.

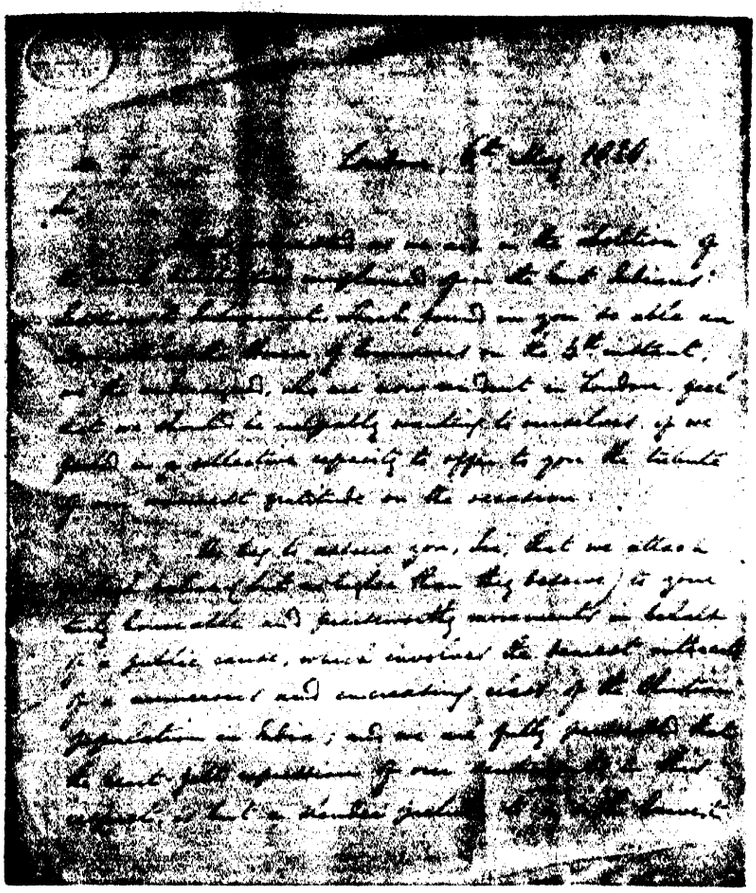
the rights of British subjects, and in the *mufassil* they had the benefit neither of *Habeas Corpus* nor trial by Jury.

In November, 1825, a general meeting of East Indians was held at the house of Mr. Wordsworth, with Mr. W. DaCosta in the chair. Acting on the advice of an eminent firm of Solicitors in London, Messrs. Collett, Wimbourn and Collett, this meeting appointed a committee of seven to draw up a draft petition to Parliament. The gentlemen composing this Committee were Messrs. Wordsworth, DaCosta, G. Reed, J. L. Heatly, A. Imlach, H. Martindell, with J. W. Ricketts as Secretary. By February of the following year, 1826, the draft petition was ready and lay for some time at the house of Mr. Imlach, of 40, Cossitollah, (Bentinck Street) for the inspection of all who might feel interested in, or care to make observations on it; and subscriptions amounting to Rs. 2,731 were obtained to meet the probable expenses of its presentation to Parliament. By the end of March, 1826, the petition was in the hands of a member of the Calcutta Bar (3), for the purpose of undergoing legal revision paying him the usual fee of 40 Gold *Mohurs*. It was not till the December of 1828, that it found its way back to the Committee, who anxious for its completeness in all its parts, submitted it to a third gentleman (4). On the 28th February, 1829, a meeting of the Committee read, discussed and approved of the thrice-revised petition, had it engrossed, and placed in the Town Hall (Calcutta) for signature, and also had it printed in several newspapers. A General Meeting of the Committee was then held in the Town Hall, on the 20th April, 1829, at which Mr. J. W. Ricketts was unanimously appointed the Agent of "the East Indians". Mr. J. W. Ricketts sailed for England in the *Andromache* and after a protracted voyage, reached London on the 27th December, 1829, the very month in which Lord William Bentinck, acting on the advice of Raja Ram Mohan Roy, Mr. Butterworth Bayley and Sir Charles Metcalfe, abolished the *Suttee* and the same year which saw the suppression of the "*Thugs*".

Mr. Ricketts was a man of literary tastes and culture. When a boy, the pages of Addison were his delight, and later on in life, he frequently contributed thoughful and tasteful articles to the various journals then existing. He published a series of religious Addresses and Exercises for Sabbath Schools, entitled "Feed My Lamb". By persuasion he was a Baptist, one of the early members of Circular Road Chappel, and the friend of the Srerampore Missionaries.

His father, Ensign John Ricketts, of the Bengal Engineers, died in the memorable seize of Seringapattam along with other young and gallant soldiers. His son, John William Ricketts, was born towards the close of 1791. When a child, he was entrusted to some friends who brought him to Calcutta, and placed him at the Upper Military Orphanage at Kidderpore. Before he was sixteen years of age, the lad left school to begin life as an apprentice in the Hon'ble East India Company's service, and sailed to Bencoolen, which at that time was a British settlement. After a stay of five years there, he returned to Calcutta and obtained a situation in the office of the Board of Customs, Salt and Opium afterwards amalgamated with the Board of Revenue and rose to be Deputy Registrar.

About this time certain social problems of considerable importance were engaging general attention. The East Indians, or descendants of Europeans by intermarriages with the natives of India, were fast increasing in numbers, and becoming in some respects an important community. They soon began to feel the want of a public seminary for the education of their children. Hitherto the only schools for them in Calcutta were either charitable institutions, or academies kept by private individuals. (Among these schools was one, in Chitpore, conducted by Mr. Sherburne, whose mother was a Brahmin, and among whose pupils were Dwarkanath and Prosono Cumar Tagore, and Russomoy Dutt, the head of the talented family of Rambagan.) Mr. Ricketts' active mind conceived the idea of founding a school to meet the requirements of the community at large. He accordingly convened a meeting of "parents, guardians, and friends" at his residence, 25, South Colinga Road (a large two-storied building, later on known as No. 9, Ripon Street) on the evening of Saturday, the 1st March, 1823. Among those present on the occasion were Messrs. Wale Byrn, Willoughby DaCosta, Sutherland, Kellner, Kerr, Sturmer, Lindstedt, Brightman, Frith and Kyd (founder of the Kidderpore Dockyard). The outcome of the conference was the Parental Academic Institution, which later on acquired the name of the Doveton College, after Captain John Doveton of H. H. the Nizam's Army, who bequeathed a sum of £25,000 to the school. Mr. Ricketts was its first Honorary Secretary, while one of its former principals was Dr. George Smith, better known as the Editor of the "Friend of India," and also the biographer of Carey, Duff, Wilson and Henry Martyn.



Ricketts bore an upright character, and earned the esteem and affection of everyone with whom he came in contact. Like James Kyd, his great contemporary, he was a thoroughly practical man, and whatever he undertook was managed with remarkable ability, energy and earnestness of purpose. As the founder of an institution for the education of youths of his own community, and the unselfish champion of his people's rights in a land far removed from his family and friends, he has a claim to be considered as the "East India Patriot."

He was married, on October 26, 1826, to Miss Sarah C. Gardner, who was, it is believed, a ward of the Kidderpore Upper Orphan School, and the daughter of a military officer. This lady, who is said to have been remarkably beautiful, survived her husband twelve years. Beside his daughters and the children he lost in their

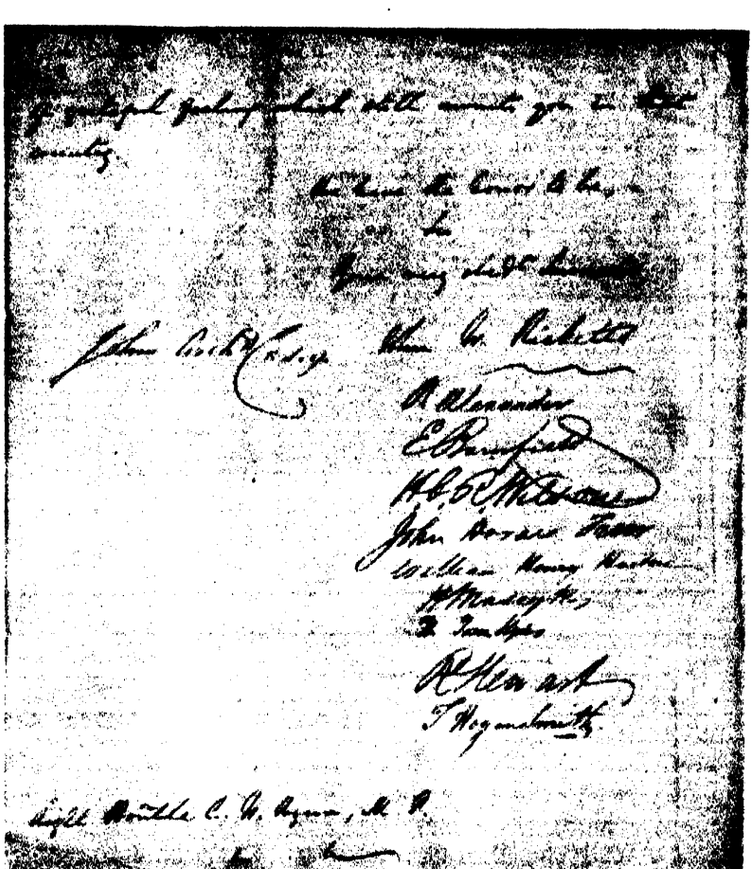
TEXT OF THE LETTER

London, 6th May, 1830.



Sir,

Deeply interested as we are in the abolition of the civil disabilities complained of in the East Indians' Petition to Parliament, which found in you so able an advocate in the House of Commons on the 4th instant; we the undersigned, who are now resident in London, feel that we should be culpably wanting to ourselves, if we failed in a collective capacity to offer you the tribute of our warmest gratitude on the occasion.

We beg to assure you, Sir, that we attach a high value (but no higher than they deserve) to your truly honourable and praiseworthy movements in behalf of a public cause, which involves the dearest interests of a numerous and increasing class of the Christian population in India: and we are fully persuaded that the heart-felt expression of our sentiments on this respect, is but a slender prelude to a rich harvest of grateful feeling which still awaits you in that country.

We have the honour to be,
Sir,
Your very obedient servants,

Sd/- JOHN W. RICKETTS.
Sd/- R. ALEXANDER.
Sd/- E. BARNFIELD.
Sd/- H. C. R. WILSONE.
Sd/- JOHN HORACE FREER.
Sd/- WILLIAM HENRY HURTON.
Sd/- H. MASEYKS.

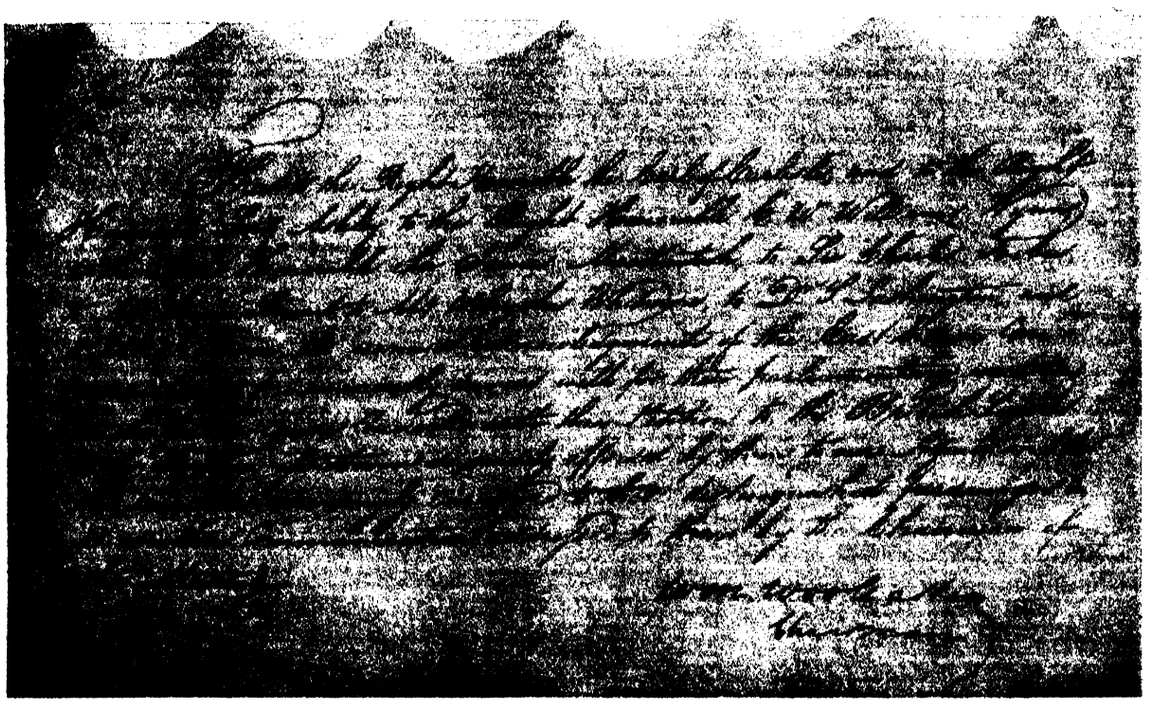
(Continued from previous page)

infancy, Mr. Ricketts had five sons:—William, the eldest, who went to Barisal and died early; George, the second, who was for many years Secretary to the River Steam Navigation Company at Calcutta; John Andrew, the third, who was posted as Deputy Magistrate and Deputy

Collector at several stations in Bengal; Henry, the fourth, who was an indigo planter at Ghazipore; and Thomas, the youngest, who was killed at Cawnpore during the Mutiny.

John William Ricketts departed this life on the 28th July, 1835, aged 43 years; and was buried in the Old Gaya Cemetery at the foot of the Ramsila Hill. Had his life been spared, length of years might have added much to the good he did and undertook to accomplish: His life is, indeed, examplary, and a great honour to his countrymen.



It will be interesting to note here that one of the leading points in Mr. Rickett's examination before the House of Commons was: "Rammohun Roy, a learned and respectable native in Calcutta, associates with us as he does with Europeans."

The East Indian Petition(5) to Parliament brought about the insertion of a clause, in the Charter Act of 1833, proclaiming that all persons, without reference to birth or colour, were eligible to the Civil and Military services of Government; and further the subsequent adoption of the Lex Loci Act of the Indian Law Commissioners.

Accidentally I discovered two papers with regard to the East India Petition in England, from the house of late The Right Honourable C. Watkin Williams Wynn, M.P., who presented the Petition to the House of Commons. One is an address of thanks to Mr. Wynn from the Indian residents in London, and the other, a vote of thanks passed at a meeting at Calcutta.

TEXT OF THE VOTE OF THANKS

FACSIMILE OF THE COPY OF THE VOTE OF THANKS.
Size 10½ in. by 6½ in., parchment paper.

TEXT OF THE VOTE OF THANKS

That to the Right Honourable the Earl of Carlisle, and to the Right Honourable Lord Ashley, to the Right Honourable C. W. Williams Wynn, to the Right Honourable Sir James Mackintosh, to Sir Charles Forbes, to Mr. James Stewart, to Mr. Wolryche Whitmore, to Dr. S. Lushington, and to Mr. I. Hume, the warmest acknowledgements of the East Indian Community are pre-eminently due, as well for their parliamentary exertions, in the public cause connected with their Petition to the British Legislature, as for the kind assistance so readily afforded by them to our Agent; and that the same be accordingly conveyed to those distinguished personages in a written communication addressed to them by the Chairman of the Meeting.

Sd/ Wm. WOOLEASTON,
Chairman.

HEALTH & HYGIENE

"A man too busy to take care of his health is like a mechanic too busy to take care of his tools."—*Cicero.*

Treatment Of Rheumatic Disease

By
DR. MORRIS FISHBEIN
EDITOR
"Journal Of The American Medical Association"
AND OF
"Hygeia": The Health Magazine

IN a recent survey of the problem of chronic arthritis, Dr. Robert B. Osgood analyzed some of the various new methods of treatment used for these conditions.

Most important is the concept that rheumatic disease is a disease of the whole body and not something just affecting the joints. First in treatment of this disease, as in any other medical condition, is rest of the body and mind. This does not mean complete inactivity. Sometimes tissues are better rested with moderate exercise than without exercise.

Dr. Osgood also approaches the subject from the point of view of the orthopedic surgeon. He is convinced that good body mechanics can do a great deal to lessen the symptoms of arthritis. Thus he feels that rheumatic patients should walk in such a a manner that the great systems of the body, including the apparatus concerned with the joints, digestion and motion, can function with the smallest amount of restriction. The person who walks erectly without disturbance, who holds his body firmly, is likely to feel better than the one who is slouching and bent.

Particularly important at this time also is the avoidance of the concept that vitamins will cure rheumatism. Now-a-days it is believed that a diet which is high in proteins, fats and vitamins, and low in sugars, is a better diet than any other for the rheumatic individual. It is also well established that regular, normal action of the bowels is helpful for the rheumatic, as for every other person. Certain it is, however, that excessive doses of vitamin D or any other vitamin will not cure rheumatism. Nevertheless, adequate amounts of vitamins A and C, and particularly of the vitamin B compounds which are so closely related to appetite and digestion, must be taken by the person with arthritis.

From time to time a variety of vaccines and serums has been used in these conditions, but the very latest reports indicate that none of these vaccines has yet been established as being really worthwhile in any considerable number of cases of rheumatic disease.

The drugs that have been used in rheumatic disease include every possible type of sedative, pain reliever, drugs which change the circulation; the most recent specific drugs which have been offered have been modifications of sulphur and gold. The most recent research on sulphur seems to show that there is no deficiency of sulphur or any abnormality in the use of sulphur by the body in arthritic disease, and therefore there would seem to be no specific reason for giving sulphur. Furthermore, carefully controlled investigations made on rheumatic patients using sulphur do not indicate that any considerable percentage has been cured.

With gold treatments, much study is going on. While some of the evidence seems highly suggestive of benefit, there is also a great deal of evidence of harm in the form of toxic reactions. Certainly the time is not ripe to say to anybody that they should take gold treatments for arthritis with any certainty of cure.

The doctor who treats arthritis also keeps in mind the fact that many feel better at a high altitude, in a climate that is dry and where there is plenty of sun. Some patients whose arthritis is regularly progressing find a slowing of the progress under such conditions.

Everyone knows that the use of physical treatments, including proper heat, water treatment and massage may benefit the patient with arthritis. In some instances a complete alteration of the nature of the body by a careful study of the glandular mechanism brings about changes that are associated with improvement.

In clinics and hospitals everywhere physicians are studying arthritis from these new points of view. The outlook seems far brighter today than it did in a previous generation.

LATEST IN MEDICINE

A RECENT issue of the *London Lancet* had an article describing the effects of anticipation in an area of England where there had been more than 50 air raid warnings in the previous five weeks. About 12 per cent of the population admitted that they had lost some sleep, and some of them admitted to the fear of being left alone, and in one case to the fear that the roof would fall in. Some people with high blood pressure shook and sweated when the sirens sounded.

It was found that twelve people with mental disease were affected—three depressives being aggravated and two getting better; four anxiety cases getting worse and one getting better; and

one mild paranoiac improving considerably, while another had to be put in the hospital.

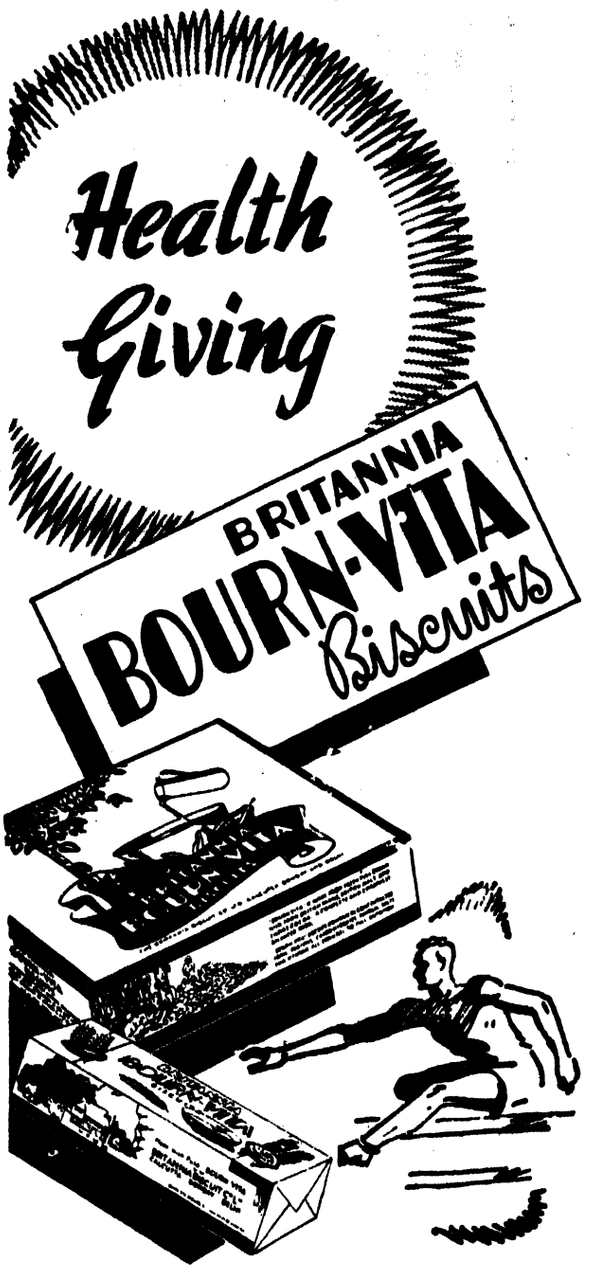
The propaganda department in Berlin translated this scientific report by saying that "wraith-like figures walk the streets of London, screaming wildly at the mere sight of airplanes. People have frightful dreams and a continuous feeling of distress. Epilepsy and sleeplessness are on the increase. Stronger religious measures are being taken to combat the increasing immorality." Now the *London Lancet* quotes the German propaganda as a fine example of wishful thinking.

* * *

IN anaemias, iron is probably among the most important of all the drugs that can be used. Even though iron has been used for many years, the exact amount that ought to be taken in the diet is still a matter of careful scientific study. General opinion now is that every one must have from twelve to fifteen milligrams of iron per day to insure adequate iron absorption. Apparently not all of the iron that is in our foods is easily absorbed. If there is not enough acid in the stomach, the iron is absorbed with greater difficulty. Evidently the same amount of iron is not equally effective in all people and excessive iron is more effective.

* * *

AS a preventive of athlete's foot, recent recommendation calls for sponging shoes, slippers and other footwear each week with a 10 per cent. solution of formaldehyde or placing them together in a closed box with a solution of formaldehyde for 24 hours each week. After each sponging or exposure, the clothing cannot be worn without airing for at least another 24 hours. Some people have eruptions on the feet from the formaldehyde. Socks worn by people with ringworm of the feet must be boiled for 10 minutes to free them from the danger of reinfecting the feet.



* * *

A RECENT survey of the hearing of aviators show that they get hard of hearing because the organs of hearing become fatigued by continuous noise, also because there are changes in the pressure in the internal ear associated with changes in altitude. Authorities suggest also that the decrease in available oxygen may be a factor in the easier production of fatigue in high altitudes. New designs in aircraft are being planned to help control the problem of loss of hearing in aviators.

* * *

NEW estimates indicate that at least one million children in the United States have speech defects. Ten per cent. are stammerers. Apparently the hearing of speech is to some extent associated with stammering, since stammering is very rare in cases of total deafness. Poor hearing causes distortion of words and uncertainty as to pronunciation. This helps to create hesitancy in speaking. Doctors Harms and Malone have found from 10 to 22 per cent. of deficiency of hearing in stammerers and believe there is a relationship between the loss of hearing and the development of stammering.

Traffic Engineering

A New Profession For Modern Needs

[By K. S.]

A NEW kind of professional man and scientific expert is coming into his own today in response to the needs of a nation on wheels.

He is the traffic engineer, most recent addition to the fraternity of professional technical men without whom the twentieth century as we know it would be an impossibility.

Five hundred of his kind are at work right now, thinking not so much about building roads or repairing them, but about a new job imposed by millions of motor cars: speeding traffic safely and sanely on its way.

He and others are receiving their highly specialised training not only on the job, but in a number of special technical school courses, of which the most are offered by a thirteen-year-old institution first at Harvard and now at Yale, the Bureau for Street Traffic Research.

More than 1500 of his fellows should be at work for City, State and Federal Governments by 1950, in the opinion of Maxwell Halsey, Associate Director of the Bureau.

The traffic control engineer's concern is not with the structure of a road itself. It is with laying out the road so that traffic can move swiftly. It is with traffic signals, road markers and warning signs.

He is concerned with intersections—New Jersey's famous clover-leaf intersections on main highways leading out of New York City are typical of the traffic engineer's work. He is also very much concerned with designing curves such that automobiles can move around them safely at the prevailing speeds on that particular road. Control of parking is a special headache that it is his job to salve or solve. Street and highway lighting are in his province.

His field is indeed a pioneering one because it has been subjected to special scrutiny for a relatively few years. One of his jobs is to find out more about the flow of traffic: What kinds of vehicles go where, when and at what speed? Such knowledge is indispensable to proper planning. How do the vast majority of accidents occur, and what percentages fall into the different categories of accidents? Such information is not being gathered as yet on as wide a scab as topflight highway men would like.

All but 50 of the 500 traffic engineers now at work are employed by the Government, working either for the Federal Government, the state governments or about 35 cities with formalised traffic cantrol units as part of their municipal administrations.

SHAW WALLACE & CO., CALCUTTA

Your traffic engineer is no policeman; in a certain sense, his job is to tell the policeman what to do about regulating traffic. With about 30,000,000 vehicles using the streets and highways of the United States, the traffic problem is entirely too complex to be solved incidentally to the general exercise of police power.

Emergence of the traffic engineer is one of the marks of the fourth stage of auto transport's history, Mr. Halsey declares.

Before it was realised that keeping autos on the move is a separate profession in itself, America passed through a stage of rapidly mounting traffic and an appalling climb in the number of automobile accidents: from 10,723 in 1918 to 27,996 in 1928 to 38,000 in 1937.

Only then did a large number of people begin to realise a fundamental truth which many far-sighted engineers and safety experts had been hammering home for years: America was driving millions of autos designed for comfortable travel at speeds of 60 miles an hour on highways whose basic characteristics go back to a slower age and which are safe for no more than 40 miles an hour.

This at least was a partial explanation of many of the mishaps which were taking (and still do take) a fatality and casualty toll reminiscent of a war.

Until this time highway engineering was concerned almost exclusively with finding out where roads ought to go and with their construction from the surface of the road down.

But this traffic problem indicated that specialised knowledge is needed to solve the problems above the surface of the road. The organisation of government street and highway agencies reflected this condition, Mr. Halsey points out; though they had many men expert in building and in repairing highways, they had almost no specialists in controlling the way the roads were used.

Your traffic engineer is called upon to command many specialised forms of knowledge, all of which are now taught in one or more universities. His training requirements are shown in Mr. Halsey's breakdown of what the traffic engineer does with his time:

For 70% of his time, he tackles problems of mechanical control and parking, involving signs and regulations, marking, signals, islands and intersections, illumination and terminal facilities.

For 10% he works on designing new roads and planning through traffic road, one-way streets, zones and major street systems.

For 5% he does traffic surveys, accident records, administration and the economics of the automobile. The rest of his time is devoted to problems of legislation, educating the public and enforcement.

Youngmen entering this new field should have an engineering degree before they take up the specialised traffic control work, Mr. Halsey thinks, because it is the best guarantee of ability to approach a problem factually and of a spirit of accuracy.

The man with engineering training is also more familiar with mathematics, useful in dealing with the statistical material that is becoming more and more common in the growing literature of traffic engineering.

YELLOW FEVER EPIDEMIC

A report from Nairobi (Kenya) states:—

A Yellow Fever Conference called following an outbreak in Sudan last month in which 15,000 cases were involved of which 1,500 were fatal, has recommended that yellow-fever carrier mosquito (Stegomyia), which occurs throughout Africa should be completely eliminated from all the sea ports of Eastern Africa which have international or inter-colonial trade, all inland and urban centres, aerodromes, all steamships plying in East Africa or inland waters and along all lines of Railways and communications.

BENGAL T. B. ASSOCIATION

Appeal for Contributions by Vice-Patrons

The following appeal was issued in connection with the 'Flag Day' for the collection of funds in aid of the Bengal Tuberculosis Association which was held on the 21st December, 1940, under the gracious patronage of Her Excellency The Marchioness of Linlithgow and the Lady Mary Herbert:

Tuberculosis is, as is well-known, a terrible scourge. In Bengal, at present, on a rough estimate there are about a million people in the grip of this disease of whom quite a quarter may be said to be spreading the infection. The death rate is quite as terrible; one lakh of people die as victims of this malady. None can escape; it attacks men, women, and children of all ages, and all communities. No less than 35,000 children in Bengal are crippled on account of tuberculosis infection. Children and adults between the ages of 15 and 30 are, according to medical opinion, easy victims of this disease. In large cities like Calcutta four times more women than men die of Tuberculosis. The invasion of the disease is not confined to urban areas, it extends also to the numerous villages of Bengal, and the toll of death and disability is increasing year by year. In these circumstances, it is most necessary that the fight which the Bengal Tuberculosis Association is waging in an organised manner to control infection and death should be reinforced by the people of Bengal by substantial contributions to the Fund for which this appeal is issued. The need of money need not be over emphasised, for it must be plain that without funds the stupendous problem of making a successful assault upon this malady cannot be solved.

CASE AGAINST MR. SUBHAS BOSE

The case against Mr. Subhas Chandra Bose who is being prosecuted under the Defence of India Rules, came up for hearing before Mr. E. G. Creek, I.C.S., Additional District Magistrate of Alipur.

Mr. Bose is charged in connection with two speeches delivered by him on February 22 and February 24, at Deshapriya Park, Ballygunge and Rash Bagan Maidan, Belliaghata, respectively.

CALCUTTA NEWS & VIEWS A Digest

SECONDARY EDUCATION BILL PROTEST CONFERENCE

"The Secondary Education Bill is designed definitely to set back the clock of progress. Besides, it is calcuated to poison the fountain of knowledge at its very source. Indeed, I am fully convinced that, of all the misdeeds and misadventures of the present Ministry, this Bill is the most mischievous from the national standpoint," said Acharya Sir Profulla Chandra Ray in the course of his Presidential address at the Secondary Education Bill Protest Conference, which was held on Saturday, the 28th December, at Hazra Park.

"The Bill", urged Acharya Profulla Chandra, "should be dropped; otherwise there will be great discontent in the province. As a worker with some experience in the field of education I consider the Bill ill-conceived and mischievous. It will do no good to anybody, not even to the communalists, as education is a sensitive plant grown in the free atmosphere of mutual confidence. If you want to nurture and develop it, do not cut it off from its root of national unity".

Hoping that good sense will ultimately prevail with the Education Minister, Sir P. C. Ray uttered these words of advice to the Ministry. He further said:

"Bring all the resources available for the development of education, seek the co-operation of all the communities and combine all the forces in dispelling the dense darkness of ignorance still enveloping the country. But in the name of efficiency and better organisation do not uproot the tree which has withstood so many storms".

Over 10,000 people attended the Bengal Secondary Education Bill Protest Conference. 8,200 delegates representing the educational institutions and interests in all parts of the province attended the Conference. The number of Reception Committee members totalled nearly 1,200. Forgetting party differences and party complexities all attended the Conference to emphasise the united opposition of the people to this measure.

"Bengal will not tolerate this measure: she will rise as one man to resist its course. And if with a majority in the Cabinet and in the House, the Bill, amended or unamended, finds a place in the Statute-book, let me tell the Ministry in all seriousness that the consequences will be disastrous. A state of things will be brought about, for which all will have to repent," said Sir Manmatha Nath Mukherjee, Chairman of the Reception Committee of the Secondary Education Bill Protest Conference in welcoming the delegates.

"The entire structure of the Bill has been constructed upon a solid foundation of communal bias, which is seriously and sincerely to be deprecated, and which, if not demolished, will develop into a cancerous growth undermining national life of Bengal in its educational aspect much in the same way and perhaps in a more permanent manner as in other aspects."

Sounding a note of warning Sir Manmatha said:—

"To try to force this Bill down our throat in spite of our protest will be a dangerous game."

ALL-BENGAL TEACHERS' CONFERENCE

At the special session of the All-Bengal Teachers' Association held on Tuesday, the 31st December, last, the Conference resolved that Government of Bengal be requested to drop the Bengal Secondary Education Bill, 1940, and appoint a representative Committee to formulate a plan for the improvement of national education.

The session was convened to consider the Secondary Education Bill and was held at the University Institute Hall under the presidency of Dr. H. C. Mookerjee. A large number of delegates attended the Conference.

"I am grieved" said Dr. Mookerjee giving his opinion on the Bill in his address, "when I see the educational system and policy of the whole Province built up at such expense thrown so lightly and carelessly into the melting pot".

POET TAGORE'S MESSAGE

Bengal's great inheritance is her culture which can only be threatened by our own weakness; no external power can deprive us of freedom in the sacred shrine of Learning or compel us to compromise our integrity by menace of fear or favour. We are proud of our Bengali language which must be preserved from harm and nourished by the devotion of our people; no sacrifice would be too great in the task of strengthening its foundation in the minds of our new generation at the Educational institutions and outside. Having devoted over seventy years of my life to the service of our mother-tongue and to the welfare of Bengal, I have earned the right to make this appeal. My age and health prevent me from taking part in public affairs but the danger which menaces the cultural existence of my own Province has touched me profoundly and I cannot help sending these few words even from my sick-bed.

RABINDRANATH TAGORE.

NATIONAL LIBERAL FEDERATION

An emphatic demand for immediate announcement on the part of the British Government that India will be accorded the status and functions of a Dominion within meaning of the Statute of Westminster within a period not exceeding two years after the conclusion of the war was presented by the National Liberal Federation of India concluding their three-day session at Calcutta on the 30th December last.

Meanwhile, the Federation felt, the Central Government should be so reconstructed as to have by convention a fully national character. The Viceroy as the constitutional head should not ordinarily interfere with any policy commanding the support of such an executive and the Central Legislature; and the portfolios of Defence and Finance should be entrusted to non-official Indians enjoying the confidence of the country.

Registering their opposition to the existence of Communal Award and the suggested division of India into Pakistan and Hindusthan, the country, the Liberals held, should form one single unit of defence though it will have to be of a federal character.

While offering their whole-hearted sympathy in the prosecution of the war, the Liberal party, at the same time, acknowledged that requisite effort would not be forthcoming from the people of India unless sufficient enthusiasm was created among the people by a change in the policy of the Government towards India.

Mr. V. N. Chandavarkar presided and over a dozen resolutions relating to the war, defence, constitution, separate electorates, Civil Disobedience, industrial development, Indians overseas and census were adopted in course of the day's sitting which lasted more than six hours.

NATIONAL DEMOCRATIC UNION

The Conference convened by Mr. M. N. Roy to consolidate present day efforts to build up a solid anti-fascist, anti-Nazi front in India, concluded its last sitting on Tuesday, the 31st December last.

An agreed statement issued suggested the formation of emergency ministries immediately to popularise and democratise the war efforts and prepare the country for the general election to be held in due course of time. It also proposed the inclusion of popular representatives in the Viceroy's Executive Council.

The formation of a National Democratic Union for carrying out the common objects was recommended by the Conference.

The Conference of Indian leaders reassembled at 3 p.m. on Tuesday with the same attendance as on Monday.

The draft of the statement prepared by Mr. M. N. Roy was discussed at great length, Sir Sultan Ahmed and Mr. Jamnadas Mehta making important contributions.

BENGAL SALES TAX BILL

The business community in Calcutta made a most effective demonstration against the proposed Bengal Sales Tax Bill, 1940, which is now before the Bengal Legislature by suspending their business, and closing their shops.

As a protest against the Bill there was no business at the Jute, Cotton, Linseed, Wheat and Bullion Future markets.

Shops in all important business centres of the city were closed. Piecegood shops in Cross Street, Nurmahal Lohia Lane, Pogeyapatti, hardware merchants' shops in Clive Street, Darmahatta, Oilman's stores in Jagannath Ghat, shops in Chinapatti, Dhurramtolla Street, Harrison Road, Grant Street, Murgihatta, Canning Street, Colootola, Ezra Street, Pollock Street, Radha Bazar, Chinabazar, Sonapati and Maidapati in Burra Bazar, shops in Khengrapati, Chandney Chalk, College Street, Shambazar, Bowbazar Street were closed.

It is understood that the lead for closing the shops on this day as a mark of protest against the Bill came from the Marwari Chambers of Commerce. The fact that at a short notice and without much propaganda work important business firms all over the city suspended their business bears testimony to the spontaneous character of the protest.

A "BABY SHOW"

A "Baby Show" organised under the auspices of the Health Publicity Section of Daridra Bandhab Bhandar was held on Saturday, the 28th December last at the Health Exhibition opened by them at the Scottish Church Collegiate School.

There was an unexpected attendance of babies, but as many could not turn up timely only 52 babies were admitted. Two groups were made of the babies, *viz.*, one below one year and the other between the age of one year and two years. The following won the prizes:—

Group—A. 1st—Asim Kumar Dutt (age 10 months) son of Mr. Anil K. Dutt of 86B, Grey Street: 2nd—Khuku (age 5 months) daughter of Mr. Himangsu Paul of 31B, Badridas Temple Street.

Group—B. 1st—Jhunu Bhattacharjee (1 year 3 months) daughter of Dr. Sailendra N. Bhattacharjee of 7, Star Lane: 2nd—Kamal (age 1 year 2 months) son of Barin Mitra of 175, Khurut Road, Howrah.

Dr. Sudhanshu Kumar Gupta, Dr. Amiya Kumar Bose, Dr. Subal Chandra Dey, Dr. Kanai Lal Das, Dr. Bikash Dutt and Mrs. A. C. Chatterjee, acted as Judges.

Lt-Col. A. C. Chatterjee presided over the function and in course of his speech urged upon the ladies to give more care and attention in building up the children who were the future hope and strength of the country.

Cups and medals were awarded to the winners and the rest were given consolation prizes. Mrs. Chatterjee gave away the prizes.

Lt.-Col. Chatterjee and Mrs. Chatterjee expressed great admiration at the large scale and methodical way in which Daridra Bandhab Bhandar was endeavouring to spread health consciousness among the people.

MATERNITY AND CHILD WELFARE SHOW

An exhibition relating to the various problems concerning maternity and child welfare will be held at Calcutta in the middle of February next.

CIVIC NEWS FROM FAR & NEAR

Civic Reception At Karachi To The Turkish Mission

A civic address was presented by the Karachi Municipal Corporation on December 26 to the Turkish Mission.

The address referred to the historical and cultural link between India and Turkey and expressed pride in presenting the address to representatives of a "courageous people who have through centuries withstood the onslaughts of the nations of Europe whose lust for conquest and the pride of power knew no bounds". The address further expressed the hope that the bonds of friendship between the two nations renewed that evening would in the near future be strengthened by exchange of visits by missions of goodwill from both the countries and "with the combined efforts of those who claim to share the common heritage of Oriental civilization, it will be possible to rid the world of its madness, might giving place to right and Bedlam to sanity".

Replying in Persian, on behalf of the Mission, Col. Ziya Kayan, leader of the Turkish Mission, said that they had ample evidence of the very sincere friendship which the people of India felt towards them and their country, demonstrating in full the innate hospitality of the great British Empire and its people. Reaffirming the extremely friendly relations which existed between Turkey and the British Empire Col. Ziya Kayan reiterated that their visit to India had impressed them very much and none of them was likely to forget the hospitality and expressions of esteem which had greeted them on all sides.

His Excellency the Governor, who was on tour, in a message to the Mayor regretted his absence on the occasion.

Darbhanga Municipal Board's Free Gift

The Darbhanga Municipal Board at its meeting held during the last week in December, 1940, passed a resolution making a free gift of its lands lying unutilised to the north of the Dighi Tank and to the south of Harrahi Terrace for the purpose of establishing a "Home for Homeless" in commemoration of the late lamented junior Maharani Adhirani Sahiba of Darbhanga. The Board also resolved to give possession of the aforesaid lands to the sponsors of the scheme of "Home for Homeless" immediately.

New Municipal Charitable Hospital

Mr. K. A. L. Hill, District Magistrate, 24-Parganahs, opened the newly-constructed premises of the South Suburban Municipal Charitable Hospital on Saturday, the 21st December last.

In welcoming Mr. Hill and the guests, Mr. Biren Roy, Chairman of the Municipality, referred to the progress of medical relief in the South Suburban Municipal area and announced that Mrs. Roy has offered a donation of Rs. 10,000 for the completion of an annexe for the exclusive use of indigent women patients of this area.

Khulna Municipality

The District Congress Committee at a meeting adopted a resolution condemning the attitude of Mr. Mahendra Kumar Ghose (Congress), Chairman, Khulna Municipality and Messrs. Manindra Kumar Ray Chaudhury, Abinash Chandra Poi and Rajendra Nath Das Gupta (Congress) Commissioners over their signing a requision for presenting an address to His Excellency the Governor of Bengal on the occasion of His Excellency's visit to Khulna on the 28th November last and requesting them to resign from the Municipality. The Committee has also declared that they have ceased to be Congress members.

Tollygunge Municipality

A mass meeting of the residents of the villages Russa, Sibpur, Khanpur, Bajeraipur, Naktala, Baishnabghata, Garia and Jadavpur, included in the added area of the Tollygunge Municipality, was held on December 22, at Khanpur School and was largely attended by cultivators. It was unanimously resolved that objection be taken against the assessments on the ground among others that the assessments made were irregular, arbitrary, excessive, unfair and unjust.

It was further resolved that steps be taken to move the higher authorities in view of the fact that the law permits exclusion of the added area from the Tollygunge Municipality and for obtaining sanction for the formation of a new municipality or inclusion within the Calcutta Municipality in future when necessary.

Allahabad Municipal Budget

Presenting the budget estimates for the year 1940-41, Mr. R. N. Basu, Chairman of the Allahabad Municipal Board, said that the Board should strengthen its fire brigade by purchasing one or two more up-to-date engines. The estimates show certain unforeseen items of expenditure such as: Rs. 3,000 for census operations, Rs. 6,000 for power supply, Rs. 8,818 for buying alumina ferric, and Rs. 900 for buying animals.

According to the budget the water works capital expenditure would involve Rs. 20,990, wastage prevention scheme about Rs. 10,000, maintenance of water supply Rs. 18,192 and power supply Rs. 6,000. The drainage scheme would cost Rs. 3,01,841, sullage project Rs. 1,89,782, Katra-Colonelgunj drainage scheme Rs. 75,857 and the G. T. Road Rs. 96,685.

Howrah Municipal Commissioners

Mr. Subhas Chandra Bose has issued the following:—

"I am glad to be able to announce that, at my request, the Congress Commissioners of the Howrah Municipality, amongst whom differences had lately arisen, have resolved their differences, and the seven members who had submitted resignations from their membership of the Party have responded to my request to withdraw their resignations and to return to the Party.

"I thank them for all the spirit of accommodation which they have shown towards each other and I feel assured that they will be the same good old friends as they have been in the past. Whatever differences had arisen were, I am convinced, all honest differences of opinion, and I am sure that they will once again begin to show the same good team work which has characterised their actions in the past".

Municipalities In Assam

Certain changes are proposed to be made by the Government of Assam in regard to the rule governing the Municipal Boards concerning classification of transactions. According to the proposed rule the budget estimate of each Municipal Board shall be so framed as to provide for an adequate closing balance. Ten per cent. of the Municipal Board's income (excluding earmarked grants or grants made for specific purposes) shall be the minimum prescribed for such closing balance.

The Board at a meeting held at least two months before the close of the financial year shall prepare in detail estimates showing the probable receipts and expenditure during the ensuing year and the objects in respect of which it is proposed to incur such expenditure.

Without the special sanction, previously obtained, of the Provincial Government (in the case of Municipal Boards in the Surma Valley and Hill Division) and the Commissioner of Division (in case of Municipal Boards in the Assam Valley), no Board shall undertake any work which would involve the reduction of the closing balance below the minimum prescribed.

The proposed amendment will be taken into consideration on the 15th February, 1941, and any objections or suggestions in connection therewith should be submitted so as to reach the Provincial Government before that date.

Dacca Municipality

At the ordinary monthly meeting of the Commissioners of Dacca Municipality held last month after three previous postponements, it was suggested to postpone the general election of Dacca Municipality "to a date after the war".

Mr. Bimalananda Das Gupta (Congress) vehemently opposed such a move of extension of the life of the present Board and pointed out that the general election of the District Board of Dacca would be held in the next month (January, 1941), in spite of the war and the present census operations; so there was no reason why the municipal election could not be held during the war period. Moreover, the idea to postpone the municipal election to a date after the terminaton of the war was very vague as nobody knew when the war would end. Rai Bahadur Satyendra Kumar Das put forward another plea for postponement, viz., that the Municipal employees were very busy with the new assessment work that was going on and so the election should be postponed for a year. In reply to this, Bimalananda Babu said that as under the law such assessment would come every fifth year and as the Municipality was expected to be competent enough to manage both the election as well as the assessment whenever due, the move for postponement should be dropped. However, the Coalition Party of the Chairman and Mirza Abdul Kadir, by their combined votes, carried a resolution for one year's postponement of the general election.

Hyderabad And Sukkur Municipalities

To enable them to introduce joint electorates for the purpose of the next general elections, the Sind Government by a proclamation published in the Government *Gazette* announces that the terms of the Hyderabad and Sukkur Municipalities expiring in January, 1941, have been extended up to 30th June, 1941, and that of Shikarpur Municipality has been extended up to 18th April, 1941.

Ahmedabad Municipality

More applications were filed in the District Court on December 21 last, challenging the election of seven Congress candidates from two Wards of the Ahmedabad Municipality. In all the elections of 50 elected Congress candidates have thus been challenged.

The election of a woman Congress candidate has not been challenged as she was elected uncontested.

Rangpur Municipal Commissioner Acquitted

The Sessions Judge of Rangpur has set aside the conviction and sentence passed on Mr. Sachindra Mohon Ghosh, Municipal Commissioner, and seven others for, as alleged, having conducted unauthorised processions and meetings. They had been convicted by the Deputy Magistrate of Rangpur under the Defence of India Rules and sentenced to be on good behaviour for one year or in default to suffer rigorous imprisonment for 6 months.

All-India Local Self-Government Conference

The third session of the All-India Local Self-Government Conference held under the presidentship of Mr. N. R. Sarker concluded its sitting recently after adopting nine resolutions.

By one resolution the Conference appealed to Governments of provinces and Indian States to help the Local Authorities Union with funds and allow local bodies in their jurisdictions to pay subscriptions and donations to the Union. The President was authorized to negotiate with the Governments in this connexion.

The executive body of the Union was asked by another resolution to take steps for the immediate establishment of a central bureau of statistics and information.

A committee was constituted by a third resolution to draw up development programmes for urban and rural local bodies. To this committee were referred several proposals which formed the subject-matter of other resolutions such as improvement of roads and sanitation, levy of terminal taxes, transfer of property and non-motor vehicle taxes, definition of functions and financial resources of local bodies, co-operative insurance scheme for local bodies, establishment of village *panchayats*, improvement of housing, establishment of clinical laboratories, undertaking of public utility concerns and a financial organization for local bodies on the lines of a co-operative society.

A resolution was also passed requesting Governments to make it their definite policy to extend the powers of local authorities and not to curtail their autonomy and suggested that sympathetic and constructive control would be more conducive to healthy development of local self-government.

Three other resolutions were passed, one requesting Governments to set apart certain sources of taxation specifically for local bodies and allow a share in the proceeds of certain taxes. The second requested Government of India to renew their grant of the crore of rupees for rural re-construction and the third wanted railway authorities to allow concessions in fares to delegates attending local self-government conferences.

HINDU-MOSLEM CULTURAL UNITY

Presiding over the 18th Session of the Prabasi Banga Sahitya Sammelan Mr. G. S. Dutt, retired I.C.S., declared:

"Bengal is lagging behind in every walk of life to-day. In the political, economic and in every other field she is faced with defeat. But in the midst of this dense darkness enveloping her, there is one silver lining. Her literature deposit everything is shining in all brilliance. Its growth and progress have kept pace with the best literatures of the world. Its vigour and opulence have evoked hope and admiration."

Mr. Dutt further added: "The liveliness and richness of our literature are amply borne out not only by the works of *Sahiya-Samrat* Rabindranath but also by the works of many modern writers. The vigorous and original creativeness that underlies the national life of Bengal is the fountain-source of this literature. Apart from its creative power and originality, Bengali literature possesses a unique harmonising and unifying power. That explains the current of deep and inseparable bond between Hindus and Moslems which flows through Bengali literature, which is unexampled. Both Hindus and Moslems are equally proud of this basic cultural unity. It is my firm belief that despite political dissensions, this cultural unity will endure. Through this unity in literature the unity that will be established in the national life of Bengal will at once inspire and benefit the whole of India."

Opening the Session, Mr. J. J. Ghandy, of Tata's, paid a remarkable tribute to Bengali literature. He said, whether you study the spiritual romanticism of Rabindranath Tagore and of his followers or the intellectualism of some of the younger poets of to-day you cannot but conclude that Bengali literature is not stagnant. Bathed in western springs it has enriched itself. He continued:

"It is unfortunate, however,—though I think it was unavoidable—that the rapidity with which your literature has developed should have brought in its train a certain degree of looseness in the structure of your language. In this age of science, no language can afford to remain a language of idealistic poetry or romance. It must be precise".

Referring to the backwardness of the Bengalis in the field of trade and commerce, Mr. Ghandy expressed confidence that in course of time, "the Bengali will develop a realistic sense which will enable him to achieve as much success in the field

—Calcutta News & Views

(*Continued from page* 208)

The Chief Executive Officer, Corporation of Calcutta, invited a group of experts and specialists in Gynaecology to form an Advisory Committee in this connection.

At the inaugural meeting the Chief Executive Officer explained the direct objects of the proposed Exhibition and considering the fact that Calcutta happens to suffer yet from high mortality of the infants as well as of the mothers, it was extremely desirable to organise a popular exhibition on Mother and Child. Lt-Col. A. C. Chatterjee, Director of Public Health, Government of Bengal, was elected Chairman of the Advisory Committee, Dr. Syed Zaffar Ahmed, Chairman of the Public Health Standing Committee of the Corporation, Dr. Sundari Mohon Das and Dr. Bamandas Mukerjee, were elected as Vice-Chairmen.

RATEPAYERS' PROTEST

The reactionary provisions of the Second Calcutta Municipal Amendment Bill, 1940, now on the anvil of the Legislative Assembly, were thoroughly exposed by a number of speakers at a meeting of the rate-payers of Ward 21 held at Maddox Square, Ritchie Road, on the 30th December last, when Mr. J. C. Gupta occupied the Chair.

The object of the meeting, as explained by the speakers, was to elect delegates from that Ward to the big Conference that was going to be held at Town Hall on 9th and 10th January, and also to invite their whole-hearted support and co-operation for the Conference, so that it might be a complete success.

Mr. J. C. Gupta recalled how inspite of their vehement opposition in the Assembly the Bill was sent to the Select Committee. Mr. Gupta said that it was to be regretted that even the rate-payers, whose interests were vitally involved, were not given any chance to have their say in the matter. Mr. Gupta alluded to the deep discontent among the Hindu citizens because they were deprived of their legitimate share of seats proportionate to the amount of taxes they paid. He said that the present measure was still more detrimental to their interests and so it should be their firm resolve to oppose its enactment.

Mr. Benoyendra Bagchi, President of the Ward 21 Rate-payers' Association, discussed the provisions of the new Bill and said that if this Bill was passed into law, the Corporation would virtually go to the hands of the Government. The Mayor and the Deputy Mayor would be mere figureheads bereft of any power. He appealed to the rate-payers of that Ward to come forward and lend their hearty help and co-operation to the coming Conference at Town Hall.

* * *

An appeal to the citizens to muster strong at the forthcoming conference of rate-payers to protest against the enactment of the Second Calcutta Municipal Bill which takes place on January 9 was made by Councillor Bepin Behari Ganguly presiding over a public meeting held on Friday evening at St. James' Square in Bowbazar.

of trade and commerce as he has done in the realms of art and literature."

A resolution condemning unreservedly the proposed measure was adopted at the meeting.

CALCUTTA CORPORATION EMPLOYEES' ASSOCIATION

The annual *Priti Sammilani* of the Calcutta Corporation Employees' Association was held on Tuesday, the 17th December, at 7 p.m. at the Minerva Theatre Board under the presidency of Councillor Sudhir Chandra Ray Chaudhuri. About four thousand employees and labourers attended the function. Mr. J. C. Mukerjea, Barrister-at-Law Chief Executive Officer of the Corporation, was the Chief Guest. Many other distinguished people were present.

Mr. Sudhir Chandra Ray Chaudhuri, the President, in course of his speech sounded a note of warning to the audience drawing their attention to Calcutta Municipal Act Amendment Bill, which if enacted, would cripple the activities of the Association in the largest measure. Under the Act the Councillors would have no power to redress the grievances of the employees, and so the organisation of the employees would be faced with the greatest danger. It would be the duty of the Association, he said, to fight out the Black Bill on the lines to be suggested by him and for which he drew up a comprehensive programme. He also said that money would not be wanting to do away with this re-actionary Bill.

Calcutta Associations & Institutions

CALCUTTA CORPORATION EMPLOYEES' ASSOCIATION

Annual Priti Smmilani

The Annual "Priti Sammilani" of the Calcutta Corporation Employees' Association was held on Tuesday, the 17th December, 1940, at 7 p.m., at the Minerva Theatre Board, Councillor Sudhir Chandra Ray Chaudhuri presiding. About four thousand employees and labourers attended the function. Mr. J. C. Mukerjea, Bar-at-Law, Chief Executive Officer of the Corporation, was the Chief Guest.

Among the distinguished guests were Mr. Satya Priya Banerjee, M.L.A., Mr. Aswini Kumar Ganguly, Mr. Amar Basu, Mr. Purusottom Roy, Mr. Tarak Nath Das, Mrs. J. C. Mukerjea and Mr. B. C. Mullick.

After the National Song by Mr. Bankim Behari Ghorai, Miss Namita Roy Chowdhury delighted the audience with a Hindi song. Mr. Radharaman Roy Chowdhury then welcomed those present on behalf of the Association which, he said, had been doing laudable work for the last seventeen years in spite of many of its selfless workers having had to suffer for faithful service to the Association.

Proceeding, the speaker referred to a speech delivered by the Mayor to the Executive Council of the Association in which the Mayor had questioned whether the Association had thought of the Moslem Problem, Mr. Roy Chowdury said that in the Corporation the workers were actuated only by a lofty sense of nationalism and not by narrow communalism.

The speaker next related how stoppage of advance salaries caused great hardship to workers. He further strongly protested against the proposal to recruit to higher services by competitive examination. Voicing the opinion of the Association, he said that all posts in higher grades should be filled only by promotion. He deprecated the filling of Corporation posts, in the past, by raw outsiders most of whom were either related to Councillors or Heads of Departments. He maintained that the higher grade posts should be filled by promotion as it was the best method and would bring contentment among the staff and efficiency in its train. Concluding, the speaker thanked the Chief Executive Officer and Mr. Sudhir Chandra Ray Chaudhuri, the President of the Association, for the help they had rendered to the Association.

Mr. Sukhen Chatterjee, the Labour Secretary and Mr. Haranath Chakrabarty, the Social Secretary delivered impressive speeches and Mr. Subodh Chandra Mitter, the Assistant Secretary, narrated the hardships which the labourers of the Corporation had to suffer due to the unsympathetic attitude of the higher officials and also complained of their being exploited for selfish ends.

Mr. J. C. Mukerjea, Chief Executive Officer, spoke highly of the manifold activities of the Association. The Association, he said, had always been helpful to the administration, and though due to various circumstances it had not been possible for him to accede even to its reasonable demands, yet he would say that at no time the Association put the administration to any embarrasing position. He always bestowed serious consideration to any representation, made by the Association. He thanked the workers who organised such a function, year after year, in order to give recreation and pleasures to the employees and workers of the Corporation who had to perform arduous works. Rising amidst great ovation, Mr. Sudhir Chandra Ray Chaudhuri, the President, praised the manifold activities of the Association but he also sounded a note of warning and drew attention to the Calcutta Municipal Act Amendment Bill which, if enacted, would cripple the activities of the Association in the largest measure. Under the Act the Councillors would have no power to redress the grievances of the employees, and so the organisation of the employees would be faced with the gravest danger. It would be the duty of the Association, he continued, to fight out the "Black Bill" on the lines suggested by him and for which he drew up a comprehensive programme. He also said that already a generous gentleman had promised to pay him Rs. 50,000 to fight out the "Black Bill" and, he assured, money would not be wanting to struggle against this re-actionary Bill.

After the presidential speech the Calcutta Corporation Dramatic Club successfully staged a Drama, named "Alamgir," wherein Messrs. Moni Ghose (Bustee Department), Jogesh Kamal Das Gupta (City Architect's Department), who appeared as 'Udipuri', and Kamakhya Chatterjee (Printing Department), played their respective roles to perfection and received great praise.

HEALTH OFFICER

Dr. S. N. Ghose, Health Officer, Corporation of Calcutta, is going out of Calcutta on leave and Dr. J. P. Chowdhury, District Health Officer, District No. I, will act in his place.

THE Improvement Trust

The following extracts are taken from the Proceedings of the Meeting of the Calcutta Improvement Trust, held on Saturday, the 23rd November, 1940 :—

PRESENT : Mr. C. W. Gurner, I.C.S., *Chairman;* Mr. Sailapati Chatterjee, Acting Chief Executive Officer, Corporation of Calcutta; Mr. Abdur Rahman Siddiqi, Rai Sahib Chandan Mul Karnani; Mr. A. J. Thompson; Mrs. Hasina Murshed; Mr. Sudhir Chandra Ray Chaudhuri; Mr. J. N. Birch; and Sir Hari Sanker Paul.

HOWRAH IMPROVEMENT

With reference to Resolution No. 12 of the Board Meeting, held on the 17th June, 1939, associating

(1) Mr. B. P. Pain, (Chairman), Howrah Municipality,

(2) Mr. Saila Kumar Mukherjee, Commissioner, Howrah Municipality,

(3) Mr. J. A. Murray (Howrah Jute Mills), and

(4) The Magistrate of Howrah,

with the Board, under Section 19 of the Calcutta Improvement Act, for the purpose of carrying out the provisions of the Act to an area in the Howrah Municipality, sanction was accorded to their continuing associated members for the 2nd and 3rd terms covering six monthly periods, from 17th December, 1939, to 16th June, 1940, and from 17th June, 1940, to 16th December, 1940, as is required under the rules for co-opted members.

Sanction was also *accorded* to their continuing as associated members for a further period of six months from 17th December, 1940, to 16th June, 1941.

With reference to Resolution No. 2 of the Board Meeting (Part 1), held on the 27th July, 1940, appointing a Committee to hear objections to Improvement Scheme No. I—Howrah (New Howrah Bridge to Dobson Road), it was *reported* that Sir Hari Sanker Paul, Kt., had been included in the Committee with the approval of the members of the Board obtained by having the proposal circulated to them.

SOUTHERN AVENUE

The Board considered the Chairman's note of the 11th November, 1940, and *resolved*, by majority, Mr. Siddiqi and Mrs. Murshed dissenting, that the Resolution of the 29th June, 1940, be rescinded and that Scheme No. XLVII (Eastern portion of Southern Avenue) be adhered to, as sanctioned in respect of the Open Space.

ENTALLY IMPROVEMENT

With reference to Resolution No. 4 of the Board Meeting, held on the 3rd June, 1939, sanctioning a preliminary engineering estimate amounting to Rs. 7,39,000 for Scheme No. LII (South Road, Entally, to Middle Road, Entally), the Board *accorded* their sanction to the Chief Engineer's revised preliminary engineering estimate amounting to Rs. 8,36,000 necessitated for providing a central reservation for tramway tracks of 26 feet.

TENDER FOR ROAD CONSTRUCTION

With reference to Resolution No. 12 of the Board Meeting, held on the 16th September, 1939, and No. 12 of the Board Meeting, held on the 4th March, 1940, accepting the tender of Messrs. Dutt and Company, amounting to Rs. 46,772-1-6, for road construction, sewerage, drainage works, etc., on the main road from Radhabazar Street to Lall Bazar Street with side roads, in Scheme No. XLV (Howrah Bridge Approach—Dalhousie Square North to Canning Street), 3rd section, and sanctioning an increase in the contract amount by Rs. 3,120 (from Rs. 46,772-1-6 to Rs. 49,892-1-6), the Board considered the Chief Engineer's note of the 19th November, 1940, and *accorded* their sanction to an additional expenditure amounting to Rs. 6,600 for transporting surplus earth, etc., not provided for in the contract, and to the consequential increase in the contract amount by Rs. 6,600, *i.e.*, from Rs. 49,892-1-6 to Rs. 56,492-1-6.

The Board also *approved* of the rate for transporting surplus earth, etc., within a radius of 5 miles at Rs. 35 per 1,000 c.ft.

NEW ASSESSOR

It was *reported* that the Calcutta Corporation had appointed, under Section 72 of the Calcutta Improvement Act, Mr. Abdus Sattar, M.A., B.L., to be an Assessor of the Calcutta Improvement Tribunal, with effect from the 18th November, 1940.

VITAL STATISTICS

For the City of Calcutta for the week ending 21st December, 1940.

CITY OF CALCUTTA (TOWN & SUBURBS.)

The total number of deaths registered during the week was 745 against 650 and 691 in the two preceding weeks and higher than the corresponding week of the last year by 11. The general death-rate of the week was 34·1 per mille against 32.2 the mean of the last five years.

Town (*Wards* 1—25 *and* 27.)

The number of deaths registered during the week ending 21st December 1940, was 635 against 554 and 579 in the two preceding weeks. There were 23 deaths from cholera, against 10 and 18 in the two preceding weeks. There were 36 deaths from small-pox during the week against 32 in the previous week. There were 4 deaths from influenza against 4 in the previous week. The mortality from fevers and bowel-complaints amounted to 40 and 78 respectively against 23 and 65 in the preceding week. The general death-rate of the week was 32·9 per mille per annum.

There were 36 imported deaths. Excluding these, the death-rate of the town was 31·7.

There were 122 deaths from respiratory diseases against 113 in the previous week.

There were 54 deaths from tuberculosis against 66 in the previous week.

There were 117 deaths of infants under one year.

Suburbs (*Wards* 28—32.)

The number of deaths registered was 113 against 106 and 112 in the two preceding weeks. Of these 12 were from cholera, 4 from small-pox, 1 from influenza, 7 from fevers, 17 from bowel-complaints and 32 from respiratory diseases. The death-rate of the suburbs or added areas was 41.3 per mille.

There were 13 imported deaths. Excluding these, the death-rate was 36·6.

There were 9 deaths from tuberculosis against 10 in the previous week.

There were 21 deaths of infants under one year.

CORPORATION NOTICES

To Contractors

Tenders are invited in duplicate for the following and will be received by the First Deputy Executive Officer on the date noted for each, up to 2 p.m. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for....." For specifications and tender forms apply to the Keeper of Records between 11 a.m. and 3 p.m. on week days and 11 a.m. and 1 p.m. on Saturdays. Price Rs. 2 per set.

1. Supply of Printing Stationery during 1941-42.
2. Supply of Office Stationery during 1941-42.
3. Supply of Typewriting and Duplicating materials during 1941-42.
4. Supply of Drawing materials during 1941-42.
5. Supply of Alum Cake during the year 1941-42.
6. Supply of Hard Coke No. 1 and Smithy Coal at the Entally Workshops during the year 1941-42.
7. Supply of Mild Steel, Chequered plate, etc., during the year 1941-42.
8. Supply of Indian Pig Iron during the year 1941-42.
9. Laying of High Tension Underground Cable from Topsia Pumping Station to the Press Sedimentation Tanks at Bantala.
10. Construction of shelter shed in Mansatala Park.
11. Supply of calves for the rest of the year 1940-41.

Tenders for 1 and 2 will be opened on 7th January, for 3 and 4 on 8th January, for 5 and 6 on 14th January, for 7 and 8 on 15th January, for 9 on 16th January, and for 10 and 11 on 17th January, 1941. The rates quoted in the tenders for the above are to hold good for three months.

N.B.—All cases of delay over a fortnight in the execution of agreements in respect of works and supply of materials will be reported to the Committee and the parties will not be allowed to execute the agreements after that period without obtaining orders of the Committee.

In case a party deposits earnest money by cheque, he must deposit the cheque at least three working days before the date of opening of the tender.

The contractors should maintain an uniformity of their names and styles of business, appearing on various documents, *e.g.*, Treasurer's receipts, tender forms, agreements, licenses and bills.

Any deviation from this on the part of any contractor whenever detected, will render his tender liable for cancellation.

Where tenders are submitted by a Corporation, it should be signed by a principal officer of the Corporation or by an agent duly authorised in that behalf and be attested by a witness. Where it is submitted by a firm, it should be signed by the proprietor or one of the partners or by an agent duly authorised in that behalf by the firm and be similarly attested

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office,
The 2nd January, 1941.

DRAINAGE DEPARTMENT.

To All P. I. Contractors,
District II and Manicktolla.

Re: Repairs to Manicktolla Syphon P. S.

Dear Sirs,

Please submit your tender in the prescribed tender form for the petty improvement works of the Corporation for the above work, the details of which can be obtained from the department. The tender in a sealed cover, endorsed as above will be received by me on the 6th January, 1941, at 12 noon.

The work is to be completed within one month from the date of order to take up the work in hand.

Yours faithfully,
P. C. BOSE,
Executive Engineer, Drainage.

Central Municipal Office.
The 2nd January, 1941.

Auction Sale.

Notice is hereby given for public information that the following materials will be sold by public auction in the Corporation Entally Workshops at Convent Road on Tuesday, the 7th January, 1941, at 9 a.m. The whole of the bid money is to be deposited on the spot to the officer-in-charge and the materials to be removed within a fortnight from the date of sale, failing, the left out materials shall be confiscated to the Corporation.

List of materials.

1. ½-in. thick old teak wood planks (pieces)—800 sq. ft. (approximately).
2. Teak wood scantlings (in pieces, old) —12 c.ft. (approximately).

A. F. NABI BAKSH,
District Engineer, III.

District III Eng'g Office.
The 23rd December, 1940.

License To Food Vendors

RE: GANGA SAGAR MELA

Notice is hereby given that only licensed vendors will be allowed to sell food-stuffs in the Embarkation Ground near Prinsep's Ghat to the pilgrims going to the Ganga Sagar Mela this year. Intending vendors must apply for and obtain license from the District Health Officer, District No. IV, before the 9th January, 1941.

License will be granted to those vendors only who undertake to keep food-stuffs under fly-proof screens and not to use vegetable products for preparing sweets.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office.
The 2nd January, 1941.

Quotations for Advertisement Kiosks

Offers in sealed covers superscribed "Kiosks on Telegraph and Tramway Poles" are invited for the utilisation of telegraph and tramway poles erected on Corporation land all over the City for advertisement purposes for a period of five years from the 1st April, 1941, subject to the following terms and conditions:—

(a) That no Corporation lamp-post shall be used for the purpose of putting up Kiosks, the agreement and the payment being for the right to put up Kiosks on Government telegraph posts and tramway poles only.

(b) That the party will have the right to display not only porcelain enamel advertisements, but of hand painted or printed paper posters.

(c) That there should be no advertisement of spirituous liquor on the Kiosks.

(d) That the type of Kiosks to be erected and the nature of the advertisements displayed are to be subject to the approval of the Chief Executive Officer.

(e) That the Corporation will have the right to dispose of complaints, if any, regarding selection of particular sites for advertisement posters.

(f) That a lump sum fee per annum should be quoted, it being understood that the fee should be payable in monthly instalments within a week from the receipt of the monthly bills.

The offer must reach the undersigned on or before Wednesday, the 8th January, 1941.

M. RAY,
Offg. Secretary to the Corporation.

Central Municipal Office
The 13th December, 1940.

Drain Land Closed

Notice is hereby given for the information of the public that in pursuance of a resolution passed by the Corporation at their meeting held on the 4th September, 1940, in exercise of the powers vested in them under Section 252 of the Calcutta Municipal Act III (B.C.) of 1923, the portion of the filled up drain land adjoining to the north of premises No. 32, Lansdowne Road in Ward 21, measuring 4 chittacks 20 sq. ft. sold to the owners of the said premises, delineated in the map or plan prepared in this behalf and thereon coloured red and marked D. E., has been permanently closed to the public with effect from the date of the Corporation resolution referred to above.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office,
The 23rd December, 1940.

Cancellation of Alignment.

It is hereby notified for general information that the Corporation of Calcutta, under powers, vested in them in this behalf, have, by a resolution dated the 4th December, 1940, cancelled the portion of the alignment of the 20 ft., projected public street, connecting Olai Chandi Road with a new C. I. T., Road, falling within the C. I. T. Scheme —Cossipore-Chitpore Open Space, (Section II) in Ward No. 30, which was previously sanctioned by the Corporation on 10th March, 1937.

A copy of the plan, showing the portion of the alignment, cancelled, may be seen in the office of the Chief Valuer and Surveyor of the Corporation, any working day except Saturday, between 11 a.m. and 2-30 p.m. and between 11 a.m. and 12-30 p.m., on Saturdays only, on payment of usual fees.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office,
The 13th December, 1940.

CORPORATION NOTICES—*Contd.*

Collection Department.

NOTICE

This is to notify that the office collection Receipt No. 76 of the Collection Department, Division VII of Form No. A.C.-8, having been lost from the book in the blank form, will not be recognized by the Corporation if at any time it is found to have been misused.

A. K BASAK,
Asst. Collector.

Central Municipal Office.
The 13th December, 1940.

Modification & Cancellation of Alignment.

Notice is hereby given under Section 308 read with Section 302 of the Calcutta Municipal Act III (B. C.) of 1923, that the Roads and Bustees Standing Committee of the Corporation in exercise of the powers delegated unto them in this behalf have considered it expedient to cancel the portion (marked P Q R on the plan) and to modify the portion (marked R S on the plan), of the alignment of the 40 ft. projected public street off Alipore Park Road East (now Raja Santosh Road and running towards south and east to Alipore Bridge in Ward 24, which was originally sanctioned on 23rd November, 1922, by the General Committee of the Corporation as constituted under Act III (B. C.) of 1899.

Any person having any objection to the same should submit it in writing so as to reach the undersigned on or before Saturday, the 18th January, 1941.

A copy of the plan showing the proposed concellation and modification, of the portions of the alignment may be seen in the office of the Chief Valuer and Surveyor of the Corporation between the hours of 11 a.m. and 2 p.m. on all working days.

J. C. MUKERJEA,
Chief Executive Officer

Central Municipal Office.
The 19th December, 1940.

Ward Maps for Sale

Notice is hereby given for the information of the public that copies of Ward Maps of the City (drawn to a scale of 12 inches to the mile) are ready for sale at rates fixed by the Corporation in accordance with the provision of Section 551 (2) of the Calcutta Municipal Act, 1923. Necessary details of information may be had from the Chief Estimator in the Chief Engineer's Office in the Central Municipal Office Buildings.

M. RAY,
Offg. Secretary to the Corporation.
Central Municipal Office,
The 7th December, 1940.

Special Notice

Health Officer's Advice.

With a view to prevent, as far as practicable, the occurance of epidemics of small-pox and cholera, an extra staff of Vaccinators and Inoculation Officers have been appointed for vaccinating against small-pox and inoculating against cholera.

The public are aware that vaccination and inoculation offer protection against an attack of the virulent diseases mentioned above.

It is, therefore, expected that the public would avail themselves of the services of this extra staff by getting themselves vaccinated and inoculated without delay, and thus co-operate with the Health Officer in attaining the object.

The public may apply to the District Health Officers of the Districts concerned at the undermentioned addresses as well as at the nearest Corporation Vaccination Stations for services of the extra staff mentioned above :—

District I Health Officer—79, Cornwallis Street.
District II Health Officer—22, Mirzapore Street.
District III Health Officer—1, Hogg Street.
District IV Health Officer—11, Belvedre Road.
Health Officer, Cossipore—10 and 11, Barrackpore Trunk Road.
Health Officer, Manicktala—109, Narkeldanga Main Road.

S. N. GHOSE,
Health Officer,

Central Municipal Office.
The 7th December, 1940.

S. S. Hogg Market.

NOTICE

To all whom it may concern, that Mr. Saroj Kumar Mukherjee has applied for registration of his name as the occupier of Stall No. 37, in the Flower Range in the Sir Stuart Hogg Market in place of Mr. Bepin Chandra Bhuiya, the recorded occupier of the above stall, who has by a registered deed transferred his rights and interests in the said stall to the former.

Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

A. QASIM,
Revenue Officer.

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—

10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.

Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

When you stop advertising, this is what you say in effect:

"We hereby notify everybody that we do not expect to do business any more."

Municipal orders do not wait. All the 12 months, the municipalities are buying equipment and supplies and the "Gazette" advertisement will bring you results just as well as it will in March.

Keep up your advertising every month in the year if you expect to do business all the year around.

Chronicle & Comment

The Late Mr. L. M. Sen

We have to place on record our deep sense of sorrow at the death of Mr. L. M. Sen, a former Councillor of the Corporation of Calcutta. He passed away last month, immediately before the Christmas holidays, after a prolonged period of painful illness, which he bore with fortitude. Alike by temperament and intellectual equipment, the late Mr. Sen was eminently fitted for civic service. This he rendered with an ability and devotion to which his colleagues in the Corporation from 1924-1930 must bear testimony. Later Mr. Sen joined the Howrah Municipality as its Chief Engineer and was responsible for many improvements. Ill health compelled him to seek early retirement and he lived the life of a recluse, away from the city. The loss of Mr. Sen will be deeply felt by all those who knew him, and great sympathy must be felt for his eldest brother, Mr. Nisith C. Sen, *ex*-Mayor of Calcutta, to whom we offer our sincerest condolence.

Councillor Khan Bahadur Md. Solaiman

We regret the omission of the name of Maulvi Muhammad Solaiman, M.L.A., the Councillor representing Mahomedan constituencies in Wards 1, 2, 3 and 5 in the Corporation, from the note on the New Year Honours in the last issue of the *Gazette*. Councillor Solaiman has been made a Khan Bahadur, and we hasten to offer him our sincerest congratulations, in which we are sure all his many friends in the Corporation will most heartily join.

Inspection Of Mosquito Control Work

Major Jaswant Singh, M.B., Ch.B., D.P.H., D.T.M. & H., I.M.S., Assistant Director of the Malaria Institute of India, Delhi, visited the Salt

Lake area on the eastern fringe of Calcutta on 31st December, 1940, and observed the conditions that have favoured the breeding of *Anopheles sundaicus* (*ludlowii*), a malaria-carrying species of mosquito.

The mosquito control operations by the staff of the Bengal Public Health Department and of the Calcutta Corporation were shown to Major Singh by Dr. S. N. Sur, Assistant Director of the Public Health, Bengal, Dr. H. P. Chowdhury, Entomologist and Dr. K. L. Chowdhury, Mosquito Control Officer of the Calcutta Corporation. Major Singh also observed the present system of sewage disposal of the city from two places,—one near the Palmer Bazar Pumping Station, and another at the end of Hughes Road, where he met Mr. P. C. Bose, Executive Engineer, Drainage, Calcutta Corporation, who explained to him Dr. B. N. Dey's new sewage disposal scheme that will come into operation very soon.

The enormous extent of breeding places of *Culex fatigans*, the spring nuisance mosquito of this city that breeds in the open *kutcha* drains and the sewage channels was pointed out by Dr. K. L. Chowdhury.

Major Singh visited the laboratory of the Calcutta Corporation Mosquito Control Department at the Town Hall on Saturday, the 4th of January, 1941, and saw some statistical records and charts.

Sanitary Improvement In Bengal

An increase of about a lakh of rupees in capital expenditure on waterworks and sewerage works was recorded in the year 1939 by the Department of Public Health and Local Self-Government, states a resolution of the Government of Bengal on the working of the department.

The increase indicates that in spite of the comparatively poor finances of local bodies, satisfactory progress was maintained towards undertaking sanitary improvement schemes. There was also a fairly large increase in the receipts of the department on account of fees for the preparation of schemes and supervision of construction—the total gross receipts during the year being Rs. 54,220 against Rs. 33,231 in the preceding year. The total estimated cost of the schemes was Rs. 43,01,006, against Rs. 99,26,000 during the previous year.

The total number of persons served by the waterworks was 1,418,967 and the total quantity of filtered water supplied amounted to 18,725,679 gallons. The quality of the water supplied from the various waterworks was reported to be satisfactory.

The chief event of the year was the completion of the main works of the Baranagar-Kamarhati joint water-supply scheme, the first of its kind in the province. The members of the joint water-supply scheme having failed to arrive at an agreement in regard to the management of the joint waterworks, the management was taken over by the Government and placed under the Chief Engineer, Public Health Department.

Public Health In Britain

Satisfaction is generally expressed at the reassuring statement by Sir Wilson Jameson, Chief Medical Officer to the Ministry of Health, concerning public health in Britain in war-time with special reference to the conditions in air raid shelters.

The Times commenting on the statement says :—"The welfare of the whole community is bound up with securing healthy conditions in shelters, and therefore, Sir W. Jameson's statement that no outbreak of infection has been reported in any of them is all the more welcome."

The paper adds, however, that the "one shadow in the figures was caused by the increase of cerebro-spinal fever—a disease closely associated with over-crowded war-time conditions."

Again, however, comfort can be gained from Sir W. Jameson's words :—"In the past, deaths among cases were about 60 per cent. Although we are still very much afraid of it, our great dread has gone and that is very largely a British achievement. In cases diagnosed sufficiently early and treated in a proper manner by means of special drugs, mortality in hospitals has fallen as low as five per cent. including those malignant cases which normally would die within 24 hours. That is an achievement of which this country has good reason to be proud."

WESTMINSTER CITY HALL DAMAGED

Westminster Cathedral and Westminster City Hall and Temple were among the buildings damaged in a recent air raid.

Several incendiaries and high explosive bombs fell on the City Hall and set the first floor of the council chamber on fire. The chamber was burnt out and the contents fell to the ground floor. A considerable amount of superficial damage was done to the building. The robing-room was badly damaged by water. The staff on duty tackled the fire bravely until fire-fighters arrived. The City records archives and the Mace were removed some time ago to various parts of the country as also portraits of past Mayors and pictures of historical scenes. There were no casualties.

The Week In The Corporation

(*Continued from page* 239)

Scientific And Technical Advisory Board

The Corporation meeting on the 7th January last expressed the opinion that it viewed with approval the proposal for the formation of a Scientific and Technical Advisory Board as outlined by the Mayor in his speech on the occasion of the opening of the Corporation Central Laboratory and with a view to ensuring co-operation between the Experts and the Corporation requested the Mayor to draw up a scheme in consultation with the Experts and the Chief Executive Officer for the consideration of the Corporation.

In moving the resolution Mr. Naresh Nath Mookerjee said that as they now had a Central Laboratory of their own it was in the fitness of things that they should have a Board as suggested.

In seconding Mr. Hamoodur Rahman congratulated the scientists who had generously come forward and offered their services and opined that there was no doubt that a good deal could be learnt to their benefit from these experts.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETINGS FOR THE WEEK ENDING JANUARY 10, 1941

SPECIAL MEETING OF THE CORPORATION HELD ON TUESDAY, THE 7TH JANUARY, 1941.

Standing Committee Vacancies Filled Up

Vacancies in the following Standing Committees were filled up as below :—

(1) *Water-Supply Standing Committee*—Mr. S. Sharfuddin Ahmed was elected in place of Mr. Abdus Sattar resigned.

(2) *Public Health Standing Committee*—Mr. J. J. N. Birch was elected in place of Dr. Sadeque Hossain resigned.

Councillor Vernon Resigns

The meeting accepted with regret the resignation tendered by Mr. G. S. G. Vernon (Leader of the European Group) of his seat as a Councillor of the Corporation and recorded its appreciation of the services rendered by him in the cause of the Corporation.

The letter of resignation dated the 17th December, 1940, stated as follows :—

> "As I have taken up a part-time Government appointment in connection with war work, which, besides occupying a large proportion of my spare time, also entails frequent absences from Calcutta, I regret that I am compelled to submit herewith my resignation as a Councillor of the Corporation.
>
> "I should like to take this opportunity of thanking the Mayor and the Deputy Mayor, the permanent officials and my fellow Councillors for the courtesy and good will they have always extended to me during the period I have been a member of the Corporation."

Tributes were paid to Mr. Vernon's work in the Corporation by Mr. M. A. H. Ispahani representing the Muslim League and Mr. N. C. Chatterjee representing the Hindu Mahasabha groups in the House.

In appreciating Mr. Vernon's work in the Corporation, the Mayor said that he hoped that Mr. Vernon would be back in their midst as soon as the duties to which he had been called were finished.

Leave Of Absence To Alderman Subhas Bose

The meeting considered under Section 41(c) of the Act an application from Alderman Subhas Chandra Bose for leave of absence from the meetings of the Corporation for six months from the 2nd July, 1940, and also for such further period as the Corporation may consider fit, and resolved :—"That the Corporation considers the absence of Alderman Subhas Chandra Bose from its meetings justifiable under Section 41(c) of the Calcutta Municipal Act."

In his letter Mr. Bose stated *inter alia* : "You are aware that I was arrested on the 2nd July, 1940 and was in detention from that date till the 5th December, 1940, when I was suddenly released. Since the latter date, I have been confined to bed.

"Thus owing to circumstances beyond my control and latterly owing to ill-health I have been unable to attend any meeting of the Corporation since the 2nd July, 1940. Owing to the prevailing uncertainty I am not sure either as to when I shall be able to attend the meetings of the Corporation."

On the matter coming up before the meeting, Mr. M. A. H. Ispahani moved that leave might be granted to Mr. Bose for a total period of one year.

Mr. N. C. Chatterjee drew the attention of the House to Section 41(c) of the Calcutta Municipal Act in which it was stated that if a person absented himself consecutively from the meetings of the Corporation for a period of six months, except from temporary illness or other causes which the Corporation considered to be sufficiently justifiable, such a person ceased to be a Councillor or Alderman.

Mr. Chatterjee pointed out that they were sorry to be temporarily deprived of Mr. Bose's services. Mr. Bose was certainly indispensable to the Corporation. Mr. Chatterjee said that he had referred to Section 41(c) of the Act not to oppose this motion but to safeguard the position of Mr. Bose, so that he might not be put in jeopardy in future. The Corporation could only record its opinion and condone the absence of Mr. Bose. It could not deal with the question of anticipatory leave of absence: that would be going beyond the Act.

Mr. Chatterjee, therefore, moved that the Corporation should consider Alderman Subhas Chandra Bose's absence from the meetings of the Corporation since July 2 last as sufficiently justifiable.

Mr. Chatterjee's amendment, which was accepted by Mr. Ispahani was carried.

Post of the Chief Executive Officer

By 25 to 24 votes, 2 not voting, the meeting decided, at the instance of Councillor Hamoodur Rahman, to postpone the issue of an advertisement inviting applications for the post of Chief Executive Officer, till the first week of March next.

It will be recalled that in view of the fact that the term of appointment of Mr. J. C. Mukerjee as Chief

Executive Officer expires on March 31 next, the Services Standing Committee No. I, at its meeting on December 3 last, recommended that steps be taken to issue an advertisement inviting applications for the post. At the Corporation meeting held on December 11 last, confirmation of the recommendation of the Committee was moved and seconded. Consideration of the matter was, however, postponed till the first meeting of the Corporation in January, 1941.

When the item came up for consideration at last Tuesday's Special Meeting of the Corporation, Mr. Hamoodur Rahman moved for postponement of the issue of advertisement inviting applications, as stated above.

Mr. Rahman said that the Municipal Amendment Bill was on the legislative anvil, and in all probability it would be passed into law. If the Bill was passed into law, it would not be necessary for the Corporation to issue any advertisement for the post at all. Under the circumstances he considered the issuing of an advertisement inviting applications for the post of Chief Executive Officer at this stage as a 'farce.' He further remarked that if any advertisement was necessary, the right time to issue such an advertisement was when the vacancy arose.

"There is no secret," Mr. Rahman observed, "that we are supporting the amending bill and certainly we should not complicate the matter any further."

Mr. Naresh Nath Mookerjee in opposing the postponement motion, said that there was no knowing when the Bill would be passed into law. The Bill might be shelved for two or three years. There was no reason, therefore, for the Corporation to stop functioning and postpone issue of the advertisement simply because the Bill was on the legislative anvil. If they were really serious about the appointment they ought to have advertised all over the country long ago, so that they might have sufficient time to consider the applications.

Mr. B. N. Roy Choudhury thought that the reasons advanced by Mr. Rahman were very weighty. The Corporation had discussed the bill threadbare and had come to the decision that the amendment proposed in the bill was for the good of the Corporation so far as it related to appointment of the Chief Executive Officer.

Mr. N. C. Chatterjee objecting said: Quite the other way. The Corporation is definitely against the suggested amendment.

Mr. B. N. Roy Chowdhury: Experience had taught us that the appointment of the Chief Executive Officer should be left in the hands of a third party instead of being left to this party or that inside the Corporation.

Mr. N. C. Chatterjee opposing the amendment said that the Corporation in his opinion, would be stultifying itself if it acceeded to the suggestion of Mr. Rahman. The Government had sponsored a bill whereby it sought to provide that Corporation should not appoint its Chief Executive Officer, but that the provincial Government should do the same.

Continuing Mr. Chatterjee said that they had decided here that the appointment should be left entirely with the Corporation. The report of the Corporation on the bill was drafted by Mr. Chatterjee and was passed by a very clear majority.

Mr. M. A. H. Ispahani: A section of this House had nothing to do with that report.

Mr. Chatterjee: The Calcutta Corporation accepted that report by a very clear majority. I am sorry Mr. Ispahani was in the minority.

Mr. Ispahani: But not a microscopic minority.

Mr. Chatterjee: The majority rules and the majority was definitely of the opinion that Section 51 of the Municipal Act of 1923 drafted by Sir Surendranath Banerjea should not be modified and the power of appointment of the Chief Executive Officer should not be taken away from the Corporation.

Proceeding Mr. Chatterjee said that the Corporation was committed to the policy that the Chief Executive Officer should be appointed by the Corporation itself and by no other extraneous authority, be that the provincial ministry or any other constituted authority. So long as the Act of 1923 was there under which the Corporation derived their present power of functioning it was incumbent on them to appoint the Chief Executive Officer when the latter retired. The term of the present incumbent would expire within a few weeks.

Mr. Ispahani interrupting said: No, the 31st of March.

Mr. Chatterjee: If the Corporation means business, if it is not going to be a party appointment to be made on the principle of log-rolling it was right and proper that the Corporation should advertise in the month of January for the post to be filled up.

"Why speak of the municipal second amendment bill," Mr. Chatterjee added, "It shall not be passed into law. We shall resist it both inside the Corporation and outside."

Mr. Ispahani: You will see for yourself if there is any truth in what you speak.

Mr. Chatterjee: If it is a question of challenge, we accept it.

Mr. Ispahani: You have.

Mr. Chatterjee: We have said more than once that if you take a referendum you will find that the clearest majority of the rate-payers of the city will stand up and oppose the making over of the power of appointment to the "popular ministry." It will be playing into the hands of bureaucracy and we shall not play into the hands of those who want to destroy the Corporation.

In any event of the matter, Mr. Chatterjee said, on the face of the present law it was their statutory duty to invite application for the post of the Chief Executive Officer immediately. There should be no dilly-dallying or shilly-shallying.

Mr. Hamoodur Rahman replying said that there was some misapprehension in the mind of Mr. Chatterjee. What Mr. Rahman had said was that if the bill was not passed by the 31st March, the Corporation would be entitled to appoint the Chief Executive Officer under the existing Act. He moved that this matter be postponed till the first week of March.

The amendment of Mr. Rahman when put to vote was carried by 25 votes to 24. The result was received with acclamation by the Muslim League group. Only Mr. Burn of the European group voted against the amendment.

Road Repairing And Petty Improvement Contractors

The following recommendations of the Works Standing Committee were confirmed by the meeting :—

I. That the road repair contractors be divided into two groups, *viz.*, (i) contractors for road repair works and (ii) contractors for road restoration works.

II. That for a period of one year from the date of Corporation sanction to the present resolution :—

(*a*) The number of contractors for road repairs be fixed at 100.

(*b*) The number of contractors for road restoration works be fixed at 50.

(*c*) That as regards contractors for petty improvement works no number need be fixed.

Harijan Quarters

The Finance Standing Committee had recommended that certain works (including the construction of Harijan quarters at Tiljala at a cost of Rs. 1 lakh) which were included in the Loans Budget but for which no commitment had yet been made, should be kept in abeyance for the time being and the amounts of raised loans available under those heads should be diverted for works of a more urgent nature.

When this item came up for consideration, Mr. Madan Mohan Burman held that the construction of Harijan quarters at Tiljala should not be kept in abeyance.

Mr. J. H. Speller endorsed the views of Mr. Burman but added that money should be spent for the improvement of Harijan quarters in the city as a whole. During the last scavengers' strike they had found on enquiry that these strikes were largely due to insanitary conditions of living of the strikers. He thought that the improvement of the Harijan quarters was a great necessity.

Mr. W. A. Burns, Chairman of the Finance Committee, said that the amount of raised loan available, taken together came roughly to a total of Rs. 4 lakhs. Out of this, half the amount was to be spent on the removal of refuse platform to Dhappa. As for the remainder, Mr. Burns said that there was a demand on this money in connection with the Dr. Dey's Kulti Outfall Scheme. The Finance Committee was awaiting the recommendation of the Works Committee on this point. If this remaining amount was utilised on Dr. Dey's Scheme, they had no money left for the construction of the Harijan quarters.

An amendment by Mr. Jogendra Nath Mondal that the amount of Rs. 1 lakh for the construction of Harijan quarters at Tiljala be kept separate from this motion of abeyance, was then put to vote and carried.

Recovery Of Corporation Dues

The Finance Standing Committee had given the direction to all Heads of Departments responsible for recovery of Corporation dues that any default on the part of a Councillor, Alderman or other influential citizen against whom summary action was not ordinarily taken, should be reported to the Finance Committee without delay for such action as the Committee might direct to be taken.

The matter coming up before the meeting, Mr. Naresh Nath Mookerjee asked as to what was really behind the Finance Committee's mind whereupon, the Chairman of the Committee, Mr. W. A. Burns, said that it had come to the Committee's knowledge that sometimes dues payable by influential citizens remained in arrears.

Matters Educational

The Psychological Upbringing Of Children

PRESIDING over the Psychology and Educational Science section of the Indian Science Congress Meeting at Benares, Dr. J. Latiff spoke on "Psychology and the Future of Mankind."

"Mankind has reached a critical point in its life history where two alternatives irrevocably confront it. It must either seriously set about the task of emotional re-education and mental re-orientation towards problems of human life and experience or it must face the alternative of self-extermination. The second alternative is not the product of morbid fear. It is based on scientific evidence from the authentic records of the fate of certain species within the animal kingdom," said Dr. Latiff.

Dr. Latiff proceeded : The history of the civilised world presents a sad record of the repeated failures of human society to ensure the sanity and stability of mankind. The future of mankind is seriously threatened by political and emotional conflicts. To take one instance, consider the ever-recurring international conflicts in Europe in spite of continuous efforts to ensure a peaceful settlement. The number of psychologenic disorders (such as neurasthenia, hysteria, anxiety, neurosis, etc., is definitely on the increase. Various types of maladjustments are progressively thriving in our modern society.

The most pathetic aspect of the situation is the profound ignorance of the leading intellectuals concerning the real causes of these manifold disorders. Their alleged explanations are futile because they ignore the influence of the mental determinants of human behaviour. Without the help of psychopathological insight the present situation will for ever remain a constant menace to the human race.

One of the most significant factors which have obscured the need for the application of psychological findings to the solution of human problems is the resistance of the civilized individual against self-knowledge. For, whatever his opinion on the subject, the mental structure of the civilised individual is fundamentally the same as that of his savage ancestors. Behind man's facade of rational

conduct there exists a primitive emotional structure which controls his individual and social life. Without recognizing the truth of this fact, one would be wholly at a loss to account for the inhuman atrocities, the hatreds, hostilities and wars, and savage superstitions which flourish to-day even in the most 'advanced' civilized societies. A psychological understanding of these primitive urge is the first step towards preventing international conflicts and wars which threaten humanity with catastrophic extinction.

A few of the specific ways in which scientific psychology can help human society to readjust itself are as follows :—

1. Psycho-analytic diagnosis and treatment must be made more generally available than it is at the present moment.

2. The psychological up-bringing of children from their very infancy is essential.

3. The emotional education of the child must receive the scientific attention it demands.

4. Actual and prospective teachers must receive a sound psychological training.

5. A large number of psychological clinics must be made available for 'problem-children.'

6. Psychological diagnosis and treatment of juvenile delinquents must replace the traditional penal methods.

7. There is an urgent need for parental education in terms of mental hygiene and child-psychology.

8. Parents, must, in particular, be enlightened about their obligation to their children in the field of sex education.

9. The basic task of psychological re-education involves a complete emancipation of the individual from all irrational fears including those of pseudo-religion.

10. Psycho-analysis must be pressed also into the service of vocational guidance and selection. The choice of a vocation is often determined by certain unconscious motives which may foster morbidity, inefficiency and unhappiness.

11. Needless deprivation of an instinctive urge, in itself, has no value to human health and sanity.

Secondary Education Policy

Allegations Denied By Government

THE allegation that the Government of Bengal plan to reduce the number of high schools in the Province is denied in a Bengal Press Note, which says :—

In many of the speeches made in connexion with the agitation against the Bengal Secondary Education Bill references have been made to a supposed Government plan for reducing the number of high schools to 400 and the obvious inference has been made that the government desire to destroy secondary educational facilities. The facts are as follows :—

Neither the present Government nor any previous Government approved or even considered any scheme for redistribution of schools or a reduction in their number. No Government officer has made any proposal to Government advocating any such reduction. The present Government considers that definite planning is necessary in connexion with secondary education but it has no intention of devising such plans unless the responsibility for direct administration of secondary education devolves upon it by decision of the Legislature.

The Government propose under the Secondary Education Bill to set up a board representative of varied educational interests and experience and to entrust to this board the responsibility of devising plans for future development.

The facts which have made possible a misrepresentation, deliberate or otherwise, of the Government's policy are as follows :—

1933 Conference

In November 1933 a conference was held at Government House in order to arrive, if possible, at an agreed solution of the secondary education problem. Then, as now, one of the most important problems was the financial one. In order to ascertain the minimum amount of money necessary to maintain efficient schools it was necessary to make certain assumptions concerning the salaries of the teachers, the cost of equipment, etc., and the income from fees. The scheme assumed reasonable salary scales for all teachers, provident fund, expenditure upon buildings including hostels, expenditure upon scientific equipment, games, etc., and the establishment of a scholarship scheme to ensure that no deserving boy was deprived by secondary education facilities by reason of poverty only. It conceived of a high school as providing high school education only *i.e.*, without primary and middle classes. The high schools were to have alternative courses as is possible elsewhere—a classics course and a modern scientific course. Classes of an economic size were assumed and the scheme provided facilities for all the boys and girls at that time reading in the high school classes.

It was shown that 400 well equipped high schools with hostels to provide residence for pupils coming from a distance could accommodate all the high school pupils then attending. Each school would have had duplicate classes—one classical and one modern—at all stages. Hostel scholarships were to be available to provide for pupils living at a distance. The remaining schools were to remain as feeder institutions. The plan was put forward as the most economic possible and a basis for financial calculations. If any other scheme were adopted the expenditure would be greater according to the number of similarly organized and equipped schools.

It was made perfectly clear at the conference that it was not a Government plan and should be regarded as a basis for discussion and as showing the financial requirements. No proposals were ever made to or considered by the Government based on that plan. Those present were aware of this and it is regretted that such unfounded attacks are being made upon the Government attributing to them a desire to destroy educational facilities. It is the Government's policy to provide the greatest possible facilities which will give sound education and to this end they propose to set up a board whose sole duty will be to consider the educational welfare of secondary institutions.

Calcutta—When Tagore Was A Boy

Poet's Earliest Reminiscences Of The City

[By Rabindranath Tagore]

WHEN I was a little boy, Calcutta city was not wakeful at night as it is now. Nowadays, as soon as the day of sunlight is over, the day of electric light begins. There is not much work done in it, but there is no rest. The fire of activity continues to smoulder in the charcoal after the blazing wood has burnt itself out. The oil mills are still, the steamer sirens are silent, the labourers have left the factories, the buffaloes which pull the drays of jute bales are stabled in the tin-roofed sheds. But the nerves of the city are throbbing still with the fever of thought which has burned all day in her brain. Buying and selling go on as by day in the shops that line the streets, though the fire is a little choked with ash. Motors continue to run in all directions, emitting all kinds of raucous grunts and groans, though they no longer run with the zest of the morning. But in those old times which we knew, when the day was over whatever business remained undone wrapped itself up in the black blanket of the night and went to sleep in the darkened ground-floor premises of city. Outside the house the evening sky rose dim and mysterious. It was so still that we could hear, even in our street, the shouts of the grooms from the carriages of those people of fashion who were returning after taking the air in Eden Gardens by the side of the Ganges.

In The Hot Season

In the hot season of *Chaitra* and *Baishakh* the hawkers would go about the streets shouting "I-i-i-ce.". In a big pot full of lumps of ice and salt water were little tin containers of what we called *kulpi* ice—nowadays ousted by the more fashionable *ice-cream*. No one but myself knows how my mind thrilled to that cry as I stood on the verandah facing the street. Then there was another cry, "*Bel*-flowers". Nowadays for some reason I hear little of the gardener's baskets of spring flowers—I do not know why. But in those days the air was full of the scent of the *bel*-flowers which the women and girls wore in their hairknots. Before they went to bathe the women would sit outside their rooms with a mirror set up before them, and dress their hair. The knot would be skilfully bound with the black hair braid into all sorts of different styles. They wore black-bordered Chandernagore saries, pleating them at the waist with a practised twist of the fingers. The barber's wife would come to massage their feet with pumice and paint them with red lac. She and her like were the gossip-mongers of the women's courts.

Children Of Those Times

The crowds returning from office or from college did not then, as they do now, rush to the football fields, clinging in swarms to the footboards of the trams. Nor did they crowd in front of cinema halls as they returned. There was some interest shown in drama, but we were only children at the time, so I can say little about it. Children of those times got no share in the pleasures of the grown-up; even from a distance. If we were bold enough to go near, we should be told, "Off with you, go and play". But if we boys made the amount of noise appropriate for proper play, it would then be, "Be quiet, do". Not that the grown-ups themselves conducted their pleasures and conversation in silence, by any means; and now and again we would stand on the fringe of their far-flung jubilations, as though sprinkled by the spray of a waterfall. We would hang over the verandah on our side of the courtyard, staring across at the brilliantly lit ball-room on the other side. Big coaches would roll up to the portico one after another. Some of our elder brothers conducted the guests upstairs from the front door, sprinkling them with rose-water from the sprinkler, and giving each one a small buttonhole or nosegay of flowers. As the dramatic entertainment proceeded, we could hear the sobs of the "high-caste girl" heroine, but we could make out nothing of their meaning, and our longing to know grew intense We discovered later that though the sobber was certainly highcaste, "she" was merely our own brother-in-law. But in those days grown-ups and children were kept apart as strictly as men and women with their separate apartments. The singing and dancing would go on in the blaze of the drawing-room chandeliers, the men would pull at the *hookah*, the women of family would take their betel boxes and sit in the subdued light behind their screen, the visiting ladies would gather in these retired nooks, and there would be much whispering of intimate domestic gossip. But we children had to be in bed by this time, and we lay listening as Piyari or Sankari told us stories—"The moonlight expanding like an opening flower . . . . . "

A Fashion Among The Wealthy

A little before our day it was the fashion among wealthy householders to run troupes of actors. There was a great demand for boys with good voices to join these troupes. One of my uncles was patron of such a company. He had a gift for writing plays and was very enthusiastic about training the boys. All over Bengal professional companies were the rage, just as the fancy companies were in aristocratic circles. Troupes of players sprang up like mushrooms on all sides, under the leadership of some well-known actor or other. Not that either patron or manager was necessarily of high family or good education. Their fame rested on their own merits. Dramatic and musical performances used to take place in our house from time to time. But we children had no part in them, and I managed to see only the beginning of the preparations. The verandah would be full of members of the company, the air full of tobacco smoke. There were the boys, long-haired, with dark rings of weariness under their eyes, and young as they were, with the faces of grown men. Their lips were stained black with constant betel chewing. Their costumes and other paraphernalia were in painted tin boxes. The entrance door was open, people swarmed like ants

into the courtyard which filled to the brim with the seething, buzzing mass, spilled over into the Chitpore Road. Then nine o'clock would strike, and Shyam would swoop down on me like a hawk on a dove, grip my elbow with his rough gnarled hand, and tell me that Mother was calling me to go to bed. I would hang my head in confusion at being thus publicly dragged away but would bow to superior force and go to my bedroom. Outside all was tumult and shouting, outside flared the lighted chandeliers, but in my room the echoes were faint and muffled, and a brass lamp burned low on its bracket. Even in sleep I was dimly conscious of the steady rhythm of the cymbals beating in the intervals of the dance.

The grown-ups usually forbade everything on principle, but on one occasion for some reason or other they decided to be indulgent, and the order went forth that the children also might come to the play. It was a drama about Nala and Damayanti. Before it began we were sent to bed till halfpast eleven. We were assured again and again that when the time came we should be roused. but from repeated experience we had no faith at all in these promises—they were grown-ups, and we were children!

"That Night"

That night, however, I did drag my unwilling body to bed. For one thing, Mother promised that she herself would come and wake me. For another thing, I always had to pinch myself to keep myself awake after nine o'clock. When the time came, I was awakened and brought outside, rubbing my eyes in the dazzling glare. Light streamed brightly from coloured lanterns on the first and second floors, and the white sheets spread in the courtyard made it seem much bigger than usual. On one side were seated the people of importance, members of the family, their invited guests. The remaining space was filled with a motley crowd of all who cared to come. The performing company was led by a famous actor wearing a gold chain round his waist, and old and young crowded together in the audience. The majority of the audience were what the respectable would call "riff-raff". The play itself had been written by men whose hands were accustomed only to the villager's reed pen, and who had never traced out the letters of an English copy book. Tunes, dances, and story had all sprung from the very heart of rural Bengal and no pundit had polished their style.

We went and sat by our older brothers in the audience, and they tied up small sums of money in kerchiefs and gave them to us. It was the custom to throw this money on to the stage at the points where applause was most deserved. By this means the actors gained some extra profit and the family a good reputation.

The night came to an end but the play was endless. I never knew whose arms gathered up my unconscious body and carried me off. I was far too much ashamed to try to find out. I, a fellow who had been sitting like an equal among the grown-ups and doling out baksheesh, to be disgraced in this way before a whole courtyard full of people! When I woke up I was lying on the divan in my mother's room, it was very late, and already blazing hot. The sun had risen, but I had not risen!—Such a thing had never happened before.

—*Visva-Bharati Quarterly.*

Indian Architecture And Dance

Sir S. Radhakrishnan's Tribute To Sris Chatterjee And Uday Shankar

TO meet Professor Uday Shankar and his group an afternoon party was recently given by Mr. Sris Chandra Chatterjee, the eminent architect and founder of the School of Indian Architecture, at the Outram Ghat Buffet, Calcutta. Fifty distinguished persons were present including Sir Sarvapalli Radhakrishnan, the Hon'ble Sir Bijoy Prasad Sinha Roy, Mr. S. C. Majumdar, Chief Engineer, P. W. D., Bengal; Mr. Moolchand Agrawal; Seth Mohanlal Jalan, Mr. A. P. Dalmiya; Mr. A. K. Sarkar; Mr. K. M. Banerjee; Mr. J. C. Mukerjea, Chief Executive Officer, Corporation of Calcutta; Mrs. Saudamini Mehta; Mrs Lila Pandya, Mrs. Sarojini Yodh, Mrs. Veena Dhruv, Mr. and Mrs. Percy Brown, Dr. D. R. Bhandarkar and Dr. J. M. Das-Gupta.

In according a hearty welcome to Uday Shankar and other guests, Mr. Prafulla Banerjee, the well-known director of dramatic arts, dwelt on the successful efforts of Professor Uday Shankar and Sthapatya-Visarad Sris Chatterjee to effect a renaissance of Indian Art and Culture. "Uday Shankar," he observed, "derived his first inspiration for cultivating the art of Dance from the dancing figure of *Nataraja* in a South Indian temple.

"In a like manner Sris Chandra got his first impulse for the study of Indian Architecture from the eloquent *Lingaraja* Temple in Bhuvaneswar, which is a metaphysical symbolism of of the *Nataraja* in *sama-bhanga* grace. In fact, the different members of the temple are mentioned in the Dictionary of Indian Architecture as *mastaka, skandha, jangha, pada,* etc. The *bhava* and *thata* of Hindu Music and Dance are frozen and embodied in the rythmic *sailac* of the temple architecture. But, whereas it has been possible of the single-handed effort of Uday Shankar to revive and develop the technique of the Hindu Indian Dance, for which no much outside co-operation and patronage was necessary in the initial stage", continued Mr. Banerjee, "it has not been possible of the creative genius of Sris Chatterjee to build as yet a strong foundation for the cultivation and renaissance of Indian architecture, inspite of the successful experiments made in his own modest School of Indian Architecture, the exhibitions of which have been enthusiastically appre-

ciated by the savants in India, Europe and America, because of the public ignorance and, in some cases, organised hostility of the peoples vested with professional interests. Following the example of the University of Calcutta, the Nagpur, Patna and Beneras (Hindu) Universities have requisitioned the services of Mr. Chatterjee for the preparation of schemes for the introduction of courses in Architecture. Difficulties after difficulties are being faced by the architect. Each of the items like Literature, Painting, Sculpture, Music and Dance can be managed by one individual from one single room. But Architecture demands a gigantic organisation and cannot live and thrive without the active co-operation and patronage of the masses and public institutions, particularly of the house-building public. Modern Indian artists and craftsmen have experienced the futility of their individual efforts by excluding the co-operation of Indian Architecture. They have realized that unless and until Indian Architecture is rescued there is absolutely no chance for the survival of the other allied arts. The Jaipur School of Arts is the only successful organisation whose services are commissioned in all parts of India There is no one cultured person, who does not know the Makrana craftsmen and Jaipur artists It is successful because it is essentially based on the building (architectural) arts and crafts Why did the Indian Society of Oriental Arts, the pride of modern India, fail? The reason is not far to seek

'A piece of noble Indian architecture, in two minutes time, can enable the onlooker to get a glimpse of the soul of Indian Culture, which otherwise may take years to do through the study of Indian Epic and Classical Literature and Histories. The repitition of the theories for expounding the merit of Indian Literature and Philosophy. Painting and Sculpture, is not enough for the resuscitation of Indian life and culture and India's constructive genius. Indian archaeological monuments still now draw thousands of foreigners from all quarters of the globe which stand as living symbols of the mature fruits of the tree of India's civilization. Our peoples should devote some energies to the sacred cause for the resuscitation of their much-neglected national architecture. Dance, Music, Sculpture and other Fine Arts can never be separated from the bosom of their Mother Architecture."

Paying tribute to the genius of Mr. Uday Shankar as a supreme exponent of the art of Indian Dance, Sir S. Radhakrishnan remarked that art should not be regarded as a mere luxury of life but as an essential of all real living. Politics and Economics were only means to the end of civilised life which consisted in the cultivation of final values.

He also paid a glowing tribute to the self-less, untiring devotion of Sris Chandra Chatterjee to the renaissance of Indian Architecture. The proposed All-India Institute of Indian Architecture, which the architect is persistently striving for, Dr. Radhakrishnan said, should be materialised with the co-operation and patronage of the nation.

At the request of Dr Radhakrishnan, Dr. D R Bhandarkar explained the different styles of Indian dancing prevalent at present in the country

General Article

Irish Local Government

City-Manager System Extended

[By Arthur W. Bromage, *University of Michigan*]

FOR a few years after the establishment of the Irish Free State (now known as Eire) in 1921, English influence continued to dominate Irish local government. Large county-borough, county, and borough councils persisted, functioning as in the days of English rule. By means of large committees acting in conjunction with administrative and professional officers, over-all direction and surveillance was given to local activities and employees.

The first break with tradition came in the nineteen-twenties through the dissolution of certain local corporations (like those of the county-boroughs of Dublin and Cork) in favour of administration by a centrally-appointed commission as in Dublin, or by a single commissioner as in Cork. This action amounted to a negation of local self-government, although the centrally-selected commissioners were not necessarily adamant against local influences or bent upon house-cleaning local staffs.

Essentially, these commissioners supplanted the general control of administration previously wielded by the elected councils. In fact, they performed so well as supervisory agencies that Dublin and Cork were never to return completely to control by locally-elected, representative councils. Instead they were destined for a modified system of local self-government plus a high degree of centralized authority.

The second radical readjustment of Ireland's urban and rural administrations involved the method of appointing their executive, professional, and technical personnel. In the period from 1921 to 1926, appearance of a spoils system threatened the selection of personnel by county-borough, county, borough, urban district, and town councils. When influences of a political or personal nature were brought to bear, the national government decided to step into what might become an ugly situation.

William T. Cosgrave, as President of the Executive Council (cabinet), sponsored a new plan for the recruitment of certain local officers and employees. By the Local Authorities (officers and employees) Act of 1926, a centrally-appointed Local Appointments Commission was set in motion. This body of three commissioners, responsible to the Executive Council, was given power to recruit by examination for executive, professional and technical positions in local units. Local councils were required to appoint to such posts candidates selected by the LAC. Centralized recruitment became the source for such officers and employees as managers, secretaries, clerks, medical officers, engineers and surveyors, fire brigade officers, architects, rate inspectors, sanitary inspectors, etc.

In examining applicants, the LAC. which has been functioning ever since, has made wide use of what is called "interview board" procedure. The LAC sets up a panel of experts and laymen to hold oral interviews, and these panel boards rate the applicants as to training, experience, and personality. Their recommendations are reported to LAC which, in turn, certifies the leading candidate to the appropriate local authority for appointment. Except in certain cases of promotion from within the service, it is impossible for the local authorities to escape from the heavy but expert hand of the LAC in the choice of executive, professional, and technical officers and employees.

Manager Plan Established

The third major trend away from the English model came in certain Irish municipalities. This was the establishment of county-borough and borough management. The first community to be organized on the managerial principle was the county-borough of Cork in 1929. The county-borough of Dublin and the borough of Dun Laoghaire (in the Dublin metropolitan area) followed suit the next year. Two other county-boroughs—Limerick (1934) and Waterford (1939)—became managerial experiments.

Although these local units were reorganized by means of special acts passed by the Oireachtas (parliament), the same general organizational and administrative principles are in large measure common to all. The formula worked out for Cork by John J. Horgan, prominent solicitor of that city, General Richard Mulcahy, then Minister for Local Government and Public Health, and E. P. McCarron, then Secretary to that department, has stood the test of time and has been reworked in subsequent acts. Mr. Horgan had studied the American manager plan and had written an article for *Studies* on "City Management in America" as early as 1920.

In writing subsequently about the Cork city management act in an explanatory pamphlet in 1929, he remarked about his own earlier investigations: "I found that in this field (city management) America had been the world's chief laboratory for political experiment, and that though costly, and not always effective or satisfactory, these experiments had been most instructive, and had in the end led to real and notable improvements in the administration of municipal affairs."

The American system of council-manager government was greatly modified in its application to Ireland. At the core of the managerial idea in the United States is the power of the local council to appoint and to remove the manager and the power of the manager to appoint and remove administrative subordinates. Although some of the Irish acts named the original managers, the basic plan of selection which they all incorporate is that of recruitment by the LAC. Furthermore, removal of a manager may be made only by vote of the local council concerned and the approval of the Minister for Local Government and Public Health, and thus far no removal has occurred. So both as to appointments and removals central control is of paramount influence. This means that

the supervision which Irish councils may exert over their managers is by no means as direct and compelling a force as is the case in American cities.

On the other hand, the experienced Irish manager consults and advises with the council in a reciprocal interchange which does little to remind one of the powers of central authorities as to his recruitment and removal. That is to say, while the managers need not brook any interference with their statutory powers, they are willing to discuss administrative policies and acts with their councils. There is an obvious line between consultation and dictation. In Ireland, I never heard the view expressed that any manager submitted to orders, thus becoming the clerk of the council in administrative matters.

A further radical difference is that the section (department) heads in Ireland are not appointed by nor removable by the manager. Here, too, the LAC plays its accustomed part in recruitment, while the Minister for Local Government and Public Health must approve removals.

Novertheless, the Irish manager is the Chief Executive of the city; his working relationship with department heads is close; and his power to suspend and to instigate removals gives him a firm grip on administration. For example, the first borough manager of Dun Laoghaire obtained the removal of some twenty officers and employees. Members of the council objected to no avail. The manager informed them that they were outside their province in attempting to interfere with the process of removal—a power vested in him subject to the action of the Minister for Local Government and Public Health.

Waterford Act

Clarifying the statutory plan of city management in Ireland is the most recent of these individual acts. The Waterford City Management Act of 1939 provides for a council of fifteen members elected by proportional representation. P. R. is the ruling favorite in Irish affairs, prescribed by the constitution for national elections and provided by statute for local elections. The council, which has power to elect one of its own number as Mayor, is vested with authority to exercise all and every power, function, and duty pertaining to a specified range of matters, including: the making of any rate or the borrowing of any money; the making, amending, or revoking of any by-law; the making of any order or resolution by which any enactment is brought into operation in the city, or the revoking of any such order or resolution; the nomination of a candidate for the office of President of Ireland; the appointment or election of members of any public body; parliamentary and local elections; subject to stringent limitations of central control, the appointment, suspension, and removal of the manager; determination of the salary and remuneration of the Mayor; disposition under the Municipal Corporation (Ireland) Acts, 1840 to 1888, of lands, tenements, and hereditaments belonging to the corporation. These and some other powers of a lesser nature of the council are known as "reserved functions." In addition the Waterford Council was given power, subject to the sanction of the Minister for Local Government and Public Health, to prescribe procedures to be followed in regard to the reception and examination of all or any class or classes of tenders for the supply of goods or the execution of works.

With reference to the appointment, suspension, and removal of the manager, the Waterford City Management Act parallels the other Irish managerial statutes. The office of manager is one to which the Local Authorities (officers and employees) Act, 1926, applies, which means that recruitment is under the LAC. The manager holds office until he dies, resigns, or is removed. He may not be removed without the sanction of the Minister. A resolution of the council to suspend or to remove the manager requires for passage an affirmative vote of not less than two-thirds of the members of the council pursuant to seven days' notice of such resolution to every council member. The Minister from time to time determines the remuneration of the manager,

The manager is vested by the act with a wide range of power and saddled with various responsibilities. He has a duty; to furnish information at his disposal to the Mayor or council on request; to prepare and present to each councilman a monthly statement showing as nearly as may be the financial position of the corporation; to advise and assist the council in the performance of its reserved functions, and to carry out all lawful orders of the council in relation thereto; and, pursuant to resolution of the council, to submit plans and specifications for the execution of works, together with an estimate of probable costs. The manager has a right to attend meetings of the council and to take part in the discussion, but not to vote. Furthermore, he must attend any council or committee meeting when requested so to do.

The manager is given general control and full supervision of officers and servants of the corporation. Subject to regulations of the Minister, the manager considers and determines all questions in relation to the service, remuneration, privileges, and superannuation of officers and employees. He acts by signed order and he must keep a register of orders made by him. He may by signed order, countersigned by the treasurer, authorize the making of payments for expenses and accounts legally incurred by the council or manager. The council may by resolution direct that every such order must also be countersigned by the Mayor or a designated member of the council.

Unanimous Support

Bills of the Oireachtas dealing with management in Cork, Dublin, Dun Laoghaire, Limerick, and Waterford have all been sponsored by the Department of Local Government and Public Health, and they have had the sanction of the government majority. Whereas the Cork, Dublin, and Dun Laoghaire acts were passed by the Cosgrave Government, the Limerick and Waterford acts were passed by the De Valera administration. The inception of the earlier measures provoked long debate on general principles. By the time of the Waterford Bill in 1939, however, parliamentary discussion turned on details and technicalities.

The fact that both major parties have seen fit to support extension of the managerial idea is a good omen. The truth of the matter is that there has not been a great deal of faith in the use of

council and their committee system as instrumentalities for the supervision of administration. The need pressed for some chief executive to integrate administrative control, to deal *vis-a-vis* with the administration and the council, to focus central-local relationships, and the Irish city manager has been the result.

Managers At Work

How the manager plan works in practice varies among the different councils and managers. Mr. Philip Monahan was Commissioner of Cork before the manager plan was established in 1929. For four years he administered the city without benefit of council. This perhaps accounts for the fact that he is the example par excellence of the manager who forges ahead on his own initiative without as much consultation with members and committees as the council might like. Managers in the other cities are more apt to lean over backwards in consulting and informing their respective Councils in advance about administrative details over which the manager actually has full rein.*

Mr. P. J. Hernon was one of the commissioners in control of the Dublin Corporation during the twenties. When the Dun Laoghaire manager plan was set up in 1930, he became the executive for that borough. During 1937 he was advanced to the Dublin managership. In that position, which is the leading executive position in a local governmental unit in Ireland, carries on normally without utilizing general staff meetings of his department heads. He summons such staff meetings only when the corporation is getting out a report for some central authority. Then the staff is called together to hammer out a unitary policy which will be supported by the collateral reports from the individual departments. Various interstaff relationships serve him as occasion demands. For example, if the fire brigade chief requests new apparatus, the manager requires that the proposed equipment be approved by the city engineer before he as manager will include this as a budget item to go forward to the council. While general staff meetings are not the rule, individual consultations with department heads are frequent--and as the manager said, they can always get him on the phone.

Consultation with the department heads is only one facet of the manager's many-sided duties. It is his business to keep the council informed. While this is done at regular meetings by formal reports and informal statements, there is another avenue of approach no less vital. With the sectional committees of the council, which keep in general touch with the work of the different departments, Mr. Hernon maintains close communication. This committee set-up is unquestionably, in part, a vestige of the days when councils wielded complete power over administration, and committees were the means whereby this control ramified into departmental detail. The Dublin manager follows a policy of telling the committees fully and frankly what the administration is doing. They may not be amused, but they are kept informed. The managed figures that two days out of every week are devoted to consulting with department heads and with committees of the council.

To field trips, to viewing such projects as municipal housing schemes, road construction, the new water supply scheme the Dublin manager devotes as much time as he can spare. He generally goes alone and without advance notice, preferring that the men on the job do not recognize him.

Unpredictable but inevitably involving the manager are trade union disputes arising out of various construction projects. For such an agricultural country, labour is well organized in Ireland. In addition, there is a Labour party which polls in general elections anywhere from eight to twelve seats out of the 138 in the Dail or lower legislative house. City management inevitably responds to predominating factors in the public scene, and trade unionism in Ireland is one of them.

One of the interesting things is to observe how a trained manager shifts his sights from the problems of one city to those of another. In 1936, Mr. T. C. O'Mahony was the county-borough manager of Limerick. There he was engrossed in municipal housing projects and public works problems. He had visualized and studied important trends in the growth of the city and had foreseen the *probable* need for annexation of certain surrounding areas.

After Mr. Hernon moved up from the Dun Laoghaire post to Dublin, Mr. O'Mahony was recommended by the Local Appointments Commission to the Dun Laoghaire Council. Accordingly, in 1939, he engrossed himself in the managerial problems of that borough. This post, because of the pleasing location of the borough on Dublin Bay and the wealth of its residents, is regarded as a plum in Irish local administration.

Difficulties Encountered

The borough manager, as Mr. O'Mahony acknowledged, was not without his problems: the numerous retired pensioners residing in Dun Laoghaire have time to object if the garbage is not collected on time, for example. The commercial interests want to develop the resort aspects of the city along Blackpool lines, while old residents yearn to keep it as an exclusive residential city. Other problems spring from Dun Laoghaire's favoured-resort position in the metropolitan area of Dublin. Some Dubliners wanted Dun Laoghaire to erect sea baths for holiday and weekend crowds; the people of Dun Laoghaire did not desire sea baths even if some other source were to contribute 85 per cent. of the cost of the project. Shore traffic on the main streets of the borough was a serious problem. An interlocking issue was Dun Laoghaire's dependence on the Corporation of Dublin for its water supply, a matter, which raised issues as to amounts and prices.

Water And Sewage Problem

In Limerick, in 1939, the manager was faced with a very old problem, that of a palatable supply of water. Limerick draws its water supply from the Shannon and it has a peaty color. In the Limerick rapid-sand filtration plant they have been using alum for settling and chlorine for safety.

(*Continued on page* 248)

*How the plan actually works has been described to me by various City Managers with whom I have had interviews in 1936 and again in 1939.

In Treatment Of High Blood Pressure

By
DR. MORRIS FISHBEIN
EDITOR
"Journal Of The American Medical Association"
AND OF
"Hygiea": The Health Magazine

AMONG the newest of medical procedures is the employment of certain operations for severe cases of high blood pressure. Apparently, high blood pressure accounts for from one-half to three-fourths of all the diseases listed as cardiovascular—renal disease, which means the heart, the blood vessels and the kidneys.

Such diseases kill 500,000 people each year in the United States. Therefore, high blood pessure is from two to three times as deadly as cancer. Nevertheless, because its symptoms are not so easily detectable and because many a man and woman with a high blood pressure carries on a fairly normal existence, these conditions are not regarded with the same seriousness as is a malignant disease.

There are some people who believe that high blood pressure is a normal reaction of the body to physical conditions which exist, and that no attempt ought to be made to lower the blood pressure. Experts, however, insist that this is not the fact. The vital functions continue normally when the blood pressure is reduced, and there seems to be no good evidence that reduction of blood pressure when it is too high is ever harmful.

Many drugs have been developed in order to lower the blood pressure, but unfortunately no one of these drugs brings about anything resembling a permanent lowering of the pressure. The most recent remedy is potassium sulfocyanate, a drug which must be administered with the utmost caution and with a constant study of the blood pressure during administration. Certainly, there is evidence to indicate that in some cases the regular administration of a remedy of this type may be helpful in keeping the pressure at a comfortable and safe level.

Most important perhaps among other methods of treatment for patients with high blood pressure is rest and the reduction of nervous stresses and strains. In general, people with this condition are advised to obtain at least nine hours of rest in bed at night and to lie down for an hour or an hour and a half in the middle of each day. They ought to have frequent vacations. Especially must they avoid anger and emotional strains, cultivating instead a calm, philosophic outlook on life.

A recent review of the subject by competent authorities says there is little evidence that diet influence blood pressure. People who are over weight should reduce because overweight throws an additional strain on the heart by increasing the work that the heart needs to do. Alcohol and coffee are not restricted unless they overstimulate the patient. There is no evidence that they increase the blood pressure appreciably.

There are some patients in whom smoking definitely increases the blood pressure. If it is found that it has this effect, smoking should be sharply restricted or completely eliminated.

This medical methods have value but with extreme limitations. Some of the symptoms associated with high blood pressure are relieved by the methods of treatment that have been described. However, these methods of treatment have not saved many lives. As a result, physicians continue to search for some more definite procedures which would bring about more permanent results.

PUBLIC HEALTH EXAMINATION

The proposal of revising the syllabus of the diploma course in public health examination at the All-India Institute of Hygiene is, it is learnt, now being considered by the Government of India.

To begin with, it has been proposed to revise the first and second parts of the course. The proposal has been sent to the various universities for their opinion.

"ART IN INDUSTRY"

An exhibition of "Art in Industry" will take place at the Government School of Art, Calcutta, during the last week in February and the first week in March, with a first prize of Rs. 750.

Public Health In India

Planning Needed

THE Medical and Veterinary Research and the Zoology sections of the Indian Science Congress met at Benares on Monday, the 5th January, 1941.

Dr A. C. Ukil, president of the Medical and Veterinary Research Section dealt with "Some aspects of public health in India" in his presidential address. He pointed out how the knowledge gained from successive scientific discoveries, particularly since the industrial revolution in the West, opened up new vistas of possibilities for their application to the mental, moral and physical well-being of man and how persistent State action proceeded side by side with educational, social and economic reform to develop the environmental and medical services.

It has been realised, he said, that science was no longer to be taken as a luxury but as an essential part of the social fabric. It had been found that in most spheres the deviation from physiological health was related to problems connected with housing, clothing, physical cleanliness, drinking water supplies, disposal of sewage, household refuse and manure, and the contamination and poverty of foodstuff.

A Social Science

The result of all these studies had led to the development of medicine fundamentally as a social science, and practically every basic science was now directed towards a comprehensive programme of community service, including the maintenance of health and prevention of disease.

Types of health planning in various Western and Eastern countries had been compared and certain essential principles of sound public health administration laid down. It had been pointed out that, in the drive for human welfare, science must be completely integrated and that the problem should not be faced separately but as an inter-connected whole. Modern public health was a field for social activity, including applications of chemistry and bacteriology of engineering and statistics, of physiology and pathology, of epidemiology and socialogy.

Defects In India

The trend of public health progress in British India showed that, while persistent endeavours had been made in countries like England to apply the knowledge gained from scientific discoveries in developing the environmental and medical services, they had been relegated to the background in India owing to the absence of any national health policy, the violation of the essential principles of sound public health administration, the backwardness and lack of methodology in education, defects in the training and supply of technical personnel, inadequate scientific investigation of health problems, lack of supply of drugs and appropriate instruments, lack of institutional planning, lack of co-ordination between the inter-related departments for social welfare and various financial handicaps to progress, such as inadequate allocation of revenue to social welfare services and the maintenance of a top-heavy administration.

The essentials for the planning of public health in a province, with special reference to Bengal, had been discussed and the working principles defined, the speaker continued. The provincial Governments had been asked, as a first step, to set up a Planning Committee, the terms of reference being to define clearly the objective, to advise on the best way to develop and demonstrate the methodology of work proposed, to determine how best to apply the same in the wider fields around, to determine the method of training the required personnel and of proper supervision, control and maintenance of their level of efficiency and to suggest the best means to secure co-operation of the inter-related departments.

(*Continued from page* 246)

—Irish Local Government

During the summer of 1939, they were experimenting with lime treatment. Water supply was the most common source of popular complaint.

The city maintains its own trucks and employees for garbage collection. Like other local authorities, for street lighting the city rents standards and lamps from the Electricity Supply Board (a central Governmental authority) and buys its electric current from the same source. Limerick is not far from the hydro-electric development on the Shannon River at Ardnacrusha.

Sewage is discharged untreated into the Shannon west of Limerick. This river flows rapidly and the absence of any large community between Limerick and the Atalantic makes a sewage disposal plant unlikely. Limerick constructs and maintains its own streets, but like other local authorities, receives grants from the central government for the construction and maintenance of arterial streets.

Again following general practice, the city must purchase its supplies from the official list of contractors at established prices issued annually by the combined purchasing section of the Department of Local Government and Public Health.

When I talked with him, Mr. Berkery had been in Limerick for only four months, having moved up from a lesser post in Clonmel. He had found the county-borough council very co-operative. One of the basic problems in local government, he thought, was the tendency of people not to improve their property, because they were so afraid that their ratable valuation would be increased.

One of the most pragmatic tests of any system of local administration is whether it is or is not being extended to other units of government. In 1940, a general act of the Oireachtas provided for the application of the managerial plan to all counties. This, as well as many other factors, speaks well for the achievements of Irish city managers.

The Burma Road

Wonders Of Its Construction

CONSIDERABLE public interest has been aroused during recent weeks in the Burma Road, and we are, by the courtesy of our contemporary *Highways and Bridges*, enabled to give some particulars of this great engineering feat.

What follows below is reproduced verbatim from the article:—

The Burma Road is probably the greatest engineering achievement of our times. Years ago we were throwing bouquets at the Reich autobahnen and the engineers responsible for making them. More recently we have been extolling the wonderful Baghdad and Haifa road and the clever engineers who made it. But look at the resources of those engineers; materials, plant, and labour were theirs without stint, and the combined brains of highly civilised, highly developed, and wealthy nations undistracted by a war on their own territory.

But the Burma Road was built by the Chinese Republic, a nation which knew not the technique of modern industrial "civilisation," a nation which, though it was civilised thousands of years ago, when the forbears of its oppressors were still in the Stone Age, had failed to acquire the arts and sciences of our industrial era. It was built by an army of 160,000 peasants, men, women, and children, supervised by a mere 200-odd engineers, many of them foreigners—Americans and British. First cost has been estimated at 6,000,000 Chinese dollars, with a further outlay of 10,000,000 for improvement and maintenance. In terms of pounds sterling that might be anything, but reliable estimates give the average first cost as the equivalent of £1000 per mile.

Considering that over 300 bridges and about 6000 culverts are included, with a live load capacity of from 5 to 10 tons, and that the road is carrying 2-ton lorries by the hundred every day throughout its length of 700-odd miles, the price represents a bargain in civil engineering in any language.

Contract, Not Direct Labour

The Burma Road was begun late in 1937, when the Chinese Central Government foresaw that their seaports would probably be closed by Japanese naval action and their armies in the field would be cut off from supplies of munitions latterly from U. S. A. and Russia, but also from Germany and Italy in the early days, which were necessary to repel the invader. The object was to bring these munitions from the port of Rangoon through Burma and then across high mountain ranges to China's war-time capital of Chungking, a total distance of nearly 2000 miles.

Not all of it was breaking new ground. The section from Shaknoan to Auting on the Sino-Burma border (350 miles) follows the Old Tribute Road, which goes back into the dim dawn of history and was used by Marco Polo. But a track suitable for mule caravans could not carry fast American lorries, and the whole route had to be realigned, rebridged, and generally conditioned for motor traffic. A minimum formation width of 18 ft., with

24 ft. wherever conditions allowed. and a travelling surface of 10 ft., consisting of 4½ in. of packed soling stone carrying 3 in. of rolled gravel of broken stone, was the specification. A few steam rollers were available, but consolidation was often done by rollers shaped from local stone and hauled by mules or even by hand.

When one considers the millions of cubic yards of excavation without the aid of modern tools, the erection of steel truss bridges with comparatively unskilled labour and the comparatively short open season during which work could be carried on, the completion of this highway within two years was a feat little short of miraculous. It is significant, perhaps, that in a republican state which we are in the habit of regarding as rankly communistic, this job was done by contract, not direct labour.

Uprise Of The Motor

In other countries the motor vehicles era grew naturally out of the horse-and-cart age by the inexorable logic of the need for quicker distribution demanded by agglomerations of population, remote from the good earth which provided their food and material sustenance. There was, too, the need for artificially bottled-up mankind to refresh its spirit and maintain its sanity by periodical escapes from its man-made prisons of smoky towns with a brief visit to the nearest thing to real country he could find where he could at least attempt to feel once more the slower tempo of Mother Nature's pulse. Thus, with the growth of man's artificiality, came the parallel steady growth of faster, easier communications. We hardly noticed it while it was happening. We did not notice that within a generation had grown up a new craft, the motor driver. They just grew.

Imagine the difference in China. There a motor road was created suddenly, overnight, as it were, where previously nothing of the kind had ever been known. They imported motor vehicles by the thousand. They could not import driver, so drivers, too, must need be created from local material. That itself was a problem almost as big as the making of the road.

Mr. Hsiao Ch'ien, a brilliant young Chinese journalist, who wrote the story of the Burma Road for the current issue of the *Asiatic Review*, told how it was done at a recent luncheon in London. Mr. Ch'ien tells what he knows; he was there.

The Chinese Government appealed to overseas Chinese to come and help. Chinese graduates of foreign universities came to the rescue and a school was formed with 1500 young Chinese aspirants for the right to drive an American truck under apalling conditions, as enthusiatic students. Many of these were the sons of important people in the academic and business worlds. Mr. Ch'ien himself was one of the first 200 graduates to travel along the new artery. His story of the Burma Road in the *Asiatic Review* is well worth reading. Because of the vast toil involved, the human tragedies brought about through pestilence, blasting, accidents, and drowning, and the magnitude of achievement, he calls the Burma Road the "Great Wall of Modern China."

WIDENING OF GRAND TRUNK ROAD

Central Government's Plan

It is learnt that the Central Government have under consideration a plan which being materialised will increase the width of the Grand Trunk Road, from Calcutta to Peshawar, from 8 ft. to 12 ft. and make it coal-tarred throughout. The plan includes also the strengthening of bridges and the restoration of the Sone causeway at Dehri. The total cost for its operation has been estimated at Rs. 4,50,000, out of which Rs. 1,50,000 will be spent on the causeway alone. The plan further includes the cementing of G. T. Road from the edge of the River Sone up to 1 mile westward at Dehri, and the estimate amounting to Rs. 27,000 has, it is understood, already been sanctioned for this work.

It may be mentioned here that the Sone causeway being restored, the traffic bound for long distances along the G. T. Road will be saved from the hardship of crossing the river at Dehri by foot or rail, and they will find a continuous route from Calcutta to Peshawar.

PLUMBING EXAMINATION RESULTS

The following candidates have passed the Plumbing Examination for Drainage Works under Chapter XVIII of the Act, 1923, held during the month of December, 1940:—

	Names of candidates.	Address.
1.	H. R. Mitter	42, Dr. Jagabandhu Lane
2.	Rabindra K. Bose	30, Ram Mohan Dutt Row
3.	Panna Lal Ghose	8, Andul Raj Road
4.	Provakar Chatterjee	18-3, Nimtola Ghat St.
5.	Monmotho Nath Chatterjee	21B, Nepal Bhattacharji Street
6.	Nrishingha K. Chatterji	17, Kailash Kaviraj Lane
7.	Kanai Lal Chatterji	2A, Bholanath Pal Lane
8.	Biswanath Das	58, Iswar Ganguli Lane
9.	Bamapada Chakravarty	13, Raja Raj Ballav St.

CULTURAL CONFERENCE

"By culture is not meant simply committing to memory text-books and notes. You should have high ideals before you. Nothing can be greater and nobler than to impart education to those who lack it." Thus observed Sir P. C. Ray when he inaugurated the third session of the Scottish Church College Cultural Conference in Calcutta last week-end.

MR. SUBHAS BOSE'S MESSAGE TO CULTURAL CONFERENCE

Mr. Subhas Chandra Bose sent the following message to the Secretary of the Cultural Conference held at the Scottish Church College last week-end :—

The culture of a nation is the product of its mind. And just as the individual has a mind, so does the nation have a collective mind. This collective mind evolves from age to age and from century to century.

A full-blown culture is possible only if the human mind is emancipated.

The world in general and India in particular are on the threshold of a new age. This new age will naturally strive to produce a new culture, but whether we shall succeed in doing so, will depend on our ability to emancipate our minds.

In order to emancipate our minds, it is not essential that we should deny the past altogether or that we should cut ourselves off from our moorings. On the contrary, we should perpetuate what is healthy and beneficial in our cultural heritage. But it is essential that we should be able to transcend all that cramps the soul and deny all that is false. Only then will the nation's culture break through the shackles of bondage and progress from decade to decade like a living stream that draws its sustenance from the people and enriches them in return.

Emancipate your minds and go back to nature and to the hearts of the dumb millions—if you want to create a new culture for New India. That is my message for to-day and to-morrow.

Let the Cultural Conference which you are holding at the dawn of this momentous year be a further mile-stone in our march towards our national goal. Remember that it is for you to win liberty and to create a New India with a new culture, richer and more glorious than the past.

CALCUTTA UNIVERSITY CONVOCATION

At the next Annual Convocation of the Calcutta University, which will be held on March 8, the degree of Doctor of Science *honoris causa*, will be conferred on Dr. Sir Nilratan Sircar, a former Vice-Chancellor of the University and President of the Council of Post-Graduate Teaching in Science. Sir Tej Bahadur Sapru will deliver the Convocation Address.

THE VICEROY LEAVES CALCUTTA

After about three weeks' stay in Calcutta, Their Excellencies the Viceroy and the Marchioness of Linlithgow, accompanied by their family and personal staff, left for Calcutta on Saturday last on a riverine tour through the Sunderbans by the *Miss Mary Anderson*.

At the end of the Sunderbans trip, Their Excellencies will leave for Kathiwar and after visiting Rajkot, Jamnagar, Porebunder, Junagadh and Bhavnagar will return to New Delhi on January 26.

Their Excellencies were seen off at the Outram Ghat Jetty by His Excellency the Governor of Bengal, the Lady Mary Herbert and a number of distinguished officials and non-officials.

THE LATE MAULANA MUHAMMAD ALI

The anniversary of the death of Maulana Muhammad Ali was celebrated on Saturday evening at the office of the Bengal Provincial Moslem League in Calcutta under the auspices of the Bengali Moslem Literary Association.

The function opened with Sir Ziauddin Ahmed in the chair. Owing to a previous engagement Sir Ziauddin left the meeting and Mr. M. N. Roy was asked to preside. Mr. Roy in his speech said that under the leadership of the late Maulana, Hindus and Moslems had joined the Khilafat Movement, which became an integral part of India's struggle for freedom. To-day the Moslem countries of the Near East were threatened with the danger of Fascist aggression. The best manner of celebrating the Maulana's death anniversary, therefore, would be to organize joint action of the Hindus and Moslems against the new danger.

WORKERS' RALLY IN CALCUTTA

"The Nazi plan of invading England has been frustrated by the heroic resistance of the British working class people. Having received a check in that direction, the Nazi and Fascist hordes have been marching eastwards, threatening the countries of the Near East and coming within striking distance of India herself. The British working classes cannot be expected to resist them there also. The burden of meeting and defeating the Fascist hordes marching eastwards must be shouldered by the Indian people, and the Indian working classes will have to play a very important role in that decisive struggle.

The object of the campaign opened by this rally is to make the Indian workers conscious of their grave responsibility, so that they may discharge the role creditably, and having done that, win for themselves as well as for India as a whole a place of honour as a free and powerful nation".

Thus declared Mr. M. N. Roy, addressing a workers' rally that was held on the Calcutta Maidan, near the Ochterlony Monument, on Sunday to demonstrate the solidarity of Indian labour with the British working classes in the fight against Fascism.

The meeting—proceedings of which were considerably distributed—adopted a resolution expressing the Indian workers' determination to fight Fascism and to help in the war efforts of the British and Allied Governments.

From early afternoon, workers' processions from different parts of Calcutta and its suburbs began to converge on the meeting place. The processionists carried banners and posters bearing legends such as "Down with Fascism," "Workers of the world unite to defeat Fascist oppression." "Labour is anti-Fascist," "Road to India's Freedom lies through the defeat of Fascism." After the meeting the various processions merged into one which paraded the streets in different parts of the city, dispersing after nightfall.

ANTI-TUBERCULOSIS WORK IN BUDGE BUDGE

Her Excellency the Marchioness of Linlinthgow on the 2nd January paid a visit to the Chest Clinic of the Anti-Tuberculosis Association of Budge Budge. So impressed was she by the work being done at the clinic that Her Excellency announced a personal donation of Rs. 500.

The clinic was opened only in August, 1939, but during this short period, it has dealth with a large number of tuberculosis cases. During 1940, 2,246 patients received attention. Of this number 267 were new cases, 1,414 were cases from rural areas and 832 from semi-rural areas.

Her Excellency was received by Mrs. D. Wilson, President of the Association, while a Bengali girl presented her with a bouquet.

IN EVENT OF AIR RAID

The question of providing for the safety of costly and important buildings in Calcutta and the neighbouring industrial areas against possible air raids is now engaging the attention of the Government of Bengal.

The Government propose to draw up a priority list of such buildings in order to facilitate the work of the Air Raid Precautions and Fire Brigade authorities who have, in the case of an air raid emergency, to fight a large number of fires starting simultaneously.

In a circular to the various trade associations and organisations, the Government point out that in order to determine which buildings should receive priority of attention in the event of numerous fires being started in Calcutta and the industrial areas of 24-Perganas, Howrah and Hooghly as a result of a possible air raid, the Government are considering the question of drawing up a list of buildings of public importance, the destruction of which would amount to a serious national calamity.

It is not unlikely, the Government state, that in the event of an air raid, large number of fires would be started simultaneously which would necessitate a decision being taken by the Air Raid Precautions and Fire Brigade authorities as to the order in which the fires should be dealt with.

They have, therefore, requested the organizations to furnish the Government with a list of buildings under their control, arranged in order of importance, which in their opinion should be considered as falling under the above category.

ANJUMAN MUFIDUL ISLAM

Premier's Appeal For Funds

The Hon. Mr. A. K. Fazlul Huq, the Bengal Premier, has issued the following appeal :—

On the eve of *Idul-Azha* may I avail myself of the opportunity of making an earnest appeal to all Moslems of this metropolis to contribute the value of hide (or the hide ieself) of sacrificial animals to the Anjuman Mufidul Islam, Calcutta, an organization which deserves every encouragement from the Moslem public of this place? I have had an opportunity of knowing intimately the manifold activities of benevolent and humanitarian work which this Anjuman carries out and I cannot too adequately emphasize the need for help from all charitable quarters. I can say with absolute confidence that any contribution that may be sent to the Secretary of this Anjuman will not have been spent on a misplaced charity.

This Anjuman, in addition to doing philanthropic work, also conducts a free U. P. Maktab, a Free Girls' School, a Free Night School, a Free Reading Room and Library and a Charitable Dispensary. To enable it to conduct all these institutions in a satisfactory manner, funds are required. I trust and hope that all my Moslem brethren will make it a point to send in their quota to this institution to enable it to fulfil its very laudable objects, which it has in view. I once more make an earnest appeal in the confident hope that it will not have been made in vain.

Value of hide or the hide itself may kindly be sent to one of the following addresses :—

Haji Maulvi Tahrisuddin, 32, Aga Mehdi Street; Mr. Abdul Bari, 9, Convent Lane (Motijhil); Munshi Rahmatullah Khan, Battikal, Matiaburz; Mr. Syed Shamsul Huq, 12, Koylasarak Road; Anjuman's Charitable Dispensary, 1, Shambhu Chatterjee Street, (Kelabagan), Munshi Abdul Hasan, alias Kochi, 129-A, Baitakkhana Road.

EDUCATION IN ENGLAND

Reform After The War

Sweeping plans for education after the war were revealed by the President of the Board of Education at Oxford.

Mr. Harold Ramsobotham said that the mistakes made after the last war would not be repeated. There would be changes in British social and economic conditions which would have a profound effect upon the people specially on those between the ages of 14 and 18. Now was the time to make plans for great and far-reaching reforms in post-primary education covering the years, 11 to 18.

He and his advisers were giving deep and careful thought to this problem. As soon as possible after the war the 1936 Act raising the school leaving age to 15 would be enforced It was his personal ambition and ultimate goal to raise the minimum leaving age to 16, but before this was possible education to suit varying tastes and capacities of children must be devised.

He did not support the demand for secondary education for all because secondary education of sufficient variety and diversity did not exist.

LEGISLATIVE ASSEMBLY LIBRARY BENGAL

CIVIC NEWS FROM FAR & NEAR

Burma Corporation's Gift

The Burma Corporation, Ltd., has given Rs. 50,000 to the Lord Mayor's Fund for the Relief of Air Raid Distress.

Civic Address For Science Congress Delegates

Sir Ardeshir R. Dalal, President of the Indian Science Congress, and delegates were presented with an address of welcome by the Municipal Board of Benares.

Joint Electorate In Sind Municipality

Two more municipalities, Jacobabad and Mirpurkhas, will have their general elections on a system of joint electorates, as they have been brought under the Bombay Municipal Boroughs Act, as amended by the provincial legislature introducing joint electorates in Borough Municipalities in the province.

Silchar Municipal Elections

Forty-six candidates have filed nomination papers for 20 elective seats in the Silchar Municipal Board, the general election to which will take place on January 17. This is the first time the Congress has decided to contest the municipal elections. The party is running eleven candidates.

Mr. Arun Kumar Chanda, Deputy Leader of the Congress Assembly Party, is contesting in the elections.

Ghandhiji's Portrait In Madras Schools

The Government have advised the Madras Corporation, as they did recently in the case of District Boards and Municipal Councils not to insist upon keeping portraits of Mr. Gandhi in Moslem schools under the management of the Corporation, if it is opposed by the Moslem community represented by the elected Moslem members of the City Council.

The Government state that they have received representations from Moslems urging that the Corporation should be asked to arrange for the removal of Mr Gandhi's portraits from Moslem schools under the management of the Corporation.

Bihar Local Bodies On Satyagraha

Dr. Rajendra Prasad, President of the Bihar Provincial Congress Committee, has convened a meeting of representatives of the Congess Party in the local bodies of the province to discuss with them how the administration of these bodies could be carried out if the Congress members of the local bodies were permitted to offer Satyagraha.

Dr. Rajendra Prasad has also invited those members of the Provincial Congress Executive who have not yet courted arrest to participate in the above conference.

Health Campaign In Darbhanga

The Darbhanga District Board has launched a vigorous campaign all over the district for the formation of Local Health Associations. The propaganda has taken the form of meetings and distribution of leaflets.

The object of forming these associations is to make the people "health-minded" and to secure their co-operation with the Public Health Department of the Board in eradicating diseases.

Bombay Municipal Budget

The Bombay municipal budget for the year 1941-42 presented to the Corporation by Mr Gordhandas Morarji, Chairman of the Standing Committee, shows a deficit of Rs. 15.43 lakhs No new taxation is, however, proposed.

Receipts are estimated at Rs. 352 lakhs and expenditure at Rs 368 lakhs. The deficit is proposed to be made good from the opening cash balance and also by appropriation of excess accumulation in the plants and machinery depreciation fund and from the net premia fund.

Patna District Board Affairs

The finance sub-committee of the Patna District Board at a recent meeting refused to frame the budget for the new year on the ground that the Chairman of the board does not command a "working majority" in the board.

Inquiries reveal that at an earlier meeting of the Congress party in the board the Chairman, with six others, declined to sign the *satyagraha* pledge and this has resulted in the Chairman losing confidence of the "working majority."

The matter will be considered at a meeting called at Siwan by Dr. Rajendra Prasad to consider the general question of Congressmen in local bodies and the *satyagraha* movement.

Public Health Administration In Assam

A scheme for the development of public health administration in the province of Assam has it is understood been submitted to the Government.

This scheme consists of proposals for the improvement and development of the work of the Public Health Department in all its branches. It is designed to provide for a public health organization, which would be a permanent and increasingly useful institution in the villages and rural areas which at present are more or less left unprovided.

The fundamentals on which this scheme is based are the necessity for the employment of qualified and trained staff in all grades of the department, the necessity to distribute the staff in such a manner that all parts of the province will benefit, the necessity of placing responsibility on divisional, district, and sub-divisional staffs, so that the higher supervising officers will have the opportunity to attend to the more important aspects of the work of prevention of disease.

It is, therefore, proposed to set up a District Public Health Department in every district, with a properly qualified District Health Officer in control and with real responsibility, relieving the Civil Surgeons of their public health functions, with a Health Officer of the second class in every sub-division and a Health Inspector in every Thana.

Calcutta Associations & Institutions

NISHULKA SHIKSHA PRACHAR SAMITY

Education Officer And Assistant Education Officer Welcomed

A meeting of the Nishulka Shiksha Prachar Samity was held at the Central Municipal Office on 21st December, 1940 under the presidentship of Mr. J. C. Mukerjea, Bar-at-Law, Chief Executive Officer, Calcutta Corporation, and President of the Samity to accord a hearty welcome to Dr. Arabinda Barua, M.A., (Cal.) Ph.D. (Lond.), Bar-at-Law, ex-M.L.C., and Mr. R. Ahsan M.A., on their appointment as Education Officer and Assistant Education Officer of the Calcutta Corporation, respectively. Mr. Palakdhari Singh, Secretary, explained the objects of the meeting and requested Mr. Mukerjea to take the presidential chair. After the election of the president and recitation of a welcome song by the students of Sahajanand Saraswati Vidyalaya, the welcomed guests were garlanded by the Secretary. Congratulatory speeches were delivered by Messrs. Sambhu Narain Ray, S. N. Sharma, Sukhen Chatterjee, Rai Saheb Dhusia and others, reminding them of the duties and responsibilities of the high post to which they have been elevated and appealing to them to formulate such educational schemes which might be planned to sweep away the darkness of illiteracy from the face of this second city of the British Empire.

The President, Mr. Mukerjea, said that the Samity stood for the spread and advancement of free primary education among adults and backward classes. The Samity had 18 schools in this city run at its own cost. He added that he was welcoming the Education Officer and the Assistant Education Officer not as Chief Executive Officer of the Corporation but as President of the Samity and hoped that the Samity would get every possible help from them in furthering the cause of education.

In reply to the congratulatory speeches, Dr. Arabinda Barua, Education Officer, said that he was fully alive to the duties and responsibilities of the post of the Education Officer of this great city and assured them that this reception would give him strength and encouragement in performing his duties towards well-directed efforts in respect of development of free education. He was inclined to give effect to a scheme for adult education and would propose to the Chief Executive Officer to lend some of the Corporation free primary school buildings in morning and evening to such societies and organisations which might impart education to working class adults. This would save them from financial worry on the score of house rent. In doing so he would seek the help of the Chief Executive Officer which he was sure to get.

Mr. R. Ahsan, Assistant Education Officer, assured the members of the Samity to go on with their scheme of educational works and he would always be available at their services. He wished every success to the Samity under the able presidentship of Mr. J. C. Mukerjea, Chief Executive Officer, and painstaking Secretaries.

After thanks to the president and chief guests the function came to a close.

CORPORATION OF CALCUTTA

TEACHERS' TRAINING FINAL (ORAL) EXAMINATION, 1940.

There were 11 imported deaths. Excluding these, the death-rate was 41·6.

There were 11 deaths from tuberculosis against 9 in the previous week.

There were 19 deaths of infants under one year.

MR. SUBHAS CH. BOSE

Abnormal Rise In Blood Pressure

Mr. Subhas Chandra Bose was examined on Wednesday last by Dr. M. N. De, First Physician and Professor of Medicine, Calcutta Medical College Hospital. In a bulletin issued on Wednesday night Dr. De says:—

"I have examined Mr. Subhas Chandra Bose this evening. He has made some progress in his health since I last saw him.

There has been, however, no relief to the pain in the loins and the sciatic pain recurs off and on. Further, there has been observed to-day an abnormal rise in the blood pressure, specially the diastolic reading. The necessary treatment for the above complaint is being carried out. Absolute bodily and mental rest has got to be followed strictly in the future."

Central Municipal Office,
The 4th January, 1941.

Re-naming Of Road.

It is proposed that the portion of Suri Lane, in Ward No. 11, starting from 16A, Suri Lane and running up to Circular Road, Lower, be renamed as "Sir Deba Prosad Row".

Any person having any objection to the renaming proposed above may state the same in writing to the undersigned, on or before Saturday, the 25th January, 1941.

D. N. GANGULI,
Assessor to the Corporation

Central Municipal Office,
The 8th January, 1941.

Special Notice

Health Officer's Advice.

With a view to prevent, as far as practicable, the occurance of epidemics of small-pox and cholera, an extra staff of Vaccinators and Inoculation Officers have been appointed for vaccinating against small-pox and inoculating against cholera.

The public are aware that vaccination and inoculation offer protection against an attack of the virulent diseases mentioned above.

It is, therefore, expected that the public would avail themselves of the services of this extra staff by getting themselves vaccinated and inoculated without delay, and thus co-operate with the Health Officer in attaining the object.

The public may apply to the District Health Officers of the Districts concerned at the undermentioned addresses as well as at the nearest Corporation Vaccination Stations for services of the extra staff mentioned above :—

District I Health Officer—79, Cornwallis Street.
District II Health Officer—22, Mirzapore Street.
District III Health Officer—1, Hogg Street.
District IV Health Officer—11, Belvedre Road.
Health Officer, Cossipore—10 and 11, Barrackpore Trunk Road.
Health Officer, Manicktala—109, Narkeldanga Main Road.

S. N. GHOSE,
Health Officer,

Central Municipal Office.
The 7th December, 1940.

College Street Market.

NOTICE

To all whom it may concern, that an application has been received from Messrs. Jogesh Chandra Narayan Chaudhury for the registration of their name in place of Messrs. Shamsuddin Mowlabux in respect of Stall No. 84 in Block "E." College Street Market.

Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof

M. BHATTACHARJEE.

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Black numbers on a Red badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

G. C. WOODWARD,
Supdt., S. S. Hogg Market.

Chronicle And Comment

THE RATE-PAYERS' PROTEST

THE Rate-payers' Conference that met at the Town Hall last week under the presidency of Mr. S. N. Banerjee is of more than usual significance in many respects. Our rate-payers, we must confess, are generally people who do not like to bother, or be bothered by, others. They prefer—almost to a fault—to be left alone to their own business and private life. They are slow to move even on questions which touch them immediately. The fact that they woke up to a protest of such representative character is in itself, therefore, a sign of the times, and we may, perhaps, be emboldened to hope, a promise of a more fruitful future that is to emerge out of the unhappy ferment of the moment. Not less noteworthy is the fact that the rate-payers, who had representatives from the different levels and spheres of the city's life, had for their spokesman so eminent a citizen as Mr. S. N. Banerjee, who is known to shun almost with diligence the lime-light of public life. Law is known to make its devotees great and scrupulous supporters of authority and its ways. When, therefore, such a man and lawyer comes to espouse a cause so different, the authorities should know that they are treading a perilous way. And the decisions of the rate-payers are a clear warning of that unhappy fact. Nothing but a grave sense of danger to their cherished ideals and principles could induce the rate-payers of Calcutta, as we maintain, to gather at the Town Hall in their hundreds, pursuade men of worth and wisdom like the President and other speakers at the assembly to champion their cause so strongly and, above all, could lead the Conference to call upon the rate-payers to resist the Bill that the Government were forcing through the Legislature, and to refuse to co-operate with the City Corporation "deprived of its autonomy and shorn of its mantle of freedom."

There is no denying that it is a disquieting situation that the Calcutta Municipal (Amendment) Bill, 1940, has created. The atmosphere is already charged with electricity. As time passes the tension grows from day to day and judicious and impartial consideration of the Bill becomes harder and harder. The changes in the Corporation administration contemplated by the Bill are too far-reaching; they raise not only vital issues but in certain respects they run counter to the fundamental conception of Local Self-Government as it has evolved in modern times. Principles which have been the corner-stone of the Act in operation now are not only denied obviously by the contemplated amendment but darker principles are sought to be

introduced and embodied into that administration by implication through the changes now advocated.

We had examined the proposed Bill thoroughly when these were at first published. The report of the Corporation Special Committee for examination of the proposed measure offered us again a valuable help in the review of the proposals. As the Bill has forced its way through provocative and unedifying debates in the Legislature it has been refused all modifications so far, and we have found no reason to modify our views on the Bill and reconsider it in any new light. That has, perhaps, to be reserved until the Bill emerges out of the Select Committee. Much as we note with regret, therefore, the ill will that is being created all around and the spirit of mutual distrust that is set loose by such an ill-conceived measure, we have to admit the validity of the criticism levelled against the Bill by the rate-payers of Calcutta and admit, more in sorrow than in anger, that such a Bill is a denial of the rights and liberties of the rate-payers of Calcutta.

The first Amendment Act, as we had pointed out when it was under way, was in itself an infringement on that right. Calcutta was compartmentalised into Hindu, Muslim, Scheduled Caste, Anglo-Indian, European, Women, Labour, etc., It had lost its homogeneous character to admit the principle of sectionalism and communalism of various hues and forms—cross-sections running into each other. The principle underlying it were neither sound nor sane. But the spirit of Calcutta appeared to survive even this onslaught. The hard facts of civic existence and the solid wisdom of the rate-payers' representatives circumvented the Amendment Act and the Corporation acted in important measures basically as one though the different voices were heard. Calcutta, therefore, still held together. It could not be won by bits and won to a different allegiance than to itself, to the citizens and the inalienable rights of the people and the country in general. So, Calcutta is now sought to be subordinated openly to a department of the Government in power, by doing away with some of the basic rights which it exercised through its elected representatives. The first Amendment Act sought to *compartmentalise* Calcutta; the present Amendment Bill seeks to *departmentalise* it.

The main provisions of the Bill for the purpose are :—

(*a*) The appointment of the Chief Executive Officer by the Government from among its officers with the ostensible object of enabling him to work "unhampered by any political or extraneous considerations."

(*b*) A Service Commission consisting of three members to be appointed by the Government with the ostensible object of "effectively eliminating all extraneous influence which has so long operated to the prejudice of the legitimate interests of rate-payers and secure the appointment of suitable candidates to posts and services under the Corporation solely in the interests of the efficiency of the administration."

(*c*) Certain other provisions such as the supersession of a department of the Corporation in case of proved incompetency or failure to perform or default in the performance of duties etc., and dissolution of the Corporation itself for incompetency and failure to perform duties etc., which have been framed to vest drastic powers of control in the hands of the Government.

It will be useless for us to go into the reasons which the Government advocates for each of the above changes, and more useless to repeat once over the facts that disprove the contention of the Government. Inspite of possessing the authority for approving or disapproving the appointment of the Chief Executive Officer of the Corporation, the Government of Bengal did not, during the last 15 years, find a single occasion to disagree with the Corporation in this matter And if it were the intention of the Bill to give the Chief Executive Officer a freedom and assurance against interference in the day to day discharge of his duties, which is essential for all executive heads in the Corporation or in the Government, the Bill could have made provisions along the line as the Model City Charter in America, to which Mr. N. R. Sarker thus very reasonably drew the attention of the Rate-payers' Conference :—

> The Model City Charter in America, therefore, specifies that the Chief Executive Officer would be chosen by the local authorities themselves, but lays down the qualifications and other terms on the basis of which he is to be appointed. If the Government really wanted to have an independent Chief Executive Officer, they could very well have secured that objective by prescribing certain conditions regarding this appointment instead of altogether taking to themselves the authority for making the appointment. For example, the Government may prescribe the requisite qualifications as well as the pay and other conditions of service of the Executive Officer, provided that the post would always be advertised and that an impartial body like the Public Service Commission would select a panel from amongst the applicants and the Corporation recruit the incumbent from that panel. The Government might also ensure him a reasonable tenure of office, say, from 5 to 8 years, so that the right type of candidate may be attracted and also lay down the conditions under which he may be removed from office and to ensure the security of his position; one of the conditions laid down may be that he can only be removed by a prescribed majority on grounds of incompetence or dishonesty and may always demand written charges and a public hearing.

Equally without foundation are the reasons advanced for advocating an official Services Commission of three for Corporation appointments. If the Ministry contemplates anything other than a mere "distribution of dividends" to the Party in power, it could certainly devise a better plan, as Mr. S. N. Banerjee pointed out in his address :—

> The provisions of the Bill may certainly be so framed that even though the Corporation would be allowed to make the appointments, the independence of the Commission would be sufficiently safe-guarded. The Corporation might for this purpose draw upon talents available in the educational sphere, in the business world and in the administrative services. If the qualifications for membership of the Commission be prescribed and if independent bodies like the University and the Chambers of Commerce were each to nominate

a panal from which two of the members are to be selected and if it be further so provided that the third member must be selected from amongst capable and experienced officers of the administrative services, I believe one could be reasonably sure that the members of the Commission would be persons not susceptible to political pressure or personal manipulation. To make this doubly sure it might also be provided that a member of the Commission shall not be a member of the Corporation, nor an office-bearer or member of any partisan political organisation.

The provision for the supersession of a department of the Corporation or of itself becomes in the Bill only as the last resource in the hands of the Government. If the Corporation is not undermined by the officialised Service Commission or torpedoed with the officialised Executive head, let us take to incendiary bombing—destroy it, burn it to ashes, burn to nothing the Calcutta which should know no freedom.

It is less in anger, as we said, than in sorrow that we criticise the Bill, which has roused the rate-payers of Calcutta to indignation and even goads them to non-co-operation. For, it is not a foreign bureaucracy, British Imperialism or European Nazism, that launches this onslaught against freedom. It is our own people, our own brothers, who have been perverted through prejudice to deny the little freedom to Calcutta for which in the broader provincial sphere they clamour and in the still broader international sphere they propose even to fight. It is a matter of sorrow for all who love Bengal, a matter of shame for all Bengalees. For, though we know, it is not true to say that communalism has not fathered the measure, we must know that communalism cannot kill it. We have heard at the Rater-payers' Conference rumblings of the communal passion, which is no longer distant and indistinct. We have noted in dismay the dark mutual recrimination that is gathering into a thundercloud; we know each day adds to the communal complex a bitterness unknown before; each morning adds to the complexity of our national scene a deeper discord. As the Bill sails out of the horizon it will add to the darkness of an already too dark world, it will not be taken even for what it is,—but for something more insidious, more vicious, more dismal than it is by one community, and as their only hope and salvation, guide and gospel by the other. It will have the most tragic effect, be it accepted or rejected. Mischief is afoot; mischief will rule as the communal bickerings become the rule when the Bill again comes before the House. Let our Ministry realize that and withdraw the measure now, withdraw it gracefully. For, if communalism of one brand, as we say cannot kill it, communalism of the other brand would not keep it alive. Communalism will only kill our freedom, civic and national. And what a travesty, and what a tragedy it would be for our national life!

—The Week In The Corporation

(Continued from page 279)

The Mayor: The House twice shouted out "time, time".

Mr. Ray Chaudhuri: I wanted the whole recommendation to be put to vote.

The Mayor: I cannot put the whole recommendation to vote because there is another amendment, an amendment of Mr. Cohen. Mr. Ray Chaudhuri, you are using the language of the Chair. I have tried to the best of my ability, to carry out the wishes of the House, and to also decide the issue before the House to the best of my capacity and understanding. The House shouted out "Time", "Time" without knowing the contents of the paper, without knowing that there is another amendment to be voted upon."

Mr. N. C. Chatterjee asked the Mayor to consider whether it would be fair to close the meeting at this stage.

The Mayor stated that the amendment which were not disposed of would be taken up at the next meeting and said that he had already stated the meeting stood closed.

C. E. O.'s Post

On a motion tabled by Councillors Naresh Nath Mookerjee, N. C. Chatterjee, S. C. Ray Chaudhuri, M. M. Burman, Indra Bhusan Beed, Debabrata Mukherjee, Harihar Das Chowdhury, Fakir Chandra Ghose, Gokulas Mohata, J. C. Ghose, Prafulla Kumar Dutt, N. N. Dalal, J. N. Kolay and Dr. S. K. Sarkar, the meeting, by majority of votes, rescinded its resolution passed on January 7, postponing consideration of the question of inviting applications for the post of the Chief Executive Officer till the first week of March, and decided to reconsider the matter.

After the motion was declared carried, Mr. B. N. Roy Chowdhury asked: What will be the effect of this motion being carried?

Mr. N. C. Chatterjee: The effect will be that Corporation will not be committing political suicide.

The Mayor: The effect will be that we have rescinded the decision taken by the Corporation on January 7. The matter will be brought up again before the House.

EDITOR ILL

Goes On Leave

The Services Standing Committee No. I at their meeting on Saturday morning (January 18) granted Privilege Leave for one month to Mr. Amal Home, Editor of "The Calcutta Municipal Gazette."

Mr. Home has been ill since the re-opening of the Office after the Christmas holidays and carrying on his editorial duties from his sick bed.

Small-pox Epidemic

Mr. Naresh Nath Mookerjee drew the Mayor's attention to the prevalence of small-pox in the City and suggested that vaccinators should be immediately appointed.

The Mayor said that the Health Officer would take the necessary steps in the matter.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETINGS FOR THE WEEK ENDING JANUARY 17, 1941

[The reports of the meetings of the Corporation appearing below are, in most cases, a summary of the proceedings.—Ed., "C. M. G."]

TWENTY-EIGHTH ORDINARY MEETING OF THE CORPORATION, HELD ON WEDNESDAY, THE 15TH JANUARY, 1941

Public Health Standing Committee

In modification of the resolution of the Corporation dated the 7th January, 1941, appointing Mr. J. J. N. Birch as a member of the Public Health Standing Committee in place of Dr. Sadeque Hossain resigned, Mr. Sorfuddin Ahmed was elected to fill up the vacacy.

Mr. Birch being already a member of the Public Utilities and Markets Standing Committee and the Services Standing Committee No. I could not be a member of a third Standing Committee as well under Section 71 (2) of the Act. He was elected under a misapprehension.

Mr. Sorfuddin Ahmed

Mr. Sorfuddin Ahmed was appointed to represent the Corporation for the year 1940-41 on the Governing Bodies of the following Institutions in place of Mr. Abdus Sattar who ceased to be a member of the Corporation :—

(1) Governing Body of Govinda Sundari Ayurvedic College, 20, Ramkanta Bose Street, (Ward I).

(2) Viswanath Ayurveda Mahavidyalaya Hospital, 94, Grey Street, (Ward I).

(3) Swimming Sub-Committee, Bengal Olympic Association, 25, Chowringhee Road, (Ward XIII).

Agreement with the Collector

The question of agreement to be entered into between the Collector (to be appointed) and the Corporation came up for consideration for the fourth time at the meeting on Wednesday.

It will be remembered that the Corporation meeting on the 11th December last was asked to confirm a recommendation of a joint meeting of the Services Standing Committee No. I and the Finance Standing Committee, which proposed to add two new clauses to the agreement. One of the clauses of that agreement was :—

"The Corporation shall allow an adequate establishment to the Collector for the efficient and proper discharge of his duties as Collector and the duties of the Collection Department, all appointments in connection with the said establishment being made by the proper authority for the time being without delay provided that appointments in the case of bailiffs shall always be made from the panel of persons to be nominated by the Collector. The persons to be thus employed shall be subject to the Provident Fund and Leave Rules of the said Corporation and shall have to furnish such security to the Corporation as may be fixed by the Corporation from time to time."

When the clause came up before the Corporation on December 11 for the first time Mr. M. A. H. Ispahani moved by way of amendment that in the matter of appointments of bailiffs to be nominated by the Collector the number of Muslims Scheduled castes and other minorites should not fall below the percentages allotted to them by the Corporation.

Mr. D. J. Cohen moved an amendment asking the Collector to conform to the percentages fixed by the Corporation for the different communities in the matter of appointment of bailiffs to be nominated by him.

The Corporation postponed the consideration of the clause at its meeting held on December 18 and January 7.

When the recommendation came up for consideration before the meeting on Wednesday Mr. W. A. Burns (Chairman of the Finance Standing Committee) said that in his opinion so far as the appointments under discussion were concerned, application of the rule relating to the percentages fixed for different communities was not suitable. They were going to ask the Collector to meet a definite liability; a great responsibility was going to be imposed upon the Collector. So it was fair that the Collector should have the power to choose men on whom he could count. In financial matters the only consideration that should weigh with them was that of efficiency.

Mr. Hamoodur Rahman pointed out that the amendment of Mr. Ispahani made good any lacuna, if there was any, in the agreement. What Mr. Ispahani wanted was that percentages fixed by the Corporation for Muslims in Municipal services should also be given effect to in the matter of appointment of bailiffs. He thought the Corporation resolution fixing percentages for the different communities applied to the case under discussion.

Mr. Rahman was sorry that Mr. Burns had said that Muslims were inefficient.

Mr. N. C. Chatterjee : Mr. Burns had never said that.

Mr. Rahman : If he had not said it in so many words he had said it by implication.

Continuing Mr. Rahman said that Mr. Ispahani's amendment was quite legitimate. Everywhere in the world there were such reservations.

Were not certain percentages of the posts in Mr. Burns's own Port Trust reserved for the Muslims?

Mr. Burns: The fact it quite different from what had been said.

It was quite possible, proceeded Mr. Rahman, to find out suitable Muslims even from among the men who would be recommended by the Collector for appointment as bailiffs. They did not want inefficient Muslims to be taken in.

"Any opposition to the amendment of Mr. Ispahani will be malicious", concluded Mr. Rahman.

Mr. N. C. Chatterjee: I strongly object to the word "malicious." This is most unparliamentary. That is most improper.

Mr. Ispahani: I rise on a point of order, Mr. Mayor, Sir, first, I want to know whether the word "malicious" is parliamentary or not. Secondly, I want to know whether the tone and temper of Mr. N. C. Chatterjee is parliamentary.

The Mayor: The word "malicious" is parliamentary.

Mr. N. C. Chatterji: It is provoked by deliberate imputation of malice. Cannot any member speak without imputing any malice to other members? Cannot there be any honest difference of opinion. It is most improper.

The Mayor: This problem is a sore point with the Muslim members of this House. Mr Burn's point of view may, on idealistic grounds, be correct; but for four years the Muslims had remained out of the Corporation on the question of the percentage of Muslims in its service.

Several voices—That is not correct.

The Mayor: If the House does not allow this thing to be decided without any excitement of any kind whatsoever I feel that the old sentiment is likely to revive. Therefore, I appeal to the House to judge this question keeping in mind that background.

The Mayor then proceeded to put the item to the vote. First, Mr. Ispahani's amendment was voted upon by a show of hands and declared lost. On a poll being demanded the amendment was rejected by the House by 31 to 24 votes, 9 not voting.

Following the declaration of the result of voting, Mr. B. N. Roy Chowdhury rose on a point of order, when Mr. S. C. Ray Chaudhuri observed that the time limit for the meeting had been reached.

Some Councillors also pointed out to the Mayor that no point of order could be raised at the stage when votes were being taken on an item.

The Mayor, however, maintained that the point of order could be raised.

Mr. Roy Chowdhury then said that his point of order was this that the recommendation before them overlapped the resolution of the Corporation which fixed the percentages for Muslims so far as appointments in the Municipal services were concerned. The recommendation was defective in that it did not say like that "in modification of the Corporation resolution fixing percentages for different communities, etc., etc."

The Mayor: Mr. Roy Chowdhury's point of order was whether this decision of the Corporation upsets Corporation resolution fixing the percentages for different communities so far as appointment in Municipal services were concerned. His ruling was this that their decision to the extent they have arrived at to-night does interfere with the permanent resolution of the Corporation fixing the percentages.

Mr. N. C. Chatterjee said that in his view the recommendation before them did not interfere with the resolution of the Corporation fixing the communal ratio in the matter of appointments. That resolution of the Corporation gave only a general direction. The resolution did not say that it would apply in every department of the Corporation.

The Mayor said that his reading of the resolution was not such. He maintained that the recommendation interferred with the permanent resolution of the Corporation fixing the communal ratio in the matter of appointments.

The Mayor declared the meeting closed and hardly had he left the Chair when Mr. Sudhir Chandra Ray Chaudhuri rose in his seat and addressing the Mayor said: That is absolutely irregular.

The Mayor: Mr. Ray Chaudhuri, I shall have to ask you to walk out of the House.

Mr. Ray Chaudhuri: Mr. Mayor I must protest against your action; you cannot close the meeting in the midst of voting.

(Continued on page 277)

CHIEF MINISTER'S STATEMENT

The Hon'ble Mr. A. K. Fazlul Huq, Chief Minister of Bengal, has issued the following statement through the "United Press":—

"The voting in the Calcutta Corporation on Mr Ispahani's amendment to have a communal ratio fixed for Muslims in some of the Corporation Services, should be taken as a complete answer to the Hindu agitation that by our amendment to the Calcutta Municipal Act, we have reduced the Hindus to a position of political inferiority and helplessness in the Corporation. Thousands of Hindu voices have complained that by our amendment of the Calcutta Municipal Act we not only reduced the Hindus to a minority in the Corporation but have rendered it impossible for the Hindus to assert themselves in the Corporation affairs.

"Recent votings have shown that the Hindus have been able to combine themselves and defeat the Muslim League completely Those who accuse us of having acted prejudicially to the Hindu interests now owe an explanation to us for having misrepresented matters. It is idle to expect a reasonable attitude from our political enemies in Bengal, but all fair-minded people must see that the agitation against the amendment of the Calcutta Municipal Act has been based on lies, misrepresentations and untruths, as is generally the case with agitations against all measures undertaken by the present Government."

Indian Architectural Conference

Duty Of The Calcutta Corporation

FOLLOWING a tea-party organised by Mr. Sris Chandra Chatterjee, Architect, an Indian Architectural Conference was held at the residence of Mr. N. C. Chunder, M.L.A., (Central), Calcutta, on the 11th inst. in the presence of a distinguished and representative gathering, including among others :—

The Hon'ble Mr. S. C. Mitra, President, Bengal Legislative Council; Mr. Percy Brown, formerly Principal Government School of Art, Calcutta; Mrs. Muriel Percy Brown; Dr. A. H. Pandya, Principal, Bengal Engineering College; Mrs. Lily Pandya; Mr. Rajaram, formerly Principal, Roorkee College of Engineering; Mr. A. P. Dalmiya; Mr. J. K. Mitter (Bengal Stone), Mr. K. M. Banerjee; Mr. N. C. Bhattacharya (India Fan); Mr. N. Guin, Architect; Mr. A. C. Banerjee, Architect; Dr. S. K. Bose; Mr. Basantlal Murarka; Dr. Lalbehari Banerjee (Reliance Firebricks and Potteries Ltd.); Mr M. M. Mukherji; General Manager, Martin's Collieries; Dr. D. R. Bhandarkar; Mr. J. C. Mukerjea, Chief Executive Officer, Calcutta Corporation; Mr. Sailapati Chatterjee, First Deputy Executive Officer, Calcutta Corporation; Dr. J. M. Das Gupta; Dr. Charu Chandra Chatterjee and Mr. N. C. Chunder.

Those who were unable to attend but sent messages of sympathy included Sir P. C. Ray, Sir Manmatharath Mukherji, Sir Badridas Goenka, Dr. Syama Prasad Mookerjee, Mr. Subhas Chandra Bose and Sir Sarvapalli Radhakrisnan.

Messages

Sir P. C. Ray wrote regretting his inability to attend owing to a previous engagement :—

"Mr. Sris Chandra Chatterjee, by his indefatigable labour has succeeded in bringing home to us the necessity of studying Indian Architecture from at least a cultural point of view. India has something to give in this field too. The Secretariat buildings, as pointed out by Mr. Havell, are not only ungainly but offensive to our aesthetic taste. Of late years many stupendous structures, six, seven or eight stories high are being constructed in Bombay and following in its wake in Calcutta. They represent on a miniature scale the much-talked of sky-scrapers of America and with their steel-frame and reinforced concrete filling they are jerry-built on the whole.

"Designs based on Indian architecture could have been all the more beautiful and soothing to every body's taste. We have to come back to our home architecture if only our taste changes for the better, and Mr. Chatterjee has undertaken this herculian task

"I hope Mr. Chatterjee's honest efforts will be crowned with success and the School of Indian Architecture will grow up from day to day."

Sir Sarvapalli Radhakrisnan wrote (prior to his departure for Trivandrum) :—

"I am sorry I will not be present for the function but I hope that those who attend it will be impressed by the work that is being done by Mr. Sris Chatterjee with unusual zeal and enthusiasm. He is devoting all his time and energy to the resuscitation of Indian Architecture. It is my sincere hope and desire that those in Municipalities and District Boards and Universities who are in a position to assist him and utilise his great talents will do so in larger numbers in years to come."

Dr. Syama Prasad Mookerjee wrote :—

"I regret my inability to attend your function of the 11th instant, as I shall be out of Calcutta that afternoon.

"I have every sympathy for the object of the organisers and am of opinion that Indian Municipalities should take up the cause of Indian Architecture and actively encourage constructions in Indian styles from which our student engineers and architects can obtain practical training for Indian Architectural Constructions."

Mr. Chatterjee's Plea

In welcoming the guests, Mr. Sris Chandra Chatterjee put forward an eloquent plea for the establishment of an Indian Architecture Section in the City Architect's Department of the Corporation of Calcutta. Extracts from Mr. Chatterjee's speech are given below :—

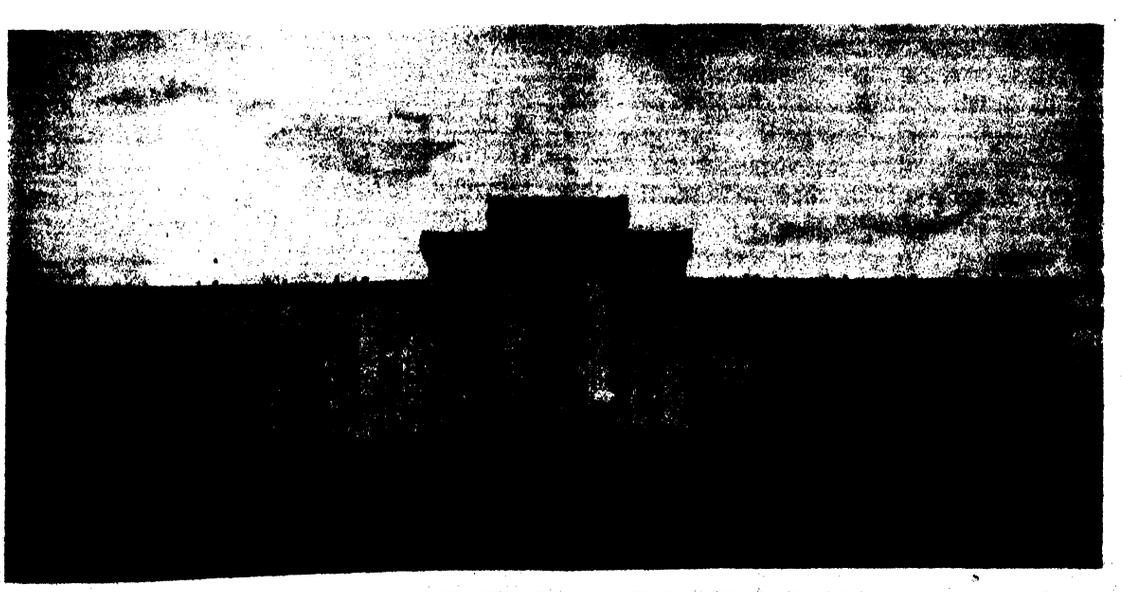
"The University of Calcutta having adopted a Degree Course in Architecture, in which all the branches of Indian architectural arts and crafts will be given their proper place, the Universities of Nagpur, Bombay and Patna have been considering the adoption of Indian architectural training under their auspices. Recently my services were commissioned for the preparation of Schemes and Regulations for the Nagpur Engineering School and Patna University. Sir Sarvapalli Radhakrisnan is also trying to incorporate a course of Indian Architecture in the curriculum of the Hindu University, on which subject I had the privilege of holding a discussion with the venerable Pandit Madan Mohan Malaviya at Benares. It was at his instance and in his presence that I delivered a series of lantern lectures on Indian Architecture in connection with *Malaviya Jayanti* ceremony at Benares.

The National Planning Committee have accepted, and included in their scheme, my suggestions (1) to safeguard the interest of Indian building arts, crafts and industry for cultural as well as economic regeneration in India, (2) to organise a laboratory for testing building materials and specifications and (3) to take necessary measures to find out, as far as possible, and develop, Indian indigenous specifications for buildings which made old Indian structures so very strong and durable. Dr. A. H. Pandya, Principal of the Bengal Engineering College, who was also a Member of the N. P. Committee with myself, put forward a strong plea for the resuscitation of Indian Architecture, which had its desired effect.

While I was in Bombay, I set on foot a movement for the establishment of an Academy of Indian Architecture. In spite of there being an Indian Institute of Architects ninety nine per cent. of the newly built houses of the city and cent per cent. of the structures erected along the Back Bay and Marine Lines have followed foreign styles totally unsuitable to Indian outlook and back ground. Certain aspects of Indian Architecture, of course, have been included in the curriculum of the Bombay School of Architecture but in the later part of their educational

career, the students have to undergo apprenticeship concerning designing and drawing of structures in the offices of local practising architects, who, unfortunately, always patronise exotic styles. Therefore I felt the necessity for organising an All-India Institute of Indian Architecture with provincial branches like the Institution of Engineers (India), with a view to fostering actual constructions in Indian styles apart from imparting theoretical class-room-training to students and apprentices. I prepared a Scheme for the purpose, which was strongly approved among other experts, by Sir M. Visvesvaraya himself. Since then the number of supporters is steadily increasing. Mr. Percy Brown, formerly Principal of the Government School of Art, Calcutta, and the worthy successor of the late E. B. Havell, has appreciated, and even improved the scheme. Attempt is being made to organise the Institute on a strong foundation.

But University training, or the objects of the proposed Institute, will never be fruitful unless and until Indian Municipalities and District Boards encourage building constructions in Indian styles, providing scope for practical training of the students or any professional or amateur engineer-architect thereby. Cannot the Corporation of Calcutta give a lead in this matter?"



"In spite of the incessant championing of the cause of Indian Architecture by the *Calcutta Municipal Gazette*, the official organ of the Corporation, which from the very beginning of the movement for Indian Architectural renaissance, has been, in all possible ways, encouraging and aiding and guiding the movement to its present popularity, I regret to say, the City Fathers have so far practically done nothing for the solution of this most vital problem affecting the nation's cultural and economic regeneration. In every part of Europe and America there are Municipal Schools of Architecture. The premier Municipality of India ought to have organised and maintained a Municipal School of Indian Architecture as well as a new branch of Indian Architecture under its Building Department, years ago.

"The speaker will be ungrateful if he does not mention in this connection the genuine sympathy and unstinted co-operation of his esteemed friend, the Hon. Mr. A. K. Fazlul Huq, bestowed on various occasions. It was the Government of the Hon. Premier that promptly approved the recommendation of the University of Calcutta then under the most able Vice-Chancellorship of Dr. Syama Prosad Mookerjee, for the introduction of the Degree Course in Architecture.

"I also look forward to the support and guidance of my revered friend Sir Akbar Hydari, the Prime Minister of H. E. H. the Nizam Bahadur, whose generosity in placing at my disposal wagon-loads of exhibits illustrating the marvels of Ajanta, Ellora and Nizamabad, was mainly responsible for the unprecedented success of the All-India Exhibition of Indian Architectural Arts and Crafts which I organised in 1937 at the University of Calcutta. The Nizam's Section in the said exhibition stirred the art-lovers of Calcutta, and the Rt. Hon'ble Sir Akbar spent thousands of rupees on freights and costs of deputing the Curator of Ajanta Museum to Calcutta. The Exhibition opened by the then Vice-Chancellor Dr. S. P. Mookerjee stimulated the formation of the Ashutosh Museum of Fine Arts at Calcutta University as much as it pleaded the necessity for the establishment of a School of Indian Architecture as had been predicted by Sir Akbar's message.

"The Osmania University is an embodiment of Sir Akbar Hyder's dream and vision—an abiding monument of his wise statesmanship and spirit of catholicity. The architecture of the great University can be viewed as a delightful harmony generating Hindu-Moslem solidarity, thoughtfully designed and built in a beautiful, composite style of mainly Hindu and Moslem and partly Christian cultural significance,—restrained, dignified and elegant. I wish our University and the Corporation of Calcutta could follow the noble example perpetuated by that illustrious son of India.

"Architecture is the Mother and repository of other fine arts like Sculpture and Painting and

OSMANIA UNIVERSITY BUILDINGS AT HYDERABAD (DECCAN)

Crafts. Unless the architecture of India is rescued, developed and propagated, there is absolutely no chance for the growth and thriving of the other items. The truth of my statement must have been realised by the present generation of painters and other artists who are languishing for want of support. All our academies of fine arts engaged in the production of sculptors and painter-artists have either ceased to exist or are carrying a precarious existence anyhow. Why has the Indian Society of Oriental Arts collapsed inspite of the decent grants of the Government of Bengal at the rate of Rs. 25,000 per year? And why has the Jaipur School of Arts (Makrana Establishment) been making excellent headway all over India without any contribution from the State? Because the former was not rooted on architectural enterprise and the latter has inseparably been connected with architectural industry.

"Fergusson and Havell, the two great saviours of Indian Architectural Arts were practical architects, acquainted with the architectural and cultural history of the world. Their ambition was to water the tree of Indian architecture so that it could branch forth into generous and abundant flowers and foliage of sculpture and painting. But, after the retirement of the latter from India, in the last twenty-five years, Indian professors, lawyers, journalists and others have continuously pleaded for the revival of sculpture and painting only, although with the very best of intention. Unfortunately by this unconscious neglect of architecture they have not done adequate justice to the cause of Indian fine arts in general.

"We appeal to our Educational Ministers and City Fathers to strive hard and combine for the rehabilitation of India's architecture from its threatened extinction. Indian Architecture, the cream of Indian culture, must not be allowed to die of starvation.

A lively discussion followed Mr. Chatterjee's speech.

Dr. Bhandarkar

Dr. D. R. Bhandarkar said: "Like the Department of Sanitation which protects the citizens from unhygienic contamination the Corporation of Calcutta should open a Department of Indian Architecture in order to protect the citizens from their aesthetic sense being contaminated with uncouth, inconsistent structures. It is a pity that the movement for national architectural renaissance in India that has attracted the enthusiastic appreciation of Europe and America has failed to evoke sympathy of the City Fathers in Calcutta. Prophets are seldom adored in their own country. This proverb appears quite true when we think of Mr. Sris Chandra Chatterjee whose creative talent and wide scholarship have been adored in the West but not by his own Bengalee brethren. Recently I had to go to Bombay and Poona. Many of my distinguished friends spoke to me very highly about Mr. Chatterjee's achievement and enquired whether I knew him. The rate-payers should hammer on the insensibility of their elected Councillors and compel them to encourage India's Architecture through Corporation".

Mr. Rajaram

Mr. Rajaram, lately Principal, Roorkee Engineering College, observed:—

"In the first place I should mention that Mr. Sris Chandra Chatterjee is undoubtedly the pioneer of the renaissance of Indian Architecture. About ten years of my life I have spent on works, projects and constructions, a few years on research, engineering and the rest in education. Of architecture, I can say that I have not practised it, but have got some ideas or views.

"In the first place architecture of a country and a period reflects the culture of the people of the time. It would be true to say that whatever architecture we have had in India, before Mr. Chatterjee took up the work, was a true reflection of the state of the country and the people. But things are changing. We have to ask our sociologists, reformers and politicians and others what are their ideals as to the present and the future. Then our master architects, who may have been properly trained in the art, can sit at a round table conference with the sociologists and others and arrive at or evolve a suitable type of architecture for the present, and project it for the future with the back ground of our own indigenous, ancient and mediaeval architecture, and modern Western architecture also. In India it is not one type of architecture that will be evolved. Each province or part of the country should develop its own style according to its climatic conditions, traditions, culture, etc.

"An ideal thing will be to replan the rural and urban areas in India as a whole, taking into account drainage, water supply, flood prevention, military requirements, economic and industrial development, etc., etc., and then draw up a programme for say 100 years.

Mr. Percy Brown

In closing the Conference Mr. Percy Brown began his remarks by stating that all those interested in the subject of Architecture, and these should comprise the entire community, should express their gratitude to Mr. Sris Chandra Chatterjee for the selfless manner in which he had applied himself to the encouragement of the building art all over the country for a very considerable number of years.

The speaker then went on to outline the scheme that was required to train students in a knowledge of architecture, not only to produce masters in this art, but also to give those who are associated with this subject, such as engineers, builders and others, some acquaintance with the principles of architectural design. A graded course of training somewhat on the line that put into such excellent effect in England was indicated, but of course adapted to conform with the educational systems that obtained in this country. Something of the kind had already been working with considerable success in Bombay. A similar scheme was, in the course of initiation in Calcutta. But a practical beginning was necessary. Before long a school would be opened with the above object in view. What was wanted was direct support on the part of influential bodies on this side of India either provided by the Calcutta Corporation, the Public Works or Educational Departments of Bengal, or the University of Calcutta.

Calcutta Municipal (Amendment) Bill, 1940

Protest Conference At Town Hall

PROTEST against the Calcutta Municipal (Amendment) Bill, 1940, and strong criticisms against its various provisions were made at the Calcutta Rate-payers' Conference held at the Town Hall, Calcutta, on the 9th and 10th January, 1941.

The Conference was presided over by Mr. S. N. Banerjee, Barrister-at-Law. Mr. Nalini Ranjan Sarker acted as Chairman, Reception Committee. On both the days the Conference was largely attended, a number of Councillors of the Corporation being present.

The President said that the object of the measure was clearly to obtain complete domination over the Calcutta Corporation by the Government, which meant the party in power in the Legislature.

The Chairman of the Reception Committee, thought that the Bill had been designed not for the benefit of the Corporation but for the political advantage of the Coalition Party, the party in power and also as a means for "curbing the influence of the Hindus."

FIRST DAY

In proposing Mr. Banerjee to the Chair, Rai Harendra Nath Chowdhury, M.L.A., pointed out that the rate-payers of the city were faced with a grave crisis to-day. The new Municipal Bill contained such proposals that if the Bill was passed into law, it would put back the hand of the clock of progress in civic administration by fifty years.

Seconding, Mr. Satis Chandra Bose (Councillor, Corporation of Calcutta) characterised the Bill as a most reactionary and retrograde measure.

Supporting, Mr. Hirendra Nath Dutta emphasised that they would have to carry on such an agitation that it became impossible for the Ministry to enact this measure.

Supporting, Mr. J. C. Gupta, M.L.A., said that if this Bill was passed into law, it would adversly affect the interests of the rate-payers.

Mr. Mrinal Kanti Bose also supported the proposal, which was carried.

PRESIDENT'S ADDRESS

After explaining that local self-government in Calcutta had been the result of a constant struggle, Mr. Banerjee in his speech referred to the different improvements made in the amenities of the town, in respect of primary education and other social services since the passing of the Municipal Act of 1923. While he did not claim that the administration of the Corporation since 1923, had been perfect he said that it could not be disputed that the activities of the Corporation had been for the betterment and welfare of the rate-payers in almost every direction.

Improvements in lighting, widening of streets, removal of filthy railway which was a standing nuisance and menace to public health, had been effected. The face of the city had been changed almost out of recognition and stately and impressive buildings with very modern conveniences had been built between 1923, and 1940, under the supervision of the Corporation. Bustee improvement and improvement of the conditions of living of the poorer classes had not been lost sight of. On the other hand, there had been a large accumulation of rates and taxes and irregularities.

It was also true that one political party had been in power almost throughout the period 1923-1940. A strong criticism that could be made against the administration of the Corporation was that preference had been given to the supporters of that party in the case of certain appointments. Barring all the alleged acts of commission and omission by this party, it was remarkable that notwithstanding the wide and drastic powers contained in certain sections of the Act no governmental action had been taken.

One had to look deeper to ascertain the real cause for such an ill-considered and stringent piece of legislation.

Extra Weightage

The cause was the recent system of government that had come into force as a result of the reform brought about by the Government of India Act of 1935. The basis of that Act was that the majority should be given the power to rule. According to this theory, embodied in the Communal Award, the power of legislation had been put in the hands of the majority community. On this theory, the majority population in Calcutta, namely the Hindu population, who formed 74 per cent. of the population, and who provided the greater portion of consolidated rates and revenue of the Corporation to the extent of 80 per cent. should have the power to rule. This did not suit the majority in power—the Government of Fazlul Huq. Therefore, there came the amendment of 1939, by which the Moslems were given extra weightage at the expense of the general constituency.

Mr. Banerjee next alluded to the general object of the Bill "which will result in the Corporation being a subordinate Government department at the mercy of the Chief Executive Officer who will not only be a Government servant but at the beck and call of the Minister-in-Charge of Local Self-Government." It could not but be the desire of all that efficiency of the administration in the Corpora-

tion should be secured. Was it not possible to secure this efficiency without any drastic change in the law and without reducing the Corporation to the status of a subordinate department of Writers' Buildings?

A Suggestion

Mr. Banerjee had one suggestion to make in regard to the provision for the appointment of a Service Commission. Such a Commission, he said, had never been appointed in any Corporation in the world. It was sought by the proposed section to vest authority in Government nominees. His suggestion was that this Commission should consist of persons who would be directly under the control of the Corporation and who would be appointed by the Corporation. The personnel might consist of three to be selected from a panel of six persons chosen by representatives nominated by the different associations and organisations like the Bengal Chamber of Commerce, the Bengal National Chamber of Commerce, the Moslem Chamber of Commerce, and Marwari Chamber of Commerce, the British Indian Association, the Bengal Provincial Congress Committee, the Bengal Provincial Hindu Mahasabha, the Moslem League, the Anglo-Indian Association and the European Association. The members of such Commission should be appointed on a scale of salary to be fixed by the Corporation with the approval of the Government. The successful candidates selected by the Commission on the test of efficiency would be appointed to the vacancies by the Corporation.

Mr. Banerjee maintained that this retrogressive measure would deprive the Corporation of real power and autonomy. Mr. Banerjee observed: "we should not take this planned onslaught on the rights of citizens and the powers of autonomous institutions with philosophical indifference.

"We owe it not only in the interest of the Hindu community, but also in the interests of democracy and good administration, and for the purpose of preserving the political atmosphere of this city from being polluted by the virus of ugly communalism, to offer resistance at every stage and with all the strength that we may command against the passage of this reactionary Bill into law."

MR. N. R. SARKER

Mr. Nalini Ranjan Sarker, Chairman of the Reception Committee and *ex*-Finance Minister, Bengal Government, observed: "Ever since the introduction of Provincial autonomy since 1937, the Calcutta Corporation has loomed large before the eyes of the Bengal Government and the inevitable result is the progressive curtailment of its autonomous powers so as to make it more and more amenable to the whims of the party and its government."

"The main and real object of the Bill," Mr Sarker continued, "is to capture the levers of control over the Corporation. The first Amendment Act sought, through the familar device of creating hedged-in constituencies and through nominations, turn the Hindus into a minority, though by strength of their number and contributions they have a right to retain control over the Corporation. And it succeeded. The Hindus have been reduced to a virtual minority and if the elected Muslims, nominated members and the Europeans join to form an alliance, the enfeebled Hindu opposition cannot shake it. But not satisfied with this *de facto* sovereignty they are out now to officialise their rule over a hitherto autonomous and democratic institution, which is the biggest of its kind in India. For rich are the rewards to be earned in the Corporation and the prospect of acquiring so much power and patronage which they can turn to personal and party advantage is a temptation too strong to resist."

SECOND DAY

At the Second day's sitting the Government was urged to withdraw the Bill. But if they persisted with it, the Conference called upon rate-payers of the city to resist the Bill. If the Bill was passed into law the Conference called upon the rate-payers to refuse to co-operate with the City Corporation and called upon Councillors who represented the rate-payers to withdraw forthwith from Corporation.

The Conference concluded its sitting appointing a Working Committee, representative of all shades of opinion, for the purpose of carrying on agitation against the Bill.

MR. N. C. CHATTERJEE CRITICISES THE BILL

Mr. N. C. Chatterjee moved:—

A. This Conference of the rate-payers of Calcutta has given its careful consideration to the Calcutta Municipal (Amendment) Bill, 1940, and is of opinion:—

(i) That by divesting the Calcutta Corporation of some of the most fundamental powers of self-government, the Bill strikes at the very root of the autonomy of the Corporation and virtually destroys its self-governing character.

(ii) That the claim that the Bill is intended solely to improve the efficiency and tone of the Corporation administration and would effectively eliminate all extraneous influences on the administration prejudicial to the interests of rate-payers is entirely unfounded; and that, on the contrary, there is great apprehension that by transferring control of the Corporation into the hands of the government, the Bill would serve to make the Corporation's administration subservient to extraneous influences of a pernicious character.

(iii) That in utter disregard of all principles of the autonomy of local bodies, the Bill proposes to transfer power from the city's rate-payers to a party, the majority of whose members represent rural areas and, as such, have but little stake in the city and on whom the city's rate-payers would have no influence or control.

(iv) That the Bill has behind it an unmistakably communal motive. The first Municipal Amendment Act sponsored by the present Ministry, disproportionately increased the Muslim strength, destroyed the system of joint electorates and through various other devices virtually reduced the Hindus to the position of a minority even though they form the preponderant majority of the city's papulation and are by far the largest contributors to the city's coffers: the present amendment Bill has as its dominant object the final consolidation of the strength of a communal party over the administration of the Corporation.

(v) That such provisions of the Bill as empower the Government to appoint the Chief Executive Officer and to set up a Service Commission whose personnel is to be selected and tenure determined by the Government themselves, to control all appointments under the Corporation are not at all calculated to serve the interests of the rate-payers but are simply devices for obtaining communal control over the Corporation for the Coalition Party and also to impose a heavy burden on the rate-payers of the city.

(vi) That the provisions of the Bill relating to the supersession of particular departments of the Corporation and the entire dissolution of the Corporation itself practically at the sweet will of the Government are most dangerous and highly objectionable.

(vii) That if the Bill were really intended for the benefit of the Corporation of Calcutta and the rate-payers, then the Government of Bengal ought to have furnished particulars in support of their allegations against the civic administration and ought to have afforded the Corporation the chance of meeting the allegations and the Bengal Government ought not to have rushed through the Bill without circulating the same for public opinion throughout the Province.

(viii) That the Bill as it stands is being proceeded with against the declared views of the Corporation and a strong body of popular representatives in the Assembly and would certainly have been rejected in toto if submitted to the test of a referendum of the rate-payers of Calcutta.

B. This Conference accordingly records its strong condemnation of, and emphatic protest against the Bill and urges upon the Government to withdraw the Bill forthwith.

C. This Conference calls upon the rate-payers of this City to resist the Bill, and if the Bengal Ministry persists in proceeding with the retrograde measure, then this Conference calls upon the rate-payers to refuse to co-operate with the City Corporation deprived of its autonomy and shorn of its mantle of freedom and, in the event of the Bill being passed into law, in spite of the clear expression of public opinion of the citizens of this City, this Conference calls upon all Councillors who represent the rate-payers of the City to withdraw forthwith from the Corporation.

Forty years ago, observed Mr. N. C. Chatterjee in moving the resolution, in this historic hall was sounded the clarion call of Sir Surendranath Banerjea against the pernicious Mackenzie Bill which was manufactured by the bureaucracy for destruction of self-government in this city. They all knew how Bengal rallied round the banner of Surendranath. Thereafter from the days of the Mackenzie Bill down to the days of Deshabandhu Chittaranjan the greatest and foremost nationalists of this province had steadily sought for the restoration of self-government in this great city of Calcutta. Ultimately, Surendranath as the Minister-in-charge of Local Self-Government introduced the Bill which culminated in the Calcutta Municipal Act of 1923.

From his practical experience of the day-to-day administration of the Calcutta Corporation Mr. Chatterjee could say that isolation of the Muslim community into a water-tight compartment and into separate electorate had led to the return of representatives to the City Corporation who were insensitive to the general well-being. They thought in terms of purely communalism and nothing else.

The Plea And Pretext

Proceeding Mr. Chatterjee urged his audience not for one moment to believe what the Ministers did say in justification of this Bill. They must have noticed what they had stated in the statement of objects and reasons of the Bill. Their plea was inefficiency, their pretext was purification. Did they honestly believe that the Bengal Ministry wanted to purify the civic administration of Calcutta? Did they believe they really wanted to do that? In support of reckless charges they had not furnished one instance, a single particular one to establish the charges they had levelled against the Corporation.

Not that as a matter of fact the Municipal Act did not require amendment. It required amendment in another fashion. It required amendment for the purpose of drastically amending the Section 16 of the Calcutta Municipal Act. Under that section the Government had got power to depute officers to make inspection and examination and report the working of any department. Since Deshabandhu Chittaranjan Das took upon the Mayoralty of the city, the Bengal Government had been saying that there had been systematic maladministration, and practically that was the charge against the Congress administration of the City of Calcutta. They had the temerity to repeat it in the statement of objects and reasons of the Bill. They had said that experience of the working of the Calcutta Municipal Act of 1923 during the last 16 years had demonstrated that the political views of the party in power in Corporation had largely influenced the day-to-day administration of the Corporation.

Complaint Of Maladministration

Mr. Chatterjee pointed out that the Bengal Government had power to depute officers to hold inspection and examination of the work of the Corporation. During the 16 years since the assumption of the Swaraj Party or the Congress Party of the affairs of the Corporation, the Bengal Government had never deputed one single officer to make any single inspection of the administration. During this period the Bengal Government had never on

any single occasion exercised this power conferred on them by Section 16 of the Act. Under Section 18, the local Government had got power to take drastic action against the Corporation. Now the Government of Bengal in the statement of objects and reasons had the effrontery to say that "complaint of maladministration in the various departments of the Corporation which was deliberate infringement of the provisions of the law had been persistently brought to their notice."

If it was so, Mr. Chatterjee held, surely the Government of Bengal was guilty of the gross dereliction of duty. They had power under the Act to take drastic action against the Corporation, but not on a single occasion they sought to exercise that power to rectify "the deliberate infringement of the provisions of the law."

Mere Camouflage

Mr. Chatterjee was convinced that the Muslim League did not want an Act for purification of the Calcutta Corporation. They wanted absolute control and domination of the civic body. They wanted power to place the civic administration and its financial resources absolutely under the domination of the Muslim League. All this talk of purification and of efficiency was mere camouflage, mere pretext.

In the case Bill were passed the Councillors would be deprived of their power and the Calcutta Corporation would be reduced to the position of a seventh rate municipality. There was no provision for appointment of a Hindu in the proposed Service Commission. People who knew how the recommendations of the Public Service Commission were twisted and turned down had no faith in such bodies. It would mean a coterie of the henchmen of the communal Ministry who would be controlling the key positions in the Corporation. The Corporation would have little power over its servants. It was not only retrograde but would seriously affect the efficiency of the administration.

An Appeal To Chief Minister

On behalf of the rate-payers of Calcutta Mr. N. C. Chatterjee would address an appeal—the final appeal—to Mr. Fazlul Huq. When the world was passing through a crisis might he not ask Mr. Huq and his colleagues: Was this the time to press such a controversial measure? Was this the time to disrupt the city and the province by the introduction of such a reactionary piece of legislation? Indians were being told day after day that Britain was fighting for freedom and democracy but the so-called popular Ministry was trying to crush democracy and freedom of the greatest Corporation of this country. It was time they cried halt.

If the Bill were placed on the Statute Book it would be impossible for any self-respecting Corporation to function if it was divested of its elementary rights and the Government do not want that a self-respecting civic body should continue to function in this province.

If, Mr. Chatterjee concluded, all the nationalist forces rallied round a common banner they would be able to resist the bill successfully.

"If all sections of the Congress, the Hindu Mahasabha, Nationalist Hindus and Nationalist Muslims combined together and if they were determined not to allow the commission of the sacrilege, the destruction of the life work of Surendranath and Chittaranjan, Mr. Chatterjee was sure that the Government would find out at once that they would have no other alternative but to withdraw the pernicious measure.

Mr. M. K. Bose

Supporting the resolution Mr. Mrinal Kanti Bose said that writ large on the Bill in the statement of objects and reasons are the words that this Bill was purely communal and a party measure. It had got nothing civic and municipal in it.

Begum Sakina

Begum Sakina Furrukh Sultana Muayyidzada felt that this bill would be opposed by all sections of citizens to whom the principle of autonomy and self-government was dear irrespective of religion, caste or creed. This bill according to the Begum was to be resisted, not because it was a communal measure but because it was a pernicious measure opposed to the interest of all rate-payers. The poor and middle class Muslim rate-payers found it very difficult to approach the Muslim Councillors for the redress of their grievances who had been returned on the system of the newly-introduced separate electorate.

Begum Sakina suggested that the organisers of this Conference should also approach the Muslim rate-payers and explain to them the real character of the measure. This, she hoped, would make the Muslim community join hands with them.

Mr. R. N. Banerjee

Mr. Rajendra Narayan Banerjee said that the real object of the bill was to deprive the Corporation of its powers and usurp them by the party in power. Since the new Act came into force there had been appointment of the Chief Executive Officer twice. They were Mr. Subhas Chandra Bose and Mr. J. C. Mukerjea. So far as Mr. Bose was concerned, whatever difference one might have with his political views, nobody could deny that his work as Chief Executive Officer drew praise from everybody. Even the Europeans praised his work. So far as Mr. J. C. Mukerjea was concerned, he had three terms. Government had never any objection to his appointment and re-appointments. The nominated Councillors who acted under the dictation of the Bengal Secretariat always voted for Mr. Mukerjea. Then why should Government take away the power of appointment of Chief Executive Officer from the Corporation.

Mr. J. C. Gupta

Mr. J. C. Gupta said that by providing for the disposal of contracts up to Rs. 10,000 by Chief Executive Officer, there would be great scope for distribution of patronage among "brilliant" nephews and supporters of the Muslim League. The reason why the Government were so emboldened was that the non-Muslims were apathetic.

Mr. S. N. Majumdar

Mr. Satyendra Nath Majumdar said that the citizens and rate-payers should combine and create a strong public opinion to awaken the ministry to the necessity of withdrawing the bill. It was a matter of regret that when the world was passing

through a crisis, such a measure should be brought forward.

Messrs. Benoyendra Nath Bagchi, Srish Chandra Chakrabarty, Biman Chandra Bose, Nalin Ch. Paul and Rajani Mukherji also supported the resolution which was supported unanimously.

Proposed by Mr. Satinath Roy and seconded by Mr. Bepin Behary Ganguly and supported by Mr. Sachindra Prosad Bose, the following resolution was passed unanimously :—

The Conference appreciates the strong opposition to the Bill already voiced in the Assembly by the nationalist members and congratulates them on the bold stand they have taken, and the Conference requests all nationalist members of the legislature and in particular, the representatives of the citizens of Calcutta there to carry on the resistance against the Bill and to strive their best to see that the Bill is not passed into law.

DR. S. P. MOOKERJEE

Dr. Syamaprasad Mookerjee moved the following resolution :—

That a general committee with power to add to their numbers and to appoint a working committee and such sub-committee or sub-committees as may be deemed necessary, be formed for the purpose of carrying on the agitation against the Bill and for the purpose of setting up an organization to federate the different ratepayers' association of Calcutta and for taking all other steps necessary to attain the objects outlined in the foregoing resolutions.

During the last one year, observed Dr. Syamaprosad Mookerjee, they had recorded their protest against the manner in which the administration of the province had been carried on by the present ministry. This conference would be useless if it merely met for the purpose of recording its protests. It would end by repeating something which had been said *ad nauseum*.

This conference was really intended to rouse public opinion in this city to such an extent that it would be impossible for the Government to carry the bill through the legislature. And even, if the bill was passed into law, to bring forward a state of affairs in this city and in this province that the Act might become a dead letter. This, however, could not be done by their meeting within the precincts of the Town Hall. They knew the forces against which they had got to fight. If they were prepared to take upon themselves the serious responsibility, if they were determined to follow up by action what they had declared here by means of the resolution then only there would be some effect on the authorities that were in power to-day.

"My own feeling is," Dr. Mookerjee stated, "I will not commit any other member, that the time has now come for us to declare here and now that if constitutional agitation fail, Bengal must take up unconstitutional agitation that may be necessary for asserting her rights."

Let them not forget, Dr. Mookerjee proceeded, that this was not an isolated instance merely for the purpose of grasping the powers of the Calcutta Corporation; this was but a part of the deep-rooted policy which was nothing more or nothing less than to destroy the fundamental basis of nationalism in this province and to instil in every sphere of public activity a communal urge, which would not benefit the Moslems as a community but was going to benefit simply a coterie of men who were due to destroy the vital interests of the province.

Dr. Mookerjee was glad to find that a suggestion in the resolution had been made that members of the Corporation should resign if this bill was passed into law. But if a certain batch of Councillors resigned, there would be other Councillors who would come forward and take charge of the Corporation and do things in a manner which would go against the vital interests of the rate-payers of the City. They would have to carry forward their agitation in such a way that the Corporation itself would remain unadministrated and no Hindu or no nationalist Muslim or anybody who cared for the vital interests of the city would venture to offer himself as a candidate for election to the Corporation. Let them create public opinion to that extent. It was no use asking the Councillors to get out and allow the Corporation to be filled up by men inferior to them. Could they create a situation in the city which would make it impossible for any one to enter the Corporation provided this bill was passed into law? It should not be left alone to a Committee like this to carry on this work. Every ratepayer in the city must regard it as an attack on his own cherished rights. Let them prepare public opinion in their own Wards and in other parts of the city.

Dr. Mookerjee hoped that after this resolution had been passed immediately public meetings would be called in every part of the city, public opinion would be formed in an effective manner. Then they will be able to guide public opinion in this province, so that their goal should be reached without fear or favour.

Mr. Debendra Nath Mukherjee seconded the resolution, which was carried unanimously.

In his concluding remarks, Mr. S. N. Banerjee, President of the Conference, said that their work had not finished but only had just begun. They should henceforward continue zealously and ceaselessly carrying on agitation against the pernicious measure, so that the ministry might find it impossible to put it on the Statute Book.

Mr. Nalini Ranjan Sarker thanked all those who had responded to the invitation of the organisers of the Conference.

With a vote of thanks moved by Dr. Charu Chandra Chatterjee the Conference concluded.

GENERAL COMMITTEE

The following General Committee was appointed :—

President—Mr. S. N. Banerjee, Vice-Presidents—Dr. S. P. Mookerjee, Messrs. Phanindra Nath Brahma, N. R. Sarker, J. N. Basu. Secretaries—Dr. Bhupendra Nath Basu and Prof. Debendra Nath Mookerjee. Members—Messrs. J. C. Gupta, N. C. Sen, Nirmal Chandra Chunder, Jogendra Nath Mandal, Srish Chandra Chakrabarty, Sachindra Narayan Sanyal, N. C. Chatterjee, H. P. Poddar, R. N. Banerjee, P. D. Himatsingka, Prof. Tinkari De, Mr. Madan Mohan Burman, Begum

Special Article

Stammering: Its Cause And Remedy

[By S. N. Sen, M.Sc.]

THE story goes that the great Greek orator Demosthenes was a stammerer in his early days. This defect which often made him a laughing stock of all weighed so heavily on him that he determined some how or other to get rid of this ludicrous habit. By putting pebbles in his mouth the great would-be orator used to roam about the lonely shore and harangue forth to the vast expanse of sea. This story is often cited as an example of patience and perseverance in our school books. But the fact that it contains an indirect suggestion as to existence of some method of correcting habit of stammering even in those good old days, is often lost sight of. The method which the Greek orator of our story used to practise may be questionable; but there it was.

However, this question of stammering habit has received more attention and critical examination in recent times. Researches in speech therapy have now unfolded the reasons of stammering habit. The failure of normal speech, to state our conclusions in advance, is now attributed in the first place to some anatomical defect in the vocal chord and in the second place to the want of balance between the flow of vocal tone and the movement of lips, tongue, jaws etc., which produce vowels and consonants. This latter defect is not always anatomical but develops from defective training, association and some other physical factors. That is why we often call it a habit, and as such it makes us look forward to a consequent correction. The idea which most of us generally hold that this habit will automatically disappear with years is generally wrong. And when the results of investigations have brought before us some suggestion of getting out of this unpleasant trouble it is worth while that public attention should be drawn to it.

Before we examine the causes of stammering it is necessary that we should appreciate the mechanism involved in the production of voice and speech in a normal human being. Most of us are familiar with the reeded musical instrument like organ pipe. The reed organ pipe is, we think, the most exact analogy we can pick up to explain the production of vocal tone. In the simplest form it consists of the mouth or entrance through which air is blasted inside, the narrow orifice with an intervening lip like arrangement called the reed whose vibrations actually produce the sound, and finally the remaining body of the pipe in which the whole air column is thrown into resonant vibrations. The shape and size of the reed determines the quality and pitch of the note emitted.

Our vocal instrument is exactly of similar description. So far as anatomy is concerned, we know that the pipe which begins at the mouth and extends deep down into the system is mainly divided into three portions *e.g.*, the pharynx, the larynx and the trachea. In the region where the pharynx blends with the larynx two pairs of folds of mucous membrane project from the sides dividing the region into three parts. The folds, however, do not form air tight partitions but each has a fissure in the centre, the size of which is controlled by muscular arrangement. The folds are called the vocal chords which closely resemble the reed of the organ pipe we were just talking of. The fissure in the vocal chords is technically called the glottis. During tranquil breathing, the opening of the glottis is triangular. It is most widely dilated in deep respiration. In the act of producing a note the chink is narrowed down and the vocal chords are stretched nearer and almost parallel by the muscle action. The wind pressure released from the chest makes the vocal chord vibrate like the reed of the organ pipe producing the note. The volutary motion of the muscles produce different chinks and tensions in the vocal chords with the consequent variety of quality and pitch in the note emitted. The vocal tone so produced as a result of the vibration of the vocal chord is hardly audible but for the resonance of the air column in the cavities of nose, mouth etc.

So much for the vocal tone production. How the vowels and consonants *i.e.*, words are produced? We have talked of the vibration of the vocal chord. There are of course various modes of this vibration simultaneously existent, or technically what we call the over-tones and harmonies. By modifying the size and shape of the pharynx, mouth and the nose and by the different dispositions of the tongue the air column is made to resound to certain harmonies to the exclusion of others. And so certain characteristic notes or vowels are produced. Consonants are produced by almost complete interruptions of the outflow of air in different positions of the tongue. For instance, to sound ā as in father, our mouth assumes the form of something like a funnel with a wide front and with the tongue lying on the floor of the mouth.

With this rudimentary idea of the physics and physiology of our sound box we can follow the thread of our problem in hand. We have said that in the act of the production of the vocal tone the vocal chords almost approach each other owing to muscular tension. This resistance is offered to the outflow of air, vibrations of the chords set in, and the vocal tone is produced. But if, as it happens with the defective organ, the approximation of the vocal chords is not enough resulting in an insufficient resistance to the outflow of air much of the vocal tone is lost. We must have noticed the absence of sharpness and clearness in the tone of a stammerer whose voice is more or less "breathy" as it is technically called. He finds difficulty in completing his words and sentences as if his breath supply has run short. But what actually takes place is not the shortage of breath supply, but the incapability of the vocal chords owing to its insufficient resistance offered to the outflow of air to make the most of breath supply. In a normal speaker, however, with perfect vocal chord resistance minimum supply of breath is required. From this it obviously follows that the remedy lies in the increase of vocal chord resistance. But how can it be achieved? One suggestion is to relax the muscle of the neck and throat. Really speaking these muscles do not directly play any part in the production of vocal tone. But the relaxation of these muscles helps in the resonance and consequently improves the depth of the tone. This is automatically adjusted in a normal speaker but an artificial effort is required of a stammerer wishing to improve his tone. Besides the stammerer should try to concentrate more to the production of tone than to that of vowels and consonants. Consistent attempt of this type may ultimately remove the breathy character so characteristic of the stammerer.

We next come to the most important cause of stammering namely the want of balance between the vocal tone and the movement of the lips, tongue and the jaws. We have said in the previous paragraphs that the movement of the lips, tongue etc., is responsible for vowels and consonants, in fact, words and sentences. They shape and mould the vocal tone into words. So any want of balance or correct adjustment will, it is easily understood, lead to disastrous results of stammering. We must have noticed the desparate movement of lips, tongue and jaws on the part of the stammerer without succeeding in giving vent to his feelings. A speech therapist has adequately described this as the habit of pronouncing too much and phonating too little'. Evidences in favour of the view that stammering is the outcome of such a want of balance are many. Thus it has been found that the stammerer can sing well if they happen to posses musical attainments. The stammerers have also been observed to speak fluently when they are called upon to address a gathering. The reason is not far to seek. In both the cases the mouth movements are of secondary importance; the speaker has got to pay more attention to the vocal tone in order to maintain the tune in music and the intensity in the address so that it will be audible to the man sitting on the last row of chairs. The speaker is thus given a chance to adjust his mouth movements comparatively slowly with less possibility of discordance.

Baked with the usual degree of excellence, and containing a high percentage of health giving Bourn-Vita, made from fresh full-cream milk from British farms, British Malt and Empire Cocoa. Obtainable in the usual size tins or convenient air-tight packets.

BRITANNIA
Biscuits

In the majority of cases stammering seems to be more a habit developed through false and careless training than a serious physiological defect. From the physiological stand point a man may be normally a slow speaker speaking at a rate much slower than the average speakers. If that man tries to speak as fast as a normal man he is sure to lose balance between his mouth movements and the vocal tone and fail over words just as a naturally slow writer will write an extremely bad hand in trying to write quickly. And this thing actually happens in stammerer. But why should a naturally slow speaker attempt at a quick speech and run the risk of developing a stammerer? We generally learn to speak by imitation in our childhood when we all begin by stammering. Gradually we learn to make proper adjustment of lips, tongue etc.. to articulate the required words and phrases. If a child who is a naturally slow speaker happens to belong to a family whose members usually speak fast the child is very much liable to develop a stammer. As a matter of fact statistical edivences corroborate this statement. Special care and attention taken at that time to prevent any attempt on the part of the child at speaking quickly by constant watch and advice may largely succeed in avoiding the development of the stammering habit.

Thus stammering being more or less a habit developed through careless training it stands no reason that much can be done to get rid of it. The stammerer should always try to speak with a firm tone thereby giving more attention to the vocal tone. In that way he can increase the vocal chord resistance as explained before. Secondly he must avoid speaking quickly and jerkily as far as possible.

Some may feel like asking whether so simple a method as this is all that is required to get rid of a stammer. The method is undoubtedly very simple. But for the assurance of success some other factors need be considered. If the stammering habit has continued for many years the process should naturally be a prolonged one requiring considerable patience and perseverance. This speech re-education also suffers considerably in the case of an unmusical stammerer who fails to differentiate between the various gradation of pitch and intensity. Last but not the least is the fact that the patient very often suffers from a psychological set back. When answering a querry he is constantly under the fear that he would stumble over words. In order to avoid being exposed to his questioner he tries to speak correctly and feels nervous at his inability and stammers more. It is of paramount importance that this element of fear must be first of all got rid of by careful and sympathetic handling of the patient so that he may completely feel at ease. By taking into account all these factors a systematic and continued speech re-education may be of great service to those who want to get rid of their stammering habit and become agreeable social beings.

"ART IN INDUSTRY" EXHIBITION

New Concession For Students

It is now generally known that an exhibition of "Art In Industry" will take place at the Government School of Art, Calcutta, during the last week in February and the first week in March, with a first prize of Rs 750. This is one of the largest prizes ever offered for an Art Exhibition in this country and it has now been decided, in order to give Indian students all possible assistance, that there will be no entrance fee for all entries which are accompanied by a certificate from the Principal of any recognised School of Art that the entrant is still an art student.

The reduced entrance fee for all other entrants is Re. 1 for one entry or more, limited to six entries from any one individual. There are six sections in the Exhibition, of which one is Juvenile, one limited to a design for the Textile Industry and one for Package Design There is also one section in which entries will take the form of Letter ing this work being particularly weak in Indian Commercial Art. The remaining sections cover Decorative Art, which is confined to designs suitable for reproduction by any recognised printing process, and an Outdoor section which deals with hoardings, posters and similar media. Entries can be for any publicity purpose, such as a cover for a programme, a label for a chocolate box, a picture to show the strength of steel, the beauty of Indian textiles, etc. Entries will be received at the Government School of Art, Chowringhee, Calcutta, between the 1st and 15th February, and full particulars of the Exhibition can be obtained from the Principal, or from any donors of prizes who are as follows :—

The Metal Box Co., of India Ltd.
The *Ananda Bazar Patrika.*
The Indian Tea Market Expansion Board.
The Dunlop Rubber Co., of India Ltd.
The Tata Iron and Steel Co., Ltd
The Mahalaxmi Cotton Mills Ltd.
and Burmah Shell (who are sponsoring the Exhibition.)

Salvage From Household Refuse In England

War Work By Local Authorities

[By W. B. Strain, *Inspector of Cleansing, Ayr.*]

DURING the Great War, 1914—18 a serious shortage of raw materials resulted from U-boat activities, and Government set up the machinery during 1917, to salvage as much so-called waste material as possible from household refuse in an effort to counter-act the effects of shortage. This scheme was so successful that the economics of permanent salvage from refuse schemes were closely studied and a new type of refuse disposal plant developed. This was the separation and incineration type, and each succeeding plant has been improved until a highly successful means of separating household refuse has been devised, and the latest types built in Edinburgh and Aberdeen are a great credit to the combined efforts of the Engineers and Cleansing Superintendents of the country, not forgetting the Cleansing Committees who have accepted the advice and guidance so freely given them by the Institute of Public Cleansing.

The number of these plants, it will suffice to say, are many in the country to-day, and the towns which have installed these plants find themselves, at this time, in the happy position of being able to put forth a very special war effort in the matter of salvage from household refuse.

The Royal Burgh of Ayr has a plant of this description, and, although six years old, is able at this juncture to be among the leading towns in salvage output per 1000 of the population. Since the commencement of the war we have been amongst the top ten of the list for the whole country, and for the month of March topped the list.

The country is fortunate in having at the head of the cleansing services of England and Wales Mr. J. C. Dawes, and for Scotland Mr. T. B. Crookes. These gentlemen operated salvage schemes during 1914—18 war, and thus their services were immediately available at the outbreak of this war. Their experiences during the Great War and in the twenty-one years subsequent thereto are proving invaluable to the country.

A scheme was set up by the Government under the Ministry of Supply and a Salvage Department under the leadership of Mr. H. E. Judd is responsible for civil salvage.

This time, however, the scheme was put into operation soon after the outbreak of war. Twenty-two district advisers were appointed to carry out the organisation and to advise Local Authorities throughout the country on the best means of securing salvage material from household and other refuse.

In pre-war days we were allowed to do as we liked, and, indeed, we did as we liked to some considerable tune.

Waste prevailed and held full sway and no one seemed to care a job. That day has gone, at least for the present, and it behoves each person to con-

serve our waste materials to the utmost for the following reasons:—

(1) We are an island nation and dependent on imports for most of our raw materials.

(2) The import of raw materials in war time imposes a heavy burden on shipping and on the Navy which must convoy the imports.

(3) Every ton of waste material which can be converted to raw material saves valuable shipping space which can be used for conveying essential materials, arms and food.

(4) We know that thousands of tons of so-called waste materials exist in the country to-day, and the Government are resolved to secure it for industries.

The materials required to meet the wants of indutries are wood, wool, paper, rags, carpets and bagging, metals (ferrous and non-ferrous), bones, bottles, cinders, screened dust, household fats, and vegetable pig feeding. Markets can be found for all of these commodities to a greater or lesser degree, but this does not exhaust the commodities which can be utilised from households by any means.

Many towns and villages have wastes peculiar to the district. For example, hundreds of pairs of boots can be salvaged from mining areas and a market has been found for the uppers. Another form of salvage can be developed in seaside resorts by conserving seaweed. Any town can collect horse droppings on the streets, soft garden refuse, autumn leaves, waste fruit, waste fish, &c. If this is mixed together it forms a good manure.

Therefore, the paper, textile, metal, bottle, and fertiliser industries can be assisted by providing them with raw materials and agriculture and horticulture benefit in mineral and organic manures and fuel. Pig feeders in many towns make use of separately collected garbage in the form of potato peelings, vegetable trimmings, &c., laid out by housewives in their districts.

Having accepted the post of Honorary District Adviser of Salvage for Ayrshire, Wigtownshire, and now, in addition, Kirkcudbrightshire, I felt that some special system would require to be set up to deal with the smaller towns and villages, &c. I am anxious to recover salvage from all towns, villages, and estates throughout the three counties. Unfortunately, the Ministry provide no funds for experiments or development of ideas. It is one thing to say we know there are hundreds of tons of salvable material in the three counties, but it is quite another matter to bring that material forth on anything like economic lines. The Government cannot afford to pay fantastic prices for scrap materials because of the effect this would have on the finished article, of which the scrap forms the basic or raw material. Thus many considerations had to be taken into account, and not the least among them being the fact that this work in county areas and the smaller towns had never been undertaken before.

Where a town, village, or group of estates, or an institution or camp, has collected 1 ton of paper or 2 tons of tins, enamel, galvanised and other metal, 5 gross of bottles, ½ ton of rags, carpets or bagging, &c., notification is sent to the merchant concerned. If the Authority has been unable to provide a paper-bailing machine for its own use, a portable baler is sent to the site and the paper is baled at a charge of 30s. per ton. The baled paper is later uplifted by heavy motor or despatched by rail. This scheme, which was introduced by me, is working very well, but then a reasonable price is procurable for paper.

The question of metals is a more difficult problem, as tins, enamel ware, and galvanised metals form the greatest part of the metal content; but the price paid for these is very small indeed. It is a controlled price, and about 48s. per ton baled and delivered at the blast-furnace works. They must be either baled or rolled before they will be accepted, and this price is payable in either town or rural areas alike. This operates most unfairly against the rural areas, where transport of such bulky material is all against reasonable working costs

PERMANENT
HUME STEEL PIPE
(with Spun Concrete Lining and R. C. C. Outcoating)
POSSESSES FULL PROTECTION, INTERNAL AND EXTERNAL. GIVES LONGER LIFE THAN UNPROTECTED METAL PIPE.
SATISFIES ALL CONDITIONS!!
Gives about 30 per cent. superior flow of water.
Saves in laying, jointing and transport.
Stands very high pressure easily.
Free from Rust and Tuberculation.
Saves a large amount initially.
Is regarded as the best Pipe by Eminent Experts.
Can be re-used after a number of years elsewhere.
Free from Bursts.
Particulars from:
THE INDIAN HUME PIPE CO., LTD.
Head Office:—
Construction House, Ballard Estate, Bombay.
FACTORIES ALL OVER INDIA.

Approved and used by P. W. D., Govt. of India & Municipalities.

EXHIBITION

The Sponsors of this Exhibition are confident that Indian art is eminently suitable to bring the messages of Indian industry to the vast public of this country.

Entries of original work are invited from all artists at present in India, and Burmah-Shell, the Sponsors will award a prize of Rs. 500 for the best exhibit. Rules and details can be obtained from Burmah-Shell or from any of the donors of prizes. The Exhibition is divided into six sections. The first five each carry prizes of Rs. 250, Rs. 100, and Rs. 50, while scholarships at approved art schools are offered in the Juvenile Section.

All entries received at Government School of Art, Chowringhee, Calcutta, from 1st to 15th February.

SPECIAL CONCESSION
REGARDING ENTRANCE FEES.

In order to encourage Indian students, there will be no entrance fee for any section for entries which are accompanied by a certificate from the Principal of any recognised School of Art that the entrant is still an Art student. The entry fee in all other cases has been reduced to Re. 1/- for one or more entries up to a limit of six entries from any one individual.

FEBRUARY 2nd — [illegible]

(*Continued from page* 290)

yet there are several thousands of tons of these metals wasted annually in Ayrshire alone. I am working on a scheme to recover these metals, and the working cost, haulage, railway charges, etc., are being carefully kept against each consignment.

We have sought and are securing a good deal of voluntary assistance in the matter of collecting metals, and we hope to arrive at a reasonable cost per ton handled. It seems to me that where the material exists and is required, that the question of costs should be of secondary importance, provided every effort is made to handle the metal economically.

With regard to bones, my scheme received a nasty setback. It was suggested that these should be collected by school children after cooking and placed in properly covered receptacles at the schools. From here the bones would be uplifted twice weekly. The Scottish Department of Education gave the scheme its blessing and the various Education Authorities were circularised. Unfortuately, the Ayrshire Education Authority turned the scheme down on the ground that children would soil their clothes. In some counties the scheme is operating well, but I find myself with no suitable acceptable alternative to the scheme, and we are thus losing many tons of valuable raw material in Ayrshire.

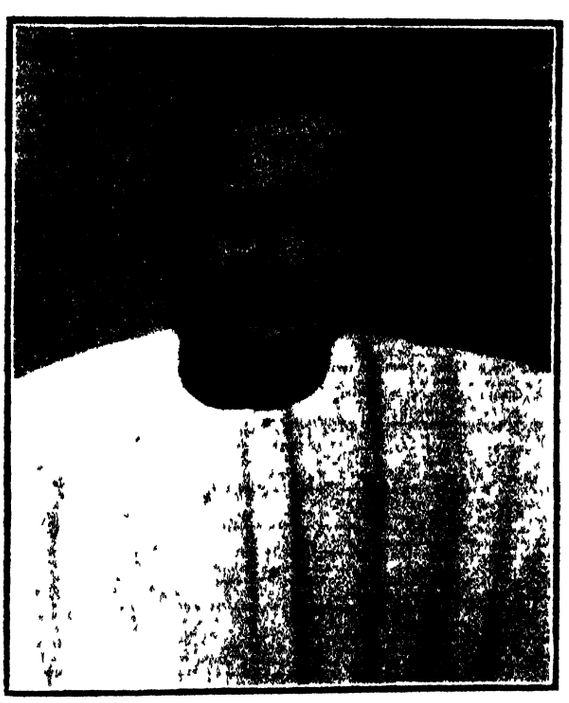
After all, this is war time, and it is hopelessly uneconomic to institute a seperate house-to-house collection for bones. There are difficulties in the way of separating every required commodity at the house, and it may be argued that if this is the most irksome or revolting experience of war time which will befall our youngsters, surely it is not a lot to ask them.

I do hope the County Education Authority will reconsider this scheme at a very early date, as there is no substitute for bone. It is the raw material with many uses, and it is shameful to think that many tons of bones are being wasted. It rather goes against the grain to observe the waste being permitted on the grounds that youngsters might soil their clothing, or that it is not nice to have them carry bones to school. What is wrong with a good clean bone which has been through the soup pot or roast pan, and what are our youngsters of to-day coming to, when they would object to carrying bones to school? It is going to help forward our war efforts, and I can assure you such a scheme would, then I say let them carry all the bones they can lay hands on—their own household bones and that of the neighbours. Also, I am sure the youngsters would be thrilled to know that they were helping forward the cause of their country. Rags, carpets, and old bagging in sufficient quantity present little difficulty in handling and transport. The prices paid for these textiles give a reasonable return for the trouble of the work involved.

The market for bottles is not too good, but a firm near Glasgow has promised to handle most of the recovered bottles in Ayrshire and Wigtownshire.

In the meantime, the recovery of household cinders is only carried out in Ayr, and a vast tonnage of partburned coal in the form of cinders is being dumped in coups in all parts of the county. Good coal has a calorific value of 12,000 B.Th.U., whilst cinders are estimated at 9000 B.Th.U.

Salvage of waste materials at military camps and barracks is now carried on throughout the three counties.



CALCUTTA NEWS & VIEWS A Digest

CENSUS OPERATION IN CALCUTTA

Mr. R. N. Bose, Special Census Officer, Calcutta has issued the following statement :—

"The Census of Calcutta is to be taken from the 19th February, 1941, and will be finished by the 4th March, 1941. Considerable preliminary arrangements have been made and house-numbering and preparation of house lists covering the 82 Wards of the city have been conducted under the superintendence of 82 public men who are with one exception Ward Councillors of the Calcutta Corporation (List attached). They have been assisted by over 400 supervisors drawn from representative and influential non-officials in checking the work of the house numbers and the public have been requested

THE LATE MR. L. M. SEN

Councillor, Corporation of Calcutta. 1924—1930

to bring to the notice of these 82 Charge Suprintendents all cases of ommission.

"All complaints have been given careful consideration and it has been found that many are under the impression that because there is no tar mark on their houses they have been omitted. The procedure adopted in rural areas where every house is painted has also confirmed this belief.

"So, it is necessary to point out that in Calcutta where the municipal premises number forms the basis of numbering, when there is one family (commensal unit) in a premises, the municipal number only has been entered in the house list and the house has not been marked. It has been found that almost all the complaints received so far refer to houses which have been actually noted in the house lists though not tar painted. It is not possible to give individual replies but those who have written to our office, may rest assured that their complaints have been attended to.

"Future complaints should be sent to the Charge Superintendents direct and it is suggested that in case no enumerator has visited any locality by the 1st March, 1941, the Charge Superintendent of that area should be at once informed and also, if necessary, the Special Census Officer. Where enumeration in the area has already taken place but a few persons have been omitted, the persons who have not been enumerated should seek out the enumerator from the address given in the Charge Office.

"Revisional rounds by the enumerators will be arranged but in the nature of things, however hard they try, the enumerators may occasionally make mistakes and count one person twice or fail to count another at all. But if members of the public especially those who happen to be travelling from place to place during the census period try to help the enumerators to achieve their object of counting each person once and once only, then we can be sure that the census will be as accurate as is humanly possible.

"An enumerator is an honorary Census worker and has every right to expect that he will be treated with consideration. To send him away rudely or lightly is to court prosecution under the Census Act, and to ask him to visit the same house again and again is to refuse co-operation with a public servant in the discharge of his duties He will have to ask some delicate questions and these have got to be answered, though in case of *Purdah* and incapacity, the questions may be answered by somebody who can speak on behalf of the person enumerated.

Names of Charge Superintendents, Address of Charge Offices and Phone Numbers.

Ward No. 1.—Debendra Nath Mukherjee, Esq., 177, Raja Dinendra Street, 5023 B.B.

Ward No 2—Dr S K. Ghosh, 23/1, Beniatola Street, 2228 Cal

APPEAL TO HINDUS

An appeal for unity and solidarity among Hindus in order to defend their rights and interests was made by Dr. Shyamaprasad Mookerji, Working President of the All-India Hindu Mahasabha, presiding at a largely-attended meeting at Sraddhananda Park, Calcutta, on Sunday evening.

He explained the programme of work adopted by the Hindu Mahasabha at its Madura session and said that if they had to take action as Hindus, they would do so not for their own communal gain or advancement but for saving their Motherland from disruption and ruin.

He attacked the *Pakisthan* Scheme and remarked: "We resolutely oppose *Pakisthan* as we in Bengal already know to our cost what this will really involve. Hindus in India will never allow Hindusthan to be partitioned and bartered away; they will resist it with everything they hold dear and sacred. The British Government should declare its policy clearly and unhesitatingly that it will be no party to any scheme which will destroy the indivisibility of India." He referred to the grievances of the Hindus in Bengal and condemned the policy pursued by the Bengal Ministry.

Dr. Mookerji concluded with an appeal to the Hindus to sink their differences and rally round the banner of the Hindu Mahasabha.

Mr. N. C. Chatterji and Mr. Sanat Kumar Roy Chaudhury also addressed the meeting.

LATE COUNCILLOR B. N. KOLAY

A portrait of the late Mr. Bhutnath Kolay, an *ex*-Councillor of the Corporation of Calcutta, was unveiled before a large gathering at Nafar Babu's Bazar (at Bowbazar Street) on the occasion of his second death anniversary held on the 9th January. Mr. Rajendra Chandra Dev, President, Bengal Provincial Congress Committee, unveiled the protrait. Sir Harisankar Paul presided.

Mr. Subhas Chandra Bose sent the following message :—

"I am glad to know that on the occasion of the second death anniversary of the late Babu Bhutnath Kolay his portrait will be unveiled at Nafar Babu's Bazar by Sj. Rajendra Chandra Dev, President of the Bengal Provincial Congress Committee. Bhutnath Babu was an important member of our party in the Corporation and he enjoyed the esteem of all his friends and acquaintances. He was one of the prominent Bengalis of his time who were engaged in commerce and industry. His charity was too well-known to need mentioning. His untimely death has been a great loss to society and to public life. It is in the fitness of things that we should pay out tribute of respect to his memory on the occasion of the second death anniversary.

Mr. Ramananda Chatterjee said that the late Mr. Bhutnath Kolay was an amiable and kind-hearted man; his heart went out in sympathy to those who were in distress. What he achieved in his life he did only by dint of his own merit and perseverance Mr. Chatterjee hoped that the members of his family would emulate his example.

Mr. Gurusadaya Dutt said that Bhutnath Babu was his class-mate in the Presidency College and as such he had the opportunity of knowing him intimately. What Mr. Dutt had noticed in Mr. Koley's life was the fact that, although he had English education, he had been able to rise above the influence that tended to separate the English educated class from the vast masses in the country.

Sir Harisankar Paul said that the deceased was a man of transparent honesty and character. His success as a businessman was due to his honesty and character. Young men of the country who took up business as a career would be greatly benefited if they studied his life and emulated his example.

BENGAL SALES TAX BILL

A strong plea for withdrawal of the Bengal Sales Tax Bill, 1940, now pending before a Select Committee of the Bengal Legislative Assembly, was made in a resolution adopted at a Conference of trading interests of the city which was held at Dalhousie Institute, Calcutta, on Tuesday evening to protest against the Bill. Mr. N. R. Sarker, *ex*-Finance Minister, Government of Bengal

presided. The Bill seeks with certain exemptions, to impose a tax of 2 per cent. on all retail sales exceeding Rs. 20,000 annually.

The Conference pointed out that the imposition of the Sales Tax at the present juncture was likely to result in a decrease in the volume of business and cause a gradual deadlock in trade, and urged Government to postpone the imposition of the proposed tax in response to the universal demand from the people.

Acharya Prafulla Chandra Ray, who opened the Conference, emphasised that the industries of the province would be hard hit by the imposition of the proposed tax.

ROUND INDIA IN MOTOR CAR

Corporation Officer's Tour

Mr. Sushil Ch. Ghose, A.M.I.Mech.E., Superintendent of Tallah Pumping Station, Calcutta Corporation, has just completed an all India-round tour in his self-driven car. He covered 6,480 miles and travelled practically whole of India excepting North-West India within two months.

Mr. Ghose left Calcutta on the 1st of November last and returned on the 30th December, 1940, and visited the following places :—Dehri-on-sone, Beneras, Allahabad, Cawnpore, Lucknow, Aligarh, Delhi, Agra, Gwalior, Kholapur, Indore, Mhow, Nasik, Bombay, Lonavala, Poona, Belgaum, Goa, Dharwar, Hubli, Bangalore, Mysore, Ootacamond, Coimbatore, Ernakulam (Cochin), Allepey, Quilon, Trivandrum, Cape Comorin (Kanyakumari), Madura, Pondicherry, Madras, Bezwada, Rajmuhindry, Vizagapatam, Waltair, Berhampore, Gopalpur-on-Sea, Rambha on Chilka Lake, Puri, Sakkhigopal, Bhubaneswar, Khandagiri, Udaigiri, Cuttack, Chaibassa, Chakradharpur, Ranchi, Hazaribag and Hazaribag Road.

In reply to our representative's query, Mr. Ghose said that roads in India outside Behar and U. P. were not generally suitable for motoring. The Agra—Bombay Trunk Road and the roads from Bombay to Bangalore were awful. In his opinion Madras Presidency stands first as far as bad roads are concerned. He expressed the opinion that there was no pleasure in motoring on such miserable roads which covered more than two-thirds of the whole tour.

Mr. Ghose did not find any asphalted roads outside a few miles beyond big towns anywhere in Central India, Bombay, Madras and Orissa provinces. The Grand Trunk Road, the whole length of roads in Travancore State, roads in Orissa and Chotanagpur were first class. Roads were good in Travoncore State, and those in Mysore were not bad.

Mr. Ghose thinks he was very fortunate to receive co-operation, help and hospitality throughout his tour. Mr. Ghose never met with any robber or thief and has not lost even a handkerchief. Our representative asked his opinion as to which was the finest spots among the places he had visited. "Mysore City" was the reply, "Goa could also be bracketted together with it."

When our representative saw Mr. Ghose at his quarters immediately after his return, he looked quite fit and cheerful inspite of the long and wearysome journey. Mr. Ghose has always been a man of active habits. He was probably the first man to cross the Naga Hills to Imphal (Manipur) in Assam alone on push-bike when he was only 19. During the last Great War he was a Section Commander of the Bengal Light Horse. When in England, he was a member of the Sherwood Rangers Yeomanry (Cavalry Volunteers) in Machine Gun Section and was attached to Inskilling Dragoons. He is also an air-pilot having obtained a "A" class License in 1932 and has made several cross country flights.

MR. S. C. GHOSE

Who has just completed his all-India Tour

VITAL STATISTICS

For the City of Calcutta for the week ending

11th January, 1941.

CITY OF CALCUTTA (TOWN AND SUBURBS)

The total number of deaths registered during the week was 760 against 882 and 753 in the two preceding weeks and higher than the corresponding week of the last year by 19. The general death-rate of the week was 34·6 per mille against 31·8 the mean of the last five years.

Town (Wards 1—25 and 27)

The number of deaths registered during the week ending 11th January, 1941, was 651 against 763 and 628 in the two preceding weeks. There were 23 deaths from cholera, against 20 and 13 in the two preceding weeks. There were 71 deaths from small-pox during the week against 77 in the previous week. There were 2 deaths from influenza against 5 in the previous week. The mortality from fevers and bowel-complaints amounted to 25 and 69 respectively against 31 and 80 in the preceding week. The general death-rate of the week was 33·8 per mille per annum.

There were 34 imported deaths. Excluding these, the death-rate of the Town was 32·1.

There were 148 deaths from respiratory diseases against 157 in the previous week.

There were 51 deaths from tuberculosis against 62 in the previous week.

There were 142 deaths of infants under one year.

Suburbs (Wards 28—32.)

The candidates must possess the qualification of B.E. All applications will be received by the undersigned upto the 25th instant.

M. MOITRA,
City Architect.

Central Municipal Office,
The 17th January, 1941.

Most people treat municipal subjects with indifference and unconcern—everybody's business being nobody's interest. But, really there are no uninteresting subjects, only uninterested people.

Yet, there is an increasingly large number of people now who believe that civics is a matter of concern to them, to their community and to the future of their city.

The *Calcutta Municipal Gazette* appeals to just such people. It invites discussions and constructive criticism in the conduct of our municipal affairs. It helps to increase the interest in Local Government, to make public life more useful, to make our nationalism richer by making it a matter of practical, constructive achievement.

And the *Gazette* is free from party fealty, without any party obligations or debts to pay. It wishes to present ideas impartially and judge questions in the interests of the city only and none other.

We invite you to read the *Gazette* regularly and help to spread ideas on municipal subjects.

Notice to Rate-payers.

The attention of the rate-payers is invited to Section 190 of the Calcutta Municipal Act which provides for additional costs to be imposed if the bills are not paid within seven days from the date of presentation. Their attention is also invited to Section 191 of the Act which provides for moveable articles to be held under distraint and sold if the bills are not paid within seven days after the service of notices of demand. They are therefore requested to pay up their dues early as under the provisions of Section 149 of the said Act the rate bills for a quarter fall due and become payable within "the 15th of the first month of the quarter, to which they relate."

Defaulting rate-payers should note that if the arrears of rates are not paid when the bills are presented for payment, "action will be taken for their recovery under the provisions of the law."

Applications for reconsideration of assessment including those now pending will not be considered unless full payment of all the arrears is made by the applicants. If not paid up, steps for the recovery of such arrears will be taken under the provisions of law as in any other case.

J. C. MUKERJEA,
Chief Executive Officer

Central Municipal Office,
The 14th January, 1941.

Quotations for Supplying Dingee Boats, etc.

Quotations for supplying and maintaining 4 Nos. ferry boats, with one *manjhi* each, along the S. W. Channel between the 9th and 17th miles in Dr. Dey's Kulti Outfall Scheme for the year 1941-42 are invited and will be received by the undersigned upto Thursday, the 23rd January, 1941. Rates should be quoted by month only and the department reserves the right of terminating the contract earlier than a year, if and when considered necessary.

The 14th January, 1941.

Lansdowne Market.

NOTICE

To all whom it may concern, that an application has been recived from Bhobli Shaw for the registration of his name in place of Nannu Shaw in respect of Stall No. 6, in Potato Range, Lansdowne Market. Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

S. M. MURSHED,
Superintendent.

Lansdowne Market.
The 15th January, 1941.

Special Notice

Health Officer's Advice.

With a view to prevent, as far as practicable, the occurance of epidemics of small-pox and cholera, an extra staff of Vaccinators and Inoculation Officers have been appointed for vaccinating against small-pox and inoculating against cholera.

The public are aware that vaccination and inoculation offer protection against an attack of the virulent diseases mentioned above.

It is, therefore, expected that the public would avail themselves of the services of this extra staff by getting themselves vaccinated and inoculated without delay, and thus co-operate with the Health Officer in attaining the object.

The public may apply to the District Health Officers of the Districts concerned at the undermentioned addresses as well as at the nearest Corporation Vaccination Stations for services of the extra staff mentioned above :—

District I Health Officer—79, Cornwallis Street.

District II Health Officer—22, Mirzapore Street.

District III Health Officer—1, Hogg Street.

District IV Health Officer—11, Belvedre Road.

Health Officer, Cossipore—10 and 11, Barrackpore Trunk Road.

Health Officer, Manicktala—109, Narkeldanga Main Road.

S. N. GHOSE,
Health Officer,

Central Municipal Office.
The 7th December, 1940.

At last a thoroughly good and reliable FLOOR PAINT,

VALSPAR FLOOR PAINT

can be used on Tile, Cement and Wooden floors.

Sound Plumbing means health and longevity

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Red numbers on Blue Black a badge. "B" class coolies of Hogg Market have Triangular Shaped brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

G. C. WOODWARD,
Supdt., S. S. Hogg Market.

When you stop advertising, this is what you say in effect:

"We hereby notify everybody that we do not expect to do business any more."

Municipal orders do not wait. All the 12 months, the municipalities are buying equipment and supplies and the "Gazette" advertisement will bring you results just as well as it will in March.

Keep up your advertising every month in the year if you expect to do business all the year around.

Chronicle And Comment

Calcutta Municipal Amendment Bill

Rumour has it that the Second Calcutta Municipal Amendment Bill now pending before the Bengal Legislative Assembly is likely to be shelved for the time being. The fact that the Select Committee appointed by the Assembly to consider the several provisions of the Bill, though scheduled to meet on the 25th January, has been postponed *sine die*, seems to have lent colour to the above suspicion, if not actually raised it. At the first meeting of the Select Committee on the 6th January last the non-controversial items of the Bill were gone through, and it was then decided that the controversial items would be taken up at the next meeting which, however, as it is now reasonably believed, is not coming off at least for some time. Those with a nose for news suggest that far from abandoning this unwanted Bill, the authorities were really biding their time and collecting materials even for a third or more comprehensive Amending Bill to be put up before the Assembly after the present agitation has died away. Let us however hope for the best, and hope through this sudden official indecision or change of front to find good counsel and better sense at last to prevail.

Improvement Scheme For Howrah

The town of Howrah which lies literally on the western fringe of Calcutta and has often been grouped with industrial suburban areas of that city, has for the extremely deplorable state of its slums and bustees and general insanitary condition of its entire municipal areas, cried long for improvement. Calcutta has through decades of systematic improvement changed now almost beyond recognition and the organised process of turning old Calcutta to the dreamland of the zealous engineering experts of her Improvement Trust, has been going on steadily from day to day. But it is anomalous that her immediate neighbour should be left to lie in squalor and pine in neglect. Citizens of Howrah have been for the last twenty-four years moving in this matter, though yet in vain. The local government could not, we are told, undertake any schemes of improvement, large or small, for sheer dearth of funds, and efforts of the local people in this direction miscarried under four successive ministers of the province.

Repeated failures have, however, now provoked local gentlemen of influence to take up this question in right earnest, and they have already given a practical shape to their zeal and enthusiasm in

the matter by the formation of an organisation to be called the Howrah Improvement Association. In the recent inaugural meeting of the Association strong views were expressed by men in the know about what was described as the dilatory policy of the Government regarding the introduction of the requisite legislation to extend the operation of the Calcutta Improvement Trust to Howrah. The speakers criticised how Howrah had been fleeced through these years by the payment of an annual sum exceeding seven lakhs of rupees to the Calcutta Improvement Trust as terminal taxes, etc., and how within these years the Calcutta Improvement Trust had received "more than two and a half crores of rupees without conferring any reciprocal benefit upon Howrah." These are facts that have their appeal and call for attention, and we have no doubt that those in power will look into the matter and consider from all aspects what could be done not only for the welfare of the two lakhs of people inhabiting Howrah but also for the indirect benefit in many ways to the citizens of Calcutta as immediate neighbours.

Administration Of Local Bodies At Dacca

The Dacca District Board Elections are, we understand, to be held immediately though there has been no announcement to that effect, we are told, either through the press or Union Board circulars, and voters in the remote interiors have yet been left mostly in the dark about it. This is certainly not as it should be.

The different polling areas or constituencies over there have, it is reported, been redistributed without assignment of sufficient reasons. If this is true, the authorities should lose no time in removing the misunderstanding that seems already to have crept in. It does not surely pay to refuse to take the public into your confidence specially in the matter of the administration of the local bodies. The majority vote is not the only thing, for without public confidence public or local bodies would have no legs to stand on.

Affairs municipal have not also been going on smoothly and well at Dacca, a report says. Quite a piquant situation was created there, we are told, at the monthly meeting of the Municipality last week over the rather unusual demand for the construction of a garage in the municipal compound to accommodate the cars of a few municipal commissioners, while as some members pointed out, the municipality had not money enough to provide for more drinking water, good roads, free primary education and other amenities of modern life. Commissioners of the Congress group vehemently opposed the motion, which however was carried by the majority of one solitary vote. "Congress opposition!" you need not whisper, friend, with a curl of derision on your lips: You may ignore the fact just as you can ignore them with their extraordinary ways and demands! But what about the European City Superintendent of Police and the Civil Surgeon Major Linton who sided with them and are reported to have said without the saving grace of an ambiguity that they felt ashamed to keep their cars in a garage built with the ratepayers' money? It was however a game of votes and the majority had its day.

Epidemics In Calcutta

Calcutta is now reported to be in the grip of a severe small-pox epidemic. One cannot help being concerned at the fact that the number of deaths from small-pox in the last week was the highest on record this season, there being 152 attacks and 98 deaths during the week ending January 18. In the week preceding, there were 81 deaths as against 129 attacks. In the corresponding week in the previous year small-pox claimed only 4 deaths. On Thursday last, ambulance removed as many as 15 fresh cases of small-pox to hospital. It is feared the death-rate from small-pox would mount up during the current week and the next if the spell of heat we are already in the midst of should persist as in all likelihood it will.

Cholera, though not yet declared epidemic, is however, taking a heavy toll. During the week ending January 18 there were 77 attacks from Cholera of which 24 proved fatal. There were 75 attacks and 24 deaths from cholera in the week ending January 11. Last year during the corresponding week there were only 7 deaths.

It is a relief to learn that Typhoid, Meningitis and Beri-Beri are comparatively 'inactive.' "To be forewarned is to be forearmed, and Prevention is always better than Cure"—is the recipe we can help our fellow citizens with at this hour of caution and care.

Sj. Subhas Chandra Bose

The 45th birthday of Sj. Subhas Chandra Bose was celebrated throughout India on Thursday last by offering prayers for his speedy recovery and long life. Feelings of great concern were expressed by his admirers—and their number is legion—at the break-down of his health as a result of the hunger-strike resorted to by him in defence of the demands of the political prisoners at Presidency and other jails in Bengal. Calcutta, the city of his birth, nay, Bengal is proud of him for the services and sacrifices this prince among his fellow men has put in for years. Trials and tribulations he has had many, and many more of them he will have to go in for for sure in this hapless land of limitations. The journey may be weary and long, but if the going is straight and steady, the end or goal must one day be reached. We join our voice with the words of earnest prayer echoed from all corners of the country for Sj. Bose's early return to health.

An Ideal Marriage

The most outstanding social event of the last week-end was the union in wedlock of Mr. Adhip Mukerjea, son of our Chief Executive Officer, Mr. J. C. Mukerjea, with Sreemati Aditi Devi, daughter of the late Chiraranjan Das, the only son of the late Deshabandhu C. R. Das. Mr. Mukerjea, the bridegroom, had a distinguished career at Cambridge where he took the Tripos Examinations in History and Law. He is besides an athlete of distinction, and combines in himself the best of western and oriental cultures with the typical traits of the ideal youth. Kumari Aditi has had her share of liberal education and having been reared up under the direct care of her grand-mother Sreejukta Basanti Devi, the ideal of womanhood in Bengal, bids fair to make the most worthy life-partner to her worthy husband. We wish the happy couple long lives of utility, prosperity and peace.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETINGS FOR THE WEEK ENDING JANUARY 24, 1941

[The reports of the meetings of the Corporation appearing below are, in most cases, a summary of the proceedings.—Ed., "C. M G."]

SPECIAL MEETING HELD ON WEDNESDAY, JANUARY, 22, 1941

Superintendent, Water Supply to Shipping

In compliance with a Requisition a Special Meeting of the Corporation was held to consider the following motion, moved eventually by Mr. S. C. Ray Chaudhuri and seconded by Mr. D. N. Ghosh:

(1) That the resolutions of the Services Standing Committee No. I dated the 6th July, 1940, deciding to invite applications for the post of the Superintendent, Water Supply to Shipping, and to grant interviews to certain candidates on 7th December, 1940, be revised and that the whole matter be reconsidered.

(2) That in the opinion of the Corporation the post need not be filled up at present and the existing incumbent (in the acting arrangement which has been made) may be allowed to continue, at least, so long as the War lasts.

(3) That direction be given to the authority concerned not to appoint any person until the disposal of this motion, before the Special Requisition Meeting.

Mr. Naresh Nath Mookerjee moved an amendment to the effect that the question be referred back to the Services Committee No. I, which was accepted by Mr. S. C. Ray Chaudhuri.

Mr. D. J. Cohen moved another amendment to the effect that the consideration of the matter be postponed for a week for the Chief Executive Officer to place before the House a full report on the subject.

The matter was discussed at considerable length and several members participated in the debate.

In opposing the resolution Mr. Satish Chandra Bose said that that being a revenue yielding department it could not go on without a head and work was bound to suffer without a qualified man at the helm of affairs; and Mr. Abdul Bari, the man appointed, had the best qualifications. The Services Committee had in fact come to unanimous decision over this appointment, and it was a flawless decision. It was, therefore, no use asking the Services Committee to go into the matter over again.

Syed Badrudduja said that there was no room for doubt about the absolute need of filling up the post which had been duly advertised and for which applications had been received and candidates interviewed. It was too late and unusual now to turn round and say that the post need not be at all filled up merely because a particular candidate had not been selected. There might be differences of opinion about the relative merits of the candidates, he said, but not surely about the urgency of the appointment.

Mr. M. A. H. Ispahani said that he had some definite and strong views about this matter. The Executive Engineer, Water Works, had sent notes to impress upon the Committee the imperative need of filling up this post, but some time later he changed his opinion evidently under influence. The present officiating incumbent, Mr. C. R. Bose, was a clerk and related, he said, to some influential Councillor of the Corporation.

Mr. Debendra Nath Mukherjee said that the Executive Engineer, Water Works, had definitely stated that this post should be abolished, while the Chief Executive Officer and the Chief Engineer also agreed with him and were against the filling up of this post. The great need for economy in administration was admitted on all hands, and there was scope here for the same.

Mr. N. C. Chatterjee said that if for four long years the department could function without a Superintendent, they might tolerate the same arrangement, specially with a deficit to the tune of a good few lakhs to meet. Far from going down the income had during this period mounted up under the present incumbent, and what was the fun of appointing a fresher, he wondered, on a heavy extra cost. The Executive Engineer, Water Works, was really the head of the Department to be responsible for its management and the Chief Executive Officer was definitely for abolition of the post in question.

Some more discussion followed. When put to the vote, Mr. D. J Cohen's amendment was lost, and Mr. Naresh Nath Mookerjee's amendment was carried.

TWENTY-NINTH ORDINARY MEETING OF THE CORPORATION HELD ON WEDNESDAY, THE 22ND JANUARY, 1941

Mr. L. W. Balcombe

Mr. L. W. Balcombe was appointed to represent the Corporation for the year 1940-41 on the General Committee of the Calcutta Hospital Nurses' Institution, 6, Royal Exchange Place, in place of Mr. G. S. G. Vernon who had ceased to be a member of the Corporation.

C. E. O.'s Post

Following a decision of the Corporation at its previous meeting on the 15th January last, to re-

consider the question of inviting applications for the post of the Chief Executive Officer due to fall vacant on the 31st March, 1941, Mr. P. N. Brahma, Deputy Mayor moved that—

"The matter be referred back to the Services Committee No. I with direction that they will, in the first instance, ascertain :

(1) if the vacancy in the office of the Chief Executive Officer to be created by the retirement of the present incumbent could not be filled up departmentally by a well-qualified and competent officer in the services of the Corporation and to recommend such appointment forthwith and report to the Corporation for confirmation if they are of opinion that the vacancies should be so filled up; and

(2) in the event of the Committee being of the opinion that there is no suitable candidate in the department the Committee will decide on the terms of the advertisement inviting applications and report the same to the House.

The Committee will send their recommendation in either case by February 10 next."

Mr. Brahma said that the reasons which actuated him to move this motion were that the post of the Chief Executive Officer was the most important under the Corporation and its officers expected that in the fullness of time they would be permitted to occupy the post. The appointment of a person from among its officers was especially needed at this time when the Corporation had some difficult questions, both financial and administrative to solve. An officer already in the Corporation would be able to tackle the problems better than an outsider. The stranger's job at the present time would be a difficult one and he would have to rely on the subordinate staff, which would not be in the best interests of the Corporation.

Continuing the Deputy Mayor said that the other question raised in this connexion was that an amending Bill was before the Legislature. But it might be that the Bill would be shelved. In that case if they did not make arrangements for the appointment of the Chief Executive Officer they would find themselves in a very difficult position. If they issued advertisement sometime in the first week of March next they would have to hurry up with the matter which should not be done in the matter of appointment of such an important officer as the Chief Executive Officer. Further, after making their selection the Corporation would send it up to the Government for confirmation. If the Bill was passed by that time the Government might not accord sanction to the appointment. But if they did not take any action regarding this important appointment now the Corporation might be accused of dilatory action.

Mr. B. S. Nahar seconded the motion which was supported by all sections of the House and passed unanimously.

VIDYASAGAR COLLEGE

400 Lady Students On Strike

About 400 women students of the Vidyasagar College, have, we learn, been on strike from Tuesday, January, 21, as a protest against the decision of the Governing Body to change their mid-day classes into morning classes.

Naming of Streets in Ward 27

In connection with the confirmation of a recommendation from the District Standing Committee, District No. IV for naming the extended portions of a few existing roads in Ward 27 as Janak Road, Parasar Road, Raja Basanta Roy Road and Sirdar Sankar Road and naming two new roads as Maharaja Nanda Kumar Road and Dr. Sarat Banerjee Road, Mr. Hamoodur Rahman moved that the items be referred back to the relevant Committee for changing the suggested names to impersonal ones.

Mr. D. J. Cohen pointed out that as these were extensions to existing roads, it would be helpful and convenient to the rate-payers to continue the old names.

Some other amendments and discussions followed after which the District Standing Committee recommendations were accepted by a majority.

New C. F. P. School for Ward 15

The following recommendation of the Primary Education Committee came up for confirmation :—

> That in modification of all previous resolutions of the Corporation to the contrary the Committee recommend that at least one more primary school for boys be started in Ward 15 and that necessary provision be made in the next year's budget.

Mr. Sudhir Ch. Ray Chaudhuri said that cases of all such schools already recommended by the Committee but hitherto shelved for want of funds should in the fitness of things come up in a lot for sanction by the Corporation.

Mr. P. N. Brahma, Deputy Mayor, supported Mr. Ray Chaudhuri's contention and said that schools recommended by the Primary Education Committee even three or four years back had yet to remain on the waiting list as the requisite funds were not forthcoming. He wanted all the recommendations to come up simultaneously for sanction.

Mr. M. M. Burman informed the House that in Ward 15 there was only one Corporation Free Primary School attended mainly by Muslim students. A second school for the Hindu boys of the Ward had been a long felt want, and he thanked Mr. D. J. Cohen for his efforts at removing the same, while he complimented Mr. Hamoodur Rahman for this move for a school for Hindu boys.

Discussions and voting followed, when the recommendation of the Primary Education Committee was accepted.

Agreement With The Collector

Regarding the agreement to be entered into with the Collector responsible for realisation of rates and taxes the Services Committee No. I's recommendation *inter alia*, that the Corporation should allow an adequate establishment to the Collector and all appointments in connection with that establishment be made by the proper authority provided that appointments in the case of bailiffs should always be made from the panel of persons to be nominated by the Collector, was discussed at some length at the previous meeting of the Corporation. An amendment of Mr. M. A. H. Ispahani urging for the representation of Moslems, Scheduled Castes and other minority communities according to allotted percentages in the service of the Corporation in the matter of

appointment of bailiffs was lost on that day. The Mayor closed the meeting on that occasion and voting on two other amendments to the resolution was pending.

When the House took up the question this time the Mayor said that he would take the voting on the amendments of Mr. D. J. Cohen and Mr. Devendra Nath Mukherjee.

Mr. B. N. Roy Chowdhury rose on a point of information and asked the Mayor why this matter had been put on the agenda. The other day he raised a point of order and the Mayor gave decision that the resolution militated against the previous resolution of the Corporation in regard to the question of allocation of percentages to different communities. If that was the ruling of the Chair then the resolution had been declared out of order.

Mr. N. C. Chatterjee: Certainly not.

Mr. B. N. Roy Chowdhury: If that was so there was nothing before the House to vote on.

Mr. Susil C. Sen: If I remember aright, Mr. Mayor, you did not declare the resolution out of order that day. Before you give your ruling may I for the information of the House give certain facts which will show that Mr. Roy Chowdhury's point of order has missed fire?

Mr. Sen said that the Corporation resolution which Mr. Roy Chowdhury referred to was dated the 17th December, 1937, and was in these terms:

> "While opposed in principle to the fixation of percentage of appointment for any particular community the Corporation in view of the prevailing opinion and to remove misapprehension lays down as a working rule that for the next three years from January 18 the Services Committee and the Chief Executive Officer should be directed to appoint Mahomedans and other candidates so as to ensure that not less than 25 per cent. of the vacancies are given to Bengalee Mahomedans, 5 per cent. to the Scheduled Castes and 25 per cent. to other minority communities in Bengal."

The Mayor: But there is a later resolution of the 15th February, 1939?

Mr. Sen: I am coming to that. This resolution therefore expired or lost its force on the 31st December, 1940 and is no longer binding on the Corporation having spent itself in due course.

Referring to the resolution of the Corporation dated February 15, 1939, Mr. Sen said that it was there laid down, *inter alia*, that the rule would apply to the new entrants to the posts excepting certain temporary posts carrying salary not exceeding Rs. 80 per month.

The net result was, Mr. Sen went on, that up to December 31, 1940, by virtue of the later resolution the Corporation was bound to give effect to the former one which was in existence and which was passed on December 17. But as from December 31, 1940, it was a mere scrap of paper and there was no resolution of the Corporation governing the appointments of bailiffs who carried salary below Rs. 80 per month. Therefore, to say that the decision of the Corporation taken on the last occasion rejecting Mr. Ispahani's amendment militated against any existing resolution of the Corporation was a fallacy.

The Mayor said that on the previous Wednesday he was very anxious to finish the item. But he was not allowed to do so. So far as the present position was concerned the Mayor had only to put the amendments to vote and take the decision of the House on it.

Mr. B. C. Chatterjee wanted permission of the Mayor to speak on the resolution and asked him not to close the debate.

Mr. N. C. Chatterjee reminded the House that they had discussed the matter for so many days.

The Mayor said that he could not allow Mr. B. C. Chatterjee to speak now. If, however, Mr. Chatterjee thought it right he could reopen the matter by requisition.

The Mayor then put the amendments and the main resolution to vote. Both Mr. Cohen's and Mr. Mukherjee's amendments were lost.

Mayor's Appeal

Before the result of voting on the main resolution was announced, the Mayor made a statement on the question. He said:—

"Before I declare the result of the voting I must tell the House that the decision it has taken is painful. It is likely to perpetuate the differences which it has been my effort in this Corporation to remove, if possible. You have got the result but might I even at this late stage appeal to you? Moslems are not going to run away with all the jobs of the Corporation: you have given them a certain percentage, - be generous, let them have it, if possible. If my appeal is accepted, I beg of you all to rescind this decision if you can. Otherwise, the atmosphere in this House and outside is likely to remain embittered and unhappy."

The original resolution was then declared carried by 48 to 27, 3 not voting.

APPEAL TO CITIZENS OF CALCUTTA

It is the duty of every citizen to get himself and members of his family enumerated.

It is the civic duty of all to help the Census authorities.

Exaggerate not; inflate not your numbers.

Remember enumerators are honorary workers.

JATINDRA MOHAN DATTA,
Secretary.
All-Bengal Census Board.

PREVENTION OF T. B.

Lectures Organised in Calcutta

Under the auspices of the Bengal Tuberculosis Association the Publicity Department of the Calcutta Corporation will give public lectures on the Hygiene of prevention of Tuberculosis according to the following programme:—

Sunday, 25th January, 1941, 6, p.m.—at Ramkrishna Das Lane, Park.

Tuesday, 28th January, 1941, 6 p.m.—at Jorabagan Park.

Thursday, 30th January, 1941, 6 p.m.—at Tara Sundari Park.

The lectures will be illustrated with magic lantern slides.

MATTERS EDUCATIONAL

Education In Soviet Russia

[By S. Upadhyay]

THE sorest need of man is enlightenment, and the most perplexing problem is the problem of education. Through ages man has struggled to attain light, and his pursuit of knowledge is continuous. Man wrestles with nature where torture spreads its weird brood. There is maddening joy in the exploration of sights and sounds and visions. And he learns to face the imperfections, pains and bafflements of life undismayed by the past. The struggle though grim, man does not battle alone, and with the will to conquer he has combined the power to think and act rationally. The story of civilization is bound up with the story of systems of education. Of the various systems of education important are Classical, Christian, Modern and Soviet. The Soviet system differs from the previous ones. The difference is vast and often tends to become a confused compound of contradictions. And only a comparative study can bring out the essential difference.

The Classical ideal, says the Soviet educationist, aimed to create a species of scholars loathe to guide and instruct the common herd of the people. The Classical scholars loved to live in a harmonious state of peace undisturbed by the storm and stress of life. Exclusive devotion to the individual and love of abstract thinking bred a sort of abhorrence of manual labour. In common with the Classical ideal the Christian ideal was otherworldly. The Christian ideal stressed the material life being the opposite of spiritual. Its love of humanity, more of abstract nature, did never bloom into action, though the classical ideal lacked it. The present day system stands opposed to both. It is mainly guided by science and does not deny the concrete aspect of life. Theoretically impersonal and international science has widened the frontier of mind and has helped to transcend the walls of the ego. So, the present system teaches to think of men and the society though it is incapable of reaching any definite conclusion. The Soviet system, says an eminent Russian educationist, lifts all hindering bars, taboos and allows the widest scope for the integration of human personality. It regards the earth the very source of happiness, makes labour the fountain of social vitalisation. It discards the supernatural in favour of what is earthly and objectively true. No part of human nature, no part of humanity is neglected or debased. Only science, according to Soviet padagogy, can achieve true humanity when freed from the control of vested interests. Such humanisation of science is only possible in the Soviet system.

In Soviet Russia education is universal and free. The *New Constitution* lays down:—Citizens of the U. S. S. R. have the right of education. This right is ensured by universal, compulsory elementary education; by the fact that education including higher education is free of charge; by system of state scholarships for the overwhelming majority of students in higher schools; by instruction in schools being conducted in the native language, and by the organisation of free vocational, and technical and agronomic training for the toilers in the factories, state farms, machine and tractor stations and collective farms.

The most remarkable fact about Soviet education is polytechnisation. Its primary objective is intellectual and physical development combined with technical training. The aim of polytecnisation, said Krupskaya, was the all round education of a highly developed worker, who could at the same time be the worker and the master of industry. At present all educational institutes are attached to certain units of production.

At present there is standardised classification for schools, comprising elementary, secondary, and higher education. Elementary schools have four forms, while secondary schools have seven or ten forms. All children between the ages of 8 to 11 are educated all over the republic and in 1937 the number totalled at 30 million.

The Curriculum

The curriculum of Soviet schools is wide and includes natural history, sociology, mathematics, physics, chemistry, astronomy, etc. The natural history is taught with care and the course is based upon evolutionary process. For evolutionary teaching, says Likhatchev, serves to inculcate a scientifically materialistic view of life in the midst of children.

Teaching of history and literature is carried out with the objective of bringing within the easy reach of students facts and characters in the ordered manner. Study of a foreign language is compulsory and of English, German and French one has to be studied. Ancient languages are reserved for higher studies.

Method of teaching and curriculum are well co-ordinated and special attention is paid to the advancement of each student. Talented ones can seek promotions to the higher form on the completion of previous course without any difficulty. Soviet schools aim at training better citizens. Independence of action even in religious matters is guaranteed by the *New Constitution*. But the church has no relation with the State or the school. No religious instruction is permitted in the school. The medium of instruction is local language and text books are printed in seventy languages spoken all over the Republic. And Russian, at present the common language, is included in the curriculum of non-Russian schools.

To the education of workers special attention is paid. There is a special course of instructions extending over three or four years. This is called Workers' Faculties. Students of Faculties are entitled to all privileges enjoyed by under-graduate students. Workers connected with a certain unit of production do acquire additional efficiency through the Faculties. Students reading in the Faculties are granted special allowance by Unions in addition to the state stipends. In 1936—276,000 students attended Faculties and there were 772 specialised courses.

Problem Of Minorities

In Soviet Republic there are about 200 nationalities and in the past none had script or any literature. Protection of life and culture of minorities has been the chief concern of Soviet Republic. Elementary education amongst minorities and introduction of Latin script has augmented the rate of literacy. The state has made ample provisions for the higher education of minorities and in 1932 there were 21 scientific research institutes being conducted by them. To raise the cultural life of minorities the state has opened village reading rooms, libraries, houses of literatures parks of rest and culture. In distant villages, village libraries are centres of culture where papers are read out and topics of common interest are discussed. In 1933 there were 36 000 libraries all over the Republic

In pre-war Russia only 13 per cent. of the population could read and write and under the new regime the percentage has gone up beyond comparison. Fight against illiteracy started during the First Five-Year Plan and 70 million adults were educated. Adult schools were opened up and these are being run on different principles. The schools are of two types, agricultural and industrial and the course covers two years. There are rest-day schools meant for the workers engaged throughout the week days.

In Soviet Republic the most respected person is the teacher and his welfare is a matter of special concern to the State. The army of educational workers is welded into the great family of teachers. The State looks to their needs and the pedagogical institutes are not slow to admit the utility of new facts on teaching. The teachers are trained in the more scientific manner. So, the teacher gains an insight into the ideal and possibility of human nature; its total and final significance The teacher is conscious of his responsibilities and this is demonstrated by the admission of teachership being "an honourable glorious, noble and heroic task." The relation between the teacher and the students is happy for the teacher that rules by the rod is dead. Through mutual co-operation and admiration the teacher lives and works

The first item in the annual budget is the expenditure on educational works. Every year the State increases the amount and 1937 recorded an increase of 34 per cent. In 1937 the total expenditure on education amounted to 325 million roubles

Some Thoughts On Indian Architecture

[By Sir Chandrasekhara Venkat Raman, *Nobel Laureate in Physics*, 1930]

In this article published in "The Indian Home" of Bombay, Sir C. V. Raman pleads the cause of Indian Architecture He rightly points to the distinguished Indian architect, Sris Chatterji who 'has done valuable service by his advocacy of the Indianisation of the architecture of both public and private buildings' in India

NATURE herself is the greatest architect of all. The investigations of crystallographers and of the physicists have revealed the amazing skill with which she builds her structures. The architecture of a crystal reveals both in its exterior form and its internal construction an eye for beauty rivalling that of the greatest artists and an appreciation of geometric principles such as even Euclid could never claim. When she choses to exert herself, as for instance, when she builds a sparkling diamond out of the blackest coal, her technical perfection of finish puts even the Taj to shame. In the inanimate world of crystals, Nature shows an infinite variety of form but she is restricted by the severity of her mathematical laws. To witness her highest efforts, we have to pass into the world of living things and see the delicateness of touch and the exuberance of fancy with which she fashions the tendrils of a creeper, the opening buds of a flower, or the grace and strength of the trees and wild animals of the forest.

It follows that Nature herself is the greatest inspirer of man in architecture. To build a shelter from the sun and rain is a necessity for man But he would be untrue to himself and to Nature if he did not seek to make the dwelling worthy of himself and express in its design and appreciation of the beauty and a sense of the fitness of things. It is no accident that the highest architectural efforts of man have usually been reserved for houses of worship, for it is inevitable that man's deepest emotions express themselves in appropriate surrounding. But for architecture to exhaust itself in building temple or memorials for the dead is a negation of its real purpose. The spirit of the builder should exhibit itself also in dwellings intended as a *Home* or for the daily task of life. Only there can be the subtle influence of environment make itself felt in the spirit in which the daily life is lived or the daily task is done.

India to-day, if she is to be true to herself, must seek to find her own soul in architecture. Scattered over her length and breadth we find priceless vestiges of her ancient glory in *viharas* and temples built by her pious monarchs and in the magnificent relics of more recent Mahomedan rule. India can proudly claim these as her own, built by men who claimed India as their home and sought to express in brick or stone or marble the spirit of her age-long culture. If history teaches us anything, it teaches us the immense strength of the

civilization of India which has conquered and made vassal even those who have sought to destroy or enslave her. The waves of invasion which passes over India left the essential continuity of Indian culture and the essential solidarity of the sub-continent unbroken. It is this essentially Indian culture that has expressed itself in the architectural monuments of India, and it is in these remains of the past and in the ever present spirit of Nature that we must seek to find the inspiration which will maintain and enlarge our architectural heritage.

If there is any aspect of aesthetics which has an intensely practical value, it is architecture. Published some years ago a symposium on the Benares Hindu University illustrates my meaning. This volume contains a series of illustrations of the buildings of the University and reviews of its activity by the various eminent persons who visited it. It is easy to trace the subtle influence of the distinctively Indian and very striking architecture and lay-out of the buildings of the University in inducing the tone of enthusiastic admiration of the University which pervades the pages of the symposium. The Hindu University of Benares, housed otherwise than it actually is, would have left the visitors cold and would have failed to elicit the enthusiastic sympathy and support which it rightly claims and receives. Mr. Sris Chatterjee has done valuable service by his advocacy of the Indianisation of the architecture of both public and private buildings. In my opinion, this is a subject of vital importance which should receive the earnest attention and practical support both of public bodies and of private individuals throughout the country. By practical examples, Mr. Chatterjee has shown what can be done even with the restricted opportunities at present available. An enlargement of those opportunities is much to be desired. The endowment of education in architecture with Indian outlook is much needed in India.

ART EXHIBITION

An Exhibition of Indian and Ceylonese Mural Paintings by Sarkis Katchadourian will be held at the Darbhanga Hall Calcutta University, at 10-30 a.m. on January 27. The Exhibition will remain open between 11 a.m. and 6 p.m. and will continue till February 5, 1941.

PREMIER'S STATEMENT ON RECENT CORPORATION VOTING

Mr. N. R. Sarker's Reply

Mr. Nalini Ranjan Sarker has issued the following statement in reply to Hon. Mr. A. K. Fazlul Huq's statement on the recent Corporation voting, published in our last issue:—

Mr. Sarker says:—

While Mr. Fazlul Huq's statement on the last voting in the Calcutta Corporation on Mr. Ispahani's amendment will of course surprise no one, it is not less but the more distressing since coming on the top of numberless statements of a similar character. Mr. Fazlul Huq sees in the rejection of the amendment for fixing a communal ratio in the appointment of bailiffs a complete answer to the Hindu agitation that Hindus have been reduced to a position of inferiority and helplessness in the Calcutta Corporation and also the need for changing the Municipal Act into one after his own heart. One would like to ask whether Mr. Huq has given any thought to the logic behind his statement. Apart from the real significance of the voting on Mr. Ispahani's amendment, there is a very pertinent question which I should like to put to Mr. Huq. Is it Mr. Huq's contention that the defeat of any measure sponsored by the Moslem League either in the Legislature or in the Corporation, however trifling or fantastic, is an irrefutable proof of the lack of supremacy of his communal oligarchy in Bengal politics? Does not such an attitude betray an intensely communal bias, and a predilection to look at things from a particular angle only? What, for example, does the defeat of Mr. Ispahani's amendment really signify? The amendment was on a relatively unimportant issue in respect of one branch of service in a particular department of the Corporation, namely the appointment of bailiffs. But Mr. Huq derives a whole political system from this one small incident in the life of the Corporation. It is, however not Hindu domination, but European neutrality that Mr. Huq must kick against in this matter. The attitude of the Europeans, who are general supporters of Mr. Huq and his party, in remaining neutral is a sufficient proof of the unreasonableness of the amendment moved by Mr. Ispahani in the Corporation.

Facts Cited

Did all the Hindus vote together? The nominated Hindus voted with the Muslim League, a fact which cannot escape the notice of the Premier, as it is on this that he has banked for reducing the Hindu community to the position of a virtual minority in his regime. For, all that Mr. Huq has done, namely, the introduction of separate electorates, provision of seats on the population basis for Muslims, keeping the Hindus to a position of minority by reducing the Hindu elected seats, upholding the principle of nomination, whose sole purpose is, on the one hand, to keep certain Hindu members under control and to secure additional seats for the Muslims, on the other hand, keeping the generous treatment accorded to Europeans in regard to representation in the Corporation—all these have but one objective, namely, to curb the powers of the Hindus and to ensure to Muslims a strength and position which they cannot acquire in the ordinary course. All that the opponents of the Municipal Bill have done is to place these facts clearly before the public. And where then do untruths or misrepresentation come in?

Mr. Huq may try to make a mountain of a mole-hill, or throw up a barrage of distorted facts and arguments to camouflage the public, but I am afraid that though he may succeed with a section of his community, he cannot succeed with fair-minded people to whichever community or section they may belong. Anger however quickly gives place to sorrow when one considers that, thanks to the Communal Award and to his popularity in his own community, decisive influence over the politics and destiny of this province has passed, and will remain, in the hands of one who, to our greatest misfortune, should be so insensitive to facts, logic or arguments, and so prone to viewing questions from a narrow communal standpoint oblivious of the interests of the various communities and of the province as a whole. The contemplation of a situation so very unfortunate fills one with pain, anguish and despair which are beyond words

HEALTH & HYGIENE

Special Article

"One Of War's Major Horrors"—Gas Gangrenes

By
DR. MORRIS FISHBEIN
EDITOR
"Journal Of The American Medical Association".
AND OF
"Hygiea": The Health Magazine

IN the World War of 1914-18, and again in Spain and in France in recent years, gas gangrene came to be one of the most feared of all of the menaces to the warring soldier. In World War I, the United States sent committees of investigators to France to study this condition at first-hand. To-day the War Wounds Committee of the British Medical Research Council and investigators for the American National Research Council are again studying this frightful complication.

Apparently when the tissues of the body are damaged, as occurs following a gunshot wound, bacterial organisms of the Clostridium group will get into the tissues. Then, if there is dead tissue, this organism tends to multiply, and its growth and development are associated with the production of gas. The Clostridia cannot grow in the presence of air. They, therefore, develop most rapidly where there has been interference with the supply of blood or where pieces of clothing or soil have been introduced into wounds.

In an endeavour to control the condition, modern medicine relies on two main procedures. The cleaning of wounds by the removal of all dead material and of all devitalized tissue and the introduction of antiseptic substances which will destroy the germs; secondly by the injection of serums.

While the condition occurs more frequently in war, cases are also found in times of peace. Sometimes gas gangrene develops within three and-a-half hours after a wound has been sustained. Occasionally, the gas does not begin to appear in the tissues until the fourth or fifth day after a wound.

Usually the infection occurs in large muscles. Then, as the gas develops, it spreads between the various muscles so that the wound swells and crackles with gas bubbles. If there are paths through the tissues leading to the surface, a fluid may exude and gas bubbles escape. This is actually one of the major horrors of war. Eventually the muscle changes to a brick-red color, loses its power to contract, the blood ceases to circulate, the tissues become greenish-black and create a condition that is likely to be fatal.

Fortunately, the newer drugs like sulfanilamide and sulfapyridine have been found useful in many of these cases, particularly if they are given early and in adequate amounts. Indeed, these drugs are given even when it is decided to perform an operation for removal of the dead tissue in order to prevent secondary infection with pus-forming germs.

Both in Great Britain and in our own country laboratory investigators are accompanying the troops with the view of learning more about this infection and with the hope of developing some technic that will quite certainly minimize or prevent it.

LATEST IN MEDICINE

SEVENTY years ago investigators first transfused serum and the plasma from human blood. It is now recognized this is the most useful procedure for overcoming shock. The whole blood must be used immediately or stored for only a short time. The serum and the plasma, which is the blood with the cells removed, may be kept for fairly long periods of time. Various technics have been worked out for aiding the keeping qualities of serum and plasma.

Investigators all over the country are working on new technics for drying these materials and several new types of apparatus have been developed. When material is needed, the dried plasma is redissolved in water, which can then be injected into the body.

It is reported that Great Britain has requisitioned as much as 20,000 quarts of serum or plasma for distribution. If a suitable drying technic can be developed, the transport of this material across the sea will be greatly aided.

* * *

INVESTIGATORS of cancer have urged the idea that cancer of one type might immunize the body against another type. It has been argued that cancer of the skin, which is curable in many instances, may thus immunize the body against other forms, such as cancer of the stomach or of the internal organs, which might be relatively fatal.

Town Planning Or Concrete Castles In The Air—I

'PLANNING is much in the air these days; and as far as town planning is concerned much is spoken about it but little, unfortunately, is done,' says Mr. P. P. Kapadia, of the Indian Institute of Architects, Bombay in his interesting Broadcast talk on the subject.

. . . This is Bombay, with the noise, the bustle and din of any large town the world over. Hour by hour, day by day, month by month and year after year millions of people spend their lives in such unnatural surroundings. The tragedy, the real tragedy of it all, is the fact that all is remediable; the remedy for this appalling muddle is in our grasp, and is eminently workable. That surely is the greatest irony of all—that the dirt, the squalor and the poverty; the overcongestion of traffic, of houses and of men and women; the cholera and the typhoid and a number of other town-bred diseases; the fires, the accidents—all this is avoidable quickly, surely, and at momentary profit to us all.

But one word of warning. There is no golden way out, no magic formula to help us without any effort on our part, no universal panacea. There is no path to the perfection we desire other than the willingness to tackle a problem that stares us in the face, a determination to find a solution, and a prosaic capacity for sheer hard work. One thing only may cheer us: let us not forget that elsewhere the problem has been solved and that a solution is possible for us here in just the same way.

* * *

Let us go back, perhaps some five thousand years or so, and see how a town can come about at all. And as we see it growing and developing we should remember that the same rules of birth and growth apply to-day just as much as they did then.

A town is a necessity to humanity. However sparse the population in an agricultural area there is always a point (it may be because crops grow particularly well here), where a large number of people are of necessity congregated. At this point the urge, as it were, to have a town or at least, a village is irresistible; not only is it convenient but it is a direct necessity. I may, happen to possess a surplus of corn which I wish to exchange and you happen to be rather clever with your hands and make rather good sandals. Someone else there makes better and more finely woven cloth than anybody else in our little area. And of course there is Ramlal's wife's father's nephew, who we all know spends his time making those rather attractive earthenware vessels. It is not perfectly natural that a little community should be established, a village, a town where we can exchange one thing against another not merely once in a while but continually? It is the first attempt on

the part of our little group to organize itself along lines convenient to all.

We may also expect many other things from this town apart from mere exchange of eatables and the more common articles, clothes, articles of household use; artistic goods, gaily coloured cloths; jewellery and articles of decoration and of fine workmanship, of silver, gold, and even precious stones. We seek companionship, protection from marauding bands, entertainment, songs and dances, places of worship. We start to read and write, to pray, to study; we learn, and have time to learn, many things.

There are several most important things that strike one about a town, however small and unimportant in its beginnings. Notice this first attempt on the part of the community at organization. Specialization in trades and professions implies arrangement, co-operation, organisation. It often even implies a large decree of planning, as is evident from almost all remains of early historic towns.

But more important even than all this; the town always has implied the beginning of culture, of civilization itself. The town is a civilizatory force—as when we speak of early Indian civilization we automatically speak of the towns, historic and pre-historic, wherein it bloomed. The history of civilization is the history of towns.

• • •

Nor must we forget that these early towns were specifically built to be centres of civilization. They were built deliberately, positively, by those magnificent men of long ago to serve as cultural centres. Modern towns on the other hand, just grow anyhow: and in permitting this to happen we are committing a very big mistake. We let them grow to be centres of mere cheap barter and of ill-paid work.

(To be continued)

SUSPENSION BRIDGE COLLAPSES

The huge 6,000,000 dollar suspension bridge over Tacoma Narrows, the third longest bridge in the world, suddenly cracked and crashed in sections of 190 feet into the Puget Sound on November 7th, 1940.

Recently nicknamed "Galloping Gertie" owing to its swaying motion, the bridge was only opened last July. The bridge has always been affected by high wind, and began swaying from side to side.

A journalist, who was the only person on the bridge at the time of the collapse, felt it going. He leapt out of his car and crawled 500 feet to safety as the bridge disintegrated, its cables waving wildly in the air.

—Health And Hygiene

(Continued from page 325)

These considerations prompted Drs. Shields Warren and Olive Gates of Boston to make a careful study of 1,149 cases of cancer of the skin found in the hospitals for cancer in Massachusetts. They concluded that there is no justification for recommending the development of cancer of the skin to protect against the development of cancer elsewhere in the body. Actually, people with cancer of the skin have more cancers elsewhere in the body than would be expected on the basis of chance.

THERE is hardly a substance used in nature or on the human body to which some one may not be sensitive. Dr. Lester Hollander of Pittsburgh reported three cases of eruption on the skin due to the use of fingernail lacquer. When a doctor suspects cosmetics as the cause of eruption on the skin or as a cause of sensitivity, he must make certain that the patient is free from all cosmetics. The hair is shampooed so as to completely remove wave set, hair oil, hair tonic, hair dressing, scalp ointment, or the various rinses which are used to bring out lustre of the hair. Then the head is covered with a large kerchief at night so that any cosmetics remaining will not come in contact with the skin.

The face must be washed with a non-scented soap so that one can be sure of the absence of perfume. Nail lacquer is removed. Sachet powders, perfumes, lipstick, eye shadow, eyebrow pencil, eyebrow and eyelash ointments, artificial lashes and artificial nails are forbidden.

If the eruption clears up, it is likely that one of the cosmetics is responsible. Gradually the cosmetic items may be returned one by one, and the appearance of the eruption will indicate which is responsible.

CALCUTTA NEWS & VIEWS A Digest

SHERIFF ENTERTAINED

To meet Mr. Biren Mookerjee, Sheriff of Calcutta, Mr. K. M. Neogy gave a lunch at Great Eastern Hotel on last Sunday afternoon.

Among those present were—Mr. Justice Biswas, Mr. Justice Khundkar, The Hon. Mr. J. H. S. Richardson, Mr. Arthur Moore, Mr. A. R. Siddiqi, Mayor of Calcutta, Mr. John Bartos, Mr. J. De, Khan Bahadur K. M. Asadullah, Sir Hari Sankar Paul, Mr. L. P. Atkinson, Mr. J. Baros, Sir Srinivasa Sarma, Mr. A. M. Reid, Mr. D. K. Sanyal, Mr. Pulin Behari Mullick, Mr. Dwijendra Chunder Ghose. Mr. Amritlal Ojha, Mr. D. P. Khaitan, Mr. H. P. Bagaria, Mr. N. L. Puri, Mr. B. N. Roy Chowdhury, Dr. M. N. De, Dr. N. N. Law and Rai Bahadur N. C. Ghosh.

TRAINING IN SOAP MANUFACTURE

In furtherance of the scheme for relieving unemployment among the youths of Bengal, the Department of Industries, Government of Bengal, says a Press Note, have decided to enlist a fresh batch of students for giving free practical training in the manufacture of bar and moulded washing soaps. The full course will cover a period of six months. The training class will be held at the Industrial Research Laboratory, Canal South Road, Pagladanga, Entally, Calcutta.

NURSES AND HEALTH VISITORS

A Committee to examine the present training conditions of Nurses, Health Visitors, Public Health Visitors, Tuberculosis Home Visitors, and other Social Workers and to formulate proposals for the improvement of their training has been appointed by the Government of Bengal.

Government consider that the problems regarding the training of nurses should be examined and arrangements should be made for the enlargement of the scope of their training and the betterment of their training conditions.

The personnel of the Committee includes:—Dr. B. C. Roy, (President), the Surgeon-General with the Government of Bengal, the Director, All-India Institute of Hygiene and Public Health, the Director of Public Health, Bengal, Miss Hutchings, Matron of the Dufferin Hospital, Miss L. C. Clarke, Registrar, Bengal Nursing Council, Dr. Sundari Mohan Das, Prof. Benoy Kumar Sarkar, Miss Falkiner, Matron, Presidency-General Hospital.

The Director of Public Health, Bengal, will act as Secretary and Convener. The Committee has been requested to submit their report as early as possible.

MEDICAL COLLEGE EYE INFIRMARY

The Lady Mary Herbert expressed satisfaction at the arrangements made at the Eye Infirmary, Medical College Hospitals, Calcutta, where she paid a visit recently. She also visited with special interest an Eye-examination Lecture Unit of the Association for the Prevention of Blindness, Bengal, housed in a room of the Infirmary.

The Unit is a travelling eye dispensary which besides rendering first-aid to the patients, does propaganda work by explaining to the public the common causes of blindness and how to prevent them. The Association has already four such Units under its care and it is learnt will start another Unit very soon.

Her Excellency was shown a film titled "Lamps of Life" which has been prepared by the Association, and depicts how eye diseases affect people and the preventive side as well.

CLEANER CALCUTTA CAMPAIGN

Moving Exhibition for Two Days

The Cleaner Calcutta Campaign organised by the Publicity Department, Corporation of Calcutta, to carry on special campaign for the cleanliness of the city will be launched this year on January 25 and 26 in co-operation with the Cleaner Calcutta Committee (Health Week).

The Starting off Ceremony of the Moving Exhibition in this connection is to be presided over by Mr. A. R. Siddiqi, Mayor at the Commercial Museum, College Street Market, Calcutta on Saturday, the 25th January, at 2 p.m.

Thirty-two hand carts will be decorated with big scenes, posters and models, etc., depicting the requirements of cleanliness in various forms. These hand carts will move around the city in four units for two days and about 50 thousand leaflets and hand-bills etc., will be distributed along with the show. So long the public has been told not to spit any where or every where but this year they will be told "Where to spit." For this purpose street gully pits at the important crossings will be notified for spitting with writings to draw the attention of citizens.

A Conference of the owners of restaurants, tea shops, eating houses and sweetmeat shops will be held on January 25, at 3-30 p.m. at the Commercial Museum, over which Mr. J. C. Mukerjea Chief Executive Officer of the Corporation will preside. Through this Conference co-operation of shop-owners will be sought to ensure better cleanliness at these places.

A specially written health playlet "Panthasala" will be staged by Hem Chandra Smriti Sangha on the same evening before a selected gathering.

BENGAL SALES TAX BILL

A largely-attended public meeting was held on last Thursday afternoon, under the auspices of

(Continued on page 330)

CIVIC NEWS FROM FAR & NEAR

MUNICIPALITY SUPERSEDED

The Government of Bombay has declared the Municipality of Islampur to be incompetent to perform its duties and to have abused its powers and has accordingly superseded it for two years from January 9.

CIVIC AMENITIES FOR PATNA

An ambitious programme of all-round improvement of the city is promised in the election appeal issued by the newly formed Patna City Improvement Association which is contesting the local civic elections which are being held this month.

The programme includes enhancement of the artistic beauty of the city, improvement of sanitation, construction of homes for the hameless, provision of free education, parks and social amenities such as a Town Hall, etc. The programme also includes the enlistment of social service organizations for the clearance of slumps and a drive against mosquitoes.

THE COMING CENSUS

Premier's Appeal For Co-operation

Mr. A. K. Fazlul Huq, Premier of Bengal, has issued the following statement in connection with the coming census:

"On the eve of the forthcoming census may I make an earnest appeal to all communities in Bengal to combine and make the census operations a success and a correct record of the actual state of things? Charges and counter-charges have been made by several interests, and it is not my purpose to refer to such charges at this stage. My appeal is for unity and for co-operation in order to ensure accuracy as far as possible in the census operations. We should be prepared to take facts as they are and not as we wish them to be.

"I hope leaders of public opinion in cities, towns and rural areas will impress upon their friends and followers the importance of an accurate record without which census operations lose all their value. I hope my appeal will be accepted in the spirit in which it is being made."

ANTI-T. B. EFFORTS AT SERAMPORE

The first meeting of the Serampore Sub-Divisional Tuberculosis Association was held on Sunday last in Uttarpara College. Dr. A. C. Ukil presiding.

Mr. Loke Nath Mukherjee, Chairman of the Uttarpara Municipality explaining the objects of the meeting pointed out how every year over a lakh of people were dying of tuberculosis in Bengal and that ten lakhs were suffering from the deadly disease. He also spoke of the intensive survey that was being carried on at Serampore by the Public Health Department which has disclosed that out of about 4,000 persons examined there were 400 patients among whom about 100 open cases of tuberculosis were found.

Col. A. C. Chatterjee, I.M.S., Director of Public Health, Bengal, pointed out that out of 119 municipalities in Bengal there was prevalence of tuberculosis in 64 municipalities. He described the means by which this disease could be prevented and the steps that were being taken by the Public Health Department in this direction.

BIHAR LOCAL BODIES AND SATYAGRAHA

That Congress members of local bodies in the province should resign *en bloc* was the view, it is understood, held by a majority of the representatives elected by Congress parties in local bodies to hold a joint meeting with the Working Committee of the Behar Provincial Congress Committee. The meeting was held at Siwan. Dr. Rajendra Prasad presided.

The view point of those who ultimately were found to be in a minority was that Congressmen had been elected to these bodies on a definite programme of constructive work and this could not be left unfinished. Moreover, since a majority of the Congress members were unwilling to join the *satyagraha* movement, it was meaningless to ask them to come out.

The majority view point rested not so much on the exigencies of the *satyagraha* movements as on wider issues. It was pointed out by these that due to party factions and other causes the administration of the local bodies was far from desirable. Congress, therefore according to them was losing prestige in the eyes of the public and it was time they left the local bodies.

BALDEODAS MATERNITY HOME

Result Of Midwifery—Nursing Examination

The following Pupil Midwives have duly passed the Baldeodas Maternity Home examinations recently held in Midwifery and Midwifery-Nursing:—(1) Narayani Sinha, Chittaranjan Hospital; (2) Madhurirani Bhattacharjee, Chittaranjan Hospital; (3) Lila Sen, Baldeodas Maternity Home; (4) Lakshmi Ghosh, Baldeodas Maternity Home; (5) Mrinalini Sarkar, Baldeodas Maternity Home; (6) Suprova Som, Chittaranjan Hospital; (7) Parul Bhowmick, Baldeodas Maternity Home; (8) Durgarani Choudhury, Baldeodas Maternity Home; (9) Sarajubala Majumder, Baldeodas Maternity Home.

Of these, Miss Madhurirani Bhattacharjee and Mrs. Parulbala Bhowmick have passed with distinction having obtained more than 75 per cent. marks on the aggregate.

This was their last chance in the Baldeodas Examination. If this Institute is affiliated, pupils will have to appear before the Bengal Nursing Council.

MRINALINI MEMORIAL LIBRARY AND FREE READING ROOM

The following gentlemen were duly elected office-bearers of the Mrinalini Memorial Library and Free Reading Room 115B, Amherst Street, Calcutta, for the year 1941, in the annual meeting held recently :—

President—Mr. A. P. Roy, Solicitor. Vice-Presidents—Mr. P. C. Ghosh, Mr. P. C. Mitra, Councillors K. C. Ghose, T. C. Roy, J. Kolay, Dr. A. Ahsan and Mr. K. Nooruddin. Hony. General Secretary—Mr. B. Dutt. Hony. Joint Secretaries—Messrs. P. Ghose and A. Roy. Hony. Librarians—Messrs. K. L. Chatterjee, M. N. Paul, S. C. Das and P. C. Ghose Hony. Treasurer—Mr. S. Ghosh.

RABINDRA MAITRA CIRCULATING LIBRARY

At the annual general meeting of the Rabindra Maitra Circulating Library (Juvenile) 24/A, Dr. Suresh Ch. Sarkar Road, Entally, held recently the following Office-bearers were elected for the year 1941 :—

President—Mr. Satyendra N. Mazumder; Vice-Presidents—Messrs. Arun Sen, Dwijendra N. Bagchi, Prosanta Kumar Bose, Harihar Das Choudhury, Subodh Kumar Sarkar and Krishna Kishore Das; Secretary—Mr. Basanta K. Dey; Assistant Secretary :—Mr. Nanigopal Roy; Librarian—Mr. Mohanlal Sen; and Treasurer—Mr. Bhawani Banerjee.

SECONDARY EDUCATION BILL

University Committee's Opinion

That the Board, proposed to be set up under the provisions of the Bengal Secondary Education Bill, would neither be representative in character nor independent of Government control and will as such fail to command the confidence of a large section of people was the opinion expressed by the Committee that was appointed by the Syndicate of the Calcutta University to submit its views to the Senate with regard to the measure.

The Committee was composed of the following :—The Hon'ble the Vice-Chancellor, the Hon'ble Mr. Justice C. C. Biswas, Dr. B. C. Roy, Dr. Syama Prosad Mookerjee, Dr. P. N. Banerjee, Mr. P. N. Banerjee, Rai Bahadur Prof. Khagendra Nath Mitra, Khan Bahadur Tasadduq Ahmed and Prof. M. Z. Siddiqi. The report has been signed by all the members of the Committee except the Vice-Chancellor, who has been absent from Calcutta on account of indifferent health. It is not known if he, as a member of the Committee, has agreed with the recommendations.

The Committee, in course of the report, states that the Board as envisaged in the Bill will fail to command the confidence of a large section of people and will neither be represenative in character nor independent of Government control. Hence, the Board is not calculated to effect necessary reform and expansion of a Secondary Education in Bengal.

The Bengal Secondary Education Bill, the Committee further says, does not make adequate provision for substantial grant for effecting improvement of Secondary Education in this province. Besides, the Bill does not provide for any co-operation between the Board and the University which has so long controlled Secondary Education in Bengal. The Committee, therefore, regards the Bill as unsatisfactory.

The Senate at its meeting on the 25th instant will take the report in its consideration.

THE Improvement Trust

The following extracts are taken from the Proceedings of the Meeting of the Calcutta Improvement Trust, held on Saturday, the 30th November, 1940 :—

PRESENT :—Mr. C. W. Gurner, I.C.S., *Chairman*; Mr. Sailapati Chatterjee, Acting Chief Executive Officer, Corporation of Calcutta; Mr. Abdur Rahman Siddiqi, Rai Sahib Chandan Mul Karnani; Mr. A. J. Thompson; Mrs. Hasina Murshed; Mr. Sudhir Chandra Ray Chaudhuri; Mr. J. J. N. Birch; and Sir Hari Sanker Paul.

MR. A. R. SIDDIQI

With reference to Notification No. 1660M, dated the 11th December, 1939, it was *reported* that Government in Notification No. 1541M, dated the 27th November, 1940, had appointed Mr. Abdur Rahman Siddiqi, M.A., B.L. LL.B., Barrister-at-Law, M.L.A., to be a member of the Board of Trustees for the Improvement of Calcutta.

—Calcutta News & Views

(*Continued from page* 328)

the Marwari Chamber of Commerce at Monohardas Katra (Burrabazar) to protest against the proposed Bengal Sales Tax Bill. Mr. M. L. Khemka, Attorney-at-Law, presided.

The meeting unanimously adopted the following resolutions :—

(1) Resolved that this general meeting of merchants and traders strongly protests against the proposed Bengal Sales Tax Bill and emphatically urges the Government to withdraw this bill, which is detrimental to the trade and commerce of the province and to withdraw the idea of imposing such an unwarranted, unjustified and unnecessary taxation on the commercial community and the poor public.

(2) Further resolved that at this critical juncture when economic burden of the general public is increasing gradually by taxation upon them by the Central and Provincial Governments in view of the present European war this extra burden by the Provincial Government will be wholly intolerable.

(3) Further resolved that this general meeting considers this measure as an encroachment upon the franchise of the free trade of the commercial community and notes its protest against the same and appeals to the Government not to impose such a legislation on the commercial community.

SIR STUART HOGG MARKET

NOTICE

To all whom it may concern, that application has been received from Mr. Krishna Chandra Nandi the recorded occupier of stalls Nos. 7 and 8 in Block "F" in the Sir Stuart Hogg Market for permission to transfer his rights and interest in the stalls to Mr. Khem Chand Asumal Bhag-Chaudani.

Objection, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

GEO. C. WOODWARD,
Superintendent.

S. S. HOGG MARKET,
The 24th January, 1941.

"ART IN INDUSTRY" EXHIBITION

Mr. B. C. Law's Generous Gift

It has just been announced that Mr. B. C Law, the well known Art patron and one of the judges at the forth coming "Art in Industry" Exhibition, has given a special prize of Rs 500 which will be presented to the best entry received from Bengal. This Exhibition carries very big prize money as, apart from Mr Law's prize, the best entry in the whole Exhibition will receive Rs. 750 and the winners of each section will receive prizes of Rs. 250. A concession has been made to Art students who can enter free of charge and it is hoped that the Exhibition will prove to be a stimulus to Indian artists throughout the country.

All entries should be sent to the Government School of Art, Chowringhee, Calcutta, between the 1st and 15th February and the Exhibition opens on the 24th February. Full particulars can be obtained from the Government School of Art or from Burmah-Shell who are sponsoring the Exhibition.

CORPORATION NOTICES—*Contd.*

DRAINAGE DEPARTMENT

To All Petty Improvement Contractors District IV.

Re.: Recovering 12 in. C. I. Pipes from Diverson Sewer over the Port Commissioner's land near Chetla Sluice Bridge Road.

Dear Sirs,

Please submit your tender in the prescribed tender form for the petty improvement works of the Corporation for the above work, the details of which can be obtained from the department. The tender in a sealed cover, endorsed as above, will be received by me on the 27th January, 1941 at 12 noon.

The work is to be completed within one month from the date of order to take up the work in hand.

Yours faithfully.
P. C. BOSE,
Executive Engineer, Drainage.

Central Municipal Office,
The 22nd January, 1941.

Sale of Corporation Surplus Land

In supersession of all the previous notices in this behalf, fresh notice is hereby given for the information of the public that the following plots of Corporation surplus land will be sold to the highest bidder above the reserve price at a public auction to be held by the Estates and General Purposes Standing Committee of the Corporation at the Central Municipal Office, on Tuesday, the 4th February, 1941, at 5-15 p.m. on the usual conditions. The sale is subject to the approval of the Corporation. Public are invited to attend the auction and offer their bids.

The successful bidder shall have to furnish an earnest deposit, in cash, equivalent to about 25 per cent. on the purchase money, immediately upon the lot being knocked down, and in default thereof, the premises is to be immediately put up and resold at the risk of the first purchaser. The balance of the purchase money must be deposited within a fortnight from the date of confirmation of sale by the Corporation, failing which the earnest deposit shall be forfeited and the land resold at the risk of the auction purchaser.

Other conditions and particulars of sale and the plans of the lands may be inspected and enquiries made in the office of the undersigned on all working days during office hours.

Description of lands:—

(1) Site of the discontinued bathing platform (with a compound wall) at No. 94/1, Lower Chitpore Road in Ward No. 7, measuring 15¼ chittacks approximately.

(2) Land at No. 6, Sarkar Lane, in Ward No. 6, measuring about 13 chittacks.

R. SINHA,
Chief Valuer & Surveyor.

Central Municipal Office,
The 21st January, 1941.

Revision of Alignment

Notice is hereby given under Section 302 of the Calcutta Municipal Act III (B. C.) of 1923 that the Roads and Bustees Standing Committee of the Corporation in exercise of the powers delegated unto them in this behalf have considered it expedient to revise the alignment of Bonomali Sarkar Street at its junction with Ganga Prosad Lane in Ward 2 which was originally sanctioned on the 14th May, 1909 by the General Committee of the Corporation as constituted under Act III B. C. of 1899.

Any person having any objection to the same should submit it in writing so as to reach the undersigned on or before Saturday, the 22nd February, 1941.

A copy of the plan showing the proposed revision of the alignment may be seen in the office of the Chief Valuer and Surveyor of the Corporation between the hours of 11 a.m. and 2 p.m. on all working days.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office,
The 23rd January, 1941.

Notice is hereby given under Section 302 of the Calcutta Municipal Act III (B. C.) of 1923 that the Roads and Bustees Standing Committee of the Corporation in exercise of the powers delegated unto them in this behalf have considered it expedient to revise a portion of the alignment of Tangra Road affecting premises No. 35, Tangra Road in Ward 19, which was originally sanctioned on 13th October, 1911 by the General Committee of the Corporation as constituted under Act III B. C. of 1899.

Any person having any objection to the same should submit it in writing so as to reach the undersigned on or before Tuesday, the 18th February, 1941.

A copy of the plan showing the proposed revision in the alignment may be seen in the office of the Chief Valuer and Surveyor of the Corporation between the hours of 11 a.m. and 2 p.m. on all working days.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office.
The 18th January, 1941.

Cash In Transit Insurance

Quotations in sealed covers regarding rates of premium payable are invited and will be received by the undersigned up to Monday, the 10th February, 1941 for insurance of Corporation Cash in Transit which is daily remitted to Bank for lodgment or brought from Bank for disbursement.

The estimated annual amount sought to be covered by the Insurance will be approximately Rupees One Crore and a half, carrying risk up to Rupees One Lakh in any single trip. The actual total amount involved will be ascertained at the end of the year and the amount of premium will be calculated accordingly and adjusted against any advance that may be previously made.

The Insurance will be for one year from 1st April, 1941 and will cease on and from 1st April, 1942.

A. K. MITTER,
Treasurer.

Central Municipal Office,
The 21st January, 1941.

Revision of Assessment In Ward No. 18

The rate-payers are hereby informed that the Assessments of holdings in Ward No. 18 are being revised during the current quarter. Any person dissatisfied with the revised valuations may prefer an objection in writing within 15 days from the date of receipt of notice under Section 138 or from the date of general publications under Section 137, whichever is later. Objections filed before the receipt of notice and before the date of publication cannot be entertained.

D. N. GANGULI,
Assessor.

Central Municipal Office,
The 17th January, 1941.

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Red numbers on a Blue Black badge. "B" class coolies of Hogg Market have Rectangular brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

Chronicle & Comment

Alderman Subhas Chandra Bose

Bengal, nay India, has been stunned at the mysterious disappearance of Sj. Subhas Chandra Bose from his home where he lay in sick-bed since his recent release from jail. It was only during the last week-end that friends and admirers throughout the country sent up their prayers for his early return to health and active public life in connection with his forty-fifth birth anniversary. Few, perhaps none, could then realise that the request publicly made by him to his fellow workers and countrymen on that occasion to celebrate his birthday in a spirit of devotion and prayer for the good and well-being of his country and not by any personal reference to him, was only a precursor of the things so soon to follow. A life of sacrifice and self-effacement has ever had its glamour for him, and he lived it all his years. If however, a proud spirit of revolt and the lack of a capacity for accommodation on questions of principle so often marked out the man, it was because he was the very embodiment of the best traditions of youth and its lofty ideals. He was no coward or sneak and never shirked an issue that had to be faced. His passionate love of his country was the very breath of his being, and he paid heavily for it through all the active years of his life. But caught apparently in the grip of a sudden spiritual urge, this dedicated man with a permanent religious strain in his character, seems to have risen beyond the understanding or appreciation of the average man and gone out mysteriously to join in the eternal quest of the unknown. Fond hopes of devoted friends and admirers or the anxious prayers of an affectionate, worried mother may or may not at once bring him back, but may the best wishes of his countrymen and their earnest prayers for his well-being always attend him and if so ordained by the Divine Dispenser of things, help in the fulness of time to bring him back a brighter, stronger, and nobler man!

Cleanliness In Restaurants

The imperative need for the observance of greater cleanliness in the tea-shops, restaurants and eating houses of the city which are not generally kept in conditions even approaching to the ideal,

and are as such often responsible for starting or spreading diseases and epidemics, was stressed at a conference of the owners and representatives of such establishments held at the Corporation Commercial Museum on Saturday last, Mr. J. C. Mukerjea, Chief Executive Officer, presiding. In seeking to enlist the active co-operation of those present Dr. J. P. Chaudhuri, Acting Health Officer of the Corporation said :—

"There is a saying 'Cleanliness is next to Godliness' : Your co-operation as owners of tea-shops, eating houses, and resturants is essential, as cleanliness at every step is wanted,—cleanliness at the place where food is manufactured, where food is stored, where food is served and where refuse is kept. You must be sure also about the cleanliness of the cups, saucers, plates, tumblers, and all other utensils as well as cleanliness of the drinking water and pots or jars used for storing and serving the same".

Continuing Dr. Chaudhuri said :—

"The inner cleanliness of the persons you engage in your food trade should also be thought of. Some of these men become carriers of Enteric and Dysentery. Stools and urine of persons suffering from these diseases should be examined to find out if they are carriers or not before they are discharged from hospitals. Private practioners should also communicate to the District Health Officers concerned such cases treated by them for free bacteriological examination of their stool and urine. You should also try to employ persons who can produce medical certificates showing that they are not carriers of these diseases".

These were words with a direct appeal and should not have gone wide of the mark. But we are conservative and often so slow to move even in our efforts at agreeing to a plan of better living. That is why it was decided at the meeting, and rightly, to pursue the matter effectively by holding further group talks of the kind from time to time.

A Forlorn Cause

The State Faculty of Ayurveda was established in 1937, but the rights and privileges enjoyed by Ayurvedic practitioners even to-day in 1941 are, in fact, equivalent to nil. As it was regretfully complained at the last All-Bengal Conference of Ayurvedic practitioners, held in Calcutta during the last week-end, the Faculty has been reduced merely to an Ayurvedic Birth and Death Registration Office. Why shouldn't Kavirajes recognised by the Faculty have a real status conventionally under the Government, which has brought the Faculty into being and in the eye of the law? If medical certificates granted by registered Ayurvedic practitioners are not, as we are told, officially recognised, why should successful men in the profession with a dependable clientele, care to come at all under such a still-born Faculty, we wonder. There may be a reasonable anxiety to support the Unani and Homeopathic systems of treatment as well, and to organise their respective Faculties, but why should the Faculty already created, be not allowed to function fully and with all its rights and privileges until the consummation of that ideal? The hoary system of Ayurveda coming right down from the beginning of civilisation is no quackery, and if the Government of Bengal in its wisdom has condescended to extend to it State aid and recognition, let there be no wavering about it and let that by all means be unqualified and thorough.

Mr. J. H. Speller

Our hearty congratulations to Mr. J. H. Speller, Councillor of the Corporation on his election to the Bengal Legislative Assembly as a member from the Calcutta and Suburbs (European) Constituency. He is sure to find much useful work in this wider sphere of his choice where many an important measure is soon to be forged on the legislative anvil.

Councillor Varma's Bereavement

We have to record with sorrow Councillor Mr. Suresh Chandra Varma's sad bereavement in the loss of his father, Mr. Banshidhar Varma, who after a protracted illness of eight months and more died of cancer on the 23rd January last at Mr. Varma's Calcutta residence on Chittaranjan Avenue. A retired employee of the Allahabad Bank the late Mr. Varma enjoyed his well-earned pension for fifteen long years and was seventy-three at the time of his death. He leaves behind him two sons and a number of grand-children to whom we offer our heartfelt sympathy and condolence.

CALCUTTA CENSUS FORECAST

That the 1941 Census will register an enormous increase in the population and number of residential houses of the city of Calcutta, is indicated by the preliminary survey already made.

It is understood that there will be over 3 lakhs of houses and 17 lakhs of population as against 2,23,162 occupied houses and a population of 12,60,700 recorded in the 1931 Census.

Countrywide Concern For Sj. Subhas Bose

Unexpected Disappearance From Home

GREAT anxiety prevails amongst the numerous admirers, friends and relatives of Alderman Subhas Chandra Bose since last Sunday afternoon when it was noticed that he was not in his room where he was confined since his release from jail in the 1st week of December last. It is generally known that from the last few days he was observing strict silence and had not been seeing anybody not even the members of his family but had been spending his time in religious practices. Anxiety is all the more acute on account of his present state of health. Mr. Arabindo Bose, Mr. Subhas Chandra Bose's nephew, who was the only person allowed to look after him in the course of an interview said that since January 16, Mr. Bose had taken the vow of silence and shut himself in a room partitioned

with a screen behind which he used to sit on a tiger's skin and read the *Gita*, *Chandi* and other religious books. Mr. Bose during these days used to meditate deeply. Fruits, milk and water used to be kept outside the screen once a day and utensils removed in the morning only. If Mr. Bose wanted anything to be done he would keep a slip outside and ring the calling bell but would not allow anybody to talk with or disturb him.

On the morning of January 26, Mr. Arabindo Bose, having found at the usual time that Mr. Subhas Bose's food and water had remained untouched since the previous evening, grew anxious and had consultation with the family members. The family members then dropped a slip over the screen that they would wait for half an hour and if there were no response by that time, would enter the room to see as to what had happened to Subhas Babu. Having received no response they entered the appartment and found that Subhas Babu was not there.

Intimation was immediately conveyed to Mr. Sarat Chandra Bose who had been at his garden house at Rishra, a few miles from Calcutta. Men were sent to Belur and Dhakshineswar and other places but no trace was available.

Mr. Arabindo Bose believes that Subhas Babu might have left home in the early hours of January 26.

Ceaseless efforts to trace Sj. Subhas Bose for the last few days, both by his own people and the police, have failed to find any clue as regards his whereabouts and intentions. The anxiety naturally grows more and more as time passes on.

Messengers deputed to South India and some other parts of the country have but one story to tell—that is "Sj. Bose is nowhere traceable."

Anxious enquiries from all quarters in and outside the province continue pouring in.

Enquiring about Sj. Bose Mahatma Gandhi in a telegram to Mr. Sarat Chandra Bose, received on Wednesday morning says :—

"Startling news about Subhas. Please wire truth. Anxious. Hope all well—Bapu".

Replying to Mahatma Gandhi's enquiry, Mr. Sarat Chandra Bose, in a telegram says :—

"We as much in dark as public about Subhas' whereabouts and intentions and even the exact time of leaving. No news in spite of best efforts for last three days. Circumstances indicate renunciation".

Poet's Concern

In a telegram to Mr. Sarat Chandra Bose, received in Calcutta on Wednesday, Dr. Rabindranath Tagore says : "Deeply concerned over Subhas' disappearance. Convey to mother my sympathy. Kindly keep me informed of news."

Mr. Bose has sent the following telegram to Dr. Rabindranath Tagore in reply to his enquiry : "Mother and we profoundly touched by message. No news Subhas yet despite utmost efforts last few days. Hope he will have your blessings wherever he may be."

Dr. Rabindranath has also deputed his Secretary, Mr. Anil Chanda, to visit Mr. Bose's place in order to gather first-hand information.

Friends and relatives of Sj. Bose, who seem now to have recovered from the first shock which kept them spell-bound for the last few days, are now making personal enquiries about the circumstances of the case. Not content with the information supplied by newspapers, they are now in large numbers visiting Sj. Bose's Elgin Road residence and evincing keen interest in every detail of the incident. The room where he used to live has now focussed everybody's attention. The tiger's skin, the English annotation of the *Chandi* Sj. Bose used to read, the half-burnt incense sticks, the silk cloth he left behind are being observed by all with an interest indescribable.

Rumour Of Arrest

The reports which were current in Jharia on Wednesday last to the effect that Sj. Subhas Bose had been arrested there now appear baseless and are contradicted in official quarters.

Enquiries made by Mr. Sarat Chandra Bose from various sources in Jharia and Dhanbad also indicate that there was no ground for these reports. Up to the time of our going to press (Friday evening,) there was no trace whatsoever received from any quarters about Sj. Bose.

"INDEPENDENCE DAY" CELEBRATIONS

Congressmen in Calcutta celebrated the "Independence Day" on Sunday, the 26th January with the usual solemnity and enthusiasm.

In spite of inclement weather people assembled in large numbers in different parks and other important centres of the city and its suburbs to participate in the solemn ceremony of the hoisting of the National Flag in the morning.

The National Flag was hoisted amid scenes of great enthusiasm at the offices of different Congress Committees, the Forward Bloc, Socialist, labour, student and other organisations, in newspaper offices, residential quarters and many commercial establishments in the city.

Miniature National Flags for button-holes were sold in large numbers.

Volunteers of different organisations affiliated to the Bengal Provincial Congress Committee and the Forward Bloc paraded the streets of the city with National Flags in their hands.

In the afternoon a huge meeting was held at Sradhananda Park where Mrs. Hemaprova Majumdar, M.L.A., the president, read aloud the Independence pledge which was repeated by the assembled men and women, all standing.

Similar meetings were held at Deshabandhu Park, Deshapriya Park and other important places of the city, where students and youngmen predominated and bowed in their thousands before the National Tricolour.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETINGS FOR THE WEEK ENDING JANUARY 31, 1941

[The reports of the meetings of the Corporation appearing below are, in most cases, a summary of the proceedings.—Ed., "C. M. G."]

THIRTIETH ORDINARY MEETING OF THE CORPORATION HELD ON WEDNESDAY, THE 29TH JANUARY, 1941

Meeting Adjourned

Deep concern for the sudden disappearance from home of Sj. Subhas Chandra Bose was expressed at the meeting which was adjourned till Tuesday next.

As soon as the House met, Mr. Debabrata Mookerjee moved that the meeting do stand adjourned till some time next week. He said that deep anxiety prevailed not only in the city, but throughout the country, on account of the fact that Alderman Subhas Chandra Bose left his house unnoticed since they met last. It had been a stunning blow to all all over the country, and he was sure that this Corporation, which saw so much of Mr. Bose and to which he gave so much, shared that anxiety. It was no use speculating on the matter at this point of time. Possibly, this might be the turning point of his career, said Mr. Mookerjee.

Mr. P. K. Dutt seconded.

Mr. F. G. Watson said that while they had every sympathy for Mr. Subhas Chandra Bose and particularly for his relatives, at the same time they had a duty to the city and to their constituency. They had a tremendous amount of work to do and they had fallen behind hand with it. Mr. Subhas Chandra Bose himself had repeatedly referred to the magnitude of their task and he felt that if Mr. Bose were able to let them know his views, he himself would not have wished the business of the House to be interrupted. He, therefore, proposed as an amendment that the House continue with the meeting that evening.

The Mayor: That amendment is not admissible as being a direct negative to the original motion. You may vote against the motion for adjournment if you so desire.

Mr. F. G. Watson: I feel that purely for civic reasons we must oppose this motion.

Mr. N. C. Chatterjee said that he was sorry that Mr. Watson had struck a discordant note. The distressing news of the disappearance of Mr. Subhas Chandra Bose had deeply affected all sections of the community. As Councillors, they were fully conscious of their responsibilities and duties to the citizens, but he felt that in recognition of the remarkable services rendered by Mr. Bose to the city and this Corporation in diverse capacities—as Chief Executive Officer, as Mayor and also as an Alderman—it was only in the fitness of things that all sections of the House should unite and act gracefully in the matter by accepting unanimously the motion sponsored by Mr. Mookerjee.

The motion for adjournment was then put to the vote and declared carried.

The Mayor: The meeting is adjourned to Tuesday next at 5-15 p.m., because on Wednesday Moslem members will find it difficult to come owing to the Mohurrum.

Councillors' Bereavement

The Mayor then continued: "Before you disperse I have to mention the death of very near relatives of two of our colleagues: Mr. S. C. Varma has lost his father, while Mr. Pulin Behari Mullick has lost a brother. I am sure the House wishes me to convey an expression of our sympathy and condolence to the members of the bereaved families."

On a motion from the chair, it was resolved (all present standing):—

(1) That the Corporation place on record their deep sense of sorrow at the death of Rai Bahadur Kumud Behary Mullick and desire that an expression of their sympathy and condolence be conveyed to Mr. Pulin Behary Mullick and other members of the family in their bereavement.

(2) That the Corporation place on record their deep sense of sorrow at the death of Mr. Banshidhar Varma and desire that an expression of their sympathy and condolence be conveyed to his son, Mr. Suresh Chandra Varma and to other members of the family in their bereavement.

LATE MR. JOGESH C. RAY

The death occurred on Monday last of Mr. Jogesh Chandra Ray, the seniormost vakil of the Calcutta High Court, at his residence at 6, Dr. Rajendra Road, Bhowanipur.

Mr. Ray was 88 years old at the time of his death and the Golden Jubilee of his practice at the Bar was celebrated a few years ago.

It is said that during his 65 years' practice in the Bar he was not absent from Court for even 65 days. He bore the weight of his years lightly and displayed the same keenness and agility of mind till his death as at any time before, and maintained his position in the front rank of the profession throughout.

General Article

History Of Rating In England

[By Kshitish Chandra Chakrabarty, M.A., B.L., *Councillor, Calcutta Corporation*]

THE foundation of the modern law of rating is to be found in the statute, 43, Eliz. C. 2, commonly referred to, without further description, as the statute of Elizabeth. The Act imposed the liability to be rated, without very precisely defining the measure of rates, created the "Overseers of the poor," by whom the rate was to be made and gave a right of sessions against the rate. So far as relates to the liability to be rated, the statute of Elizabeth stands subordinately unrepealed by any later Act of general application, with the one important exception of the Poor Rate Exemption Act, 1840, which abolished the liability of the inhabitant, as distinguished from the occupier.

The first section of the statute 43 Eliz. C.2 directs the overseers to take order for setting the poor to work, and also it raises weekly or otherwise by taxation of every inhabitant, person, vicar, and others, and of every occupier of lands, houses, tithes appropriate, coal mines or saleable underwoods in the said parish, in such competent sum and sums of money as they shall think fit, a convement stock of plan, hemp, wool, thread, iron and other necessary work, and shift to set the poor on work; and also competent sums of money for and towards the necessary relief of the lame, impotent, old, blind, and such other among them being poor and not able to work, and also for the putting out of such worthless people to be apprentices, to be gathered out of the same parish, according to the ability of the same parish.

The persons made chargeable under this section are "every inhabitant, parson, vicar, and other, and every occupier of lands," etc. The word "inhabitant" includes only residents within the parish, and a parson holding property within the parish, but residing elsewhere, is not chargeable as an "Inhabitant." The liability of an inhabitant (as such) to be rated is now abolished by the Poor Rate Exemption Act, 1840.

It was decided in Sir Anthony Earby's case "that assessment ought to be made according to the visible estate of the inhabitants there, both real and personal, and that no inhabitant there is to be taxed by them (*i.e.*, the overseas) to contribute to the relief of the poor, in regard of any estate he hath elsewhere, in any other town or place, but only in regard of the visible estate he hath in the town where he doth dwell, and not for any other land which he hath in any other place or town."

In R. V. Andover Lord Mansfield said, "It would make the poor laws very oppressive if a man is to be taxed to the extent of his whole personal estate and income. In that case, every man who has money in the funds would be liable: lawyers for their fees: soldiers for their pay. But where men are occupiers of houses and have stock-in-trade, whether such stock-in-trade may be taken into consideration is a very different question. Such personal estate may be rateable; but it must be local property within parish."

By far the largest numbers of persons rated are rated as "occupier of land or houses." The word land as used in the statute, must be understood in the widest possible sense; it includes not only the surface of the earth, but everything under it, or over it; so that a telegraph company may be rated for their posts, and even for the wires attached thereto, a tramway company may be rated for a tramway laid in a public highway, the owner of a bulk may be rated for permanent moorings which he has placed in the bed of a navigable river, and gas or water companies may be rated for pipes running through the bowels of the earth.

A few words may be said here as to the nature of the poor rate imposed on the occupier: the poor rate is not a tax on the land, but a personal charge in respect of the land: So that to the validity of the rate it is essential, not only that the land should be within the parish for which the rate is made but that there should be an occupier of that land who can be made liable. Consequently, if the owner is entitled to exemption, but the occupier is not, the liability attaches; on the other hand, if the owner is not, but the occupier, is exempt, then no liability attaches. Again, if the rate is not paid, it is recovered by distress and sale of the goods of the offender, and of no other person, and is not charged on the land.

In strictness it is incorrect to say that land is rateable. The occupier, and not the thing occupied is rateable. But as the occupier of land is rateable in respect of that land, it is sometimes convenient, for the sake of brevity, to say that the land is rateable. But there is always a danger in substituting for the words of the estate under phrase which is not an exact equivalent.

43 Eliz. C 2 shall extend to the following hereditaments in like manner as if they were mentioned therein, that is to say,—

(a) To land used for plantation, or for the growth of saleable timber, and not subject to any right of common;

(b) To rights of fowling, of shooting, of taking or killing game of rabbits, and of fishing, when severed from the occupation of land; and

(c) To *meus* of every kind not mentioned in the statute, 43 Eliz. C. 2.

When severed from the occupier's land, rights of sporting were in effect at one time not rateable; for where one person had the sporting rights of fishing, shooting, etc., over land which was in the occupation of another person, the owner of the sporting rights could not be rated for them, because they were in corporal rights in gross, and as such not written in the statute of Elizabeth.

The Advertising Stamps (rating) Act, 1869 was passed; not so much to make rateable property that was not rateable before, as to meet difficulties which had arisen in finding out who was the right person to be rated for land, which

was used for advertising, and either was or was not otherwise occupied.

There is no statutory definition of the words "occupier" and "occupations" as used in connection with the law of rating. Persons are to be found in some of the cases which suggest that "occupation" for the persons of rating, means "possession", that the occupier is the person who, if there were a trespass committed on the premises would be the person to bring an action of trespass for it. But the word "possession" may be used in more senses than one; and it has more than once been contrasted with "occupation." Thus in R. V. Watson it was said that "occupation" implies possession, and trespass can only be brought by him who is in possession of the land. And in R. V. St. Pancras, Lust J. said—

It is not easy to give an accurate and exhaustive definition of the word "occupier." Occupation includes possession as its primary element, but it also includes something more: legal possession does, out of itself, constitute an occupation. The owner of a vacant house is in possession and may maintain trespass against any one who invades it, but as long as he leaves it vacant, he is not rateable for it as an occupier. If however, he furnishes it and keeps it ready for habitation whenever he pleases to go to it, he is an occupier, though he may not reside in it even one day in a year.

Mosquito Control

Measures Recommended By The British Ministry Of Health

[*We give below verbatim extracts from the memorandum, "Measures for the Control of Mosquito Nuisances in Great Britain," prepared for the British Ministry of Health by Colonel Sinton and Mr. P. G. Shute with prefactory note by Dr. Arthur S. MacNalty, the Chief Medical Officer of the Ministry.*]

THE problem of the transmission of malaria by mosquitoes is seldom a serious one here, and most measures against them are usually undertaken to reduce their numbers to a level at which they no longer cause a nuisance by their bites. This mostly means the control in relatively small breeding places such as woodland pools, stagnant ditches, lakes in public parks, water in disused gravel and sand pits, sewage farms, and domestic water containers of all kinds around dwellings, farms, allotments, etc. The only relatively large-scale operations are those in connection with the breeding of such mosquitoes as *A. detritus* and *A. caspius* in the brackish water of coastal marshes. These may often need to be extended over a large area on account of the prolificity of these species and their length of flight.

While the nuisance caused by certain species of mosquito may be diminished by measures directed against them in the adult stage, the most satisfactory results can only be obtained by attacks upon the breeding places of these insects. Wherever possible anti-mosquito measures should aim at destruction of the breeding places of these insects by abolishing them permanently, either by preventing their formation or by draining or filling them up if this occurs. Wherever such more permanent measures cannot be undertaken the insects may be attacked by the use of larvicides of various kinds (*vide infra*). It must be remembered, however, that the action of such substances is only a temporary palliative, and their application has usually to be repeated at varying *ad infinitum* until the breeding grounds are permanently abolished, or made unsuitable for breeding.

To obtain the optimum effect of such larvicidal measures, it is essential that they be applied at the proper season of the year. In the case of those species the larvae of which appear mainly in one large brood annually (most of the troublesome species of *Aedes*), such measures should be carried out vigiourously a few weeks before the adults begin to emerge. In this way the majority of the annual adult generation will be destroyed before emergence and the otherwise inevitable nuisance controlled or very greatly ameliorated. On the other hand, with insects which have multiple broods during the spring, summer and autumn, anti-larval measures will usually need to be carried out every two weeks during the season when adults are emerging. It is in the latter case that any permanent reduction in the number of breeding places will be of greatest value. Even if only a little is done each year the time, material, and money needed for anti-larval work will gradually decrease.

Measures Against Adult Mosquitoes

The measures of Mosquito Control may be directed either against the adult insect or its immature aquatic stages, mainly the larvae.

If houses be kept clean, well ventilated and well lit, they are much less liable to harbour mosquitoes. Measures against adult mosquitoes are the use of insecticides to kill them and of repellents to deter them from biting.

(a) *Insecticides.*—It is only in the case of those species of mosquito which tend to congregate in large numbers inside buildings at certain seasons (usually for hibernation) that destructive measures of this nature are likely to have any appreciable effect upon the prevalence of these insects. Species such as *A. maculipennis*, *T. annulata*, *C. pipiens*, and probably also *C. molestus* tend to collect in cattle sheds, cellars, attics, etc., during the colder months, and at such times very large numbers of them can be destroyed. The adults of *A. maculipennis*, which tend to congregate in buildings at all seasons of the year, can also be attacked at other times.

In places like cellars, cattle sheds, etc., where there are few things which can be damaged by their use, one may employ spraying mixtures consisting of either 2—5 per cent. solution of carbon tetra-chloride in kerosene oil or 5 per cent. aqueous solution of cresol disinfectant. The best results are obtained, however, with mixtures containing pyrethrum. There are many proprietary "fly

sprays" advertised, which are of this nature and give satisfactory results. In large-scale operations a knapsack sprayer of the type used by gardeners fitted with a very fine spraying nozzle may be employed with advantage. The pyrethrum-kerosene larvicide mentioned later can be used for this purpose also.

The places where mosquitoes are congregated for hibernation should be sprayed twice, once at the beginning of this period and again some weeks before the insects resume their activities in the spring.

(b) *Repellents or Culicifuges.*—These are substances rubbed on the exposed parts of the body (ankles or legs, wrists or arms, back of neck and ears) to protect the individual against bites. Their effects are usually only apparent for a few hours at the outside. The chief constituent of repellents is citronella oil, and the following are useful prescriptions:—(1) Oil of citronella, 2 parts; spirits of camphor, 1 part; cedar wood oil, 1 part; white petroleum jelly, 8 parts. (2) Oil of citronella, 3 parts; liquid paraffin, 2 parts; coconut oil, 4 parts. Mix and add sufficient carbolic acid to make 1 per cent. There are several proprietary preparations on the market.

Measures Against The Immature Stages Of Mosquitoes

Such measures may be divided into (*a*) those which aim at the prevention of the formation of breeding places and their abolition should they be formed (mechanical measures); (*b*) those aimed at making water collections unsuitable for the breeding and survival of larvae (naturalistic measures); and (*c*) those aimed at the direct destruction of larvae and pupae (larvicidal methods).

(a) *Mechanical Measures.*—The ideal methods against mosquito larvae are those which either prevent the formation of breeding places or abolish these so rapidly that the insects have not time to multiply in them. Wherever possible the abolition should be permanent. These methods consist mainly of the drainage or the filling if actual or potential mosquito breeding places.

Minor measures consist in burying old tins, pots, and other potential water receptacles which accumulate on rubbish heaps and around houses. Water butts, tanks, cisterns bird baths, etc., in gardens and green-houses often breed many mosquitoes. These should be emptied and brushed out about once every week. If they are fitted with tight covers to prevent the entry of mosquitoes to lay eggs, and the water is withdrawn by a tap from below, the danger is lessened.

Holes in trees should be filled with earth, clinker, or gravel and faced with cement, or better with asphalt, which is less liable to crack. Where breeding pools are few, small and localised, they should be filled in. When, however, there are old quarries, gravel stand and borrow pits, brick fields and similar excavations, this may be a formidable task. In some cases the formation of such pools can be prevented to a large extent by the stoppage of flood water entering them from overflowing ditches and streams. The amount of filling needed to abolish water can often be greatly diminished if this is combined with appropriate methods of drainage. In the vicinity of towns many such large or numerous excavations can be got rid of permanently at a relatively low cost by filling with household rubbish. Swamps can sometimes be treated in a similar manner.

In many instances breeding places are formed by obstructions to drainage. It is essential, therefore, that all ditches, etc., which drain known breeding places, or which themselves act as breeding places, should be kept properly cleaned graded, and free from vegetation. This is especially the case just before and during the mosquito season. In some cases a relatively simple system of drainage will abolish quite large breeding places, if properly carried out.

There are, however, larger drainage schemes which will need expert engineering advice. These are usually in connection with the most serious mosquito nuisances in this country, namely, those caused by the mosquitoes which breed mainly in brackish water along the lowlying coastal areas (*e.g.*, *A. detritus* and *A. caspius*). When such breeding places are below the level of and are flushed by the lowest spring tides, they seldom require attention, because the larvae are washed out at least once a fortnight, which, save in exceptionally warm weather, is too short an interval to allow of the hatching out of adults. Marshall has made a special study of these coastal breeding mosquitoes and their control. He divides the areas into two groups: (i) those to which the sea has more or less direct access; and (ii) those lying behind the sea walls bordering upon reclaimed areas.

(i) *Areas to which the Sea has access.*—Hence the spring tides often leave pools which may stagnate for long periods and in which mosquitoes breed until the water soaks away or evaporates. The duration of these pools may be shortened by drought or lengthened by rainfall. Such breeding places may be abolished by filling, or by drainage to lowest spring tide level, or by a combination of these methods. As such measures may take some time to complete, it is equally necessary to use larvicidal measures (oil or cresol) to obtain an immediate destruction of the larvae, if these be present, otherwise they may hatch out in the interval.

(ii) *Areas behind Sea Walls.*—These areas are usually low lying and their surface is often below the level of ordinary high tides. Large brackish stagnant pools may be formed here by percolation and by leakage through or over imperfect sea walls. Defective drainage devices and accumulation of rain water are other or additional causes of the formation of breeding places. In such areas repairs to sea walls are often needed, but it is usually also necessary to install some system of drainage leading to sluice valves or tidal gates, which are opened either automatically or by hand when the tide is sufficiently low to allow the accumulated water to run away. Such schemes usually require expert engineering advice. In some of these areas many depressions may be abolished by filling, while other breeding places may be treated periodically with larvicides. Whenever the nuisance is a serious one it is always advisable to get the opinion of an expert as to the best method of dealing with the problem.

HEALTH & HYGIENE

A Healthy Mind In A Healthy Body

Problems Before Parents ....

A healthy mind in a healthy body is every child's birthright. In what ways can parents ensure that their children shall be healthy in mind and body? The question has been sought to be answered by a Welfare Centre Father in the following interesting article published in "Mother and Child" :—

THE foundations of a healthy body—and, incidentally, of a healthy mind, since the two are to a certain extent interdependent—can undoubtedly be laid during the ante-natal period. By means of judicious diet and exercise for the expectant mother a great deal can be done to give the child an excellent start, and there are now so many reliable sources of information available that there is little excuse for ignorance in these matters.

With regard to the handling of the child himself, here again diet and the right type of exercises must play a very large part in building up a sturdy constitution. Regular hours and habits should be observed from the very earliest days. The child should have a bedroom to himself from the beginning if at all possible in order that he may get a better supply of pure air and is not disturbed by his parents.

It should be realised that when a young child cries something is wrong: the parents should trace, and as far as possible remove the source of trouble, not dope the child with a dummy, honey or other devices of the last generation.

There seems to be a tendency for parents to play with children as if they were dolls instead of devising means to amuse and, at the same time, quicken the observation. There are now many such toys on the market which are quite cheap, or, for that matter, quite easy to make.

A child is a reasoning animal with a strong sense of justice and fair play, and as such is very much easier led than driven. The realisation of this is a great step in the training of children. A suggestion which will lead the child's thoughts away from a certain object or course of action is much more effective than a stern "Don't do that", which merely leaves the child with a strong determination to do it at the earliest opportunity. When punishment is considered necessary it should be administered immediately following the offence, so that the child has no doubt as to why he is being punished. On the other hand, the parent must be certain that punishment *is* essential and then punish in cold blood, *not* in anger. After punishment is over a fresh start should be made and no malice borne or further reference made to the offence.

The child should never be laughed at or sarcasm used at his expense, since most children are so sensitive that this may dwell in their minds for days after the parents have forgotten all about it, and this brooding over a feeling of inferiority can produce most harmful results.

A healthy child will ask a large number of questions, and the parents should answer these honestly and to the best of their ability. Questions on sex matters should be answered as soon as they are asked, in the simplest possible manner. I consider it uncessary to wait until a child has reached a specified age before answering this type of question. If the child is old enough to ask he is old enough to know. On the other hand, I consider it unnecessary to do more than answer the bare question in the earlier years since undue emphasis on the subject may be as harmful as entirely ignoring it. Matters which the parents do not wish the child to know should not be discussed in front of the child, on the assumption that "he is too young to understand". The observance of these ideals, and the treatment of the child as an individual with rights, tastes and opinions of his own, should avoid the repressions and inhibitions of which we now hear so much.

Bathing Dangers

A Few Don'ts Suggested

The modern child is encouraged to find his feet in the water, if one may so express it, at as early an age as possible. He is encouraged to be fearless but being fearless does not mean being incautious, and a good many tragedies might be averted if children were trained to take some common sense precautions when bathing.

"Take common sense into the water with you" is the basis of a holiday warning issued jointly by the National "Safety First" Association and the Royal Life Saving Society of London. They suggest the following "Don'ts" :—

Don't take risks when bathing. Use common sense.

Don't bathe too soon after a meal. Wait at least two hours.

Don't go beyond your depth alone, and even then only when a good swimmer.

Don't dive into water of which the depth is not known.

Don't swim out to sea. Just as much enjoyment can be obtained by swimming parallel with the shore.

Don't stay in the water when feeling numb or cold.

Don't play or swim near creeks, harbour mouths, etc.

Don't try to swim across rivers or streams. It is not worth the risk unless accompanied by a boat.

Don't enter the water when overheated or fatigued.

Don't allow children or young people to play with rubber floats, rubber balls or other pneumatic appliances, or use them in an attempt to learn to swim. They are dangerous.

Don't lose your head if attacked with cramp. Turn on to the back, keep calm and try to attract help.

Don't bathe in unfrequented places or away from a crowd. There is safety in numbers.

Don't fail to make inquiries first as to tides, currents, etc., when bathing in any less frequented spot.

Don't bathe outside marked safety areas.

Swimming and bathing are health-giving exercises which can be enjoyed with perfect safety if due consideration is given to possible dangers.

—Mosquito Control

(*Continued from page* 359)

(b) *Naturalistic Methods.*—In many permanent water collections such as lakes, ponds, and ditches, the breeding of mosquitoes is kept under control by the attacks of their natural enemies, which must destroy enormous numbers of larvae. Where, however, there is much aquatic vegetation, more especially that of a floating type, large numbers of the larvae may be protected from destruction.

Many small fish such as sticklebacks, gold fish, and the fry of larger fish, will eat larvae greedily. Small ornamental ponds in gardens can often be kept free of these forms if a few gold fish are introduced into them. If, however, there be much vegetation, the shelter for the larvae may be so great that many escape destruction. Weedy ponds, lakes, and ditches are often fruitful breeders of mosquitoes (especially of *A. maculipennis*). In such cases the vegetation should be removed or cut away below the water level so that the larvae are exposed to the attacks of their natural enemies or are washed into uncongenial surroundings.

In some weedy dykes, where it was too expensive to cut the weeds and keep them cut, good results have been obtained by the use of sluice gates which allowed the water to be raised and lowered so that the larvae were washed out of their shelters. A similar method may be used with ornamental lakes if financial conditions permit.

When cresol larvicides or oiling are used extensively on lakes and ponds, it must be remembered that many natural enemies of the larvae may be killed off. This may leave the water more suitable for the breeding of mosquitoes after the temporary effects of these larvicides have passed off.

Marshall records that with *A. cantans*, a spicies which always breeds in densely shaded pools, the removal of trees and bushes around a very prolific breeding ground resulted in the disappearance of the larvae, which only reappeared when the bushes were allowed again to reform shade.

Town Planning Or Concrete Castles In The Air—II

(Concluded from the issue of 25th January, 1941)

THERE is very little in our modern towns for us to be proud of. That everything should be organised so that man can do all the things he needs to do, and is there to do, more efficiently and well, this idea has in the last centuries been lost sight of, and we are only just beginning to realise how fatal this is. We are beginning to understand that to let things take their course, just anyhow, is from the point of view of culture disastrous, from the point of view of economics the most costly way. Dirt and disease; lack of sanitation; overcrowding and overcongestion; poverty; the irresponsibility of individual element living at the expense of the community—someone always has to pay for this. In the end you and I have to pay: in increased rates and taxes, in enhanced and artificial prices for the town's amenities (such as they are), and in abnormally high rents.

Take the case of a certain town in Central India. Not so many years ago the town was so plague-ridden that the average life expectancy for men was—can you believe it?—*eighteen years*. This means that if you as a male child had been born there, you could not entertain any great hopes of living beyond your eighteenth birthday. Alarmed, the authorities began to clear up the worst spots, the overpopulated and overcongested areas, and now the average male life expectancy stands at about thirty-four years. This is certainly better, yet it still will not stand comparison with the corresponding figure for England, say, which is about sixty-four, or that for America which is slightly below this. And yet perhaps two centuries ago life expectancy in Europe was no higher than that for India at present. Or take the case of the little town of Redhead in America, which a few years ago was perhaps that country's unhealthiest spot, cholera and typhus ridden. And now, two years after the completion of a proper scheme of sanitation and for the first time since the town's existence, there has not been one single death from either of these diseases. To the inhabitants of Redhead this means: the redundancy of special hospitals, reduced insurance rates all round and reduced workman's health insurance in particular. Further, which do you consider will cost less in the end: ever bigger, more numerous and more expensive hospitals; or the first cost of abolishing to a large extent the reason for their existence?

Town planning is popularly supposed to involve huge and invariably expensive schemes, and hence those who are ignorant of its real purpose and aims always lend to fight shy of it. They would prefer something nice and simple, some detail which they can easily grasp; an improvement to an already existing scheme, say, or patching up some existing condition. In fact this attitude is based on a misconception. You have all heard of the so-called "rationlization of industry", of how

NEW!

SHAW WALLACE & CO., CALCUTTA

antiquated and inefficient methods of production can be traced down and replaced by more efficient ones. You have also heard of "efficiency experts" whose job it often is to repair an industry so that it may fulfil its job better and more cheaply, avoiding sources of conflict and of waste. The aim in all cases is to reduce inefficiency to a minimum and, while cutting cost of production, to gain a higher standard of living for its staff. So one of the chief duties of a town planner is akin to those of an efficiency expert: to cut down production costs of the town, as it were, and to see that the whole vast machinery runs more smoothly and cheaply. Town planning is there to increase the town's efficiency; to save money on its building and running.

* * * *

Before we ever start on any scheme of town planning we must visualize the town, not as a number of disjointed small parts, but as one whole *organism*. The town must be seen in proper perspective, as it were; and only after this has been done can we narrow down our field of vision until ordinary details begin to appear. The best way to view the earth would be from the moon: but, failing this advantage, let us start off by taking our own as it stands on the map of India. It is perhaps an important port, the capital of a province, of a State, or the main town of some agricultural area. Notice its geographical position on the seafront, on a river, at the crossing of two trade routes, in the centre of a plain or at the fringe of a range of mountains. Bear in mind the kind of town it is: purely agricultural, an industrial town, a military centre, a place of pilgrimage, a port, an administrative centre, or a mixture of one or more of these. See the main lines of communication converge on it: trade routes, roads, railways, waterways, airways.

Is all this not already suggestive? Of course it is!

Supposing the main wind throughout the year comes from the West. Has the chief residential area of the town been placed to windward, or has industry perhaps been allowed to encroach in this direction? A glance now at a map of bigger scale will tell us. We may also notice that the railway station, which properly belongs on the East side of the town and near the industrial and market area, is not where it should be. As likely as not, also, the main road from the agricultural lands which bear food and produce is allowed to pass through the busy bazaar and is therefore strangled: bullock carts and lorries in overwhelming confusion seeking an outlet to the countryside become entangled in a maze of narrow little streets—some vehicles may even have to start off in a wrong direction and make a wide detour simply because no outlet in the right direction exists. See how the industrial area, a late arrival, has been kept from an easy and short access to the station and is obliged to encroach on fertile agricultural land nearby; or see how an early residential area now forms a lone and stranded island just where it is obvious that the food market should be. See also how, because only the most crooked and meandering streets exist to the fringe of the town and its residential area, and therefore because communication is bad and lengthy, the greater part of the population prefers to stay in the densest area with perhaps three hundred or even more inhabitants to the acre in two or three-storeyed houses. Just imagine the living conditions there.

In such a case, of course, before any scheme of housing can even be considered we should see what can be done about providing an easy access: wide roads, frequent squares, room for 'buses and horse tongas or victorias. You can seek vainly on the map for a garden here, an open space at least, still less for a play ground: there is none—land is far too expensive for that.

And so, even from a study of maps, at first of small scale and then of larger, of the whole country first, before we come to that of the town itself, everything falls into place. We need to study first the very reason for the existence of the town at all, its main support of produce and industry, its main lines of communication, the placing of its vital elements: zones, railway station, markets, bazars, schools, administrative buildings, places of worship—where they actually are, and where they best should be.

This last ideal condition, this imaginary plan which should be aimed at eventually if the town is to run efficiently as one whole well conceived organism, this is the master plan. In years to come, little by little, we proceed to develop the town according to this plan, and according to the money in hand and the occasions as they arise. In a further talk in the future I shall try to give you a more definite instance of such a plan: the master plan for the town of Bombay.

CENSUS OPERATIONS

An Appeal to Public

Mr. N. C. Chatterjee, President and Mr. J. M. Datta, Secretary, All-Bengal Census Board, have issued the following:—

"On the eve of the Census we join all responsible leaders of public opinion to make the Census in Bengal a faithful record of the economic and cultural life of our country apart from mere enumeration of the numerical strength of the respective communities. Our appeal is for co-operation with the Census authorities. Successful Census in Bengal will mean hard work and sustained labour on the part of thousands of volunteers and public-spirited non-official workers throughout this province.

"We reciprocate the appeal for unity and co-operation made by certain leaders, including the Chief Minister of Bengal, and we want all organisations working in this national cause to pool their resources and to co-ordinate their acivities for the good of Bengal and particularly for the sake of the communities who have been adversely affected by the boycott of the last Census. Let us not waste our time in mutual recriminations. Let us be alive to the importance of a correct Census from the economic, political and sociological points of view. Census statistics are the common tools and materials of day-to-day business of the Government of every civilized country.

"Please do not non-co-operate with the Census as it will prejudice the vital interests of the community and the nation."

CIVIC NEWS FROM FAR & NEAR

CENSUS OPERATIONS IN HOWRAH

In connection with the ensuing census operation all houses in Howrah town have been, we understand, numbered and house lists prepared. The town has been divided into 134 circles and these census circles have been divided into 506 blocks. Supervisors and enumerators have been appointed.

Classes for training census workers are being held and it is expected that training will be completed by the first week of February. A batch of instructors has already been trained for the purpose of helping supervisors.

A list of reserve enumerators is being prepared and all persons who are prepared to assist in correct enumeration have been requested to write to or see the Census Officer-in-charge immediately.

SILCHAR MUNICIPALITY

The credit of being the first Ward in the Silchar Municipality, in its annals, in re-electing unopposed the sitting members to the Board in the municipal election, goes to Tarapur, says a report. Messrs. Rabindra Kanta Sen, Muktear, (Congress); Satindra Mohan Dev and Girija Nath Chowdhury, three sitting members were returned un-opposed from the Tarapur Ward in the last municipal election.

HEALTH EXHIBITION AT JESSORE

An Industrial, Agricultural and Health Exhibition will be opened at Jessore on February 9 by the Hon'ble the Chief Minister of Bengal.

While the main object of the Exhibition is instruction and education to the masses, arrangements are being made for providing fun and amusements so that the largest number of people can be attracted to the Exhibition which will continue till February 28.

Mr. Jnananjan Neogy, Officer-in-charge of the Commercial Museum, Corporation of Calcutta is going down to deliver a lecture on "The Triumphant March of Man" on the 10th February. Mr. N. R. Sarker has also, we understand, agreed to go and deliver a lecture.

Capt. Sinha, Assistant Director of Public Health Malaria Research, will deliver a lecture at the Exhibition on "Malaria and its control." Dr. Chatterjee, Nutrition Officer and Dr. Pandit, Superintendent, Maternity and Child Welfare Work will deliver lectures on their respective subjects on the 11th and 12th February.

One of the best 'Jatra' parties in Bengal will give performances on three nights. Kabi parties have also been engaged to give performances on two days. There will be performances of *Nader Nimai* on two evenings. Free talkie shows will be given for the benefit of the masses.

BIHAR CONGRESSMEN IN LOCAL BODIES

The Behar Provincial Municipal Association, it is understood, have urged upon Mahatma Gandhi in a representation the necessity of Congressmen remaining in local bodies generally, and in office where they command a majority support.

A. R. P. EXPERIMENTS AT AMRITSAR

An 'Air Raid' warning was given there in the Amritsar Cantonments the other day at 10-30 a.m., when two aeroplanes of the Indian Air Force arrived flying very low over the cantonments. In a few moments all the residents shut themselves up in their houses and shops, several going to the newly constructed shelters complying with the instructions issued to them by the military authorities. The All-clear signal was given half an hour later.

Amritsar Cantonments had black-outs for four days at a stretch last week by way of experiment, all street lights being closed from 6 p.m. till 6 a.m. while the lights inside premises were dimmed or shaded.

RESTRICTIONS ON KITE-FLYING

Restrictions on kite-flying and playing of certain other games in municipal limits have been placed by the Abbottabad Municipality. The Committee has framed certain bye-laws in this connection which have been approved by the Frontier Government.

According to the new rules no person within the municipal area of the Abbottabad Municipality shall fly kites by means of thread or string which is composed wholly or in part of metallic wire or which has been treated with powdered glass.

Another rule forbids the flying of kites and playing of games in the vicinity of electric, telegraph or telephone wire or poles.

Breach of the bye-laws it is notified, is punishable with fine which may extend to Rs. 20.

LAHORE SWEEPERS TO BE REGISTERED

A new scheme for collection and disposal of filth and rubbish from the municipal area by sanitary methods has been drawn up by the Municipal Officer of Health, Lahore.

According to the scheme private sweepers will have to get themselves registered at the municipal office free of cost. They will be required to take covered buckets, initial supply of which will be made free of cost from the municipal office. The registered sweepers will be required to remove human excreta separate from other rubbish in covered buckets, which will be emptied in night soil receptacles with air tight lids placed in filth depots and removed from there at night in motor trucks. Human excreta will be trenched at the municipal filth dumping grounds and sold to cultivators after it has transformed into humus. Rubbish other than human excreta will be carried by sweepers to the municipal rubbish carts and motor trucks, which will be stationed at filth depots and other convenient places for the purpose. Non-organic rubbish will be used to fill up depressions and the organic one carried to municipal filth dumping grounds for sale to cultivators.

BOMBAY TAILORS ON STRIKE

A large number of tailors in Bombay have gone on strike demanding the restoration of their original wages, which were subjected to a cut, and better conditions of service. An appeal was made by the workers to the Labour Commissioner, but it is reported that the contractors, who engage a large number of tailors, are unwilling to restore the original wages. At a largely attended meeting of tailors a resolution was passed, requesting the Government to intervene in the strike.

INNS AND HOTELS IN PESHAWAR

The enactment of bye-laws governing and regulating the maintenance and building of inns, taverns, hotels, serais and other lodging houses in Peshawar is contemplated by the Peshawar Municipal Committee. The matter is now under the consideration of a Sub-Committee.

At present, serais and lodging houses are kept in very insanitary and unhygienic conditions. There are in many cases, no proper arrangements for ventilation and several persons are huddled together in small rooms. This affects adversely the health of the residents of the serais, and, what is worse, the general population of the city also suffers. The cholera epidemic of 1938 in Peshawar originated in one of these serais. Experts opinion attributes the high incidence of tuberculosis and other infectious diseases in the city to the general insanitary conditions of lodging houses.

JULLUNDAR DISTRICT BOARD

The general elections of the Town Committees at Noormahal, Rahon, Banga and Nawanshahr Doaba have been postponed to next year on account of the war exigencies. The life of the District Board is, we learn, also to be extended by another year for the same reasons.

MATERNITY HOSPITAL IN SIALKOT

Silver Jubilee Maternity Hospital has been opened at the town of Daska, in the Sialkot district. The hospital has cost Rs. 18,000, the initial cost being brone by the District Red Cross Society out of Their Majesties Silver Jubilee Fund while the maintenance has been taken over by the District Board. Four acres of land worth Rs. 20,000 was given free of cost for the construction of the Hospital building by a local Zaildar. Attached to the hospital a Child and Maternity Welfare Centre has been established in a building given free of cost by a local contractor.

HONORARY SERVICE AT HOSPITALS

"The principle that a successful doctor should spend part of his available time and energy in the public hospitals and lend his skill without reward for the treatment of the poor has been accepted in Britain and the Continent of Europe. It is a principle which should be extended to India too," said His Excellency Sir Maurice Hallet, Governor, United Provinces, during his recent visit to the Seva Samiti Hospital at Allahabad.

His Excellency added, "If a hospital is to be successful, it must have an endowment. It must have money to meet the day-to-day expenditure. Government do not have unlimited funds by any means, and if our hospitals are not to carry on a hand-to-mouth existence they must have adequate endowment."

His Excellency hoped that despite difficulties caused by the war, it might be possible to start work on the proposed new hospital for Allahabad.

SECTION 144 AGAINST COUNCILLORS

An order, under Section 144, Cr. P. C., was promulgated recently against the Hajipur Municipal Councillors. The Municipal Office was locked and police were posted there following scences of rowdyism on the occasion of the election of the Chairman.

It is stated a large number of outsiders had entered the municipal office and as the voting for the election of the Chairman commenced an altercation developed into a free fight, necessitating police intervention.

The situation, however, is now reported to be quiet.

NEW TAXATION PROPOSALS FOR MADRAS

Increase in the tax on property; in the duty on transfer of property, in the tax on cycles and carts and on private markets are said to be included in the Budget proposals of the Commissioners of the Madras Corporation for 1941-42, which are now in the hands of the Standing Committee of Taxation and Finance.

BOMBAY'S TRAINED AMBULANCE FLEET

Bombay has a complete and fully trained ambulance unit, equipped with a fleet of 25 ambulances, working in the city to convey sick and wounded men from the docks and hospitals and from the hospitals to the trains.

SHORTAGE OF ELECTRICITY AT AMRITSAR

The Textile Manufacturers' Association of Amritsar in the course of an important communication to the Punjab Government says that there has developed an increased demand for Indian manfactures, which has necessitated the expansion of Indian industry. This legitimate expansion is being hampered at Amritsar because the Municipal Committee is not sanctioning any new connections for industrial concerns nor permitting installation of additional load in the existing factories. The Punjab Government has in this connection been requested to take needful steps at an early date to ensure proper supply of electricity for industrial concerns at Amritsar.

TAJ MAHAL INQUIRY COMMITTEE

The Taj Mahal Inquiry Committee appointed by the Government recently visited Agra and examined the Dome of the Taj and its foundations.

The report is said not to have been yet ready.

LONDON MAYOR'S THANKS FOR PUNJAB

The Lord Mayor of London has, it is reported, cabled his thanks to the people of the Punjab and the Punjab Government for their recent contribution of Rs. 1,00,000. It will be recalled that on December 23, the Punjab Government's contribution of Rs. 50,000 and an equal amount allocated by His Excellency the Governor out of the Punjab War Purposes Fund were remitted to the Lord Mayor of London by cable.

CALCUTTA NEWS & VIEWS A Digest

BENGAL MILL-OWNERS' ASSOCIATION

At the general meeting of the Bengal Mill-owners' Association held at the premises of the Association on Saturday last, Rai Sahib Suresh Chandra Ghose was elected President of the Association, Mr. Debendra Nath Choudhury and Mr. Mohanlal Shah, Vice-Presidents, and Dr. Narendra Nath Law, Mr. Girija Prasanna Chakravarti, Mr. Brij Mohan Bagri, Mr. Suryya Kumar Basu, Mr. Dhirendra Nath Datta and Mr. Raghu Nath Dutta were elected members of the Executive Committee of the Association. Mr. Subinoy Bhattacharyya was appointed Secretary.

The President and the new Committee of the Association met Mr. S. C. Mitter, Director of Industries, Bengal, at a Tea Party on last Monday afternoon when various problems affecting the cotton mill industry in Bengal and how the Department of Industries in co-operation with the Bengal Mill-owners' Association could tackle them effectively, were discussed.

Among those present were Messrs. S. K. Basu, D. N. Choudhuri, M. L. Shah, G. Chakravarti, D. N. Datta, M. N. Sarkar and S. Bhattacharjee.

CLEANER CALCUTTA CAMPAIGN

The Cleaner Calcutta Compaign organised by the Publicity Department, Calcutta Corporation, in co-operation with the Cleaner Calcutta Committee (Health Week) was inaugurated on Saturday afternoon by Rai Bahadur P. N. Mukherjee, President, Rotary Club, in the unavoidable absence of Mr. A. R. Siddiqi, Mayor of Calcutta. Twenty-four hand-carts picturesquely decorated with instructive charts and posters depicting the requirements of cleanliness started to move around the city in four units for two days. The moving exhibition started from the Commercial Museum of the Corporation and paraded through the different streets, bustees and bye-lanes of Calcutta. About fifty thousand leaflets and hand-bills were distributed along with the moving show.

The function was attended at the Commercial Museum among others by Lady Brikmyre, Dr. A. C. Ukil, Mr. B. Sen-Gupta, Mrs. Lila Ghosh, Dr. R. N. Ghosh, Dr. B. N. Dey, Mr. Jnananjan Neogy and Mr. B. R. Das.

Rai Bahadur P. N. Mukherjee inaugurating the Exhibition congratulated the organisers. He hoped that in future the exhibition would be bigger than the present one.

Lt.-Col. A. C. Chatterjee. Directer of Public Health, Bengal, observed that by organising such exhibition they would be able to throw a flood of light in different bustees.

Rai Bahadur Prof. H. C. De requested the organisers to approach various educational institutions to help and co-operate with their laudable object.

Dr. Borjendra Ganguli read the Annual Report of the Cleaner Calcutta Committee.

VIDYASAGAR COLLEGE STRIKE CALLED OFF

Women students of the Vidyasagar College, who went on strike on January 21 as a protest against the decision of the college authorities to change their midday classes into morning classes, decided to call off the strike and join their classes from Wednesday last.

Women students met at a meeting under the presidency of Dr. B. C. Ghose, Principal of the College, on Tuesday. Dr. Ghose gave an assurance to the students that he would move the Governing Body of the College so that at least in the coming session midday classes were held for the benefit of the first and third year students as at present.

The girls having been satisfied with what Dr. Ghose said, decided to call off the strike.

AN APPEAL TO STUDENTS

REMEMBER

JADABPUR T. B. HOSPITALS

The only one of its kind in Bengal, when you celebrate the Saraswati Puja. Help the Hospital to extend and save the lives of hundreds of your unfortunate brother and sister students. There is no worthier cause which needs your help and co-operation to-day.

Send your contributions to—

Dr. K. S. Ray, Medical Superintendent.
JADABPUR T. B. HOSPITAL
Office : 6A, Surendra Nath Banerjea Road, Calcutta.

MURAL PAINTINGS EXHIBITION

An Exhibition of Indian and Ceylonese Mural Paintings by Mr. Sarkis Katchadourain, an Iranian aritist of international repute, was opened by Dr. Shyamaprasad Mookherjee at the Darbhanga Buildings, Calcutta University, on Monday morning. The Exhibition has been organised by the Indian Society of Oriental Art and will remain open up to 5th February next.

In opening the Exhibition, Dr. Shyamaprasad Mookerjee said that India had attained the height of glory in the domain of art and architecture. Many of those beautiful things had been practically lost now. Mr. Sarkis Katchadourain had not only reproduced some of the Mural Paintings from the South but had practically reconstructed them. He hoped that the paintings at the Exhibition would stimulate the desire for the study of Indian art and architecture in the University and outside. He thanked Mr. Sarkis Katchadourain on behalf of the University and the Society of Oriental Art and hoped that before the talented artist left Calcutta, he would be able to give some short talks about his paintings.

Among those present were Dr. Abanindranath Tagore, Mr. and Mrs. Percy Brown, Mrs. P. K.

Roy, Mrs. Indira Devi Choudhurani, Prof. Sahid Suhrawardy, Prof. and Mrs. Benoy Kumar Sarcar, Dr. Kalidas Nag, Mr. J. Chakravorty, Principal Mukul De, Mr. A. F. M. Abdul Ali, Prof. Hem Chandra Ray Choudhury, Mrs. Srimati Tagore, Mr. Jamini Ganguly, Dr. Stella Kramrisch, Prof. F. Levi and Mrs. Levi and Mr. Srish Chatterjee.

TRIBUTES TO ALI BROTHERS

Tributes to the memory of Maulana Mohammad Ali and Shaukat Ali were paid at a largely attended meeting of Moslems held in Mohammad Ali Park, Calcutta, on Sunday last on the occasion of the Ali Brothers Day.

Mr. A. R. Siddiqi, Mayor of Calcutta, who presided, said that the lines of progress laid down by Maulana Mohammad Ali still held good and if they were to follow them, they would reach their goal soon. He said that he had the good fortune in working with the Ali brothers for more than two decades and in course of his long acquaintance with them he had realised the spirit with which they worked for the Muslims in India.

"It has become doubtful," the Mayor continued, "whether we are to-day following in the footsteps of those who have gone before us. We shout Pakistan, liberty and freedom, but have we really developed the will to achieve anything? The world is in great turmoil and our leaders should see to it that we come out of it better and happier".

Some other speakers also addressed the meeting.

SEVA SADAN DAY

As in previous years the Chittaranjan Seva Sadan Day will be held this year on Saturday, the 15th February. In aid of this Seva Sadan Day—workers will go round the city with coupons of Rs. 5, Re. 1, As. 8 and As. 4 only. It is hoped the general public will respond to the appeal of Seva Sadan for help.

The Seva Sadan needs expansion, which means money. But the money so much needed will be easy to collect if only the public will it. It should be remembered that the Seva Sadan is the fittest tribute to the memory of the late Deshabandhu C. R. Das.

Seva Sadan Coupons will be sold from the 1st to the 28th of February next.

CALCUTTA ART EXHIBITION

The second annual Art Exhibition of the Calcutta School of Crafts was opened by Mr. O. C. Ganguly at 47, Chowringhee Road, Calcutta, on Sunday last. Mr. Ganguly commended the various exhibits on display and wished the school every success.

The exhibition includes a number of photographs and water-colours. There is also a display of brass and wood crafts.

LATE DR. HARINATH GHOSE

Rai Bahadur Dr. Harinath Ghose, Professor of Medicine in children's diseases of the Carmichael Medical College breathed his last on Wednesday, the 29th January, at his Calcutta residence in Cornwallis Street. He had been suffering from blood pressure and on the night of his death had a sudden stroke of apoplexy to which he succumbed.

He was about 70 years old and left behind him his widow, three sons, three daughters and a number of grand-children.

He took his medical degree in 1898, from the Medical College with distinction, and obtained his M.D., in 1911, securing record marks and gold medals. He then joined the Bengal Medical Service and worked as Teacher of Medicine in the Campbell Medical School and later on served as a Civil Surgeon. On retirement from Government service he accepted the post of a visiting Physician in the Carmichael Medical College and Hospital. He was also the Professor of Medicine in Children's diseases in which he was a specialist.

The Rai Bahadur wrote a number of treaties on Medicine and Hygiene, etc., and also contributed articles on medicinal subjects in daily and periodical papers. He also evinced keen interest in Ayurveda and studied the science thoroughly. Rai Bahadur Ghose was one of the Directors of the Bengal Immunity Co. Ltd., and was the President of the Ward Health Association of Ward No. 1, and was also connected with various public institutions.

The Rai Bahadur was very popular and much loved and respected by all for his amiable character and unassuming nature.

AYURVEDIC PRACTITIONERS' CONFERENCE

With an earnest appeal to the votaries of Ayurveda to repair to the villages and there devote themselves to the service of their fellowmen Kaviraj Satish Chandra Sen, Visak-Bhusan, concluded the address he delivered as President of the All-Bengal Ayurved Chikitsak Sammelan held on last Saturday afternoon at the Asutosh Hall of the Calcutta University.

Dr. Syama Prosad Mookerjee urged the Ayurvedists to join hands in securing from the Government their legitimate rights and privileges.

In hoisting the "Dhanuntwari Flag" Sj. Sarat Chandra Bose said that the flag stood as the emblem of Ayurveda every part of which bore the sanction of the Sastras. Service of humanity was the motto of Ayurveda. So this flag was ochre-coloured which represented the spirit of sacrifice and a complete detachment from the material interests of life.

The science of Ayurveda, as it was taught in modern times, did not restrict itself rigidly to the contribution of India alone. It was enriching itself by the latest researches of the west as well. This synthetic process, said Mr. Bose, was quite in keeping with the spirit of India the culture of which was never proscriptive or exclusive but which always encouraged expansion through assimilation.

Mahomohopadhyaya Kaviraj Gananath Sen, Vice-President and Kavirajes Bimalanda Tarkatirtha and Jyotirmoy Sen sent messages conveying good wishes for the success of the conference.

SECONDARY EDUCATION BILL

By 36 to 21 votes, six members remaining neutral, the Senate of Calcutta University, adopted on Saturday last the report of the Committee appointed by the Syndicate to consider the provisions of the Bengal Secondary Education Bill, urging the immediate withdrawal of the measure and creation of "a favourable atmosphere for a calm and dispassionate consideration of the problems of educational advancement of the province." The Vice-Chancellor, Sir Asizul Haque, presided.

In the opinion of the Committee, the Bill as framed was not calculated to advance the cause of secondary education in Bengal, and that the Board, as envisaged in the measure, would "fail to command the confidence of large classes and sections of the people and would neither be representative in character nor independent in the discharge of its duties."

The supporters of the motion for adoption of the report, while admitting the imperative necessity of reorganizing secondary education in the province, criticized the measure as lacking in essentials that would foster close co-operation between the University, the public and the Government so as to produce a real educational advancement of the province.

Letters TO THE EDITOR

[The Editor does not hold himself responsible for the views expressed by the correspondents]

PROPOSED PARK AT ENTALLY

To The Editor, "Calcutta Municipal Gazette."

Sir,—We, the rate-payers and residents of Entally (Ward No. 19) beg to draw the attention of the Councillors of Calcutta Corporation, to the following facts for favourable consideration :—

The Calcutta Corporation has acquired a plot of land at 45, Ananda Palit Road with an area of 2 bighas 5 kattahs and 13 chittaks, for a public park in Ward No. 19. Naturally, steps are in this connection being taken to perpetuate the memory of some departed distinguished person of Entally. The late Dr. Sagar Lal Palit, who was a distinguished son of Entally and a Commissioner to the Calcutta Corporation for a long time,—who was connected with many local associations and organisations,—who was the real founder of present Entally,—who voluntarily resigned from the Corporation on reasons of health, and gladly offered his position to the late Dr. Suresh Chandra Sarkar in the year 1910, has not yet been honoured by the Calcutta Corporation by the naming of any park or road after him.

The late Mr. Palit's family has been living in the locality for the last hundred years, seven generations having already been passed here. His memory is still fresh in the minds of the people of the locality due to his selfless, valuable services for this Ward, and it is the imperative duty of the local people to take adequate steps to keep alive the memory of the said illustrious deceased, in a fit manner.

We would therefore propose that the proposed Park be named as "Sagar Palit Park" after the name of said late Dr. Sagar Lal Palit and we believe this proposal will be appreciated by the local people and no difficulties whatsoever will arise in this connection.—Yours, etc.,

JOGESH CHANDRA SARKAR,
Secretary, Entally Welfare League,
and others.

18/1, Gope Lane, Entally,
Calcutta, 27th January, 1941.

Calcutta Associations & Institutions

WATER WORKS INSPECTORS' CLUB

A social function of the Inspectors' Club, Water Works Department, Corporation of Calcutta, was held on Saturday, the 25th January, at 4 p.m. at 194, Manicktala Main Road (the Garden House of Sj. Mahendra Nath Sreemany).

Amongst the distinguished guests present were Councillors, Mr. I. B. Beed, Mr. N. N. Dalal, Mr. S. C. Ray Chaudhuri, Mr. J. C. Ghose, Mr. Haridas Saha, Mr. A. C. Das, Mr. D. Mukherjee, Mr. K. C. Chakravarty, Mr. Adamji Oosman, Mr. B. Banerji, Mr. Harihar Das Chowdhury, Mr. Dhirendra Nath Ghose, Dr. Subodh Chandra Sarkar, Mr. C. Griffiths, Mr. M. M. Haque (*ex*-Councillor), Mr. J. C. Mukerjea, (Chief Executive Officer), Mr. S. C. Chakravarti, (Executive Engineer, Water Works), Mr. P. C. Gupta, (Deputy Executive Engineer, Water Works), Mr. P. D. Ghose (Sub-Engineer), Mr. S. N. Das, (D. H. O.) and others.

Guests were entertained with light refreshment. There were also arrangements for vocal and instrumental music.

SAFE DEPOSIT VAULT

Air conditioned according to most modern methods

The Bank puts at the disposal of the Public in the Central Bank Building at 100, Clive Street, Safe Lockers of different sizes intended for the deposit of valuables, documents, Jewellery, etc. Each hirer receives a special Key of which there is no duplicate. The hirer only can open the locker rented by him.

Our safe deposit installation offers the best protection against both fire and burglary.

Rentals are very moderate and vary according to sizes of lockers and periods of hire.

For further particulars please apply at The Central Bank of India, Ltd., 100, Clive Street, Calcutta.

No unnecessary waiting — Prompt service rendered

Sale of Corporation Surplus Land

In supersession of all the previous notices in this behalf, fresh notice is hereby given for information of the public that the following plots of Corporation surplus land will be sold to the highest bidder above the reserve price at a public auction to be held by the Chief Executive Officer, at the Central Municipal Office, on Friday, the 14th February, 1941, at 5 p.m., on the conditions specifically mentioned in the form of agreement to be executed by the successful bidder at his cost within seven days from the date of auction. The successful bidder shall have to furnish, in cash, an earnest deposit of 25 per cent. on the amount of the purchase money immediately upon the lot being knocked down, and in default thereof, the premises is to be immediately put up and resold at the risk of the first purchaser. Public are invited to attend the auction and offer their bids.

The plans of the lands, the form of agreement, conditions of sale and other necessary particulars may be seen and obtained on personal enquiry in the office of the undersigned on all working days during office hours.

Description of lands :—

(1) Land at the junction of Upper Chitpore Road and Joy Mitter Street, Ward No. 3, measuring about 4 kottahs, approximately.

N.B.—A strip of land on the eastern side of this plot has been set apart for the present. The successful bidder for this plot must agree to purchase the said strip at the same rate if and when it is available for sale.

(2) Lots Nos. 1, 2, 3 and 4 on Harshi Street, Ward No. 9, measuring about 1 k. 2 ch. 12 sq. ft., 1 k. 11 ch. 15 sq. ft., 1 k. 13 ch. 15 sq. ft. and 1 k. 14 ch. 30 sq. ft. respectively.

(3) Lots Nos. 10, 11, 12 and 13 on Sankar Bose Road, Ward No. 24, measuring about 6 k. 6 ch., 5 k. 4 ch., 5 k. 4 ch., and 7 k. respectively.

(4) Lot No 7 on the new 35 ft. road connecting Monsatala Lane and Pipe Road Ward No. 25, measuring 5 k. 13 ch. approximately.

(5) Lots Nos. 7, 11 and 12 on Hussain Sha Road, Ward No. 25, measuring about 7 k. 3 ch., 5 k. 12 ch. and 5 k. 12 ch. respectively.

(6) Plots Nos. A, B, C and D on Beerpara Lane, Ward No. 31, measuring about 5 k. 14 ch., 5 k. 3 ch., 4 k. 14 ch. and 4 k. 9 ch. respectively.

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office,
The 25th January, 1941.

Notice to Rate-payers.

The attention of the rate-payers is invited to Section 190 of the Calcutta Municipal Act which provides for additional costs to be imposed if the bills are not paid within seven days from the date of presentation. Their attention is also invited to Section 191 of the Act which provides for moveable articles to be held under distraint and sold if the bills are not paid within seven days after the service of notices of demand. They are therefore requested to pay up their dues early as under the provisions of Section 149 of the said Act the rate bills for a quarter fall due and become payable within "the 15th of the first month of the quarter, to which they relate."

Defaulting ratepayers should note that if the arrears of rates are not paid when the bills are presented for payment, "action will be taken for their recovery under the provisions of the law."

Applications for reconsideration of assessment including those now pending will not be considered unless full payment of all the arrears is made by the applicants. If not paid up, steps for the recovery of such arrears will be taken under the provisions of law as in any other case.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office.
The 14th January, 1941.

License for Corporation Properties Etc.

Offers, in sealed covers, superscribed as "Rent for Corporation Properties" are invited from the public, to be submitted to the Chief Valuer and Surveyor, on or before Thursday, the 6th February, 1941, in respect of the following :—

(a) Annual license fee for taking license of the ferry service between Paramanick Ghat at Cossipore and Lala Babu Shire Ghat at Belur, for a period of 3 years.

(b) Consolidated salami and license fee for taking the license for the tank and fruit trees in the Kasiabagan Burial Ground, for a period of 4 years.

The successful offerers will have to deposit one year's fee as security in respect of (a) and the whole consolidated offer in respect of (b), on the acceptance of their offers. Other conditions of the licenses may be seen at the office of the undersigned, on any working day, during office hours.

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office.
The 24th January, 1941.

Water-Works, Drainage and Plumbing Engineers
Mission Row, Calcutta

Sound Plumbing means health and longevity

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Red numbers on a Blue Black badge. "B" class coolies of Hogg Market have Rectangular brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

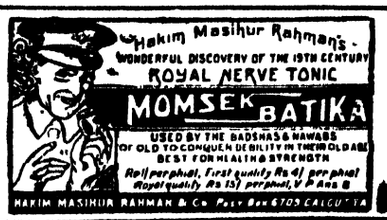
6. If goods are taken "on approval," customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.



11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

Chronicle & Comment

Improvement Scheme for Beliaghata

Those interested in the early improvement of the added areas of Calcutta will at last learn now with feelings of distinct pleasure and relief that the Local Government have in a recent notification accorded their sanction to Improvement Scheme No. IV—Manicktala (Beliaghata Main Road to Narkeldanga Main Road) and to the estimate amounting to Rs. 40,31,000 which represents the nett cost of the Scheme as well as to Improvement Scheme No. IV—Maniktala (Supplementary)—Excavation Area, and the estimate amounting to Rs. 22,66,600 which represents the nett cost of the Scheme. The planning and execution of big schemes like these must in the very nature of things look like proceeding at a slow pace, but let us not grudge or grumble when the process though slow is steady.

Mahajati Sadan

Elsewhere in this issue is published an appeal for funds made by Mr. N. C. Mitra, Secretary to the Subhas Congress Fund, for pushing on vigorously the work of construction of the Mahajati Sadan, which as aptly named by the great Poet Tagore, is intended pre-eminently to be a home of many-sided cultures for our great nation. As pointed out in the appeal, the task of completing the building has, with the unexpected disappearance of Sj. Subhas Chandra Bose, devolved entirely on his friends, followers and countrymen. The great edifice, already a long way under construction, promises to be unique in many respects, and our countrymen owe it to themselves to see to it that the work of construction is expedited with the necessary funds forthcoming even during Sj. Bose's absence. It is a grand conception for Bengal's capital city to have a building of this kind, and even admirers of Sj. Subhas Bose who may not see eye to eye with him politically, may be able with a broad outlook and a long-range vision to persuade themselves to help the cause which has nothing aggressive about it. For his friends and co-workers who can ill afford to let his project down on any plea whatsoever, there is but one clear-cut line of duty in this matter, and that is [illegible]

themselves unsparingly to translate the grandeur of his dream into a reality,—the reality of brick-mortar-and-stone projecting itself into the accommodating vastness above to the lasting glory of a nation that wanted an institution and had it,—the reality of getting together earnest worshippers of the great common ideal under the same roof. And wherever he may be, now or in future, Sj. Bose shall then have the genuine pleasure of seeing the great work accomplished—a People's Hall raised through the concerted efforts of an entire people! Yes, it is essentially a people's cause, and we commend the appeal to our people.

Calcutta Municipal Amendment Bill

So we are not allowed to continue long with the optimism which we came fondly to cherish about the incidental dropping of the Calcutta Municipal Amendment Bill. On the opening day of the Budget Session of the Bengal Legislative Assembly the Hon'ble Minister-in-charge of Local Self-Government presented an *'ad interim'* report of the Select Committee on the Bill and asked for extension of time for submission of the report of the Select Committee till February, 28, which was granted. As the Select Committee are to have still another fortnight to give to the consideration and shaping of the Bill, let us hope even against hope that they will in their cooler moments try to make a correct assessment of the misunderstanding, heat and fury raised by this controversial Bill, and, in view of the huge responsibility resting on their shoulders from the national point of view, make whatever use they can of their capacity for accommodation and adjustment.

"Cleaner Calcutta" Campaign

The "Cleaner Calcutta" campaign recently organised by the Publicity Department of the Corporation appears to have drawn the amount of public attention it was intended to. The "Moving Exhibition" made a good show and helped well to disseminate a lot of useful information about the benefits of cleanliness. As one of our contemporaries has pointed out, there is more apathy than ignorance in this matter and spasmodic cleanliness campaigns may not go a long way. True; but the chronic state of uncleanliness of our streets and bustees and neglected stretches of lanes and open lands point only to one thing—the great need of educative propaganda in this direction to be supplemented undoubtedly by strict official supervision with rigid enforcement of bye-laws in glaring cases of lapse. The civic sense must be roused to secure the willing co-operation of the citizens on your side; or you cannot go on prosecuting an endless army of defaulters. As our contemporary points out very rightly, "Streets and parks will not be clean so long as there are people who think that they belong to nobody, or that, being meant for everybody's use, they need no attention except what a municipality can give. Men who keep their houses clean are often found untroubled by dirt and filth in their neighbourhood. The houses are theirs; the street is somebody else's." Publicity of the right type will correct our people of this fallacious, or more correctly, distinctly careless way of thinking. Yes, there is another way: ceaseless official supervision and infliction of penalties where due. But the one may not go before the other, and much of the solution of the problem would rest on the wilful and intelligent co-operation of our youthful citizens to whose imagination and never-failing sense of duty we make an appeal.

Deshabandhu Memorial

The Improvement Trust land adjacent to the Deshabandhu Memorial at Shahanagore Burning Ghat, measuring about 22 kottahs, 9 chittaks and 15 s.ft., is now on a fair way to being acquired and added to the Memorial grounds at no distant date. Thousands of his devoted countrymen assembled on the Memorial grounds on the last Deshabandhu Anniversary Day to pay their respects to the sacred memory of the man who had completely given away his self in the service of the nation, were assured by Mr. Phanindra Nath Brahma, Deputy Mayor, that the Corporation would spare no effort to have the land acquired and a garden laid out thereon as early as possible as part of the terms and conditions under which the Corporation agreed to take over the Memorial Building from the Deshabandhu Memorial Committee. All concerned must now be glad to learn that the Corporation at its last meeting accorded executive sanction to the proposal for acquisition of the land, which it is understood, will for the present, be levelled, sown with grass and enclosed by a railing. The decision of the Deshabandhu Memorial Advisory Committee to have a marble bust of Deshabandhu set up in the shrine now remains to be implemented, and we hope Mr. Santosh Kumar Basu, the capable Secretary of the Committee will, with the promised support of the Mayor, Mr. A. R. Siddiqi, be able to find the resources to put up the bust in its place before the next anniversary meeting.

Foreign Municipal Councils Dissolved

Sixty-two more municipal councils have been dissolved and 24 local Magistrates have been dismissed for "hostility" to the Government or for "inaptitude", states a *Reuter* message from Vichy. This mass condemnation of important local bodies in a country which gave birth to democracy, though shocking to many who love to see the people's cause prevail, is however, quite understandable at a time when strong, unrelenting adverse foreign influence dominates the administration of that unfortunate land, and as one even with a little imagination can visualise from this distance, the popular voice is stifled by the mighty hand of repression. The charge of "hostility" to the existing order, or of inaptitude" perhaps in cases where "hostility" could not be proved but the needed spirit of subservience to the authorities was wanting, was levelled against the councils dissolved. We in India who hear so often about the dissolution of district or local boards and municipalities on charges of "inefficiency" or "maladministration", and are quite familiar with these convenient phrases, may not take long in following how the lack of adaptability comes often to constitute offences unpardonable.

DECLARE YOUR GOLD TEETH

All persons, including foreigners, who leave Japan must now declare the number of gold teeth, caps, fillings, etc., in their mouths and pay duty for taking precious metal out of the country,—says a recent cable.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETING FOR THE WEEK ENDING FEBRUARY 7, 1941

ADJOURNED THIRTIETH ORDINARY MEETING OF THE CORPORATION HELD ON TUESDAY, THE 4TH FEBRUARY, 1941

Grants To Primary Schools

Mr. Hamoodur Rahman moved for the confirmation of the following recommendation of the Primary Education Standing Committee :—

> That the delegation of powers to the Primary Education Standing Committee and the Estates and General Purposes Standing Committee in respect of recommending grants to primary schools and primary departments of secondary schools, be revised and that necessary powers be delegated to the Primary Education Standing Committee to make recommendations in respect of all proposals for grants to primary schools, post-primary schools and primary departments of secondary schools.

Mr. S. C. Ray Chaudhuri raised a point of order suggesting that the powers delegated to any Committee could be withdrawn but not revised in the way suggested.

The Mayor said that under Section 71 (4) the Corporation could at any time withdraw from any Standing Committee any of the powers delegated to them and after having done so they must necessarily invest some other Standing Committee with those powers, this latter following as a necessary corollary to the former. He therefore held the motion before the House to be quite in order.

Mr. Naresh Nath Mookerjee then said that as these important questions of grants to the institutions of the kind came up only once in a year he did not see any reason why both the Estates and General Purposes and Primary Education Standing Committees should not be allowed to confer and act jointly in these matters, and so he moved as an amendment that the consideration of the matter be postponed for a week for the presence of the Chairman of the Estates and General Purposes Committee.

Mr. Indra Bhusan Beed seconded the amendment, which being put to the vote, 27 members voted for and 26 against it.

The Mayor gave his vote as well as his casting vote against the amendment which was therefore *lost*.

A poll was demanded and taken with the result that 29 voted for and 28 against the amendment, one member remaining neutral.

The Mayor gave his vote as well as the casting vote against the amendment, which was therefore *lost*.

The original motion was then put to the vote, but that was also declared *lost*.

Remodelling Chetla Lock Pumping Station and Sewer

On a motion by Mr Israil supplemented by another motion moved by Mr. W. A. Burns which was treated as a rider, the following resolution recommended by the Works Committee, was passed :—

I. That the Engineer's revised estimate amounting to Rs. 1,16,000 including 5 per cent. for supervision for remodelling the Chetla Lock Pumping Station and Sewer in Chetla Road, be executively sanctioned, it being understood that the entire actual cost plus 5 per cent. on account of supervision, is borne by the Hindusthan Co-operative Insurance Society Ltd.

II That the following mode of payment of the amount to be deposited by Messrs. Hindusthan Co-operative Insurance Society Ltd., and the undertaking to be furnished by them regarding extra costs, be approved :-

> (*a*) That the Hindusthan Co-operative Insurance Society Ltd., be asked to give a written undertaking to the satisfaction of the Chief Law Officer that they assume full liability for the cost of the entire project including any extra expenditure that may with the approval of the Corporation have to be incurred on account of any modifications of, or extra works not provided for in the original estimate and found to be necessary in the course of execution of the project, it being understood that the Society will make the deposit necessary to cover all such extra costs as soon as supplementary estimates are sanctioned by the Corporation and demand is made on the Society in pursuance thereof.
>
> (*b*) That as a special case the Hindusthan Co-operative Insurance Society, Ltd., be allowed to deposit the estimated cost in the manner following, that is to say, the Society shall deposit Rs. 25,000 in cash and the balance of the estimated cost in Calcutta Municipal Debentures duly endorsed in favour of the Corporation subject to the condition that the interest accruing on those Debentures less any charges levied by the Bank will be paid to the Society when the same falls due but that Rs. 25,000 shall always remain in cash in the hands of the Corporation up to the settlement of the final bill and that the Society shall make payment within ten days from the date of receipt of a notice from the Corporation, of such sum as may be required from time to time for the payment of the contractor's progressive bills: failing such payment by the Society, the Chief Accountant of the Corporation shall be empowered to sell, without reference to the Society, as much of the Debentures deposited by the Society as will be required to recoup the amount paid to the contractors out of the cash deposit of Rs. 25,000.

(c) That on receipt of further cash payments from the Society to meet contractor's progressive bills as specified in para (2) above the Corporation shall return to the Society Debentures of approximately like denomination duly endorsed in their favour.

Cost Of Police Posting Against Unauthorised Works

With regard to a motion by Mr. W. A. Burns for cancellation on the recommendation of the Finance Standing Committee of a bill amounting to Rs. 6,988 for the cost of Police Sergeants posted to stop unauthorised works at 1/1, Duttapara Lane, Mr. Md. Rafique moved that the matter be referred back to the Committee to obtain detailed report from the City Architect as to the circumstances under which the heavy cost had been incurred. While it was the duty of the department to bring the whole question to the notice of the relevant Committee, for 129 long days, said Mr. Rafique, matters were allowed to drag on with the heavy cost, as a result, to the Corporation of Rs. 6,988, and naturally Councillors might now feel called upon to fasten the responsibility on the right person.

Mr. Susil C. Sen said that the least that they could do in the matter was to register their strong disapproval of that "wanton wastage of money." Police was posted at the spot practically for one full year. What was the department doing all the while, he wondered. The officers responsible must be made to realise, he said, that every penny lost to the Corporation would be visited on them, and the Corporation should be allowed to know those in default.

Mr. D. J. Cohen said that there was undoubtedly a scandalous waste of money and they should be able to make sure that such things would not occur again. He moved an amendment to the effect that the matter be referred back, with the rider that a Special Committee consisting of six members be in the meantime appointed to go thoroughly into the circumstances under which police guard was posted at the premises for such a long time and to fix the responsibility for the same.

Mr. Rafique accepted Mr. Cohen's rider which along with the amendment was carried.

Mr. Cohen then moved that the Special Committee do consist of the following members :— Messrs. W. A. Burns, N. C. Chatterjee, Susil C. Sen, Md. Rafique, K. C. Chakravarti and D. J. Cohen.

This was also carried.

Sanction of Grants Equivalent to Rates

On a recommendation of the Finance Standing Committee the following resolution was carried :—

That in cases where grants equivalent to rates are sanctioned by the Corporation, the institutions concerned should be required to pay ½ per cent. Howrah Bridge Tax out of their own resources, this being made a condition of the grant. This condition should be entered in the form of application for grant equivalent to rates, it being stipulated that no application should be considered unless it is accompanied by a receipt from the Corporation Treasury for the amount representing the Howrah Bridge Tax for the year as certified by the Assessor.

Acquisition Of Lands For Deshabandhu Memorial

On a recommendation from the Estates and General Purposes Committee the following resolution was passed :—

That the estimate amounting to Rs. 21,240 for the acquisition of the C. I. T. land adjacent to the Deshabandhu Memorial at Shahnagore Burning Ghat, measuring about 22 kottahs, 9 chittacks and 15 s.ft., be executively sanctioned: it being understood that the Trust would transfer the land coloured pink on the plan laid on the table, at the rate of Rs. 940-8-0 per kottah (being the cost of acquisition to the Trust) and for the present it will only be levelled, sown with grass and enclosed by a railing and that the Corporation would allow the Trust to use the land, if necessary, for storing materials when the Chetla Bridge would be under construction; after which the Trust will restore the land to the Corporation in the same condition in which it was handed over to them; and further that the land to the north not shown coloured in the plan will be reserved for transfer to the Corporation at the same rate per kottah as and when the Corporation would be in a position to purchase the same.

Tax on Petrol

Mr. I. J. Cohen moved and Mr. B. K. Banerjea seconded the following resolution which emanated as a recommendation from the Estates and General Purposes Standing Committee :—

(i) That it be recommended that the Provincial Government be approached to accord sanction to the proposal of the Corporation.

MAHAJATI SADAN

Appeal For Funds For Completing Building

Mr. N. C. Mitra, Secretary, Subhas Congress Fund has issued the following appeal :—

With the sudden and most unexpected disappearance of Sj. Subhas Chandra Bose from the field of his activities for the present the task of completing the building of Mahajati Sadan devolves entirely on the shoulders of his countrymen in whose sympathy and support he had unflinching faith and which never failed him even in his severest ordeals. Will the same fail him now?

The construction of the building has been going on steadily but sufficient funds are required immediately to push on the work vigorously to bring his dream to fruition as soon as possible, so that wherever he may be, he shall have the satisfaction to see one of his missions fulfilled and be assured that he is still in the hearts and minds of his countrymen.

I appeal to the generous public to contribute liberally towards the Fund for the construction of Mahajati Sadan. I also appeal to those of his friends and admirers, who had promised him substantial contributions, to pay the same without the least possible delay.

All contributions should be sent to me at No. 5, Hastings Street, Calcutta or to Sj. Sarat Chandra Bose, No. 1, Woodburn Park, Calcutta. All contributions will be gratefully acknowledged by me.

(a) To prohibit under Section 181 (1) of the Calcutta Municipal Act, 1923, the introduction into Calcutta for the purpose of storage therein, of petroleum intended for consumption elsewhere, and (b) to impose a tax under Section 181 (3) of the Act at the rate of four annas for every ten gallons, on all petroleum introduced into Calcutta for consumption therein.

(ii) That consideration of the draft notification in this connection be postponed pending receipt of Government sanction to the proposal.

Mr. M. M. Burman in opposing the resolution said that when the price of petrol had already gone up, the Government of Bengal had moved in the matter and the Government of India had also a scheme which might be enforced any day, it would not be advisable to levy any new taxes.

A PRETTY WEDDING

"Udayan", the residence of Mr. K. Dutt, Managing Director of Nasco Ltd., wore a gala appearance on last Monday evening when Mr. Dutt's second daughter Kumari Chhaya was married to Mr. Nirmal Churn Law, M.Sc., (Gold Medallist), second son of Dr. Satya Churn Law, Councillor, Calcutta Corporation and ex-Sheriff of Calcutta. The bridegroom is a distinguished scholar of the Calcutta University and is still carrying on important researches. The elite of Calcutta was well-represented in the ceremony.

On the occasion of the bride's reception on Wednesday, the 5th February, Dr. Law held a grand dinner party in his palatial house on Kailas Bose Street which was, true to the traditional grandeur and style of the famous Laws of the city, nicely decorated and profusely illuminated. A lavish music and dance programme organised by the Popular Entertainers aided by the Light-House Orchestra, spoke well of the taste and choice of those in charge of the entertainments. There was a very large and distinguished gathering which included amongst others—Mr. Justice R. C. Mitter, Mr. Justice B. K. Mookerjee, Mr. Justice C. C. Biswas, Sir B. P. Singh Roy, Hon'ble Mr. P. D. Raikut, Hon'ble Maharaja Srish Ch. Nandy, Mr. B. N. Mookherjee, Rai Bahadur P. N. Mookerjee, Rai Bahadur Nalini Nath Majumdar, Rai Bahadur Bijoy Mukherjee, Sir U. N. Brahmachari, Sir H. S. Paul, Dr. Syama Prasad Mookherjee, Mr. Jadu Nath Roy, Sir A. K. Roy, Mr. B. C. Chatterjee, Mr. N. K. Basu, Mr. J. N. Basu, Mr. S. C. Sen, Dr. S. K. Gupta, Dr. S. C. Basak, Mr. S. N. Ray, I.C.S., Prof. and Mrs. Benoy K. Sarkar, Mr. B. M. Sen, Dr. and Mrs. S. L. Hora, Dr. J. P. Neogy, Dr. and Mrs. Baini Prasad, Rai Bahadur A. T. Ghose, Mr. A. F. M. Abdul Ali, Dr. D. R. Bhandarkar, Mr. N. Ghatak, Mr. Adam Oosman, Mr. Satish C. Bose, Mr. K. C. Chakraburti, Mr. Bejoy Banerjee, Mr. Anukul C. Das, Khan Bahadur Haji Abdul Sattar, Dr. B. S. Guha, Dr. K. P. Biswas, Dr. H. K. Mookerjee, Dr. S. R. Bose, Dr. A. C. Ukil, Dr. R. K. Mookerjee, Mr. Tarak Nath Mookerjee, Mr. Kanai Goswami, Mr. Sanat Kumar Roy Chowdhury, Mr. K. L. Dutt, Dr. K. C. Baral, Mr. Prasvangsu Sett, Dr. S. Hossain, Mr. D. J. Cohen, Mr. I. J. Cohen, Mr. Goculdas Mohta, Mr. N. C. Paul, Mr. Haridas Saha, Mr. Amulya Mitter, Mr. Hriday Krishna Ghose, Mr. D. N. Bhattacharji, Mr. Sachindra Nath Banerjee, and Mr. Khagen Dutt.

We wish the happy couple long lives of prosperity and peace.

Mr. W. A. Burns also opposed.

The Mayor pointed out that in preparing the budget the likely income on this head had been counted upon; and the proposal, if accepted both by the Corporation and the Government, would fetch rupees two lakhs and a quarter to the coffers of the Corporation.

Put to the vote the motion was lost by 26 to 24 votes.

Kutcha Channel for Calcutta's Sewage

Mr. Naresh Nath Mookerjee moved for confirmation of a recommendation from the Works Standing Committee to the effect that the emergency kutcha channel suggested by the Chief Engineer and approved by the Government Engineer, should be excavated on an urgent basis, and that pending release of funds, the estimates amounting to Rs. 1,82,000 be sanctioned, the draft specifications be approved and tenders be called for on short notice.

Mr. Susil C. Sen said that as a kutcha channel could never serve the purpose for which it would be intended, the excavation would mean merely the throwing away of about another two lakhs of rupees all for nothing. He, therefore, moved as an amendment that the matter be referred back.

Mr. D. J. Cohen also moved as an amendment that steps be urgently taken to obtain Government sanction to the project as quickly as possible, and that the work on the project be taken in hand only after Government sanction has been received.

Mr. M. A. H. Ispahani said that that being a very important matter involving a heavy expenditure they should not come to a decision at once. He liked the idea of a Sub-Committee going into the matter immediately.

The matter was discussed at considerable length and several members participated in the debate.

Eventually on the motion of Mr. Hamoodur Rahman it was resolved that consideration of the item be postponed to the next meeting

In announcing the decision about postponement, the Mayor said :—

"I do not wish to intervene in this very technical matter, but when we discuss this next time I would earnestly request you to consider one very important point raised by Mr. Burns, and that is the question of eliciting the opinion of a Consulting Engineer. I had occasion to visit the Kulti Outfall, and the thing that astonished me was that the sewage of Calcutta was going in an open channel miles long. When I was standing near the parapet, a mouse came up and immediately three crows and two kites simply swooped down, and one of the kites fled away with a colony of germs that Calcutta can give to the world. The dredger having got stuck up and the Bidyadhari having ceased to function as the outlet for the city's sewage, this item has become terribly important. But the question of taking the opinion of a Consulting Engineer is a moot one. Supposing a scheme of mine is being discussed, I might advocate it as an ideal scheme. Another man might perhaps discern some defects in it. What struck me was whether we could not have a covered channel from Calcutta right up to Diamond Harbour instead of an open channel

carrying the black sewage of Calcutta. Next time when we discuss it, kindly consider the point raised by Mr. Burns.

Post of Assistant Lighting Superintendent

On the motion of Mr. M. A. H. Ispahani seconded by Mr. Hamoodur Rahman it was resolved on the basis of a recommendation from the Services Standing Committee No. 1, that the post of the Assistant Lighting Superintendent, grade Rs. 400—20—500, plus motor bicycle allowance of Rs. 50 per month, be abolished.

Dr. Chowdhury as Acting Health Officer

Mr. M. A. H. Ispahani moving for confirmation of a recommendation from the Services Standing Committee No. I regarding the acting arrangement to be made in place of Dr. S. N. Ghose, Health Officer, on leave, Mr. Hamoodur Rahman moved as an amendment that consideration of the matter be postponed till the next meeting.

At that stage it being close upon time, Mr. Satish Chandra Bose moved that the meeting do continue till 7-30 p.m. Put to the vote, the motion was carried.

Mr. Hamoodur Rahman's amendment for postponement of the consideration of the item was then put to the vote and lost.

Mr. Satish Chandra Bose then moved some amendments to some clauses of the Services Committee's recommendation on the admissibility whereof Mr. Anukul Chandra Das raised some points of order.

The Mayor ruled that the amendments were in order.

Mr. Anukul Chandra Das then opposed the appointment of Dr. J. P. Chowdhury in the leave vacancy as recommended by the Services Committee No. I. He spoke at some length and was still on his legs, when on a motion of Mr. S. C. Ray Chaudhuri the house by a majority decided to continue the deliberations until the item was finished.

At this stage a certain section of the House left the meeting.

Mr. N. C. Chatterjee spoke in support of the appointment of Dr. J. P. Chowdhury.

Then the Services Committee's resolution with the following amendments by Mr. Satish Chandra Bose was carried by a majority:—

That Dr. J. P. Chowdhury, M.B., (Cal.), D.P.H., (Lond.), D.T.M. (Liv.), D.P.H. (Edin. and Glas.) F.R.I.P.H. (Lond.), M.R.S.I., (Lond.), F.R.S.T., M and H. (Lond.), the seniormost District Health Officer in the grade of Rs. 500—700 and drawing Rs. 600 plus Rs. 100 motor car allowance per month, be appointed to act as Health Officer during the latter's absence on leave from 2nd January, to 12th February, 1941, on an acting allowance of Rs. 240 per month in addition to his substantive pay of Rs. 600 plus motor car allowance of Rs. 100 per month.

That during this period the seniormost Sanitary Officer in District No. I do act as District Health Officer I in addition to his own duties on such allowance as may be admissible under the rules.

The meeting was then closed.

LARGE-SCALE VACCINATION IN BOMBAY

About 1,200 persons are being vaccinated by the Bombay Municipality every day. This large-scale vaccination is being undertaken in the city to combat the spread of small-pox which, it is understood, has been declared to be prevalent in an epidemic form.

CASE AGAINST ALDERMAN SJ. SUBHAS BOSE

'Proclamation' And Attachment Of Property Ordered

Khan Bahadur Wali-ul-Islam, Additional Chief Presidency Magistrate, Calcutta, re-issued on Tuesday, February 4, the warrant returned unexecuted against Mr. Subhas Chandra Bose, ordered the issue of proclamation and for the attachment of his property and directed the Special Branch of the Calcutta Police to furnish particulars returnable on March 10 next.

In this case Mr. Bose has been charged under the Defence of India Rules for having delivered a speech at Mohammed Ali Park on April 11, 1940, and in connexion with the publication of an article in *Forward Bloc* entitled 'Day of Reckoning" on May 18 last year

On the previous day of hearing *viz.*, January 27, the Magistrate issued a warrant against Mr. Bose on his failure to appear before the Magistrate to stand his trial.

As the case was called on Monday Mr. Bose was found absent. The police prayed for an extension of time. The Magistrate issued orders as stated above

ANOTHER WARRANT ISSUED

When the case against Sj. Subhas Chandra Bose who is charged under the Defence of India Rules in connexion with two speeches delivered by him on February 22, and 24, 1940, at Deshpriya Park, Ballygunge and Rashbagan Maidan, Ballighata, came up for hearing before Mr. E. G. Creek, I.C.S., Additional District Magistrate, Alipore, on Tuesday last, the Magistrate in the absence of Sj. Bose issued warrant against him for his production before the Magistrate.

Mr. Barada Prasanna Pain, Advocate, who appeared on behalf of Sj. Bose said that he was instructed by the relations of Sj. Bose to mention before the Magistrate that he was missing from his home and his whereabouts were unknown.

The Magistrate issued non-bailable warrant against Sj. Bose, returnable by February 18.

SJ. BOSE'S HOUSE SEARCHED AGAIN

Officers of the Special Branch of the Calcutta Police visited the residence of Sj. Subhas Chandra Bose recently and examined his elder brother, Dr. Sunil Chandra Bose and several other members of the family, regarding the disappearance of Sj. Subhas Chandra Bose from his residence.

The Police continued their enquiry for over an hour and left.

GRAVE CONCERN OF MADRAS CORPORATION

A resolution viewing "with grave concern and deep anxiety the sudden and mysterious disappearance of Sj. Subhas Chandra Bose, ex-Mayor, Alderman and ex-Councillor of the Calcutta Corporation" was passed by the Madras Corporation at its meeting on February 4.

General Articles

Mosquito Control—II

Measures Recommended By The British Ministry Of Health

(Concluded from the issue of 1st February, 1941)

THE permanent abolition of breeding grounds is the ideal to be aimed at in all anti-mosquito measures. Because this may not always be possible financially, and because such permanent works may take weeks or months to complete, it is often necessary to resort to more rapid but temporary measures of control.

Larvicides should never be used on any collection of water unless mosquito larvae are present in it. The optimum time for the application of larvicides is influenced largely by season, rainfall, flooding, temperature, &c. In the summary at the end of this section some indications have been given as to what are usually the most suitable times with the different species. The effect of larvicides should always be observed 24-48 hours after their application.

Such methods involve the use of agents which kill the larvae and pupae rapidly (usually within a few hours). These larvicides may be classified as follows:—(1) Those whose chief action is to suffocate the larvae or pupae (oil); (2) those which act by poisoning them (chemical larvicides); and (3) those which act by a combination of these methods (pyrethrum-kerosene mixture).

Oiling.—A film of oil upon the surface of the water not only tends to prevent the larvae from reaching the surface for air, but also blocks their breathing tubes, so killing them.

Kerosene oil may be used to kill larvae, but, as it evaporates away very quickly and is expensive to use on a large scale, it is usually mixed with some heavier oil. A good preparation consists of a mixture of 1 part of crude heavy oil to 4 parts of kerosene. If to this mixture be added about 0·1 to 0·2 per cent. castor oil, its spreading power is increased enormously. Some workers say the toxic properties of the oil are increased by the addition of about 1 per cent. cresol to this mixture. The amount needed is about ½ oz. per square yard, or 15 gallons to an acre. Waste crankcase oil from motors can also be used instead of crude oil. It should be mixed with 10—20 per cent. kerosene and 1—2 per cent. castor oil added. The waste oil should be well strained before use, otherwise, if used in a sprayer, the impurities are liable to block the nozzle of the spray. A long stick with a bundle of rags or sacking on the end may be used to spread oil on small pools. Where large areas have to be dealt with, the oil is best distributed by means of knapsack sprayer (such as is used by gardeners) with a fine spraying nozzle.

Oil does not spread well where there is much vegetation, and the surface layer may be disturbed by wind or heavy rain before it has time to act properly. It is also liable to kill fish and vegetation. Oiling is very useful in temporary ponds in woodlands where it is protected from wind. It is less suitable for pools in coastal areas, where the wind is often strong and displaces the oil film before it has time to act. The rapidity of its killing action can be increased, however, by the addition of 1 per cent. cresol, but cresol larvicide is often preferable in such situations. Oiling may also be used along the edges of deep ponds and lakes, when the breeding is confined to these situations. Oiling is also suitable for use on water stored for fire-fighting purposes. As the action of oiling is only temporary, it may be necessary to repeat its application every two weeks, if the larvae attacked belong to a species which continues breeding during the summer months.

Oil may also be used on the surface of domestic water containers such as water butts, cisterns, &c., but if the water employed is for domestic purposes or for gardening, this may be objected to by the users. In such cases about four tablespoonfuls of petrol per square yard of surface will kill the larvae, and if exposed to the air will evaporate off in less than twenty-four hours without damaging the water. This must be repeated if larvae reappear later. Where the liquid is stored in receptacles with taps at the bottom, the water may be covered with a thin layer of liquid paraffin (about 1½ teaspoonfuls per square yard). The effect of this will last for several months.

Chemical Larvicides.—These may be divided into two groups:— (a) Liquids soluble in water and (b) poisonous dusts. The soluble larvicides commonly used depend for their action upon a content of some of the phenol derivatives such as cresol, crude carbolic acid, &c. Some of the ordinary standardised disinfectant fluids (containing about 20 per cent. of phenol), of which there are many proprietary brands on the market are mainly employed.

Before applying the larvicide, the volume of water in the pool should be calculated and sufficient disinfectant distributed to make a strength of about 1/80,000. The worker should wear rubber thigh boots, so that he can wade about in the water to produce a thorough admixture of the larvicide. In such strengths the larvicide is innocuous to man and domestic animals but will kill fish and vegetation; it is therefore used mainly in temporary pools. The amount needed may vary with the type of water, and the treated area should be revisited 24—48 hours later to see whether the results have been satisfactory. As the effects of this larvicide may last for several week, it is especially useful for water stored for fire-fighting purposes.

Poisonous Dusts (Paris Green).—Paris Green (copper aceto-arsenite) is a chemical dust largely used in the tropics for the destruction of Anopheline larvae. The powder is distributed upon the surface of the water where it is swallowed by the larvae which are poisoned by it. It does not kill pupae, and, as ordinarily used, is not effective against Culicines, but only against Anopheline larvae.

HEALTH & HYGIENE

Follow The Vitamin Road To Health

By
DR. MORRIS FISHBEIN
EDITOR
"Journal Of The American Medical Association"
AND OF
"Hygiea": The Health Magazine

IN conserving our supply of vitamins, special attention must be given to Vitamin B1—thiamin. Apparently it is more difficult to obtain the necessary amount of this than any of the other vitamins. Recent studies show that American diets have tended gradually to eliminate the necessary thiamin, a substance found particularly plentiful in certain meats and in whole-grain cereals. The vitamin is lost frequently by cooking. This is particularly true because B1 occurs in foods which are usually eaten after cooking instead of being eaten raw. In order to save vitamins, foods should be stored at low temperatures in closed containers.

Vitamin C is especially susceptible to oxygen and is destroyed by oxidation, hastened by cooking fruits and vegetables in copper vessels. If fruits and vegetables are chopped or if they are crushed and allowed to stand, they will lose Vitamin C rapidly.

Recent studies of frozen foods show that these vitamins are not destroyed by freezing. However, the vitamins can be destroyed if the frozen fruits and vegetables are improperly handled. It is recommended that this material should not be defrosted and allowed to stand. Frozen foods should be cooked while they are still frozen and all of the liquid should be used with the food.

Many people have been of the impression that the canning of foods will destroy vitamins. Actual studies show that canned foods retain vitamins. Vitamin C, however, is lost if food stored too long. Again the recommendation is made that the entire contents of the can be used so as to secure such vitamins as are extracted from fruits and vegetables by the fluid in which the material is packed.

The Milbank Memorial Fund has just published a complete statement by Miss Hazel E. Munsell, a Government Nutritionist, regarding the vitamin contents of various foods and the manner in which these contents may best be preserved. We must remember that vitamins may be taken into the body and then not be properly absorbed or utilized by the body because of other factors. It is known, for instance, that the taking of considerable quantities of alcohol will interfere seriously with the absorption by the body of the necessary amount of vitamin B1.

Most of the vitamins that we require can be secured by the use of natural foods, if we remember to choose our foods wisely. Since we may occasionally lose vitamins because of various conditions, it is in general recommended that people take some of the foods containing vitamins that are required according to our present knowledge of minimum essential requirements. It is well established that the toxic dose for such substances is so many thousands of times the normal dose as to occasion little danger from excess quantities.

LATEST IN MEDICINE

A recent survey by the United States Public Health Service indicates far too many deaths occur from appendicitis. The annual mortality increased from 7,731 in 1900 to 18,000 in 1930, then there was a decline to about 14,000 in 1939. The chief steps in prevention are: (1) consider any abdominal pain as a dangerous sign; (2) if you have a pain, don't take laxatives, drugs or enemas. Call a physician: (3) until the doctor comes just put an icebag or other cold application over the painful area and rest.

Latest scientific evidence shows high blood pressure is associated with interference of circulation of the blood through the kidneys. A report from Doctors Koons and Ruch of Indianapolis describe a seven-year-old girl with a tumor of the kidney who developed a blood pressure of 180 at the time the heart contracted and 180 with the heart relaxed. Operation for removal of a tumor of the kidney dropped the blood pressure to 116 with the heart contracted and 76 with the heart relaxed. Here is a scientific report of a case in a human being which confirms experimental evidence Harry Goldblatt developed by research on dogs.

In 1936 doctors believed that treatment of virus diseases with serums could be only of little value and that "once a virus had entered a cell, no amount of anti-serum brought in contact with the cell can injure the virus or hinder its activity." Experts now report preparations of a serum which would help to control measles, now considered a virus disease. In Chicago, Doctors Zichis and Shaughnessy reported experiments to prove that western equine encephalomyelitis, a form of inflammation of the brain which becomes epidemic among horses and which can be transferred to human beings, may also be treated with serum which they prepared from rabbits. Horse serum prepared in a similar manner failed to be effective with infected animals. Most recent epidemics of equine encephalomyelitis occurred in Massachusetts and in Montana.

City Engineer's Work In Relation To Town Planning

OUR title might preferably be worded "The relation which should exist in the attitude of the Town Planner towards the City Engineer." In saying this it is not intended to convey the idea that the groups of engineers, architects and other technically trained men who advocate master plans (which groups are usually classified under the somewhat hackneyed term "Town Planners") should take all their instructions, direction and guidance from the officials who happen to be the chief engineers in charge of the current public works of the areas under study for major improvements.

The point here to be brought out is that any engineer who has the requisite technical training and experience to justify his appointment as a City Engineer, and especially to justify his retention in such a position for a number of years, ought to be regarded as a very valuable source of information for the guidance of the outside experts who may be called in as Town Planners.

In other words, the competent City Engineer, with years of experience in his chosen community has great knowledge—knowledge which is of inestimable value to the outside, independent-minded town-planning expert.

It must be readily understood that the City Engineers in most of the major cities and towns have been driven to do their own town planning. When one tries to visualize the growth of most of our cities, and at the same time considers what a small proportion of the ideas of Town Planners, either of general or specific, have been actually carried out, it will be seen that at the very most there has been only a slight scratching of the surface here and there, so far as realising the ideals of the town planning enthusiasts are concerned.

Mention has been made above of the tremendous growth which has taken place in many cities and towns during the past few decades. By "growth" we do not merely mean increases in population. In this western world the experience is that increases in city populations result in expansions in area far beyond the ratio that resulted in such growths on the older continents or even in the older settlements of America.

The reasons for this condition are well known. In addition to the ambitious schemes of real-estate promoters, there is the natural desire of workers of all kinds to acquire residences in open air and sunshine, far removed from the mills, warehouses, factories and counting houses—to get away from the slums or potential slums which naturally develop in the immediate proximity of great industries and the marts of trade and commerce. Such movement is facilitated and encouraged by the marvelous development in providing local transportation facilities at low rates of fare—such as street railways, buses, etc.

These are statements of well-known facts, but the resulting *problems* are not so well known or comprehended.

These widenings of municipal areas mean new streets. But few there be who can comprehend that the opening of new subdivisions means more than the mere staking out of roadways, or even the preliminary macadamizing or paving of them so that there may be ways for the new residents to go to and from their homes.

There must be provision for water supply, lighting of streets and houses and for drainage. And by far the most important of all facilities is that of drainage. It is quite feasible to open streets where traffic must needs run up and down hill; motors, street-cars and even horses can take care of that. It is even feasible to furnish water supply, within reasonable limits forcing water to run up hill.

But it is a far more difficult, nay an insurmountable problem, to make the contents of sewers flow up hill. This cannot be done without force pumps, and that process is so expensive that in most cases the cost is prohibitive.

To explain this situation in a manner that can be understood by any layman, it frequently happens that new residential areas are opened up, where the promoters, in their innocence, have an idea that not only can there be extensions of city water mains, streets and street-car lines, extensions of lighting, etc., but that sewers can easily be built to flow into the old existing city sewers, regardless of the fact that the slope of the new subdivision often leads away from and not towards the parent city area. This has happened in many cities and towns in Canada, with the unavoidable result that in order to provide outlets for the sewers in the new residential area, trunk sewers must be built at enormous expense leading to some new natural outlet i.e., an outlet by gravity flow, and this in turn has frequently resulted in the construction and operation of costly sewage-treatment and partial purification plants. Incidentally it may be stated that the annual perpetual cost of operation and upkeep of such plants is an exceedingly heavy burden for any municipality.

Without dwelling too much on such a problem as local or general drainage systems, it should be noted that there are other problems arising from year to year, such as (*a*) the inevitable changes created in older parts of a city when the population moves to new suburban areas, (*b*) the general traffic problem, which in reality resembles very closely the drainage problem in fact it is a drainage problem, but must be controlled by methods other than those for sewers, because after all, while traffic can flow up hill, it should not all be compelled to flow up the one hill—*i.e.*, through one artery or a very limited number of arteries.

It should be remembered that the City Engineer has the general daily responsibility of construction and maintenance of local pavements, side walks, sewers, water-mains, municipal buildings and structures, collection and disposal of refuse (garbage and rubbish) and a host of miscellaneous services.

And while he is strenuously occupied with these *current* activities, he is confronted, in a growing city, with the very vital major problems resulting from growth and expansion.

These latter certainly belong in the realm of town planning. But during the years and the decades when the community has been flooded with lectures, conventions and the teaching of town planning efforts of many kinds, without the adoption of any comforting master plans, or legislation, either "enabling" or "compulsory," the growth of towns and cities has been going on and *somebody* has had to cope with the situation.

Municipal councils and commissioners are almost invariably elective and in the nature of things their average life is for only two or three years. At the very best such councils and commissions are composed of men (or women) who cannot possibly have much knowledge, experience or understanding of the planning, construction, operation and maintenance of public works. I am not discussing the organization and management of such departments as those of Public Health or Public Safety. Important as these are, they also are beyond the required intimate knowledge and understanding of elected administrations of short life.

But to confine ourselves to the relations which should exist between the Town Planner and the City Engineer :—

The somebody who has been compelled to cope with the major problems is the City Engineer. In the opinion of the writer, this official usually has dealt with the problems in a satisfactory manner—considering the means at his disposal,

considering the indifference of the general public and considering also frequent political obstruction—which in the last analysis can be ascribed to indifference on the part of the public.

One can go further and state that in many cities and towns the engineers have accomplished wonders in advocating, insisting on, and finally achieving improvements of great public importance: also in *preventing* developments which would have later caused great expense to rectify, and which would result in tremendous inconvenience to the public while waiting for the rectification.

I would repeat: There has for years past been a set of City Engineers throughout this Dominion of ours, who have stood in the breach, holding the "bridge," like Horatius of immortal fame, striving with all their energies to see to it that everything done in the way of municipal expansion should be done in the best possible manner, with vision towards the future. These are men who "know something," men whose personal advice, or that of their records of achievement if they have passed on, should be sincerely consulted when the millenium arrives, when the best town-planning brains of the world are given an opportunity to put into effect the changes and betterments they have been advocating for many years.

It is, perhaps, not inappropriate to state, by way of illustration, that in the City of Montreal and environs, the City Engineers have during the past 15 to 20 years carried out on a large studies and surveys (using the term "Surveys" in its highest sense) taking the responsibility of advocating and, so far as possible, executing improvements, and collecting data of tremendous value, for use when the long hoped for day arrives when real town planning can be put in effect.

LIFE AFTER DEATH

Many human organs survive for a considerable time after the heart stops beating, and medical science has already progressed so far that living, healthy organs from a dead person have been grafted on to a living but diseased, sufferer

The after-life of various parts of the body has actually been determined by experiment Here are some instances, the human brain lives for ten minutes after its owner's death; the heart muscles 20 minutes; the eyes 30 minutes; the ears 1 hour; arm and leg muscles 4 hours, blood corpuscles 18 hours, bones 3 days, and the skin 5 day —*Hemmet's Journal* (Stockholm)

Census Operations In Calcutta

Special Officer's Appeal For Workers

In his appeal for volunteers to act as Enumerators for the census of the house population of the city, the Special Census Officer, Calcutta, has issued the following statement —

'As the time for the taking of Census is approaching, I would remind the public that every effort has been made to make the Census this time a people's Census

"Much responsibility has been vested in the Charge Superintendents and the Supervisors who are generally leading members of the public and attempt has been made to secure with their co operation the most representative and accurate organisation drawing upon local knowledge and interest as far as possible

"House numbering and house lists which formed the preliminary stages have been locally checked by the Supervisors and scrutinised by the Charge Superintendents and repeated attempts have been made through the press, the radio and notices issued through the courtesy of the the Calcutta Electric Supply Corporation and the Bengal Telephone Company to elicit all cases of omission

"As long as the house lists were in the Special Census Office, the public were requested to report all cases of omission there, but it has been repeatedly pointed out that even afterwards up to the enumeration period cases of omission if detected or reported would be rectified Now the the public are again urged to point out to their respective Charge-Superintendents all cases of omission, and if there is any grievance the Special Officer may be informed I would specially draw the attention of authorities of the institutions with a house population like the hotels, factories, hospitals, hostels, etc., to this aspect Many of these have been already selected as special areas for enumeration Others have been included in the regional blocks to which they appertain. If there is any institution within Calcutta area which has a residential population and which has escaped the attention of the Census Agency, notice should be promptly sent to the Special Officer.

It is important that every body should be brought to realise that just as it takes two to make a quarrel so it also takes two to make a Census One is represented by the Census Agency especially the enumerators and other is represented by the individuals who answer their questions. Both sides have a clear duty and an obvious responsibility in trying to secure enumeration and avoiding double enumeration

Enumeration Of Vagrants

The enumeration of vagrants, vagabonds and street-dwellers without address in Calcutta will be undertaken on March 1, by the Calcutta Police.

For the Census of the house population in Calcutta, nearly 6,000 enumerators will be required and so all possible sources have been tapped. The official and semi-official establishment have supplied over 4,000 enumerators while through the associations representing the different communities, leading institutions and the Charge Superintendents nearly 1,000 enumerators have been secured There is still a considerable shortage of enumerators for Wards 5, 6, 7, 8, 15, 29, 30, 31, and 32 and some shortage for Wards 1, 2, 3, 11, 12 and 20 and it is hoped volunteers in these Wards will apply at once through their respective Charge-Superintendents to fill up the gaps It may be noted, however, that no application will be received direct at the Special Census Office, as without the endorsement of some authority it will not be possible to issue the appointment *parwanas*.

"A course of lectures is being arranged at the following central places —Darbhanga Hall at 4 p.m. on February 9; Town Hall at 4 p.m on February 10; Town Hall at 4 p m on February 12; and at the Ashutosh College Hall, Bhowanipore at 4 p m. on February 16

It is hoped that it will be possible to meet the enumerators there and explain to them the nature of their duties.

"Where detailed or personal discussion is wanted, the enumerators will be received at the Special Census Office every Monday and Thursday between 1 and 2 p.m. or later at 5 p.m. at the Town Hall (ground floor)."

CALCUTTA NEWS & VIEWS A Digest

BENGAL CHRISTIAN ASSOCIATION

At the annual general meeting of the Bengal Christian Association held at Duff Chapel, Manicktolla on 27th January last, Principal A. K. Shah presiding, the following office-bearers were elected :— President—Principal A. K. Shah, Vice-Presidents—Prof. M. L. Sircar, Rai Sahib J. G. Biswas, Rev. C. C. Panday and Rev. M. Moses, Secretary—Mr. J. M. Das; Treasurer—Mr. S. Biswas.

ASSOCIATION OF INDIAN CULTURE

At the fifth annual meeting of the Association of Indian Culture held on the 27th January last, the following office-bearers for the year 1941 were elected :—

President—The Hon'ble Mr. Justice C. C. Biswas, C.I.E.; Vice-Presidents—The Hon'ble Mr. Justice A. N. Sen and Raja Kshitindra Deb Rai Mahasai; General Secretary—Sj. Sudhir Ch. Bandopadhyaya; Assistant Secretary—Mr. D. B. Mukherjee; Members of the Working Committee—Sj. Mrinal Kanti Ghosh Bhaktibhusan, Sj. Hirendra Nath Datta, Mr. J. N. Basu, Mr. Percy Brown, Mr. A. K. M. Zakariah, Dr. Kalidas Nag, Mr. Sushil Chandra Sen, Mr. Rezaul Karim, Mr. Kumar Krishna Mitter, Mr. S. Wajed Ali, Mr. T. I. M. Nurannabi Choudhury, I.C.S., Mrs. Renuka Roy, Begam Hamida Momin and Mr. S. P. Sarma.

Resolutions for starting a Cultural Unity Club and Free-Reading Library and for convening the 5th All-India Cultural Unity Conference either at Hyderabad or at Cooch Behar or at any other suitable venue this year and felicitating Sir Azizul Haque on his being knighted and Dr. Surendra Nath Das Gupta receiving the C. I. E. were unanimously passed at the meeting.

LATE MR. K. W. BONERJEE

The death occurred on January 29 of Mr. Kali Krishna Wood Bonerjee, second and the last surviving son of the late Mr. W. C. Bonerjee, the eminent Barrister and the First President of the Indian National Congress.

Mr. K. W. Bonerjee, had retired from the Bar after having practised for a long time at Madras and Rangoon. He was 66 years of age at the time of his death.

AMERICAN VISITOR TO INDIA

With the object of ascertaining the conditions and facilities available for public health nursing in India, Miss M. E. Tenant, of the International Health Division of Rockefeller Foundation, America is, it is understood, to visit India this month.

Mr. D. Jacocks, Indian representative of the Rockfeller Foundation has left for Ceylon to meet Miss. Tenant there.

SIR HOMI MEHTA ENTERTAINED

Sir Homi Mehta, Founder and Chairman of Zenith Life Assurance Company was entertained by Dr. Protap Chandra Guha Roy and staff of the Calcutta Branch of the Company at a tea party at Firpo Hotel on last Tuesday afternoon. There was a large and distinguished gathering.

In welcoming Sir Homi Mehta, Dr. Guha Roy in a neat speech referred to his great achievements and success as a businessman and his very many public services.

Mr. J. C. Mukerjea, Chief Executive Officer, Calcutta Corporation, expressed great admiration for Sir Homi Mehta from his personal experience.

Sir Homi Mehta in replying gave a short history of his career—how he started as a clerk on Rs. 25 and how he has made a success in several big businesses. Aptitude, determination and courage, he said, were the watchword of success. He concluded 'Never disdain any work however small and proceed step by step from the lowest rung of the ladder and you are sure to come at the top."

Among those present at the party were :— Messrs. Nalini Ranjan Sarker, J. C. Gupta, P. Banerjee, Jalaluddin Hashemy, Choudhury Moazem Hossain, Hemendra Prosad Ghose, Makhan Lall Sen, Janaki Jiban Ghose, Jatindra Nath Bhattacharji, Bhupendra Nath Dutt, Bijoy Ratna Mazumdar, Bidhu Bhusan Sen Gupta, Rabindra Narayan Chowdhury, S. C. Roy, A. C. Sen, J. C. Ghose Dastidar, Amar Krishna Ghose, Arun Guha, Kalipada Mukherjee, Suresh Chandra Das, Satish Chandra Chakravarty, Sailajananda Sen, Prof. Rajkumar Chakravarty, Pandit Purosatam Roy, Kaviraj Bimalananda Tarkatirtha, Messrs. Kshitish Chandra Chakravarty, Bhudhar Halder, Sachindra Prosad Basu, Manomohan Bhattacharjee, Sailendra Nath Ghosal and Rai Bahadur F. L. De.

CO-OPERATIVE SOCIETIES FEDERATION

At a meeting of the General Council of the Bengal Co-operative Societies Federation held on the 27th January last, the following persons were elected as office-bearers for the year 1941 :—President—Mr. Santosh Kumar Basu, M.L.A.; Vice-Presidents—Mr. Satyapriya Banerjee, M.L.A., Mr. Shamsuddin Ahmed, M.L.A., and Mr. Debendra Nath Mukherjee; Secretary—Mr. Radharaman Roy Chowdhury; Joint-Secretaries—Mr. V. Srinivash, and Mr. P. K. Roy; Treasurer—Mr. A. M. Das Gupta. Among others the following resolutions were adopted :—

(1) That an appeal be made to His Excellency the Governor of Bengal to withhold his assent to the Bengal Co-operative Amendment Bill, 1940.

(2) That arrangements be made for celebrating the Death Anniversary of Sir Danial Hamilton, the Pioneer of Co-operative workers.

RATE-PAYERS' COMMITTEE

The following gentlemen were elected as members of the General Committee of the Rate-payers' Conference recently held in the Town Hall. President—Mr. S. N. Banerjee; Vice-Presidents—(1) Dr.

Shyama Prasad Mookherjee, (2) Mr. Phanindra Nath Brahma, (3) Mr. N. R. Sarkar and (4) Mr. J. N. Basu. Secretaries—Dr. Bhupendra Nath Basu and Mr. Debendra Nath Mukherjee; Members—Messrs. J. C. Gupta, N. C. Sen, N. C. Chunder, P. Banerjee, Jogendra Nath Mandal, Srish Chandra Chakravarty, Sachindra Narayan Sannyal, N. C. Chatterjee, H. P. Podder, Rajendra Narayan Banerjee, Prabhu Dayal Himatsingka, Prof. Tinkari De, Mr. Madan Mohan Burman, Messrs. Hriday Krishna Ghosh, Tulsi Charan Roy, Satish Chandra Bose, Narendra Nath Dalal, Bijay Kumar Banerjee, Prafulla Kumar Dutt, Bepin Behari Ganguli, Kishori Mohan Banerjee, Dr. Charu Chatterjee, Messrs. Makhan Banerjee, Sailendra Nath Dutt, Lakshmi Kanto Mullick, Biman Chandra Bose, K. C. Roy Chowdhury, Bhagat Singh, Rajani Mukherjee, Sachindra Prasad Basu, Kabiraj Jugal Kishore Sen, Dr. Sundari Mohan Das, Messrs. Durga Charan Mitra, Kanai Lal Sarker, Begum Sakina, Nalin Chandra Paul, Benoyendra Prasad Bagchi, Major P. Burdhan, Mr. Kiron Sankar Ray, Rai Narendra Nath Chowdhury, with power to co-opt, the Presidents and Secretaries of Ward Associations—*ex-officio*.

BUILDING WARDENS FOR CALCUTTA

The appointment of Building Wardens to advise on and control all air raid precaution measures in buildings in the city has been suggested by the Assistant A. R. P. Controller in a letter to all the Chief Air Raid Wardens in the city and in the surrounding industrial areas.

The letter states that many of the Chief Air Raid Wardens are being approached by the heads of big business houses, shops, Government departments etc., to attend conferences and give expert advice about A. R. P. measures. It was not possible for them to give personal attention to all such undertakings and the correct procedure is for the Wardens to ask parties concerned to select one or more of their responsible employees for appointment as Building Wardens to advise on and control all A. R. P. measures in a building.

Special classes, the letter adds, may be arranged for such candidates at the nearest training centre, and they will then be able to take the necessary measures in their buildings without so much assistance from the Chief Air Raid Wardens.

ROYAL ASIATIC SOCIETY OF BENGAL

Presiding at the annual general meeting of the Royal Asiatic Society of Bengal held at the hall of the Society in Park Street, Calcutta on last Monday afternoon Mr. Justice Lort-Williams observed:

"Our aim must be to provide something of which there is urgent need and which other societies do not provide—a centre of general knowledge and culture. Ours should be a common platform upon which specialist and non-specialist can co-operate, where East can meet West and where the expert and the man or woman of broad culture can exchange views without embarrassment."

Continuing he said that the future of the Society must depend more and more as the years passed on Indian men and women of culture and intelligence, and he hoped that the future would produce not only specialists and professional scholars, but men of broad culture as well.

The President announced that the Sir William Jones Memorial Medal for 1940 had been awarded to Acharyya P. C. Ray for Science including Medicine. The gold medal is awarded biennally to a person who in the opinion of the Council of the Society has made conspicuously important Asiatic Researches with reference, alternately to (1) Science, including Medicine and (2) Philosophy, Literature and History. Other distinguished recepients of the medal include Sir Malcolm Watson, Sir George A. Grierson, Dr. Felix H. D'Herelle, Dr. C. S. Hurgronje, Dr. Sir U. N. Brahmachari and Dr. A. J. Wensinck.

The following were elected officers and members of Council for 1941:—President:—The Hon'ble Mr. Justice John Lort-Williams. Vice-Presidents:—Bt.-Col Sir R. N. Chopra, Dr. C. S. Fox, Dr. Syama-prasad Mookerjee, Sir S. Radhakrishnan. General Secretary—Mr. B. S. Guha. Treasurer—Mr. Baini Prashad. Philological Secretary—Mr. S. K. Chatterji. Joint Philological Secretary:—Mr. M. Mahfuzul Haq. Biology—Mr. Kalipada Biswas. Physical Science—Mr. Meghnad Saha. Anthropological Secretary—Mr. H. C. Chakladar. Philosophical Secretary—Mr. Vanamali Vedantatirtha. Historical and Archaeological Secretary—Mr. Kalidas Nag. Medical Secretary—Major C. L. Pasricha. Library Secretary—Mr. J. C. Mukherjee. Other Members of Council—Dr. S. C. Law, Messrs. M. Z. Siddiqi, C. W. Gurner and The Hon'ble Mr. Justice N. G. A. Edgley.

—Mosquito Control—II

(*Continued from page 000*)

The powder is mixed with some inert dust, such as powdered soapstone, slaked lime, &c., so that it can be spread upon the surface of the water in a fine layer. It is very useful where the breeding places have much vegetation which it is impossible to remove for some reason. When large areas, such as marshes, have to be treated the larvicide is usually distributed by means of a special mechanical blower in dust mixtures containing 2 to 5 per cent. Paris Green. For small and narrow areas a 1 per cent. mixture in fine dry road dust or sand can be thrown by hand. The amount of Paris Green needed is about ½ lb. per acre. The treatment needs to be repeated at least once every two weeks during the breeding season. It is unlikely that its use will often be required in this country, as Anophelines seldom cause a nuisance by their bites, and, if they do, they usually can be dealt with by other methods.

Pyrethrum-Kerosene Larvicide.—Work in the United States has shown that the killing power of oil can be greatly increased if an extract of pyrethrum be added to it. The larvicide recommended consists of a pyrethrum-kerosene-oil-soap emulsion, which is diluted 10 times with water before use. This larvicide is said to be harmless to fish, waterfowl, and plant life, and to have been used successfully at sewage disposal works and in bathing pools. It is effective in water of salinity not over 5 per cent. It is employed by spraying, usually in amounts equivalent to 1½—2 gallons of the stock emulsion per acre, but as it does not spread well where there is much vegetation or floating debris, as much as 5 gallons may be needed to produce a high degree of efficiency.

CIVIC NEWS FROM FAR & NEAR

SMALL-POX AT RAJSHAHI

Small-pox has broken out in epidemic form in Rajshahi town. The type is virulent and in 7 or 8 cases it has already proved fatal. There are about a hundred more cases of severe nature. The municipal authorities are doing their utmost to cope with this difficult situation. Several roads have been closed to traffic and several sweetmeat shops have been put under lock and key. Extra hands are being employed to effect mass vaccination.

KARACHI CORPORATION INNOVATION

The Mayor of Karachi proposes to convene regular session of the Municipal Corporation lasting several days continuously as in the case of the Provincial and Central Legislatures instead of bi-weekly meetings as at present. The first session under this new arrangement to be known as Budget Session is, we understand, to commence on February 10.

JUBBULPORE MUNICIPALITY

By a notification in the *C. P. Gazette*, the Governor of the C. P. and Berar has proposed that the Jubbulpore Municipal Committee shall consist of 29 elected members and 6 nominated. Accordingly the municipal area of Jubbulpore has been divided into 29 Wards. The proposal is open to objections and suggestions for a month.

BOMBAY MUNICIPAL PRIMARY SCHOOLS

The Bombay Municipal Corporation decided at a meeting on January, 31 last to fix the age for admission of children into their schools at six instead of five as hitherto. It was also resolved to raise the number of pupils under each teacher from 35 to 40.

The changes are meant to effect a retrenchment in expenditure. It was stated that if the changes were made the municipality would save approximately two lakhs of rupees every year. On investigation it had been found that over 60 per cent. of the children below the age of six failed in the infant classes and had to go through the same class for another year. Primary education being free, this had meant a considerable loss to the city exchequer.

FIREWORKS REGULATION AT LAHORE

To regulate the discharge of "fire-arms, fireworks, fire-balloons, bombs, or detonators," within the Lahore municipal limits, the Administrator of the Municipality has proposed a new bye-law, according to which the letting-off of the above explosives will be prohibited without previous permission of the authorities.

The letting-off of fire-works and fire-balloons on the occasion of marriages and religious festivals has, however, been exempted. Objections to the bye-law have been invited.

MUSLIM GIRLS' EDUCATION AT KARACHI

The Government of Sind has called upon the Karachi Municipal Corporation to prepare a scheme for immediate introduction of Compulsory Primary Education for Muslim girls in the city, particularly in Lyari quarters which have a Muslim population of 56,000.

It may be mentioned that the Municipal Corporation had abandoned a similar proposal last year due to financial stringency. The Municipal Corporation spends about 6 lakhs of rupees on education in the city annually.

C. P. MUNICIPALITY DISSOLVED

The Government of the Central Provinces and Berar have ordered the dissolution of the Darwha Municipal Committee.

The Municipal Committee, the order says, has been mismanaging its affairs for some time past. The Committee has been very remiss in collecting its taxes with the result that its financial condition has deteriorated considerably. There is often great delay in paying salaries to the municipal staff and the Municipal Committee had to be repeatedly warned for this default.

The order further states that the Committee has not been able to maintain the prescribed minimum balance of Rs. 2,000 ever since 1935.

Another result of the poor finances of the Committee is that municipal contributions on account of the Provident Fund of the employees have not been credited since June 1937. In spite of repeated warnings the Committee, it is said, has failed to take effective steps to improve collection of taxes.

The Government have not accepted the plea of the Committee that previous committees have been responsible for mismanaging municipal affairs as Government saw no indication that the present Committee which had been in office for over a year has made any serious attempts to improve its financial position.

CHANNEGERE TOWN ELECTRIFICATION

The Government of Mysore have sanctioned the electrification of Channegere Town in the Shimoga District, at a cost of about Rs. 1.30 lakhs.

CUTS RESTORED AT HAFIZABAD

In pursuance of the advice of the Deputy Commissioner, Gujranwala, the Municipal Committee, Hafizabad has adopted a resolution to restore 5 per cent. cut imposed on the salaries of employees besides sanctioning increment of rupee one to the sweepers with effect from the ensuing financial year.

ERNAKULAM TOWN IMPROVEMENT SCHEME

The Ernakulam Municipal Council which met on January 27 under the presidentship of Dr. T K. Krishnaswami, Chairman, adopted by an overwhelming majority the Town Improvement Scheme designed to reclaim the marshy and low-lying parts of the town.

The land proposed to be acquired and improved lies between the Chittur Road and the Thirumala Devaswom Road, the northern and southern boundaries being the Banerji and the Durbar Hall Roads respectively. The proposal is to acquire all the low-lying areas and to lay out a road [illegible]

wide along the centre of the acquired plot with footpaths 10 feet wide on either side. The work would be executed in several stages and it was decided to get a loan from the Government, if the scheme was approved, the loan being availed of in instalments as and when required by the Council.

It was further resolved to request the Government to reduce the rate for supply of water consumed by the Municipality from 4 As. to at least 3 As. per 1,000 gallons for the time being.

LYALLPUR MUNICIPAL AFFAIRS

The right of a Municipal Committee to censure its Executive Officer has been conceded by the Commissioner of Multan Division. The Lyallpur Municipal Committee recently passed a resolution censuring its Executive Officer for his certain acts of "omission and commission," which in the opinion of the Committee he was not entitled to do. The Deputy Commissioner suspended the resolution on the ground that it was *ultra vires* of the Committee.

The Committee then in its explanation to the Commissioner justified its position on the ground that, since the Executive Officer was a municipal employee, he could be censured by the Committee. The Commissioner has accepted the contention of the Committee, and consequently cancelled the order of the Deputy Commissioner by which he suspended the said resolution.

CONGRESSMEN IN LOCAL BODIES

It is understood that instructions have been issued from Wardha to Congress members of District and Local bodies directing them not to resign if they are in a majority and to continue to carry the administration of the local bodies concerned so long as the local bodies are not required to do anything against the general policy and programme of the Congress and smooth and efficient running of the local boards is assured. Congress members should resign from local bodies if they are in a minority and the local body concerned does anything contrary to the Congress policy and programme.

RESIGNATIONS FROM MADRAS CORPORATION

It is understood Dr. Pattabhi Sitaramayya, President, Andhara Provincial Congress Committee, in his recent interview with Gandhiji, discussed with the Mahatma the position of the Congress members in the Madras Corporation, who are in a minority, in the light of the decision of the Corporation to contribute to the war fund.

Gandhiji, it is learnt, holds the view that, as the Congress party in the Corporation is not in a majority now, and, therefore, not in a position to prevent voting of funds of the Corporation for war efforts and such other assistance, it is much better if the Congress members resigned from the Corporation.

Kala Venkata Rao, General Secretary, Andhra Congress, will discuss the matter with Dr. U. Krishna Rao, Leader of the Congress Party in the Corporation, and Mr. V. M. Obeidullah, President, Tamilnad Congress had already had discussion with Mr. Krishna Rao, a decision is likely soon to be reached.

It appears at least 17 members will be prepared to tender their resignation of their seats in receipt of the mandate on that behalf.

LEGAL INTELLIGENCE

ASSESSMENT OF GOVERNMENT HOUSE

"Government House", which is the official residence of His Excellency the Governor of Bengal, is the subject matter of assessment suit pending before the Calcutta Small Causes Court.

"The Province of Bengal," which is the official designation of the Government of Bengal in legal documents, being not satisfied with the decision of the 1st Deputy Executive Officer of the Calcutta Corporation preferred an appeal objecting to the assessment of the premises constituting the "Government House" on the ground that the valuation of the land of the premises had been taken at a very high figure. It is contended that the land valuation should be reduced from Rs. 8,000 to Rs. 2,000 per kottah on the principle of *rebus sic stantibus*.

BUILT IN 1799

The Government House, which is situated on 81 bighas of land, was built by Lord Wellesley and its foundation was laid in 1799. It is, according to an authoritative book, planned after the Keddleston House of England and cost the East India Company Rs. 80,000 to acquire the land, Rs. 13 lakhs for the construction and Rs. 3,000 for equipments.

Lord Valentia, who visited Calcutta in 1803, says, "The Esplanade leaves a grand opening on the edge of which is placed the new Government House erected by Lord Wellesley, a noble structure although not without faults in the architecture and upon the whole not without its dignity."

Before the Government House was built, the Governors-General used to live in the garden houses of their own. Clive had his at Dum Dum and Hastings at Alipore. Calcutta began growing after what is historically known as the "Plassey drain," the huge economic drain on the country continuing from 1757 to 1780 and amounted to £38,000,000. It may be recalled in this connection that the purchasing power of money was then at least five times as high as now.

Government House is perhaps one of the oldest civil buildings of the city, if not the oldest. Amongst contemporary to this House is the office building of the Royal Asiatic Society of Bengal, constructed in 1805, although the Society was founded by Warren Hastings in 1784.

The highest price that Calcutta land has fetched is Rs. 40,000 per kottah near the new Howrah Bridge Approach.

The Corporation has already reduced the annual valuation of the Government House from Rs. 6,93,526 to Rs. 6,91,929, which does not appear to have satisfied the other party.

There has, however, been a move for amicable settlement in the matter and a compromise acceptable to both the parties may soon be reached.

CALCUTTA CENSUS

LECTURES FOR TRAINING OF ENUMERATORS

Date—9th February, at 4 p.m.

Place—Darbhanga Buildings (University Library).

Speaker—Mr. R. N. Bose, Special Census Officer, Calcutta.

Date—16th February, at 4 p.m.

Place—Ashutosh College, Bhowanipore.

Speaker—Mr. S. Banerjee, Assistant Special Census Officer, Calcutta.

As Others See us

CLEANER CALCUTTA

Calcutta has been asked to become cleaner; the Corporation's officials and several leading citizens have banded themselves together in an effort to rouse several areas to a sense of their responsibilities. Some of our contemporaries have been assiduously reminding their readers that cleanliness is next to godliness.

There are cities in the East which are kept clean by the vigilance of their municipalities. Bye-laws are enforced with unrelenting strictness; supervision is careful and unceasing; penalties are severe for those who violate the civic authority's regulations. Visitors to Malaya speak with enthusiasm of what they have seen and heard at Singapore and Penang. Not all municipalities in India give the same evidence of an anxiety to promote and maintain cleanliness. Not many of them put cleanliness first; other things make larger demands on their time and attention. The armoury of regulations may be complete but the will to enforce them may be lacking. Persuasion as an easier method appeals to many; apathy, they say, is best destroyed by propaganda. Others trace dirt to ignorance; they too see no hope except in the dissemination of information through the conventional instruments of publicity. There is plainly however more apathy than ignorance; and spasmodic cleanliness campaigns may not go a long way. Many municipalities need to interprete their duties more vigorously than they do.

All health and cleanliness campaigns endeavour to tell the ignorant or apathetic citizen that cleanliness is not merely a personal but a social duty. Streets and parks will not be clean so long as there are people who think that they belong to nobody, or that, being meant for everbody's use, they need no attention except what a municipality can give. Men who keep their houses clean are often found untroubled by dirt and filth in their neighbourhood. The houses are theirs; the street is somebodyelse's. Not many are scrupulous about the disposal of household refuse. Nor are some who are careful about food in their own houses equally attentive to what is served them in the cheap eating-houses. Some Calcutta citizens have been busy going round tea-shops and teaching their owners cleanliness. Not lectures but correction is what these need. Spitoons, it appears, are soon to make their appearance in Calcutta's select streets. That they have to be put up is dismal evidence that persuasion has not been enough. And what if those who aim at them do not aim straight? —*The Statesman.*

THE BANK OF INDIA LIMITED

The profit of the Bank of India Limited for the year ended 31st December, 1940, including the sum of Rs. 8,86,336-8-0 brought forward amounts to Rs. 28,45,284-7-11.

Provision for Income Tax and Super Tax for the current year will absorb—Rs. 2,50,000-0-0.

The payment of an *ad-interim* dividend at the rate of 11 per cent. per annum made on 30th June, 1940, absorbed—Rs. 5,50,000-0-0.

The balance now available for distribution is—Rs. 20,45,284-7-11.

The Directors propose to pay a final dividend for the half-year ended 31st December, 1940, at the rate of 11 per cent. per annum free of Income Tax—Rs. 5,50,000-0-0.

To place to the Bank's Property A/c—Rs. 2,50,000-0-0.

To place to the Bank's Reserve Fund—Rs. 2,50,000-0-0.

and to carry forward the balance subject to the payment of a bonus to the staff—Rs. 9,95,284-7-11.

THE Improvement Trust

The following extracts are taken from the Proceedings of the Meeting of the Calcutta Improvement Trust, held on Saturday, the 7th December, 1940, at 10-30 a.m.:—

PRESENT:—Mr. C. W. Gurner, I.C.S., *Chairman;* Mr. Sailapati Chatterji, (*Offg.*) *Chief Executive Officer, Corporation of Calcutta;* Mr. Abdur Rahman Siddiqi, M.A., LL.B., Barrister-at-Law, M.L.A.; Mr. A. J. Thompson, D.S.O., M.C., F.R.I.B.A., F.S.I., Mrs. Hasina Murshed, M.B.E., M.L.A.; Mr. Sudhir Chandra Ray Chaudhuri; Mr. J. J. N. Birch; and Sir Hari Sanker Paul, Kt.

LATRINE FOR UNIVERSITY ROWING CLUB

The Board considered a request from the Registrar, Calcutta University, for sanction to the construction of a latrine at the University Rowing Club premises at the Dhakuria Lake, for the use of the menials residing therein, and resolved that they would prefer a septic tank to be installed, but should this prove impracticable, would leave the Chairman discretion to sanction the latrine as designed at the site proposed, subject to (1) that the building shall not be erected nearer than 5 feet to the western boundary fence of the Club; and (2) that the University Rowing Club make proper arrangements with the Corporation for the removal of night soil.

KING GEORGE'S DOCK'S LAY-OUT

The Board considered letter No. 6009/2/A, dated the 23rd November, 1940, from the Chairman, The Commissioners for the Port of Calcutta, regarding the proposed scheme for the lay-out of the King George's Dock and the joint report of the Chief Engineer and the Chief Valuer thereon. The Board resolved that the opinion expressed in the joint report should be approved.

CASH IN TRANSIT INSURANCE

TENDER NOTICE

Quotations in sealed covers regarding rates of premium payable are invited and will be received by the undersigned upto Monday, the 10th February, 1941, for insurance of Corporation Cash in Transit which is daily remitted to Bank for lodgment or brought from Bank for disbursement.

The estimated annual amount sought to be covered by the Insurance will be approximately Rupees One Crore and a half, carrying risk upto Rupees One Lakh in any single trip. The actual total amount involved will be ascertained at the end of the year and the amount of premium will be calculated accordingly and adjusted against any advance that may be previously made.

The Insurance will be for one year from 1st April, 1941, and will cease on and from 1st April, 1942.

A. K. MITTER,
Treasurer.

Central Municipal Office,
The 21st January, 1941.

VITAL STATISTICS

(I)

For the City of Calcutta for the week ending 25th January, 1941.

CITY OF CALCUTTA (TOWN AND SUBURBS)

The total number of deaths registered during the week was 301 against 725 and 760 in the two preceding weeks and higher than the corresponding week of the last year by 79. The general death-rate of the week was 36·5 per mille against 33·4 the mean of the last five years

Town (Wards 1—25 and 27)

The number of deaths registered during the week ending 25th January, 1941, was 680 against 616 and 651 in the two preceding weeks There were 30 deaths from cholera, against 17 and 23 in the two preceding weeks. There were 139 deaths from small-pox during the week against 90 in the previous week. There were 2 deaths from influenza against 2 in the previous week The mortality from fevers and bowel-complaints amounted to 27 and 60 respectively against 29 and 49 in the preceding week. The general death-rate of the week was 35·1 per mille per annum

There were 28 imported deaths Excluding these, the death-rate of the Town was 33·9

There were 112 deaths from respiratory diseases against 104 in the previous week

Most people treat municipal subjects with indifference and unconcern—everybody's business being nobody's interest. But, really there are no uninteresting subjects, only uninterested people.

Yet, there is an increasingly large number of people now who believe that civics is a matter of concern to them, to their community and to the future of their city.

The *Calcutta Municipal Gazette* appeals to just such people. It invites discussions and constructive criticism in the conduct of our municipal affairs. It helps to increase the interest in Local Government, to make public life more useful, to make our nationalism richer by making it a matter of practical, constructive achievement.

And the *Gazette* is free from party fealty, without any party obligations or debts to pay. It wishes to present ideas impartially and judge questions in the interests of the city only and none other.

We invite you to read the *Gazette* regularly and help to spread ideas on municipal subjects.

CORPORATION NOTICES

To Contractors

Tenders are invited in duplicate for the following and will be received by the First Deputy Executive Officer on the date noted for each, up to 2 p.m. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for....." For specifications and tender forms apply to the Keeper of Records between 11 a.m. and 3 p.m. on week days and 11 a.m. and 1 p.m. on Saturdays. Price Rs. 2 per set.

1. Supply of Indian Pig Iron during 1941-42.

2. Supply of mild steel, chequered plates, etc., during 1941-42.

3. Supply of sleepers during 1941-42.

4. Supply of paints and varnishes during 1941-42.

5 Supply of metals other than Iron and Steel during 1941-42.

6. Supply of bearing springs, draw bar hooks, etc., during 1941-42.

7. Supply of pipes and fittings during 1941-42.

8 Supply of Miscellaneous stores during 1941-42.

9. Laying 15 in. and 10 in S. W. Pipe sewer in place of existing sewers in portion of Alimuddin Street.

10. Supply of six 1½ ton, five 2½ ton, five 3½ ton and alternately three 5—6 ton lorry chassis, tractor and two 5-seater cars.

11. Supply of carts for carrying pipes etc., during 1941-42.

12. Cutting and restoring trenches in public roads for laying water mains during 1941-42.

Tenders for 1 and 2 will be opened on 11th February, for 3 and 4 on 14th February, for 5 to 7 on 18th February, for 8 on 19th February, for 9 and 10 on 20th February, and for 11 and 12 on 21st February, 1941. The rates quoted in tenders for the above are to hold good for three months

N.B.—**All cases of delay over a fortnight in the execution of agreements in respect of works and supply of materials will be reported to the Committee and the parties will not be allowed to execute the agreements after that period without obtaining orders of the Committee**

In case a party deposits earnest money by cheque, he must deposit the cheque at least three working days before the date of opening of the tender.

The contractors should maintain an uniformity of their names and styles of business, appearing on various documents, *e.g.*, Treasurer's receipts, tender forms, agreements, licenses and bills

Any deviation from this on the part of any contractor whenever detected, will render his tender liable for cancellation.

Where tenders are submitted by a Corporation, it should be signed by a principal officer of the Corporation or by an agent duly authorised in that behalf and be attested by a witness. Where it is submitted by a firm, it should be signed by the proprietor or one of the partners or by an agent duly authorised in that behalf by the firm and be similarly attested

BHASKAR MUKERJI,
Secretary to the Corporation.

Central Municipal Office.
The 5th February, 1941.

Notice To Petty Plumbing Contractors.

District No. IV, Engineer's Department.

Tenders for the following work are invited and will be received by the Chief Engineer in duplicate in a sealed cover superscribed "Tender for ....." on Thursday the 13th February, 1941, upto 2 p.m. :—

113. Shifting the public urinal existing at the junction of Ramkamal Street and Circular Garden Reach Road, Ward 26—Rs. 644 dated 7th December, 1940, (1 month).

N. B.—Please note that words in italics "7 days' notice" in clause 6 of the condition of contract should be read as "3 days' notice".

A. K. SEN,
District Engineer IV

District IV Eng'g Office
The 3rd February, 1941

Street Alignment.

Notice is hereby given under Section 302 of the Calcutta Municipal Act III (B. C.) of 1923 that the Roads and Bustees Standing Committee of the Corporation in exercise of the powers delegated unto them in this behalf have considered it expedient to prescribe the alignment of Upper Circular Road, from Shambazar to Razabazar, in Wards Nos 1, 3, 4 and 9 to a width varying from about 75 ft to 130 ft.

Any person having any objection to the same should submit it in writing so as to reach the undersigned on or before Tuesday, the 4th March, 1941

A copy of the plan showing the proposed alignment may be seen in the office of the Chief Valuer and Surveyor of the Corporation between the hours of 11 a.m and 2 p.m on all working days

J. C MUKERJEA,
Chief Executive Officer

Central Municipal Office,
The 4th February, 1941

Wanted Special Apprentices.

Applications are invited from outside candidates desirous of being trained as special apprentices in the Drainage and Water Works Pumping Stations and also in the Electricity Department of the Corporation of Calcutta and will be received by the Chief Engineer up to the 15th February, 1941 The candidate must have a fair general and some technical education and served at least five years' apprenticeship in some well established engineering Workshop. They must have a fair technical education, *e.g.*, a degree in engineering from a recognised University, a diploma in Mechanical or Electrical Engineering from the National Council of Education, Bengal, or the Bengal Engineering College or some equivalent qualification

The candidate prior to their appointment will be required to produce a certificate from the Health Officer of the Corporation as to their physical fitness.

The period of training shall be for one year only (which will not be extended unless time is lost through illness or other unavoidable causes) and apprentices so trained shall have no preferential claim for any appointments under the Corporation.

The number of candidates to be selected is four. Each apprentice will be paid an allowance of Rs. 40 per month.

B. N. DEV,
Chief Engineer

Central Municipal Office,
The 3rd February, 1941.

Notice To Lawyers.

Lawyers practising in the different courts of Calcutta are hereby requested to take out their professional licenses for the year 1940-41, by the 28th February, 1941, on payment of the assessed demand. For facilities of collection, License Inspectors will attend Courts on every alternate day. Lawyers practising in more than one court will kindly let me know beforehand from which address they prefer to pay their license fees as otherwise they run the risk of being assessed in all the courts where they do their professional work. If however, the license is not taken by the above date I shall be most reluctantly obliged to file prosecution against defaulters

S. GHOSHAL,
License Officer

Central Municipal Office,
The 24th January, 1941

Sale of Corporation Waste Papers

Offers per maund are invited for the purchase of Corporation waste papers consisting of condemned files, papers and registers, etc, and of unserviceable paste boards for the year 1941-42.

Separate offers should be given for the purchase of surplus municipal publications printed on good paper.

The approved contractors shall have to execute agreements and also to furnish security deposits of Rs. 100 and Rs. 20 only respectively

The contractors for waste papers shall arrange for tearing up into pieces the records before taking delivery.

Offers in sealed covers must reach the undersigned by the 14th February, 1941.

M. S ANAM,
Keeper of Records

Central Municipal Office,
The 29th January, 1941.

Notice to Contractors

Registration of Names as Contractors for 1941-42

Applications are invited in duplicate for Registration of names as Contractors for the following and will be received by the 2nd Deputy Executive Officer up to 2 p.m. on the date noted against each. Each application in duplicate must be enclosed in a sealed cover and superscribed "Application for Registration of Names as Contractor for.....". Application forms in duplicate may be obtained during office hours from the Central Record Office on payment of Rs. 2 in each case. Further particulars may be obtained from the Chief Engineer's Office

(1) Petty Plumbing and House Drainage Works of the Corporation for the year 1941-42 in Districts I, II, III, IV, Water Works Department and Dhappa—12th February, 1941.

(2) Petty Improvement Works (other than Petty Plumbing and House Drainage Works) of the Corporation for the year 1941-42, in Districts I, II, III, IV and Dhappa—12th February, 1941.

CORPORATION NOTICES—*Contd.*

Every applicant will have to deposit in the Corporation Treasury a sum of Rs. 400 and Rs. 500 either in cash or its equivalent in the Calcutta Municipal Debentures as earnest money for Petty Plumbing and House Drainage Works and for Petty Improvement Works respectively and the same in the case of selected contractors will be held as security for the due performance and observance of the terms and conditions of the agreement or contract, a form of which may be inspected at the Chief Engineer's Office.

BHASKAR MUKERJI,
Secretary to the Corporation.

Central Municipal Office.
The 30th January, 1941.

Notice to Rate-payers.

The attention of the rate-payers is invited to Section 190 of the Calcutta Municipal Act which provides for additional costs to be imposed if the bills are not paid within seven days from the date of presentation. Their attention is also invited to Section 191 of the Act which provides for moveable articles to be held under distraint and sold if the bills are not paid within seven days after the service of notices of demand. They are therefore requested to pay up their dues early as under the provisions of Section 149 of the said Act the rate bills for a quarter fall due and become payable within "the 15th of the first month of the quarter, to which they relate."

Defaulting ratepayers should note that if the arrears of rates are not paid when the bills are presented for payment, "action will be taken for their recovery under the provisions of the law."

Applications for reconsideration of assessment including those now pending will not be considered unless full payment of all the arrears is made by the applicants. If not paid up, steps for the recovery of such arrears will be taken under the provisions of law as in any other case.

J. C. MUKERJEA,
Chief Executive Officer.

Central Municipal Office.
The 14th January, 1941.

Sale of Corporation Surplus Land

In supersession of all the previous notices in this behalf, fresh notice is hereby given for information of the public that the following plots of Corporation surplus land will be sold to the highest bidder above the reserve price at a public auction to be held by the Chief Executive Officer, at the Central Municipal Office, on Friday, the 14th February, 1941, at 5 p.m., on the conditions specifically mentioned in the form of agreement to be executed by the successful bidder at his cost within seven days from the date of auction. The successful bidder shall have to furnish, in cash, an earnest deposit of 25 per cent. on the amount of the purchase money immediately upon the lot being knocked down, and in default thereof, the premises is to be immediately put up and resold at the risk of the first purchaser. Public are invited to attend the auction and offer their bids.

The plans of the lands, the form of agreement, conditions of sale and other necessary particulars may be seen and obtained on personal enquiry in the office of the undersigned on all working days during office hours.

Description of lands :—

(1) Land at the junction of Upper Chitpore Road and Joy Mitter Street, Ward No. 3, measuring about 4 kottahs, approximately.

N.B.—A strip of land on the eastern side of this plot has been set apart for the present. The successful bidder for this plot must agree to purchase the said strip at the same rate if and when it is available for sale.

(2) Lots Nos. 1, 2, 3 and 4 on Harshi Street, Ward No. 9, measuring about 1 k. 2 ch. 12 sq. ft., 1 k. 11 ch. 15 sq. ft., 1 k. 13 ch. 15 sq. ft. and 1 k. 14 ch. 30 sq. ft. respectively.

(3) Lots Nos. 10, 11, 12 and 13 on Sankar Bose Road, Ward No. 24, measuring about 6 k. 6 ch., 5 k. 4 ch., 5 k. 4 ch., and 7 k. respectively.

(4) Lot No 7 on the new 35 ft. road connecting Monsatala Lane and Pipe Road, Ward No. 25, measuring 5 k. 13 ch. approximately.

(5) Lots Nos. 7, 11 and 12 on Hussain Sha Road, Ward No. 25, measuring about 7 k 3 ch., 5 k. 12 ch. and 5 k. 12 ch. respectively.

(6) Plots Nos. A, B, C and D on Beerpara Lane, Ward No. 31, measuring about 5 k. 14 ch., 5 k. 3 ch., 4 k. 14 ch. and 4 k. 9 ch. respectively.

R. SINHA,
Chief Valuer and Surveyor.

Central Municipal Office,

MARKET NOTICES.

1. It is recommended that coolies should be paid at the following rates :—
10 Minutes—Two pice. ½ Hour—One anna. 1 Hour—Two annas.
Every succeeding hour or part of an hour—One anna.

2. Coolies for carrying bazar purchases are obtainable at all the principal entrances and care should be taken that only coolies bearing number badges are engaged. For the current half-year "A" class coolies have been allowed a Khaki coat with Red numbers on a Blue Black badge. "B" class coolies of Hogg Market have Rectangular brass number badges. Entally Market licensed coolies have Semi-circular brass arm badges.

3. Any complaints about coolies should be made at the Superintendent's Office, giving the number of the cooly.

4. All complaints relating to the conduct of vendors should be made to the Superintendent. No action can be taken where the articles in dispute have been removed from the shop premises or in regard to transactions which are not brought to the notice of the Superintendent at the time of occurrence.

5. To avoid conflicts of statements both as regards the goods purchased and the nature of the sales, customers are requested to insist on getting a voucher, as far as practicable.

6. If goods are taken "on approval, customers are recommended to obtain a voucher to that effect stating the price paid.

7. Any articles lost or found in the market should be reported at the Superintendent's Office.

8. No dogs, bicycles, tricycles or perambulators are allowed inside the market.

9. For the convenience of the public a stand is provided at the south-west corner where the visitors can keep their bicycles in charge of the lessee thereof on payment of a fee of 0-1-0 for a Bicycle and 0-2-0 for Motor Cycle, the Corporation not having any liability in this connection.

10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market

12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop-keeper if any spurious coin is alleged to have been detected after they leave the shop.

Chronicle And Comment

Wanted A Correct Census

What is essentially real social work in which all sections and communities should in the right spirit of service actively co-operate with one another, has unfortunately been through political manipulations and subtle communal propaganda, mistaken as offering an occasion for advancing sordid communal ends. The Census as a purely scientific survey helps all the civilised nations of the world to-day to arrive at figures or statistical data calculated to supply materials for welfare schemes or national plans of reconstruction or for the direction of State policy in ways too numerous to detail. It is a scientific measure of national stock-taking and is intended to be conducted under no misdirected political influence or bias. But there has been a good deal of excitement and misunderstanding already among the politicians of our country, where so much unfortunately depends on the communal ratio; and charges and counter-charges have been made by the leaders of the two major communities against one another. As a contemporary rightly observes,—"The big idea is to swell the figures province by province of Moslems on the one hand, Hindus on the other. Each side frankly accuses the other of lying and trickery. Enumerators are attacked. Storms of suspicion and hate sweep the country." During the last Census ten years ago a similar atmosphere prevailed and an attempt was made by certain people to interfere with the collection of correct figures. Mr. Hutton, the then Census Commissioner of India referred in his report to the "excess of zeal on the part of all parties to register as many adherents as possible in view of the possibility of a communal franchise based on census figures." The situation to-day is no better, if not worse, for people have been taught to think and act on communal lines and there is a strong disposition towards the inflation of numbers. We must therefore appeal to all honest men with a broad national outlook to exert their very best towards obtaining a correct census and through it a picture of the country as near to reality as possible.

The Menace Of Spurious Drugs

Thanks to the opportunities created by the War, many drugs which were formerly imported from England are now being manufactured in India and it is encouraging to learn that though much in the nature of making a virtue of necessity, the Director-General of the Indian Medical Service has placed orders for some of these drugs with Indian manufacturers. Production in India of high-class medicines which have been able to compete with those imported from abroad, has not been rare even in peace times, and the quality of [illegible]

products being quite unimpeachable, market was found in other countries for a good quantity of them. With a widening field and increasing potentialities before our Drugs trade, which even at its best may yet be said to be passing through its period of trials and ordeals, it is now extremely distressing to learn about fraudulent manufactures here and there. The use of chalk as a substitute for quinine by 'non-ethical and fraudulent manufacturers' in Bengal and other provinces has, we are told, come to the notice of the Public Health Department of Bengal, which on examination of the different samples of quinine sold in the markets, found several of them containing no quinine at all. It is stated that such cheap substitutes, which have no medicinal value at all, are being utilised at present owing to the shortage of importation of quinine from Java as also to a rise in its price. So that is the background for this unheard of specimen of dishonesty and fraud; but as the enormity of this offence—which is an offence against the State and injures the reputation and prospects of the National trade beyond redemption—cannot be looked at with equanimity, these vile offenders against society must be ferreted out and given the highest punishment allowed by law.

Prayers For Alderman Subhas Bose

We whole-heartedly associate ourselves with the appeal for individual or collective prayers in private places, mosques, temples and churches for the safety, sound health and peace of mind and success of the noble mission of the man who had so deeply woven himself into the texture of Indian public life with a passion for the well-being of this unhappy land and yet so mysteriously tore himself away with an amazing spirit of abandon—when, whither none could tell! The All-India Subhas Day on Sunday, the 23rd February next, comes to be observed none too soon, for no trace of Alderman Subhas C. Bose is yet available and no definite account is still forthcoming as to whether it is finally a case of renunciation or if he has been a victim of foul play. One and all, including even those who may differ from him politically, have been torn by an anxiety about the safety and welfare of this intensely lovable person, and it is well that an opportunity is to be given to the friends and admirers of Mr. Bose to join in the ceremonial offering of a mass prayer for his safety, strength of mind and success in his newly chosen line of service, wherever he may be.

Safety Maps for Overseas School Children

The trip from home to school and back again is undoubtedly a big daily adventure for the young scholar. To safeguard their early grade pupils, teachers and public officials of the Toledo Metropolitan area have provided each child in public and parochial schools with a school-route Safety Map, on which is drawn the way to school which entails the fewest traffic hazards and is the safest and most direct route. Each child receives his own map, which he studies with the assistance of a teacher who points out the dangerous street crossings to be avoided. Meanwhile, the police department co-operates by appealing to adults to set a good example to children in their own observance of traffic regulations. An extensive traffic-planning survey preceded the drafting of the maps, and as many as 86,250 of them have so far been distributed.

Late Sachindra Prasad Bose

We have to record with deep sorrow the death from intestinal hemorrhage due to high blood pressure of Mr. Sachindra Prasad Bose, patriot, orator and journalist on the 10th February last. With his death, it may be said, is snapped another link between the old and new generations of political and social workers and sufferers in Bengal, he being the last of the first batch of deportees from the province under Regulation III of 1818. One of the foremost powerful speakers of the Swadeshi days, he turned to business later on and to make the Bengalis business-minded he preached furiously and wrote with emphasis. Thorough-going in whatever he did, this man of strong convictions made many a good cause his own and he never shirked a fight when one was due. To the memory of this worthy friend and fellow citizen we offer our tribute of respectful homage, and to his illustrious widow, Mrs. Kumudini Bose, *ex*-Councillor of the Calcutta Corporation and other members of the bereaved family we send our sincerest sympathy and condolence.

Rai Bahadur Kumud Behari Mullick

The late Rai Bahadur Kumud Behari Mullick, whose brief life sketch appears elsewhere in this issue, lived well his active life of three score years and is for his lovable personality and his sterling qualities of head and heart to be missed for long long years to come. Born in a family which produced a number of men of distinction, he had in him the making of a capable officer and he made an officer, able, fair and just. The privilege of popularity denied often to those wielding power, was, however, given to him to enjoy in plenty and he was well known not only for the large amount of his private charities but also for his noble spirit of social service which made him work wherever he went and helped him to leave behind enduring marks of his various activities for the education and inspiration of the young as well as the relief of suffering humanity at large. Such indeed was the man overflowing with the genial current of his soul, and when at his death we convey to his bereaved family, specially to his brother Mr. Pulin Behari Mullick, Councillor of the Corporation, our heartfelt sympathy and condolence, we do so with the assurance that their loss and sorrow are shared by us as by countless admirers of the late Rai Bahadur all over the province.

Corporation 'Phone System Re-organised

Attention of all concerned is drawn to a notice published elsewhere about the re-organisation of the Telephone system of the Central Municipal Office including the Hogg Buildings and S. .S Hogg Market, Calcutta, which has just been completed. As the result of this reshuffle all independent connections except those of the Mayor and the Chief Executive Officer, have been brought under the Corporation private exchange renumbered as "CALCUTTA 6600"; which will operate during office hours. After office hours and on holidays 18 direct connections with the principal officers will work.

THE WEEK IN THE CORPORATION

A SHORT RECORD OF THE MORE IMPORTANT DECISIONS OF AND DISCUSSIONS AT THE CORPORATION MEETING FOR THE WEEK ENDING FEBRUARY 14, 1941

LEGISLATIVE ASSEMBLY LIBRARY

SPECIAL MEETING OF THE CORPORATION HELD ON MONDAY, THE 10TH FEBRUARY, 1941

Budget Estimates For 1941-42

The Chief Executive Officer laid on the table the Budget Estimates for the year 1941-42, including his proposals as to the total sum to be borrowed for capital works and for the repayment of loans, and the rates and taxes to be levied during the said year.

[The Budget Estimates submitted by the Chief Executive Officer will be published as a supplement to our next issue.]

Appointment Of Budget Special Committee

In taking up the item for appointment of a Special Committee to consider the Budget estimates for 1941-42, Mr. Naresh Nath Mookerjee enquired whether the Mayor was going to allow a discussion on the Chief Executive Officer's Budget Estimates.

The Mayor: The practice has been that the Chief Executive Officer's statement in connection with the Budget is taken as read, and then a Special Committee is appointed to consider the Budget, and when the Budget Committee's recommendations come up before them the House discuss the Budget.

Mr. Mohamad Rafique: Are we not entitled to give directions to the Budget Committee as to the lines on which they should proceed?

The Mayor: The practice has been that, but if you wish to discuss the Budget before the Committee actually begins to sit, I would like to ascertain the sense of the House and personally I shall be guided by the opinion of the House.

Mr. Naresh Nath Mookerjee said that it was difficult to embark on a general discussion of the Budget without first going through the Chief Executive Officer's statement.

The Mayor: As to that, another meeting may be called, if necessary, if the House wants to give directions to the Committee.

Mr. M. A. H. Ispahani: May I know the convention of the House in regard to this matter?

The Mayor said that the convention was that the Chief Executive Officer's statement was taken as read, a Committee was then appointed to go into the Budget in detail and make recommendations to the Corporation, and then when the Committee submitted its report, the House discussed the Budget as a whole.

Mr. Debendra Nath Mukherjee said that he was for giving specific directions to the Budget Committee to make adequate provision in the next year's Budget for the improvement of the various Wards. If there was no such direction from the House, the Budget Committee, he said, would go their own way.

Mr. B. N. Roy Chowdhury pointed out that any Councillor could table a motion before the Budget Committee for increased provision for improvement works in the different districts.

Mr. Naresh Nath Mookerjee then moved that a Special Committee consisting of 26 members be appointed to consider the Budget Estimates for 1941-42. He said that if they looked to the personnel of the Budget Committees for the previous years they would find that the Chairmen of all the Standing Committees would have to be included as well as some members who were not on any Committee at all. Seeing that all these important people would have to be included, a small Committee of six members only as they had last year, would not serve their purpose. In all previous years they had Committees whose numbers ranged from 16 to 30. This year the House had been enlarged considerably and he thought that a Committee of 26 members would not be at all unwieldy.

Mr. Indra Bhusan Leed seconded the proposal.

Mr. M. M. Burman said that it would, in his opinion, be much better to have a small committee which would be required to meet from day to day both morning and evening till the Budget has been finished and he moved as an amendment that the Budget Committee do consist of 12 members.

Mr. D. N. Ghosh seconded.

Mr. F. G. Watson said that at the instance of Mr. P. N. Brahma the number of members of the Budget Committee had been reduced last year to six only, and he thought that the innovation of having a small committee proved very helpful as they were able to get through the work in a much better manner. So he moved as an amendment that the Budget Committee this year also do consist of 6 members only.

Mr. W. A. Burns seconded.

Mr. Sudhir Kumar Chatterjee said that in the previous year there was almost a total lack of representation of Ward Councillors on the Budget Committee with the result that grants to Ward Health Associations and sundry urgent improvements in the various Wards were not provided for in the Budget. That was the reason why they were insisting that this year the elected representatives of the rate-payers should be given an adequate representation on the Budget Committee.

Mr. N. N. Dalal said that in previous years the election of members of the Budget Committee was governed by a salutary principle and that was that the Chairmen of all the Standing Committees, being in a better position to know the needs and requirements of their connected departments, should be on the Budget Committee. But apart from that the Budget should be discussed fairly and impartially by a Committee composed of members drawn from all sections of the House, and that being so, it was no use having a small Committee.

Mr. F. G. Watson's amendment that the Committee do consist of 6 members was then first put to the vote and declared lost.

Mr. M. M. Burman's amendment to the effect that the Committee do consist of 12 members was then put to the vote and also declared lost.

The original motion of Mr. Naresh Nath Mookerjee to the effect that the Committee do consist of 26 members was then put to the vote and declared carried.

Mr. Naresh Nath Mookerjee then proposed 26 names and moved for their acceptance as members of the Budget Special Committee.

Mr. Indra Bhusan Beed seconded his proposal.

In the course of a discussion that followed 7 other names were proposed by some other members as alternatives.

An agreed list was, however, obtained, and the Mayor declared the following 26 members to be duly elected as members of the Special Committee appointed to consider the Budget Estimates for the year 1941-42. :—

(1) Mr. P. B. Mullick, (2) Mr. W. A. Burns, (3) Mr. Hamoodur Rahman, (4) Mr. Syed Badrudduja, (5) Dr. Syed Zafar Ahmed, (6) Mr. M. A. H. Ispahani, (7) Mr. M. A. Jubbar, (8) Mr. B. N. Roy Chowdhury, (9) Mr. A. C. Das, (10) Mr. Md. Rafique, (11) Mr. K. C. Chakravarty, (12) Mr. N. N. Dalal, (13) Mr. S. C. Ray Chaudhuri, (14) Mr. P. K. Dutta, (15) Sir Hari Sanker Paul, (16) Mr. B. K. Banerjee, (17) Mr. P. N. Brahma, (18) Mr. A. S. Naskar, (19) Mr. S. K. Chatterjee, (20) Mr. Indra Bhusan Beed, (21) Mr. N. C. Chatterjee, (22) Mr. B. B. Sarcar, (23) Mr. Sudhansu Kumar Mitter, (24) Mr. Debjiban Banerjee, (25) Mr. Suresh Chandra Varma, and (26) Mr. S. A. Gray.

THIRTY-FIRST ORDINARY MEETING OF THE CORPORATION HELD ON WEDNESDAY, THE 12TH FEBRUARY, 1941

C. M. Debentures And Government Securities

Before the items on the agenda for the day were formally taken up the Mayor said that Mr. W. A. Burns, Chairman of the Finance Standing Committee was going to mention an important matter and he hoped members would give him a patient hearing.

Mr. Burns said that the Corporation held certain saleable securities. The Finance Committee had received certain offers, but they found difficulty in accepting those offers even if they were acceptable, because they had no such powers at present. In the past the practice had been for the Chief Accountant to make sales or purchases of such securities in the normal course of working and then report such cases to the Finance Committee and through them to the Corporation for final approval. He was particularly anxious not to say or imply anything in derogation of the very able Chief Accountant, but it seemed to him that it would be to the advantage of the Corporation if they thought fit to delegate powers in this behalf to the Finance Committee who ordinarily met at least once a week.

After some discussion it was resolved :—

That pending formal delegation of power to the Finance Committee to make purchases and sales of Corporation debentures and Government securities, the Corporation do authorise the Finance Committee as an emergency measure, to make such purchases and sales at prices which the Committee consider to be favourable to, and in the interest of, the Corporation under the present conditions

C. E. O.'s Appointment

Mr. M. A. H. Ispahani said that the Corporation gave certain directions to the Services Committee No. I regarding the appointment of the Chief Executive Officer and also enjoined that the Committee's recommendation should be placed before the Corporation by the 10th February, 1941. For various reasons the said Committee had not been able to present their recommendation to the House by the 10th February, but he assured them that the Committee would definitely submit their report by the 26th February, up to which date he asked for an extension of time, which the House granted.

Entally Workshops Enquiry Committee

Mr. Naresh Nath Mookerjee said that on the last occasion he asked for a fortnight's extension of time for the Entally Workshops Enquiry Committee to submit their report. The Corporation's direction to the Committee was to submit their report by the 15th January; but owing to holidays intervening the Committee could not make much headway. An *ad interim* report had since been drawn and would be coming up before the Corporation at its next meeting. He, therefore, asked for a week's extension of time which was granted.

Enquiry About Delay Over A Case

With regard to a motion by Mr. S. C. Varma for confirmation of a recommendation of the Roads and Bustees Standing Committee to have the report of the Bustee Surveyor on the delay in bringing up to the notice of the Corporation, an old case regarding the abandonment of the bustee road at No. 10 (now 8), Nil Madhab Sen Lane, recorded, the following resolution on the motion of Mr. D. J. Cohen, was accepted :—

(i) That a Special Committee consisting of six members be appointed to consider the specific question of apportioning responsibility for the delay in bringing the matter to the notice of the Corporation and to submit a report within a month.

(ii) That the Special Committee do consist of the following :—Mr. Susil Chandra Sen, Mr. S. K. Mitter, Mr. M. A. H. Ispahani, Mr. Syed Badrud duja, Mr. N. C. Chatterjee and Mr. D. J. Cohen.

Tenders For Straw At Gowkhana

With regard to a motion by Mr. Natal Charan Paul for confirmation of a [illegible] th

---

LATE MR. S. M. MOITRA

The death occurred in Calcutta on the 10th February last from heart failure of Mr. Surendra Mohan Moitra, M.L.A., Chairman, Rajshahi Municipality. Mr. Moitra was for sometime a member of the Working Committee of the All-India Congress and also an acting President of the Bengal Provincial Congress Committee.

Mr. Moitra took keen interest in municipal and local bodies and was recently elected as the general secretary of the Congress Party in the Bengal Legislative Assembly led by Mr. Sarat C. Bose.

As a mark of respect to his memory, both the Assembly and the Council were adjourned for the day.

Works Committee for acceptance of some tenders for the supply and delivery of straw at the different Municipal Gowkhanas for a year (January to December, 1941) Mr. Satish Chandra Bose pointed out with relevant details from the list of tenders, that no principles as such appeared to have been followed in distributing the tenders; and there were also material irregularities in some cases. So he moved as an amendment that the matter be referred back with directions to the Committee to send up their recommendations within a week.

Mr. Debendra Nath Mukherjee supported Mr. Bose saying that during consideration of the tenders things did not appear to have been looked at from the point of view of economy.

Mr. Mohamad Rafique opined in favour of accepting the lowest tenders or those near about them and sending back or discussing the remaining ones on the list.

Mr. Amulya C. Mitter opposed the idea of accepting the lowest tenders without examining the reliability of the parties concerned.

Mr. Susil C. Sen wondered how tenders with the highest rates came to be accepted.

More discussion followed, after which the amendment for reference back moved by Mr. Satish C. Bose was accepted.

Electric Installation At Palmer's Bridge Pumping Station

On the motion of Mr. Gokuldas Mohata seconded by Mr. Naresh Nath Mookerjee it was resolved on the basis of a recommendation of the Works Standing Committee—

That the revised estimate amounting to Rs. 15,040 for the whole work of electric installation at the Palmer's Bridge Pumping Station be sanctioned.

Amalgamation Of Certain Departments

Mr. Kshitish Chandra Chakravarty who had given notice of the following resolution, moved :—

That a Special Committee consisting of five members be appointed to formulate a scheme for the amalgamation of the following three Departments and for their reorganisation :—

(a) Building Department,
(b) Survey Department, and
(c) Bustee Department.

Note by the mover :—Considering the close relationship between the functions of the Building Department and those of the Surveyor's Department and Bustee Department, it is not only desirable but advisable that all these three Departments should be amalgamated into one. The provision of the Road alignments, Building lines etc., demands a good deal of careful thought for their right application by one officer, for the attainment of the Corporation's chief ideal of a city beautiful. Under the present system while the Building Department has been entrusted with the task of dealing with the plans submitted for the construction of huts, another department is dealing with the bustees and roads. The above three Departments and their respective functions are inter-allied and inter-dependent.

Mr. Satish Chandra Bose seconded the motion.

Mr. F. G. Watson moved as an amendment—

That consideration of the matter be postponed for 8 weeks for the Chief Executive Officer to submit a full report on the proposal in consultation with the Heads of the Departments concerned.

Mr. K. C. Chakravarty accepted the amendment which was carried.

CORPORATION TELEPHONE SYSTEM

Re-organization And Re-numbering Of Main Connections

Mr. M. Ray, Assistant Secretary, Corporation of Calcutta has in his Circular No. 160 of 1940-41, notified as follows :—

The re-organisation of the Telephone System of the Central Municipal Office including the Hogg Buildings and S. S. Hogg Market, has now been completed. All independent connections, except those of the Mayor and the Chief Executive Officer, have been recovered and have been brought under our private exchange renumbered as "CALCUTTA 6600". During office hours, all connections in the Central Municipal Office, Hogg Buildings and S. S. Hogg Market can now be obtained only through our Central Exchange (Calcutta 6600). After office hours and on holidays, there will be 18 direct connections to principal Officers as in the list below. The old numbers (shown in Column 3) should be avoided and the new numbers (shown in Column 1) should be asked for in future.

NIGHT CONNECTIONS.

New Numbers.	*Instrument.*	*Old Number.*
6600	Councillors' Room	4600
6601	Secretary (Office)	6240
6602	Asstt. Secretary	6240
6603	Health Officer	4602
6604	Executive Engineer, Water Works	4604
6605	Collector	4605
6606	Chief Accountant	4606
6607	Press Supdt. (Office)	6981
6608	Chief Engineer	192
6609	Dy Ex Officer I	2709
6610	Dy. Ex. Officer II	792
6611	Ch. Law Officer	5819
6612	Lighting Supdt.	2123
6613	D. E. III	2238
6614	S. S. Hogg Market	585
6615	Converter Station	599
6616	Press Supdt (Residence)	3577
6617	Secretary (Residence)	4251

THE A. R. P. IN CALCUTTA

Proposed Black-out From Sun-set To Sun-rise

Calcutta is to have a black-out from sun-set to sun-rise next time. The exact date has not yet been fixed but it is probable it will be during the last week of the current month and on Thursday, February 27.

The A. R. P. arrangements for the city and the industrial area round about it are going to be further strengthened and perfected and the whole A. R. P. force will have to undergo an exercise on February, 19 for half an hour in the morning.

In order that the citizens may have all the facilities to be A. R. P.-minded gramaphone records in Bengali, Hindi and English will be played in the cinemas, from Government propaganda vans and popular restaurants, tea-stalls in the city and at big social gatherings.

It is quite possible, says a report, that at the next A. R. P. demonstration at Howrah to be held on Monday, February, 17, genuine incendiary bombs will be used and the A. R. P. personnel will be getting opportunities of handling them

Late Rai Kumud Behari Mullick Bahadur

RAJ Bahadur Kumud Behari Mullick, retired Deputy Magistrate, died in his own house at 6, Valmeek Street, Calcutta, on the 26th January, 1941. The late Rai Bahadur was a man of regular habits and kept a very good health even after retirement from active Government service about 3 years ago. Unfortunately he had a sudden stroke of apoplexy on the 18th January and was immediately placed under his medical advisers who felt that he might recover; but he had a second attack on the 25th January to which he succumbed the day following.

LATE RAI KUMUD BEHARI MULLICK BAHADUR

He was born in about 1882 in a village in the Bagerhat Sub-division in the district of Khulna in a fairly well-to-do family and his parents did all they could to give him a fair and liberal education. He passed his Entrance Examination from the Bagerhat H. E. School and his First Examination in Arts from the Ripon College, Calcutta. He took his B. A. Degree from the Duff College in 1906. After taking his Degree he joined the Law classes of the Metropolitan Institution and when he was about to go up for the Degree Examination in Law he was appointed a Deputy Magistrate in the Bengal Civil Service in January, 1908. Besides his work in the general line he was in charge of Settlement work under Mr. Sachse at Susung Durgapur in Mymensingh, where officers like Mr. Fawcus, Mr. (later on, Justice) Edgley were placed under him for settlement training. As a Magistrate he was always courteous, fair and just. From 1917 to 1932 he was in charge of 5 different Sub-divisions. As Sub-divisional Officer of Feni he succeeded in establishing a first-grade college there, and naturally the people of that Sub-division still hold him in high esteem. As Sub-divisional Officer of Balurghat in 1925 he had to deal with the terrible famine conditions prevailing there, and his services were highly appreciated by Lord Lytton and his Government. As Sub-divisional Officer of Barisal and Uluberia he had to deal very tactfully with difficult political situations. As an *ex-officio* member of the District Board of Howrah and as also the Sub-divisional Officer of Uluberia he succeeded in sinking a large number of tube-wells throughout the whole sub-division where he is still known as the "giver of Water." As Sub-divisional Officer of Kalna he had the reputation of being able to put down oppression of big landlords over the poor. He sat on several occasions as a member of some tribunals to deal with political cases.

He was the first Deputy Magistrate from amongst those who are now called Scheduled Castes of Bengal, and was for his all-round abilities, looked upon as an ideal by the younger sections of those communities.

He retired from active service as a Deputy Magistrate in July 1937. In recognition of his services Government conferred upon him the title of Rai Bahadur on the 1st of January, 1938.

Immediately after retirement his services were requisitioned by the Government of Bengal and he acted as an Honorary Presidency Magistrate of Calcutta for some time. But as the Government of Bengal needed the services of some senior officers, they placed the cases of some retired members of the B. C. S. for consideration by the Public Services Commission and of the very few the Commission recommended to Government for re-appointment he was chosen as one of the fittest from all points of view and on re-appointment he was in charge of the Wards Estates in the district of 24-Perganas.

After his retirement from this appointment, the Revenue Department of the Government of Bengal requisitioned his services once again to take charge of the administration of Raja Ram Mohun Ray Wards Estate as its Manager. It is said that during the short period he was in charge of this Estate he was able to liquidate a large portion of its liabilities and to make suitable arrangements for its proper administration.

The late Rai Bahadur had six brothers, one of whom died very young and another late Mr. Nirode Behari Mullick, M.A., B.L., M.L.C., who was the first elected member from amongst the Scheduled Castes from Barisal South to the Bengal Legislative Council after the Montagu-Chemsford Reforms of 1921, died in 1934. His second brother, the Hon'ble Mr. M. B. Mullick is a Minister to the Government of Bengal. His third brother, Mr. Atul Behari Mullick is now a senior Munsif in the Bengal Judicial Service at Krishnagar. His fourth brother, Mr. Kshirode Behari Mullick is a member of the Bengal Civil Service and is now Sub-divisional Officer of Naogaon in the district of Rajshahi. His youngest brother, Mr. Pulin Behari Mullick, M.A., B.L., M.L.A., is an

Advocate of the High Court, Calcutta, Fellow of the Calcutta University and Councillor of the Calcutta Corporation.

Besides them he leaves behind him four sons and five daughters. His eldest son, Dr. Suprasanna Mullick took his final Degree from the Barts in London and has started a fair practice in that great city. His second son, Mr. Sukumar Mullick has just been appointed to the Indian Civil Service and is now under training at Dehra Dun. His third son, Mr. Sushil Kumar Mullick is shortly going up for the final Engineering Examination at Glasgow. His youngest son, Mr. Subodh Kumar Mullick took his M.A. Degree in July last and is going up for the B.L. Degree.

As an officer under Government at various places he had a large amount of private charities distributed irrespective of caste, colour or creed, not only among the students of different educational institutions but also the poor who came for such help.

With marked qualities of head and heart the Rai Bahadur thus lived a life of great utility to society, and is sure to be remembered by generations to be born.

Mob Attack On City Police

Tear-Gas Used To Disperse Aggressive Crowds

A SERIOUS disturbance took place in Calcutta on Monday, the 10th February, when an excited Muslim mob attacked the Tram depot at Rajabazar in Upper Circular Road, following the arrest by the police early that morning of about 70 Muslims from the Saheb Bagan *bustees* in Narkeldanga area.

These arrests were made by the police on a charge of riotous behaviour on the last day of Muharrum (Saturday) when processionists carrying big banners and *tajias* demanded removal of overhead wires of the newly constructed Tramway's extension on Upper Circular Road off Rajabazar Tram depot.

Excited by these arrests, the mob twice attacked the Rajabazar Tram Depot, pelted stones and brickbats at tram cars, held a demonstration in front of the Beleghata Police Station where the arrested men had been taken and attacked some Hindu shops in Mowlali.

When the mob gathered in front of the Rajabazar Tram Depot for the second time with a threatening attitude, Hon'ble Sir Nazimuddin, Home Minister, who had gone to the place, reasoned with them and tried to pacify the mob. The appeal did not seem to have its desired effect when the police resorted to a *lathi* charge with a view to disperse the mob.

Lathi charge failing to disperse the crowd which had assumed a menacing attitude, the police fired six rounds of gas cartridges, which resulted in the dispersal of the mob.

More than fifty persons including about 16 Tramway employees, half a dozen sergeants, a dozen constables, besides a number of Muslims and Hindu passers-by, were injured as a result of the disturbance which continued for about six hours, the area affected extending from Rajabazar to Mowlali along the Circular Road.

Following the disturbance, almost all the shops in Circular Road from Rajabazar to Mowlali remained closed. Tramway service in Rajabazar and Burra Bazar sections was suspended for the rest of the day.

An adjournment motion seeking to discuss the incidents was ruled out of order by the Hon'ble Speaker in the Bengal Legislative Assembly on Tuesday evening.

Premier's Statement

A similar adjournment motion was sought to be moved in the Upper House (Council) on Wednesday, the 12th February, which was opposed by the Hon'ble Chief Minister, Mr. A. K. Fazlul Huq, who made the following statement as regards the actual facts :—

"In the afternoon of the 8th February last a number of *tajias* were passing through the Circular Road with unusually long poles which were obstructed by the tramway wires and the *tajiawalas* could not proceed further. They demanded that the wires should be cut. It was somewhat unusual because it has never occurred before. It so happened that in the course of the altercations that were taking place a large number of persons, apart from those who had taken part in the procession, assembled on the spot. The police tried to argue with and urged them to move to one side but they would not listen to any request. The situation was then such that the police had either to use force or to adopt some other means to meet the wishes of the *tajiawalas*. The use of force then perhaps would have meant nothing less than a slaughter; hundreds of persons would have been injured or killed. The police, therefore, thought that the best way to deal with the situation was to cut the tramway wires and allow the *tajias* to proceed. This was done and beyon the fact that *tajiawalas* were delayed nothing happened on that day.

"Cases under Section 143 and also under the Police Act for obstruction were started against persons who insisted on having the wires cut. No arrests were made on the spot on the 8th February, because the *tajias* were continuing to come. On Sunday no action was taken because it was decided to arrest these persons after identification on Monday morning. These persons live in *bustees* and go out in the early morning for work. Therefore, it was necessary to arrest them in the early hours of the morning. It is not correct that the arrests were made at 3 a.m. or 4 a.m.; the arrests were made at day-break. There were a number of police officers when the arrests were made. The arrests were made not indiscriminately but on the identification of police constables. I may mention that these indentifications were made by Moslem constables and under the supervision of the Moslem superior officers. After these arrests were made they were taken to the thana and they were subsequently released on bail. Nothing happened till 10 or 11 in the morning when angry crowds began to collect in the streets.

"The men were released on bail. Their demand was complied with. As a matter of fact, when the arrests were made the women folk began to cry and they were told by the police officers that nothing much would happen, and that they would be allowed to be released on bail. I may mention here that wild charges that huts were broken into, women were molested were made. I am authorized to say that all these are absolutely untrue and I may also add that I have had it from certain members of this House and of the lower House who had been on the spot to make investigation that the allegation that women had been molested is absolutely untrue and that no huts were broken into. As a matter of fact the arrests were made as people were coming out of their houses and only those who were properly identified were arrested.

"At about noon when we were in office we received information that people had collected at the Rajabazar tram depot and were obstructing tram cars, hurling stones and indiscriminately assaulting people. The Hon'ble Home Minister, the Hon'ble Finance Minister and myself accompanied by the Commissioner of Police and other persons went to Mowlali where I met a crowd. They listened to me and dispersed. We then moved on to Rajabazar and when we came near the Calcutta Medical School we were met by a number of persons brandishing *lathis*, shouting slogans and throwing stones, in fact they surrounded my car.

"I got out of my car and wanted to speak to them. But I was received with a fussilade of stones. I came back to my car. Stones were thrown at my car and it was an accident that I did not get stones on my head. I went home. Since I came away I had personally no knowledge of what took place later. But I was told that in some places the crowd were unruly; when Sir Nazimuddin was speaking to them stones were thrown there from all sides. And *lathi* charge had to be made to disperse the crowd.

"May I mention here that as a result of the fracas between the police and the mob, on the side of the police in the North District 24 policemen including two Deputy Commissioners, one Assistant Commissioner, two Sergeants and 18 tramway employees including 1 Assistant Traffic Superintendent were injured. On the side of the mob at Rajabazar area 9 persons were injured,—1 Hindu and 8 Moslems. Three were admitted to the Campbell Hospital and others were dressed and discharged. It is evident that the police suffered heavily. I can bear testimony to the fact that during the time I was there the mob behaved in an unruly manner and the police dealt with them with extreme patience.

"The whole affair is under investigation. I can assure my Hon'ble friends that I am looking into the matter myself and if I find that there is any excess on the part of the police or even the shadow of the charge of excess of the police can be substantiated I know how to do my duty. If my friends are satisfied with that and in view of the fact that this matter is still under investigation I hope my friends will not press for an adjournment motion."

The motion for adjournment was disallowed as being out of order.

KULTI OUTFALL SCHEME

Notice

Re : Construction of a silt trap at Kulti

Quotations are invited and will be received by the undersigned upto Thursday, the 20th February, 1941, for constructing a silt trap at Kulti.

Full particulars should be had from the office on any working day. The successful tenderer must deposit a cash security of Rs. 50 to the Corporation Treasury through this Department and must complete the work in all its details within one month.

A. N. BANERJEE.
Outfall Engineer.

Central Municipal Office,
The 13th February, 1941.

Re : Supplying and erecting standard cross section pillars on the banks of the Kulti river

Quotations are invited and will be received by the undersigned upto 2 p.m. of Thursday, the 20th February, 1941, for supplying and erecting standard cross section pillars on the banks of the Kulti river within a period not exceeding two months.

Intending tenderers should call at this office on any working day for other particulars. The successful tenderer must deposit a cash security of Rs. 50 to the Corporation Treasury through this department.

A. N. BANERJEE.
Outfall Engineer.

Central Municipal Office,
The 13th February, 1941.

TRADE LICENSE FEE FROM INSURANCE AGENTS

Demand For Relief

A deputation on behalf of the Indian Insurance Institute and the Indian Insurance Companies' Field Workers' Association waited on the Mayor of Calcutta on the 12th February, to lay before him the grievances of the Insurance Agents working within the jurisdiction of Calcutta Corporation on account of the Trade License fee recently levied upon them *viz.*, Rs. 25 per Agent. The Chief Executive Officer, Mr. J. C. Mukerjea, the Secretary, Mr. B. Mukerji and the License Officer, Mr. S. Ghosal took an active part in the discussion. The deputationists pressed for exemption from tax with regard to Agents earning less than Rs. 300 per year and imposition of tax on others on a sliding scale from Rs. 2 to Rs. 25. The Mayor gave sympathetic hearing and in consultation with the aforesaid officers agreed to give adequate relief wherever possible. The members of the deputation were assured that though their demands might not be met in full, the tax would be substantially reduced with regard to Agents having small income. He requested the deputationists to submit a Memorandum enumerating the points already discussed.

The deputation consisted of Mr. S. C. Ray, President, Indian Insurance Institute, Mr. J. C. Ghosh Dastidar, President, Indian Insurance Companies' Field Workers' Association. Messrs. S. N. Roy Chowdhuri, S. Bagchi, H. C. Naug, A. K. Ganguly and Mr. Q. Zaman.

Are You Heading For Stomach Ulcer?

[By Sir W. Arbuthnot Lane, Bt., C.B., *Consulting Editor, New Health*]

THERE are two main forms of dyspepsia not associated with any gross structural change in the component tissues of the stomach. One is dependent upon inadequate secretion of the gastric digestive juice, atonic dyspepsia, and the other acid dyspepsia, is dependent upon an excess of the secretion.

These are both functional disorders of digestion, in contrast to organic disease of the stomach such as gastric catarrh or gastritis. Both are exceedingly prevalent, and account for the largest proportion of stomach sufferers. In the present article I shall deal with the acid type of dyspepsia, its causes symptoms, prevention and management. I shall also demonstrate its relationship to that common complaint, gastric and duodenal ulcer.

"25—35's" Suffer

Acid dyspepsia is most often complained of by young adults from about twenty-five to thirty-five years of age. Not infrequently they are of the athletic type, men and women who have indulged in energetic sports, but whose circumstances or increase of years have led to an abandonment of such recreation. Very often such people are also of a nervous or highly strung temperament, given to worry and anxiety. Acid dyspepsia is immediately dependent upon an excess of hydrochloric acid in the gastric juice. This acid plays an essential part in stomach digestion, but if too much is secreted it is likely in time to upset the digestive process and cause unpleasant symptoms.

Recent investigations suggest there is a type of individual who is *constitutionally* prone to excessive secretion of hydrochloric acid. Such individuals have abnormally sensitive nervous systems and have difficulty in meeting the strains and stress of life. Prolonged mental or physical overwork and depressing emotional experiences readily precipitate an attack of acid dyspepsia in those persons. Most of such victims date the onset of their symptoms to some peculiarly harassing episode in their lives.

Much-abused Stomach

At the same time ordinary errors of digestive hygiene must be taken into account. No organ in the body is more easily abused than the stomach. To-day there are temptations on all sides to eat unsuitable foods. We eat in a hurry, fail to masticate sufficiently, and artificially stimulate our appetites with numerous condiments. Leisure and peace over a meal are almost a thing of the past. We think, work or divert our minds with a radio programme instead of attending to the business of eating. We are certainly most unfair to our digestions. Moreover, there are the ill-effects of constipation, which reflexly can excite an excessive secretion of acid in the stomach. Constipation also induces mechanical alterations in the structure of the digestive canal, and these have an important bearing on the production of gastric and duodenal ulcers.

"Burning" Pain In Stomach

Now, the characteristic symptom of acid dyspepsia is a burning pain in the stomach which comes on from one to two hours after taking a meal. This pain may be very severe, and may lead to emptying of the stomach with immediate relief. Some people will find that the eating of more food, especially protein, will alleviate the discomfort. Often there are acid eructations, while waterbrash is commonly associated. This latter symptom is caused by the swallowing of an excess of saliva and its regurgitation into the mouth. As a rule there is not much flatulence—a point of which differentiates this type of acid dyspepsia from the atonic variety, in which organic acids arise as a result of fermentation taking place in the stomach.

Worry And Pain

Nearly always in acid dyspepsia the appetite is quite good; in fact, often the desire for food is unusually keen. The tongue is clean and does not suggest any stomach disturbance. Constipation in some degree is nearly always present, and this is one of the factors which tends to perpetuate the condition. Once established acid dyspepsia may persist for long periods—unless active steps are taken for its relief. Phases of quiescence are followed by attacks of pain and discomfort, these frequently coinciding with some worry or overwork.

As to the control and management of acid dyspepsia, certain simple measures of relief are available. For the immediate relief of the burning sensation in the stomach alkalies are indicated. Twenty to forty grains of sodium carbonate will be wonderfully efficacious provided the condition is a true acid dyspepsia. In fact, the remarkable efficacy of sodium bicarbonate is a corroborative point in the diagnosis of this disorder. To enhance its effect sodium sulphate and sodium phosphate are often combined with the bicarbonate. It is generally advised that the powder should not be taken as such, but should first be dissolved in water.
